About Conestoga Wood Specialties

Since 1964 Conestoga Wood Specialties has manufactured the highest quality cabinet doors and components for the Kitchen & Bath Industry. From our modest beginnings in a small garage in Lancaster County, Pennsylvania, we’ve grown to be the industry leader known for our consistent quality, breadth of selection and product performance.

While our roots run deep in producing finely crafted wood components, we’ve never stopped looking for “what’s next”, relentlessly searching for new designs, materials, accessories and services to assist our customers in keeping up with developing design trends. While predominantly known for our work with wood, Conestoga repeatedly steps outside our historic comfort zone to capitalize on developments in technologies and materials. We’ve routinely traveled to Europe to establish supplier relationships and explore revolutionary new materials such as Decorative Laminate Veneers and high textured Thermally Fused Laminates. We work with some of the world leaders in alternative sheet stock and make huge investments in inventories to help bring these products to our customers. Our latest Alternative Material investments included multiple High Gloss materials and Super Matte films…and our search continues.

Our commitment is not only to provide our customers with superior products, but to also monitor the market making every attempt to understand where it is heading; then doing our best to provide the products needed to allow customers to capitalize. Several years ago we anticipated the rise of painted finishes and aggressively promoted hybrid doors and introduced 5-Piece MDF doors well before they became widely accepted by the industry. Shortly after, we launched the Prism Paints Program, bringing over 1,500 paint colors and several treatment options to our standard finish offerings. Today, these programs continue to thrive and remain cornerstones of our custom product offering.

And while we’ve experienced a myriad of changes, our company has stayed true to its roots, continuing to produce thousands of wood doors, drawer boxes, front frames, mouldings and other components each day. Still a family owned business, we are committed to servicing the Custom, OEM and RTA Cabinet Systems Kitchen & Bath segments. With a proud history approaching 60 years, we remain dedicated to the principles that elevated Conestoga to the top of the kitchen component industry while understanding that we must be receptive to new ideas and agile enough to successfully institute them in order to stay relevant, and allow our customers to stay at the forefront of the custom kitchen market.

But most of all, we have never forgotten that relationships are built one delivery at a time.

Conestoga Cabinet Systems

Conestoga’s framed Cabinet Systems Program significantly reduces the amount of labor needed to construct custom kitchens. Combining quality, variety, flexibility and cost savings, the more than 1,500 SKUs greatly reduces the need to hire labor in both the shop and finishing areas of your operations. The all plywood box also offers soft close drawer glides and hinges along with a number of optional enhancements. These options allow customization of each kitchen to meet the specific needs of nearly any consumer. Choose from more than 100 Conestoga door and drawer front designs in four overlays as well as an inset option. To further reduce labor needs, our Cabinet Systems can be ordered in thousands of standard paint, stain and glaze combinations to provide the perfect finishing touch.

Variety

With over a hundred standard configurations and almost limitless sizing options, the Cabinet Systems Program provides everything you need to design and build a broad variety of cabinetry for kitchens, baths and other room applications. From walls, bases, utilities, appliance, vanity and specialty cabinetry, this expansive collection, combined over 100 door design options, allows cabinet manufacturers to meet nearly every design need.

Design Flexibility

While strong, stable construction is critical, another important feature is the appearance of the face of the cabinetry. Whether designing and building a kitchen that is modern, transitional or traditional, Conestoga’s vast door and drawer front offering allows you to alter the look and feel of each and every project. Choose from 1/4”, 1/2”, 1-1/4” and 1-3/8” overlays, or the popular inset option.

• Program Doors – For more price sensitive projects, Conestoga has made our top selling CRP-10 and TW-10 designs available in a Value grade material specification for Cherry and Red Oak. While using the same high quality construction methods as our Standard grade doors, our Value grade allows more character and color variation.

• Custom Doors – Choose from the over 100 door and drawer front designs found in Conestoga’s Custom Product Manual. Most designs offer a variety of framing beads, panel raises, edge profiles and custom width framing options, allowing customers to create an almost limitless variety of custom looks. Custom product pricing and lead-times apply.

Customization

• Custom Sizing – In addition to the broad selection of standard cabinet configurations, Conestoga offers size customization for nearly every cabinet design. Custom sizing can accommodate width, height and even depth requirements in most cases. Cabinets with drawers are limited to drawer glide hardware lengths.

• Custom Finishing – Our finished component program allows customers to order individual cabinet parts finished to match the doors and drawer fronts. Simply assemble the prefinished component parts and you’re ready to install.

Conestoga Cabinet Systems also offers options to enhance customers’ product offering, such as optional matching interiors, extended stiles, undermount soft close drawer slides, soft close hinges, exposed ends, flush ends, flush toe, shaped bottom rails, wood shelf upgrade and inset or overlay styles.
**Time and Cost Savings**

- **Complete Cabinet Systems Units** – Each cabinet unit comes with all the pre-machined parts, drawer slides, shelf supports and doors needed to build a complete cabinet. Most parts are packaged together per unit and ready to assemble. Blum and Economy soft close overlay hinges are optional.

- **Ease of Assembly** – Dovetailed construction and pre-inserted assembly splines make assembly fast and easy. Due to this combination of joinery, assembly clamps are not needed. Complete Assembly Instructions featuring all Cabinet Systems configurations are available by simply checking the Assembly Instructions box on Order Form 7/7-A or by answering "yes" to Assembly Instructions on Con-Nex.

- **Streamline Manufacturing** – Complete ready-to-assemble units minimize the time required to order, schedule, receive and handle materials. With prefinished cabinet interiors, shelves and drawer boxes, time is saved, bottlenecks reduced and VOC emissions lowered within your shop.

- **Prefinished Components** – Components come standard with a durable UV clear coat on the interior of plywood end panels, tops, bottoms, shelving and backs. Conestoga also offers our premier stains, glazes and paints on cabinet exteriors including face frames, doors, drawer fronts, end panels and toe kick strips. When the matching interior option is selected, the interior components come unfinished or finished to order.

- **Lower Costs** – The pre-machined, prefinished cabinet components greatly reduces the time needed to manufacture complete kitchens. This simplified system allows utilization of lower cost labor for cabinet assembly, minimizing your labor cost per box and freeing highly skilled labor to focus on more difficult projects.

- **Reduce Overhead Costs** – Overhead costs of shop equipment and floor space are reduced or eliminated by using the Cabinet Systems Program rather than building from scratch.

- **Improve Yields** – The cost of material and material yields are consistent when using the Cabinet Systems Program. Waste is practically eliminated.

- **Improved Cash Flow** – The Cabinet Systems Program can help improve cash flow with faster throughput, lower cost per unit and minimal or no inventory. Add sales revenue and capacity without large capital investments.

**Design and Assembly**

Conestoga’s precut and machined Cabinet Systems units are designed to assemble quickly and easily. Tools required include a rubber mallet, Phillips head screwdriver, and a pin gun (1/2” and 1-1/4” pins). **Woodworking glue must be applied to all joints.**

- Tops and bottoms slide into dovetailed grooves on the cabinet sides. Two 3” wide strips are used for the top of base cabinets. The back lays into rabbets on the cabinet sides and is secured with glue and pins/staples.

- Sides have pre-inserted splines which easily engage and lock cabinet sides to the front frame. A series of splines are pre-inserted into cabinet tops, bottoms and mid-floors to secure these components to the front frame while adhesives dry.

- 1/2” thick cabinet backs provide a secure surface area for installation screws. Backs are inset 1/4” in from the back edge of cabinet sides to account for irregularities in wall surfaces.

- **Reference assembly instructions.**
Cabinet Systems Packaging

Standard Box Packaging
• All Cabinet System units are individually boxed making it easier to move one cabinet at a time. Most parts for one unit are in the same box. Larger cabinets are packaged in multiple boxes for easier handling.
• Boxes are placed on skids, stretch wrapped and banded for shipping.
• Doors and drawer fronts are packaged separately from cabinet unit.
• Assembled drawer boxes, drawer slides, hinges and shelf rests are shipped on a separate skid from cabinet units.
• This packaging method will create a fair amount of cardboard boxes, inserts and plastic strapping to discard.

Skid Pack Packaging
• Skid pack packaging must be requested.
• Cabinet Systems units are packaged on a 44" x 54" skid with a sheet of cardboard separating each cabinet.
• The skid is reinforced with cardboard, stretch wrapped and prepared for shipping.
• All cabinets are individually labeled with cabinet code and size.
• Drawer boxes, drawer slides and hinges will be packaged separately.
• Custom doors, drawer fronts and front frames are shipped on a separate skid from cabinet units.
Cabinet Systems Packaging (continued)

Skid Pack Packaging (continued)

- Depending on order size and options, the entire order may be placed on the same skid.
- Approximately twenty cabinets can be placed on a skid.
- Adequate receiving facilities and handling equipment (loading dock, forklift, skid jack, etc.) must be provided. Product cannot be carried by hand off the skid during receiving process.
- Customers who pick up their orders must have a truck capable of accepting palletized products.
- A minimum of five cabinets is required for skid packaging.
- Customers using the skid pack packaging options will receive a $3.00 net discount per cabinet unit.
- With less labor needed to unpack cabinets, customers will experience considerable labor cost savings.
- With less cardboard boxes and plastic banding to discard, customers will have a significant decrease in waste disposal cost.

Handling & Packaging Upcharges

- Small order quantity charge:
  A $4.50 net charge will be included for small quantity orders containing 1 to 3 pieces. This charge is necessary to offset costs associated with processing, handling and packaging small quantity orders and will be assessed on all custom product orders, including expedites. Cabinet Systems orders and Cabinet Systems parts orders are exempt from this fee.

- Oversize packaging charge:
  Oversized products will be packaged using honeycomb cardboard to protect against shipping damage. A product will be considered oversized if it meets one of the following criteria:
  - Dimensions exceed 36” in width and 36” in length.
  - Dimensions exceed 84” in width or 84” in length.
  Each oversized product will incur a net charge of $26.95 per item for packaging. Customers requesting oversize packaging will also receive the $26.95 per piece net charge. Mouldings and Cabinet Systems parts will not be included in the oversize packaging program and are exempt from this fee.

Shipping Options and Methods

- Conestoga offers a wide variety of shipping methods, including our company-owned fleet trucks, common carriers and UPS Ground or FedEx Ground.
- Conestoga operates several daily and weekly route trucks to many parts of the Northeast, Southeast and Midwest. These route trucks are designed to deliver customer orders economically, reliably and damage free. This service provides a dependable daily or weekly arrival time at the customer’s site. If you are interested in using the Conestoga route truck service, contact your Conestoga Sales Representative for more information. This service is available on a limited basis. Several guidelines and restrictions apply.
  Restrictions include:
  - Delivery Routes – Conestoga has several established delivery routes to service areas that support high amounts of freight deliveries. Areas outside these established delivery networks may not contain the necessary volume needed for cost effective delivery service. Customers located outside established delivery routes will be serviced by select common carriers.
  - Purchase Quantities – we make every attempt to service high volume customers on Conestoga delivery equipment. Customers located in close proximity to larger customers that order on a frequent basis may be eligible for Conestoga truck deliveries. Customers ordering on an infrequent basis or not near established delivery routes will be serviced by select common carriers.
Shipping Options and Methods (continued)

- **Delivery Frequency** – Conestoga route trucks generally travel once per week to regions outside our local delivery areas unless the overall territory volume justifies multiple deliveries. Conestoga truck deliveries can be supplemented by common carrier if desired, however, common carrier deliveries will likely cost more than Conestoga deliveries.

- **Receiving Deliveries** – depending on the areas serviced, Conestoga will utilize either straight trucks with lift gates or tractor trailers. If located on a delivery route using tractor trailers, customer’s facilities must have a loading dock and lift equipment to handle pallets.

- **Residential/City Deliveries** – some customers in residential and city locations may have insufficient space for tractor trailers to safely maneuver. Even if volume and location warrants Conestoga truck delivery, there may be facilities we cannot deliver to based on insufficient delivery space.

- Common carriers are used to ship larger orders outside of our delivery routes, to lower volume customers or to regions more difficult to access. Conestoga has negotiated discounted rates with several carriers and will choose the most economical and timely carrier for your area.

- Customers’ facilities must be able to accommodate LTL shipments. A truck dock and skid-handling equipment are required in order to receive these shipments.

- FedEx Ground and UPS Ground are the primary shipping methods used to ship smaller orders and groups of orders totaling less than five packages.

- Expedited services are available via UPS Ground and FedEx Ground for products whose weight and size qualify. Any special air freight premiums are the responsibility of the customer. Contact your Customer Service Team with questions regarding your options when using these premium shipping services.

- Because all finishing materials are flammable, they are classified as Hazardous Materials by the shipping industry. Although limited quantities of finishing materials can be shipped by air, shipping charges are extremely expensive. Finishing materials shipped by common carrier require special handling designated by the shipping industry. Additional Hazmat charges will be assessed and are the responsibility of the customer, and will be added to your freight costs.

**Drawer Box and Cabinet Systems Orders**

- If you are located in the following states: AL, FL, GA, MS, NC, SC or TN your order will ship from our Kenly, NC facility. All others will ship from our East Earl, PA location.

- Expedites will ship direct from our Kenly, NC facility. These costs are the responsibility of the customer.
Customer Pick Up

- A 2.5% handling fee (min. $10.00 net) is added to all customer pick up orders due to staging, storage and double handling of the product. All customer pick ups must be scheduled through Customer Service at least four business hours prior to the desired pick up time. Customers picking up their own orders are asked to do so within three days of the acknowledged ship date.

- Customers are required to schedule a pick up time with Conestoga's Customer Service Department. Warehouse hours of operation are 7:00 a.m. - 3:30 p.m. (EST), Monday through Friday.

Damaged and Defective Product Policies

- Notify your Customer Service Representative within 12 business days after receipt of shipment if you receive products that are damaged, defective or in error. Submitted claims must include the following information:
  - Original order and invoice numbers.
  - A list of the defects or errors in the product(s).

- Returns of non-defective merchandise will not be accepted.

- Conestoga will ship replacements or missing items as soon as possible after a claim is reported. Replacement product(s) will be invoiced at the original product cost. A credit will be issued against the original Purchase Order once the claim has been investigated and the product has been deemed defective. In some instances Conestoga may require that the defective product be returned for inspection prior to a credit being issued, but this will not impact the lead-time of the replacement item.

- A copy of our Return Merchandise Authorization Form, supplied by your Customer Service Team, must accompany all returned merchandise.

Replacement Order Process

- Replacement orders will be processed as quickly as possible. See the Replacement Expedite Program Chart in the Lead-Time Section of this manual for details.

- All replacement orders will be processed according to the customer's normal payment terms. A credit will be issued against the original order for all replacement items.

Return Merchandise Authorization (RMA)

- Because our products are custom manufactured from natural materials, we will occasionally ask to have incorrect products returned for quality inspection. This inspection process is necessary to identify how the issue occurred and to improve our overall quality and delivery performance.

- Your Customer Service Representative will issue a Return Merchandise Authorization (RMA) form to you via e-mail, automated fax acknowledgement or mail. This RMA form will list the products that you have identified as defective. Please mark your return cartons and boxes with the RMA number listed on this form.

- All returned merchandise must be shipped with secure, protective packaging materials.

Freight Damage Claims

- In all situations, if a shipment contains a damaged package or skid, the freight bill must be marked “Damaged” or “Subject to Inspection”. Both the receiver and delivery person must sign the freight document. If the freight bill contains no notation of damage or appropriate signatures, the freight carrier will not honor the claim.

- Conestoga will process all claims for damaged products shipped on Conestoga's trucks.

- FedEx Ground and UPS Ground damage claims must be filed by Conestoga, and will be paid to Conestoga. All packaging materials and damaged product must be retained by the customer for inspection or collection by the carrier.

- Common carrier claims must be filed out by Conestoga with the appropriate freight carrier. Conestoga will replace damaged items with no expedite upcharges.

- Damage must be reported within 12 business days after receipt of product. Claims for damaged products after 12 days may be denied.
**Missing Product Claims**

- For missing product claims, Conestoga will initiate an investigation of the original shipment. The research will include our picking documents, skid listing and Bill of Lading. These documents will verify if the proper number of products were loaded on the delivery truck. The Bill of Lading will show proof of delivery or notations of any delivery or receipt issues.

- Based on the results of the investigation, Conestoga will either issue a credit to your account or notify you that your claim has been denied.

- Conestoga requests that customers verify the package count within 5 business days, and the total number of items and product sizes within 12 business days. Claims filed for missing products after 12 business days may be denied.

- If any portion of a shipment is lost, 3 business days must be given to locate it.

**Customer Receiving Process**

- For Conestoga route truck deliveries, Conestoga drivers will assist you in verifying that you have received all products listed on a skid report. The skid report documents each skid number and the number of packages on each skid. Any oversized or loose packages will also appear on the skid report. Your receiver will be asked to sign the skid ticket and Bill of Lading as verification that delivery of all packages listed has occurred.

**Warranty Information**

- Conestoga Wood Specialties Corporation warrants that, for a period of one year from date of shipment, our products will be reasonably free of defects in materials and workmanship. When properly handled, our products will conform, within acceptable tolerances, to applicable manufacturing specifications. This limited warranty applies only to Conestoga products which are stored, handled and installed properly. Conestoga will not be responsible or liable for any indirect, consequential or incidental damages or costs sustained by the user.

- Conestoga's warranty is limited solely to the value of the original materials purchased from Conestoga and is further limited in amount to the purchase price paid for such materials. Conestoga will not be liable for the cost of extraneous materials, labor, travel costs, installation expenses or other related expenditures.

- Conestoga will not be liable for damages to products caused by improper handling, storage, assembling, finishing or installation by the customer. Our products are not warranted against expansion occurring as a result of high moisture or humidity conditions.

- Natural characteristics in the wood (burls, grain patterns, pin knots, mineral deposits, sap, etc.) that fall within Conestoga's specifications will not be considered defects.

- Most wood species, particularly Cherry, will darken naturally with age. Conestoga is not liable for the change in appearance of any product, finished or unfinished, due to this aging process. Results of aging will be more obvious when using light colored or natural finishes.

- Mitered doors allow a .010" joint gap 1" from the inside bead.

- Mitered doors are not warranted against joint separations that occur as a result of high humidity or moisture conditions.

- Veneered panel doors are not guaranteed to match solid wood framing on the same door in either the raw or finished state.

- Solid wood moulding color may differ from doors of the same specie.

- Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These will not be considered defective. To eliminate the chance of stave offsets, Conestoga recommends utilizing an MDF panel option when using painted finishes.

- Vertical grain panels that exceed 22" wide by 43-15/16" high or horizontal grain panels that exceed 43-15/16" wide by 22" high in either single or multi-panel products are not warranted against expansion, warpage, cracking or open framing joints.
Warranty Information (continued)

- Conestoga will warrant 1-piece products against expansion, warpage or cracking if they are within the following parameters:
  - Product up to 12" wide and 21-15/16" high will be warranted if the expansion or warpage is greater than 1/8".
  - If the product measures between 12-1/16" to 22" in width, or 22" to 43-15/16" in height, it will be warranted if the expansion or warpage is greater than 1/4".
  - Any 1-piece product exceeding 22" in width or 43-15/16" in height will not be warranted.

- All solid wood 3-piece drawer fronts over 44" wide or 14" high are not warranted against expansion, warpage, cracking of panels or cracked joints.

- Conestoga expressly disclaims any and all other warranties, whether expressed or implied, including all warranties of merchantability and warranties of fitness for a particular purpose with respect to its products.

- Allowable tolerances of bow, warp or twist for single panel, multi-panel, frame only and mullion doors are as follows:
  - Single panel up to 26" wide and 48" high = 1/8".
  - Multi-panel up to 26" wide and 48-1/16" to 64-15/16" high = 1/4".
  - Multi-panel up to 26" wide and 65" to 83-15/16" high = 5/16".
  - Single panel, single opening frame only and mullion doors over 26" wide and 48" high will not be warranted (mullion lites not to be included in opening count).
  - Any door exceeding 26" wide or 83-15/16" high will not be warranted.

Finishing Warranty Information

- Conestoga's finishes carry a one year limited warranty against peeling, blistering or cracking, but no warranty against discoloration. Conestoga assumes no responsibility for damages or poor color match when finish is applied by the customer.

- Most wood species will naturally darken with age. Conestoga will not be held liable for the change in appearance of any product, finished or unfinished, due to this aging process.

- Conestoga recommends that a finished sample door be ordered prior to ordering any finished job. We do not suggest ordering large or complex finished product based on small sample swatches.

- Conestoga has established an acceptable range of color for finished products. Orders placed over an extended period of time may vary in color due to the natural aging of the finished substrate and slight variations from batch to batch in finish materials. These variations will not be considered defective and will not be warranted by Conestoga.

- Conestoga's finish materials are interior grade only and not intended for exterior use. Exposure to outdoor conditions will cause failure and will not be warranted.

- Due to the many variables involved in any finishing process, Conestoga assumes no responsibility if products stained by the customer using the DuraGuard System do not produce an exact match to prefinished products purchased from Conestoga.

- Painted or opaque finishes are not recommended on mitered designs. To reduce the chance of joint separation, Conestoga recommends using an MDF panel option with painted finishes.

- Veneers will absorb stain differently than solid wood. The mismatch of solid wood and veneers is not considered defective.

* See Custom Product Manual for additional information.

Overall order lead-time is determined by the item with the longest lead-time. Refer to our Custom Product Manual for lead-times and other ordering specifics on custom products.

General Lead-Time Information

- Lead-time scheduling may be delayed if order placement questions are encountered. Orders with questions will not be scheduled for production until all questions have been answered by the customer.

- Lead-times are based on normal business days, which excludes weekends, company holidays and non-workdays due to acts of nature. Lead-times do not include transportation time.

- Published lead-times are not guaranteed and can vary according to incoming order volume, material availability, capacity constraints, labor requirements and other factors.

- Following the order entry process, each order is scheduled and committed to a production schedule. This process is completed at the end of each day; assuming no questions are encountered, a ship date is assigned to the order. The ship date appears on the order acknowledgement and can be viewed on the CBP (Customer Business Portal).

- Orders containing products with different lead-times are given the ship date of the product with the longest lead-time. Customers wishing to split their orders and receive products when ready must note this on their order.

- When using the Conestoga route truck delivery service, lead-times will vary according to your truck’s delivery schedules. Consult your Customer Service Team with route truck questions and schedules.

- Large quantities, complex orders and products processed through our Special Designs Department may experience extended lead-times.

Order Timing

- All standard orders processed with open terms and received by 9:00 a.m. (EST) on a business day will have the lead-time begin that day. Orders received after 9:00 a.m. (EST) will have the lead-time begin the following day.

- 100% pre-pay orders will begin the manufacturing process one business day after receipt of payment. Lead-time calculations begin upon the receipt of payment, not receipt of order. Orders prepaid using American Express, Discover, MasterCard or Visa obtain faster approval.
Expedite Programs

- Conestoga’s expedite program is designed to aid our customers in emergency situations where product is needed to complete a job. The expedite program lead-time is based on available capacity.

- Expedite charges are based on the net amount of all products ordered before shipping, special handling and taxes are applied. Expedite charges are shown as a line item at the bottom of both the acknowledgement and invoice.

- Code Green expedites can only be used with Cabinet Systems orders. These expedites ship in 4-5 days, with a 35% upcharge. There is a six piece limit on Cabinet Systems Code Green expedite orders.

- Expedite orders received prior to 1:00 p.m. (EST) will be eligible to go into production the same day. Any expedite order received after 1:00 p.m. (EST) will be eligible to go into production the following day.

- The expedite lead-time for a custom door ordered with Cabinet Systems products will be based on the door design.

- Orders containing products with different lead-times will be given the lead-time date of the longest product.

- Finished products can be expedited. To calculate the lead-time take the product expedite lead-time and add the standard finishing lead-time.

- All expedite upcharges are calculated on a “percentage of the order” basis. More detailed information can be found within the relevant lead-time charts.

- Every item on an expedited purchase order will be subject to the upcharge. To expedite only a few items, separate those items onto a different purchase order.

- For additional information regarding our expedite programs, see the Lead-Times Section of the Custom Product Manual.

Replacement Program Lead-Time

- Products incorrectly produced by Conestoga will be replaced with no expedite upcharges.

- Customer replacement orders must contain products that were previously ordered. The preferred method of documentation is to submit the original order acknowledgement with hand-written revisions.

- Individual products damaged or incorrectly ordered by the customer will be replaced as a Code Red expedite with no upcharge.

- Entire orders damaged or incorrectly ordered by the customer will be replaced as a Code Blue expedite in approximately half the standard lead-time with no upcharge.

- Cabinet Systems products damaged or incorrectly ordered by the customer will be replaced as a Code Green expedite with no upcharge.

All Plywood Construction

- **Front Frames:** 3/4" thick solid wood with 1-1/2" wide stiles and rails unless otherwise specified. Blind mortise and tenon joints. Non-standard configurations must be ordered as custom fronts.

- **Cabinet Sides:** 1/2" thick plywood with prefinished Natural Birch veneer on one side.

- **Cabinet Tops:** 1/2" thick plywood with prefinished Natural Birch veneer on one side. Most base cabinets, have open tops with two 1/2" thick by 3" deep plywood support strips running across the full width of the cabinet in the front and back. Sink and Vanity Sink cabinets have cut back support strips that run front to back to ease sink installation. Some Specialty cabinets have full tops.

- **Cabinet Bottoms and Backs:** 1/2" thick plywood with prefinished Natural Birch veneer on one side.

- **Shelves:** 3/4" thick Natural Birch plywood with a banded front edge. Both sides of shelves are finished with a UV clear coat. Shelf height adjustable in 32mm increments. Plywood shelves are standard and can be upgraded to a solid Birch wood shelf.

- **Drawer Boxes:** English dovetail construction. 5/8" thick solid wood with eased top edge. 1/4" thick bottoms standard; 3/8" thick bottoms and additional drawer box options available at an upcharge. Drawer boxes are finished with a UV clear coat.

- **Toeboard Backers:** 1/2" thick plywood with prefinished Natural Birch veneer on both sides. Designed to fully enclose toe space and provide support for applied, finished toe boards.

- **Toeboard Strips:** Available in 4" high x 8' long x 1/2" thick plywood strips in Cherry, Hard Maple or Red Oak.

- **Prefinished Interior:** Clear finished interiors are standard. Clear finish is on interior of backs, tops, bottoms and sides. If you wish to finish the interior cabinet surfaces order Matching Specie Interior Option.

- **Matching Specie Interior:** Matching Specie Interior cabinets are unfinished. Drawer box parts and solid wood shelf upgrades do not apply.

**Custom Size Cabinet Program**

Conestoga's custom size Cabinet Systems Program allows customers to simplify their manufacturing and ordering processes by eliminating the need to modify stock size cabinets and parts to achieve non-standard sizes. Ordering custom size cabinets reduces the amount of time spent calculating part sizes, eliminates additional machining of parts, reduces the chances for error throughout the entire process and allows customers to order a complete cabinet – including doors and drawer boxes – with minimal effort.

- Most custom size cabinets are available with widths, heights and depths in 1/16" increments. Cabinets with drawer boxes are limited to 12", 15", 18", 21", 24", 27" and 30" depths to correspond with drawer slide hardware.

- Standard Cabinet Systems options are available with custom sized cabinets with some exceptions. See individual cabinet offering for specific size ranges and options per cabinet.

- Door and drawer front overlays will follow standard overlay rules as outlined in the Doors/Drawer Fronts Section.

- Standard cabinets less than 24" wide will receive one door. Standard cabinets over 24" wide will receive 2 doors. Custom cabinets 24" wide are available with either single or butt doors and must be specified.

- Shelf depths in custom cabinets typically will be 2" less than the overall cabinet depth. Exceptions include:
  - Cabinets from 20-1/16" to 24" deep have 18" deep shelves.
  - Cabinets from 24-1/16" to 30" deep have 21" deep shelves.

- Shelves over 18" in depth, double entry and some specialty cabinet shelves not available with wood shelf upgrade.
Custom Size Cabinet Program (continued)

- Custom size cabinet code is listed after stock size cabinet code in header bar.

**B/CSB - Base**

- When ordering custom sized cabinets, the corresponding custom sized cabinet code must be entered on the Cabinet Systems Order Form along with the width, height and depth of the cabinet. Do not order using standard cabinet nomenclature and add a note to adjust to a custom size.

- Online users should also provide the applicable custom sized cabinet code along with the width, height and depth of the cabinet.

Accessory Specifications

- **Lazy Susan**: White molded plastic, independently rotating shelves.

- **Wood Susan**: Prefinished Maple plywood susan with durable laminated wooden edge. Designed for use without a center pole. Ring bearings are included per susan.

- **Drawer Slides**
  - **Undermount Full Extension – Blum TANDEM plus BLUMOTION**: Soft close zinc coated steel and self-closing with rear mount screw-in bracket. 100 lb. dynamic load capacity.
  - **Side Mount – Full Extension Ball Bearing**: Chrome plated steel ball bearing slide for 12-1/2” deep wall cabinets and POT’s only. 75 lb. dynamic load capacity.

- **Hinges**
  - **Blum**: Nickel plated concealed hinges for inset, 1/2”, 1-1/4” and 1-3/8” overlays with integrated soft close feature. 170° corner cabinet hinges are not available with the soft close feature.
  - **Shelf Rests**: Brass plated 5mm diameter metal shelf rests.
  - **Pie Cut Soss Hinge**: Polished brass colored Soss hinge option available on Base Lazy Susan and Wall Corner Pie Cut cabinets only. Routing for Soss hinges are spaced 18” apart and entered on the edge of the door. This rout will be the same for all cabinet heights and overlays. Maximum door height is 42”.
  - **Tambour Door Track**: Spring tension track system with opening control similar to a window shade. Tambour door is a balanced construction veneer core to prevent warping.

Cabinet Systems accessories subject to change. Replacement items will maintain similar specifications.
Program Specie Specifications

- **Cherry and Red Oak**: Value grade doors and Standard grade front frames – panels may vary slightly in color but will be similar. Panels and framing may contain areas of sapwood. Light to medium color is acceptable. Mineral and pin knots may be present. Framing color may vary from panel.

- **Hard Maple**: Standard grade doors and front frames – panels are matched for color. Minor shade variations are acceptable. Mineral, pin knots and curly grain may be present. Framing color may vary from panel, but is similar. Heartwood may appear in profiled areas. Premium grade is available, upcharge applies.

*Cherry and Red Oak doors are also available in Standard and Premium grade, upcharges apply.

- **Soft Maple**: Standard grade doors and front frames – panels are matched for color. Minor shade variations with light gray and blue are acceptable. Mineral and pin knots may be present. Framing color may vary from panel, but is similar. Heartwood may appear in profiled areas. Not available in Premium grade.

Specie and Grade Characteristics (Doors, Drawer Fronts and Front Frames)

**Why Have Different Grades?**

Conestoga has developed different grades of material to utilize our natural resources to the fullest. These distinct material grades have been established, allowing you to choose the best alternative for a particular job or finish.

**Premium Grade**

Conestoga’s Premium grade has been developed for those jobs where a more uniform look is needed. This grade contains less of the natural material characteristics and is produced within a more uniform color range.

Premium orders will be matched to obtain a look that is as uniform as possible. However, since each board is different, there may be slight differences in appearance and color between pieces. Premium products will contain fewer and smaller mineral streaks and pin knots than “Standard” grade. A Premium grade order will give you a job that is consistent throughout for color and material characteristics.

In Heartwood species, such as Cherry or Red Oak, no sapwood will be seen on the front of the door; in Sapwood species, such as Hard Maple, no heartwood will be seen on the front of the door.

Conestoga recommends Premium grade for natural and light tinted finishes.

Hickory is an exception to our normal Premium grade guidelines in that the color variations and lack of uniformity are a characteristic of Hickory. A Premium grade of this specie will include a narrower range of variation and fewer natural characteristics, but will not be uniform in heartwood or sapwood color.
Specie and Grade Characteristics (continued)

**Standard Grade**

Conestoga's Standard grade has been developed to meet a wide variety of applications and will provide a very versatile product at a reasonable cost. Standard grade material allows for many of the natural characteristics of the wood to be present in the product while limiting or eliminating the most objectionable. This material grade allows Conestoga to utilize as much of the natural resource as possible while still producing a product that meets the needs of our customers.

Even though each board has its own unique color and grain, staves will be matched for a pleasing appearance. Colors will be blended within each door. Character marks such as pin knots and mineral streaks are limited in size.

In Heartwood species, such as Cherry or Red Oak, the amount of sapwood that is present on the face of a door is limited and will only be present in the profiled areas. Sapwood species, such as Hard Maple, limit heartwood to the machined areas.

Conestoga utilizes steamed Walnut. The steaming process turns light colored sap to grey. Conestoga's Standard grade Walnut allows a mix of heartwood and grey sapwood throughout both the face and profiled areas of the product. This grade is recommended for medium and dark finishes on Walnut. If no sap is desired, order Premium grade Walnut which eliminates all sap from the face.

Standard grade works well with most finishes. Light tinted and clear finishes will accentuate the natural characteristics and color differences within the product. Two or more sample doors should be ordered and finished prior to ordering an entire kitchen.

**Value Grade**

Conestoga's Value grade material has been developed as an alternative price point product for medium and darker finishes and is only available in Cherry or Red Oak. This grade improves utilization of natural resources by allowing more color variation and other natural characteristics than our Standard grade.

While each board has its own individual appearance in color and grain pattern, staves will be moderately matched for color. Sapwood may be present on the face. Character marks such as pin knots and mineral streaks, although limited in size and amount, will be more prevalent and numerous than in Standard grade.

This grade works very well with most medium to dark finishes. Light tinted and natural finishes will accentuate the natural color differences within the product. Two or more sample doors should be ordered and finished prior to ordering an entire kitchen.

**Paint Grade Hard Maple**

Conestoga's Paint Grade Hard Maple was developed specifically for those customers that prefer to use only Hard Maple components for paint applications. This grade will allow natural color range of Hard Maple including stain heartwood and mineral. Products made from this grade will not be matched for color, with heartwood and sapwood present in varying amounts. Knots, wormholes and other defects that would cause voids are limited, providing a smooth paintable surface. This grade is intended for painting only and is also available with an MDF panel option.

**Other Grade Options**

Conestoga offers a variety of other wood grades including Rustic Knotty Cherry, Rustic Knotty Hard Maple and Rustic Knotty Red Oak as well as Paint Grade Hard Maple and Quarter Sawn Red Oak. For painted kitchens Conestoga recommends Paint Grade Hard Maple Hybrid, or 1-piece and 5-piece MDF products. See Specifications, Section 3 in the Custom Product Manual for details about these offerings.

Inset Door and Drawer Information

- Front frames ordered with inset doors and drawer fronts will be pre-fit to the opening size. A 3/32" margin will be used on all sides for single doors and drawer fronts and between butt door pairs.

- Inset doors and drawer fronts are not subject to Program door pricing and will be priced as Custom doors.

- The following edge profile options are recommended for use with inset doors and drawer fronts. These edges have a 5 degree back bevel edge to ensure sufficient door clearance. Machine Edge is available upon request at no additional upcharge.

**Standard Lip Options**

| L-253 | L-686 |

**Design Exceptions**

- The following door and drawer front styles are not available due to their unique design characteristics: 1-1/8" Sandwich drawer front, #10 drawer front, 10141 drawer front, Alexandreia, Aspen, Astoria, Aurora, Boulder, Brighton, CRP-1420, CRP-10191, CRP-10318, CRP10334, CRP-10827, CRP10875, CRP-10946, Fairhaven, Fargo, Hastings, Keystone drawer front, LaSalle, Marcel drawer front, Omaha, Prestige, Rothbury, Rothsford, Savoy, Topeka, TW-10827, TW-10875, Wellston and Woodridge.

- Alternative Material doors and drawer fronts are not available for inset applications including Allure DLV, Intrigue TTS, Strata TTS, Vogue TTS, Synchronicity High Gloss and Super Matte products, and Aluminum Frame doors.

- The following standard edge profile options are available for inset applications: L-253 and L-686. Premium edge profiles: L-304 and L-996 upcharge applies.

- Front frame openings with trimmable inserts are not available beaded.

- Inset and beaded front frames that are ordered with Colourtone and glazes will receive the same hand glazed finishes as doors. Case parts will not receive a hand wiped glaze. Cabinet Systems parts that are ordered with select Colourtone and glaze combinations will be finished with Colourtones that have been tinted to match one of the select Colourtone and glaze combination*. Some options, such as Heirloom and Brushed glazes that are available on inset and beaded front frames are not available on Cabinet Systems case parts.

- **Miter/Inset Combination Not Recommended.** Miter doors and drawer fronts are not recommended for inset applications for the following reasons:
  - Miter joint lines may not intersect door corner after pre-fit sanding. Not considered a defect by Conestoga, this condition may not be visually pleasing to some customers.
  - Panel expansion caused by high humidity may cause miter doors to bind inside frame openings. Although Conestoga’s miter door joint construction is one of the industry’s most durable, high humidity will cause panel expansion. The resulting pressure can push the mitered door framing outward and bind against the front frame.
  - If a miter design is necessary, Conestoga recommends specifying a plywood or MDF center panel. To reduce expansion see applicable specifications in the Custom Products Manual.
  - For complete inset and beaded front frame information see the Specialty Products Section in the Custom Product Manual.

*See Section 12 Finishing Program for select Colourtone and glaze combinations.

### WRC3/CSWRC3 – Wall w/ 3 Sided Recessed Back

**Custom Size Ranges**
- **Width:** 24” – 36”
- **Height:** 12” – 48”
- **Depth:** 12” – 27”

- Designed to accommodate and conceal ductwork, electric or plumbing supply lines.
- Front panel is removable for installation and access to supply lines.
- To customize recess size and location, specify A, B and C.
- Recess can be centered or offset from either side.
- Minimum dimensions for A, B and C: 2”.
- Maximum dimensions for A and B: Cabinet width minus A + B equal to or greater than 2”.
- Maximum dimension for C: Cabinet depth minus 2”.
- No shelves.
- Specify single or butt doors on custom size cabinets 24” wide.

WCSELS – Wall Corner Single Entry with Lazy Susan

Custom Size Ranges

- Width: 24", 27"
- Height: 30" - 72"
- Depth: 24", 27"

- Cabinet top and bottom is pre-drilled to accept hub assembly. Location and installation are greatly simplified.
- Cabinet includes 18" diameter entry level plastic susan with two independently rotating shelves mounted on a center pole.
- White susan shelves feature a self-lubricating nylon bearing and tool-free height adjustment.
- Size customization is not available due to susan size constraints.
- WCSELS24 has 12-1/2" deep sides.
- WCSELS27 has 15-1/2" deep sides.
- When ordered in 1-1/4" and 1-3/8" overlay applications (with or without hinges), cabinets will have their door sized as 1/2" overlay in width only to ensure adequate clearance.
- Not available with inset applications.

- **36" High**
  - WCP2436
  - WCP2736

- **42" High**
  - WCP2442
  - WCP2742

- WCP24 units have 12-1/2" deep sides.
- WCP27 units have 15-1/2" deep sides.
- When hinges are ordered in 1-1/4" and 1-3/8" overlay applications, cabinets will have their doors sized as 1/2" overlay in width only to ensure proper clearance.
- If hinges are not specified, 1-1/4" and 1-3/8" overlay sizing rules apply. These overlays require adequate clearance for door functionality between corner and adjacent cabinets. Use filler or extended stiles accordingly.
- CSWCP available with custom size legs. Specify width (left dimension) and depth (right dimension). Side depth remains fixed; front frame pie cut opening adjusts as size changes.
- Wood shelf upgrade not available with CSWCP.
- Shelf mounted wood susan shelves are available. See Section 10 – Accessories.
- Optional Soss hinges available.
- 24" – 36" high has two shelves.
- 36-1/16" – 48" high has three shelves.
- 48-1/16" – 60" high has four shelves.
- 60-1/16" – 72" high has five shelves.
WCPLS/CSWCPLS – Wall Corner Lazy Susan

- Cabinet top and bottom is pre-drilled to accept hub assembly. Location and installation are greatly simplified.
- Cabinet includes entry level plastic susan with two independently rotating kidney shelves mounted on a center pole.
- White susan shelves feature a self-lubricating nylon bearing and tool-free height adjustment.
- WCPLS24 has 12-1/2” deep sides and 18” diameter susan shelves.
- WCPLS27 has 15-1/2” deep sides and 24” diameter susan shelves.
- Height customization is not available due to susan unit size constraints.
- When hinges are ordered in 1-1/4” and 1-3/8” overlay applications, cabinets will have their door sized as 1/2” overlay in width only.
- If hinges are not specified, 1-1/4” and 1-3/8” overlay sizing rules apply. These overlays require adequate clearance for door functionality between corner and adjacent cabinets. Use filler or extended stiles accordingly.
- Not available with inset applications.
- Optional Soss hinges available.

TTWCSE/CSTTWCE - Two Tiered Wall Corner Single Entry

Custom Size Ranges
Width: 24", 27"
Height: 48" – 72"
Depth: 24", 27"

- When height changes, lower opening height changes. Upper opening height fixed at 16”.
- TTWCSE24 units have 12-1/2" deep sides.
- TTWCSE27 units have 15-1/2" deep sides.
- Susan option is not available.
- When ordered in 1-1/4" and 1-3/8" overlay applications (with or without hinges), cabinets will have their doors sized as 1/2" overlay in width only to ensure adequate clearance.
- Lower section designed to align with adjacent wall cabinets. Add 18” to adjacent cabinet to determine TTW cabinet height.
- 48” – 60” high has two shelves.
- 60-1/16” – 72” high has three shelves.

TTWCP/CSTTWC - Two Tiered Wall Corner Pie Cut

Custom Size Ranges
Width: 24", 27"
Height: 48" – 72"
Depth: 24", 27"

- When height changes, lower opening height changes. Upper opening height fixed at 16”.
- TTWCP24 units have 12-1/2" deep sides.
- TTWCP27 units have 15-1/2" deep sides.
- Susan option is not available.
- When hinges are ordered in 1-1/4" and 1-3/8" overlay applications, cabinets will have their doors sized as 1/2" overlay in width only.
- If hinges are not specified, 1-1/4" and 1-3/8" overlay sizing rules apply. These overlays require adequate clearance for door functionality between corner and adjacent cabinets. Use filler or extended stiles accordingly.
- Lower section designed to align with adjacent wall cabinets. Add 18” to adjacent cabinet to determine TTW cabinet height.
- 48” – 60” high has two shelves.
- 60-1/16” – 72” high has three shelves.

- **Preconfigured units include Blum HK-XS Series lift system hardware and Blum COMPACT hinges.**
- **Door weight and design determine the strength and quantity of lift mechanisms provided.**
- **Cabinet width 15" – 24" are single panel door designs. 24-1/16" – 36" are two panels side by side. Upcharges for 2 panel door apply.**
- **Rabbeted edge profiles and inset/prefit options are not available.**
- **12" – 18" high has no shelves.**
- **18-1/16" – 24" high has one shelf.**
CSWCO - Wall Case Only

Custom Size Ranges
- Width: 9" – 48"
- Height: 12" – 120"
- Depth: 5-1/2" – 30"

- Customizable cabinet case for custom wall and tall applications.
- Use Conestoga's online ordering system, Con-Nex or contact Customer Service for pricing of case only.
- No front frame included – case only. Order custom size front frame and doors.
- Sides are machined with shelf holes.
- Loose fixed floor kits are sized to fit between sides. Plywood cleats included to mount floors as needed behind front frame openings. Floors include pre-inserted splines.
- Matching specie interior is not available over 96" high. Natural Birch UV material will be used.
- Custom quantities of fixed floor kits are available. Specify the quantity per cabinet.
- 12" – 18" high has no shelves.
- 18-1/16" – 24" high has one shelf.
- 24-1/16" – 36" high has two shelves.
- 36-1/16" – 48" high has three shelves.
- 48-1/16" – 59-15/16" high has four shelves.
- 60" – 72-15/16" high has five shelves.
- 73" – 84-15/16" high has six shelves.
- 85" – 90-15/16" high has seven shelves.
- 91" – 96-15/16" high has eight shelves.
- 97" – 108-15/16" high has nine shelves.
- 109" – 120" high has 10 shelves.

Custom Size Ranges
- Width: 33” – 42”
- Height: 31-1/2” – 42”
- Depth: 33” – 42”

- Plywood shelf standard; wood shelf upgrade available on BCP3634.5 only.
- Shelf mounted wood susan shelves are available. See Section 10 – Accessories.
- CSBCP available with custom size legs. Specified width (left dimension) and depth (right dimension). Side dimension remains fixed; front frame pie cut opening adjusts as size changes.
- Minimum entry opening width required for BCP3634.5 is 35” (doorways, hallways etc.).
- When hinges are ordered in 1-1/4” and 1-3/8” overlay applications, cabinets will have their door sized as 1/2” overlay in width only.
- If hinges are not specified, 1-1/4” and 1-3/8” overlay sizing rules apply. These overlays require adequate clearance for door functionality between corner and adjacent cabinets. Use filler or extended stiles accordingly.
- Optional Soss hinges available.

BCP3D/CSBCP3D – Base Corner Pie Cut Three Drawer

Custom Size Ranges
Width: 39", 42"
Height: 31-1/2" – 34-1/2"
Depth: 39", 42"

- 1-1/4" and 1-3/8" overlay applications will have their drawer fronts sized as 1/2" overlay in width only.
- Not available with inset applications.
- Not available with miter drawer front.
- Cabinet includes corner drawer boxes with back extensions.
- Each drawer front comes as two separate pieces using edge profile L151 (45 degrees) standard to form the mitered inside corner.
- 5-piece drawer fronts, one stile on each will be 3/4" wider on the mitered edge to form the inside corner. Wide framing upcharges will apply.
- Exterior edge profiles can be specified to match adjacent cabinetry.
- Customizable in height only.
- When height changes, lower opening height changes. Upper and middle opening heights fixed at 5" and 8".
- Separate 4" high toe platform is standard to aid in passing through doorways.
- Minimum entry opening with width required is 35" (doorways, hallways, etc.).

- BRT4D4834.5

**BUCM/CSBUCM - Base Under Counter Microwave**

Custom Size Ranges
Width: 24" – 36"
Height: 31-1/2" – 42"
Depth: 12", 15", 18", 21", 24", 27", 30"

- For 34-1/2" high cabinets, top opening height is 15-3/4".
- When height changes, upper opening height changes. Lower opening height fixed at 10-1/4".

**Options Key:**
- EXP = Exposed End(s)
- FL = Flush End(s)
- FUE = Flush Unexposed End(s)
- SS = Shaped Side
- PFD = Prep for False Door
- EXT = Extended Stile(s)
- FT = Flush Toe
- SBR = Shaped Bottom Rail
- LE = Leg Extension
- TSS = Toe Space Side
- OS = Omit Shelving
- NSH = No Shelf Holes
- WS = Solid Wood Shelves
- MI = Matching Interior
- DT = Dust Top
- NB = Natural Finished Bottom

**BUCM Codes:***
- BUCM2434.5
- BUCM2734.5
- BUCM3034.5
**BIUCM/CSBIUCM - Built-In Under Counter Microwave**

Custom Size Ranges
- Width: 24” – 36”
- Height: 31-1/2” – 42”
- Depth: 12”, 15”, 18”, 21”, 24”, 27”, 30”

- Microwave opening is 13” high, width is 6” less than cabinet width.
- Microwave opening is trimmable up to 5” in height and 3” in width.
- For 34-1/2” high cabinets, top opening height is 13”.
- When height changes, upper opening height changes. Lower opening height fixed at 8”.

### BDE/CSBDE - Base Double Entry w/Butt Doors

**Custom Size Ranges**
- **Width:** 24” – 36”
- **Height:** 31-1/2” – 42”
- **Depth:** 12”, 15”, 18”, 21”, 24”, 27”, 30”

- One false drawer front on one side, functional top drawer on opposite side.
- When height changes, lower opening height changes. Drawer height fixed at 5”.
- Specify single or butt doors on custom size cabinets 24” wide.

**Options Key:**
- EX = Exposed End(s)
- FL = Flush End(s)
- FUE = Flush Unexposed End(s)
- SS = Shaped Side
- PFD = Prep for False Door
- FT = Flush Toe
- SBR = Shaped Bottom Rail
- LE = Leg Extension
- TSS = Toe Space Side
- OS = Omit Shelving
- NSH = No Shelf Holes
- WS = Solid Wood Shelves
- MI = Matching Interior

</thead>
</table>

### Custom Size Ranges

- **Width:** 30" – 39"
- **Height:** 84" – 120"
- **Depth:** 24" – 30"

- Preconfigured units include HK-XS Series lift system hardware and Blum COMPACT hinges.
- Door weight and design determine the strength and quantity of lift mechanisms provided.
- Cabinet width 15" – 24" are single panel door designs. 24-1/16" – 36" are two panels side by side. Upcharges for 2 panel door applies.
- Rabbeted edge profiles and inset/prefit options are not available.
- Middle numbers in the cabinet code refer to the height of the wall cabinet (example: RTLHKXS331284 has a 12" high upper cabinet).
- Matching specie interior is not available over 96" high. Natural Birch UV material will be used.
- When ordering custom size refrigerator cabinets specify top cabinet opening height.
- 12" – 18" high upper cabinet has no shelves.
- 18-1/16" – 24" high upper cabinet has one shelf.
### RTL/CSRTLCS - Refrigerator Tall Left w/Center Stile

**Custom Size Ranges**
- **Width:** 30” – 48”
- **Height:** 84” – 120”
- **Depth:** 24” – 30”

- Middle numbers in the cabinet code refer to the height of the wall cabinet (example: RTB331284 has a 12” high upper cabinet).
- Matching specie interior is not available over 96” high. Natural Birch UV material will be used.
- When ordering custom size refrigerator cabinets specify top cabinet opening height and lower appliance opening.
- 21” – 24” high upper cabinets have one shelf.
- 24-1/16” – 27” high upper cabinet has two shelves.

CSCO - Case Only

Custom Size Ranges
Width: 12" – 48"
Height: 10" – 120"
Depth: 5-1/2" – 30"

- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.
- Customizable cabinet case for custom base and tall applications.
- No front frame included – case only. Order custom size front frame, shelves, doors, drawer fronts and drawer boxes separately.
- Sides are machined with shelf holes.
- Loose fixed floor kits are sized to fit between sides. Plywood cleats included to mount floors as needed behind front frame openings. Floors include pre-inserted splines. Specify quantity of fixed floor kits per cabinet.
- Matching specie interior is not available over 96" high. Natural Birch UV material will be used.
- Custom quantities of fixed floor kits are available. Specify the quantity per cabinet.
- 12" – 18" high has no shelves.
- 18-1/16" – 24" high has one shelf.
- 24-1/16" – 36" high has two shelves.
- 36-1/16" – 48" high has three shelves.
- 48-1/16" – 59-15/16" high has four shelves.
- 60" – 72-15/16" high has five shelves.
- 73" – 84-15/16" high has six shelves.
- 85" – 90-15/16" high has seven shelves.
- 91" – 96-15/16" high has eight shelves.
- 97" – 108-15/16" high has nine shelves.
- 109" – 120" high has 10 shelves.

CSCONH - Case Only No Shelf Holes

Custom Size Ranges
Width: 12" – 48"

Height: 34-1/2" only  
Depth: 12-1/2" – 30"

- 3/4" matching specie plywood with dowel construction.  
- Exposed edges are banded with matching specie veneer.  
- Hard Maple plywood used for Hard and Soft Maple lines.  
- 30" high has five openings.  
- 36" high has six openings.  
- 42" high has seven openings.  
- 11-3/4" interior depth. When ordered deeper than 12-1/2" sides extend past back.

Pull-Out Trays

- Pull-Out Tray (POT) system includes corner cleats and dovetail trays.
- Provides tool-free location change of Pull-Out Trays.
- Adjustable pull-out system features unfinished Soft Maple installation components.
- Boxes are 2" high and available for 21" or 24" deep base, vanity or tall cabinets.
- All POT kits available sized for inset (1-1/2" less in drawer box width) to allow for door clearance with non-mortise hinges. Also can be used in cabinets adjacent to a wall or a tall cabinet where doors may not open fully for additional clearance. Add “I” to the end of the POT code for inset sizing. Example: POT21524-I.
- Pricing: per POT system.

<table>
<thead>

</tr>
</tbody>
</table>

On the Cabinet Systems Order Form, enter the desired Pull-Out Tray code number in the column “Conestoga Cabinet Code #”. This Pull-Out Tray must match the width, depth and door configuration of the cabinet it is to be installed in.

Example of Pull-Out Tray code number:

```
POT1 15 24
```

Pull-Out Tray
One drawer
For base or vanity cabinet with one Pull-Out Tray per opening.

For a 15" wide cabinet
A POT11521 would be a 21" deep unit.

For a 24" deep cabinet
For a 24" deep cabinet

Add “I” to the end of the POT code for inset sizing. Example: POT21524-I.

* Indicates availability in both 8' and 12' lengths - Cherry, Hard Maple and Paint Grade Hard Maple only.

See Section 9 of Custom Manual for pricing, specie availability and dimensioned drawings.
Size is nominal. Actual 8' length will vary between 94" to 97".
When ordering Reversible Shaker Crown 1529 and Reversible Frieze 345 specify Face A or Face B.
Finished mouldings will have Face and Edges finished. An option to finish Face & Back can be specified - upcharge applies.
### Standard Lazy Susan Shelves

- White plastic susan with two independently rotating shelves mounted on a center pole.
- Shelves feature self lubricating nylon bearing and tool-free height adjustment.
- When standard lazy susan selves are ordered, cabinet interior shelves are automatically omitted.
- See individual cabinet sections for standard lazy susan upgrade pricing.

### Wood Lazy Susan Shelves

- Wood susans are designed to be installed onto adjustable shelves and cabinet floors.
- Pricing includes susan and mounting ring bearing only, cabinet shelves not included.
- No center pole is required.
- Sold individually and packaged with a center mounted ring bearing.
- All susans are prefinished with clear topcoat; unfinished units are not available.
- 1/2" thick Maple plywood with a 1-1/2" high laminated edge.

Pull-Out Storage Units

Base Units
- All base storage units 23” deep and 30” high.

Pull-Out Storage Units are designed for 3” or 6” spaces between cabinets and can be accessed from both sides.
- Storage units are fully assembled and packaged with installation instructions.
- Wall and base storage units include adjustable shelves with chrome rails and full-extension ball bearing sides.
- Prefinished Natural Birch only; unfinished units are not available.
- Drawer fronts and overlay fillers are not included and must be ordered separately.

Wall Units
- Available in 30”, 36” and 42” high.
- All wall storage units 11-1/8” deep.

Pull-Out Storage Unit Installed
- Mount Pull-Out Storage Units to adjacent cabinets.

Wall Units
- Available in 30”, 36” and 42” high.
- All wall storage units 11-1/8” deep.
1/4" plywood strips in Cherry, Hard Maple and Red Oak are available in common wall depths x 96" long.

Diagonal corner wall panels are available for WCS, WCSLS and TTWCSE cabinets.

When attached to the underside of wall cabinets, these panels provide flush finished bottoms.

Use B11 Light Rail to cover exposed plywood edges.

For best results attaching B11 at end of run applications, order flush ends.

End Skins - Program Species

- Use end skins when exposed or flush ends are necessary.
- End skins are 1/4" thick veneer core with sound backs. Face species are Plain Sliced B grade veneers.
- End skins are available finished or unfinished and will be sent separately from the cabinets. See Finishing Program Section for finish pricing.
- When installed, 1/4" end skins provide a nearly flush end and need to be installed using adhesive.
- To calculate end skins for most cabinets: width = cabinet depth minus 3/4" length = overall cabinet height
- To order, specify end skin, specie, width and height.

<table>
<thead>
<tr>
<th>1/4&quot; End Skins - Program Species</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specie</td>
</tr>
<tr>
<td>Cherry</td>
</tr>
<tr>
<td>Red Oak</td>
</tr>
<tr>
<td>Hard Maple</td>
</tr>
</tbody>
</table>

Non-Standard Specie Option for Cabinet Systems

- End skins are 1/4" thick plywood with MDF core with matching specie face and back. Most species are Plain Sliced A faces with 1" backs except Red and White Birch which are rotary cut face and back.
- Species other than the standard program (Cherry, Hard Maple, Red Oak and Soft Maple) are available using custom specie front frames and pre-cut matching specie end skins for cabinet sides.
- End skins are available finished or unfinished and will be sent separately from the cabinets. See Solid Wood Finishing Section 9 in the Custom Product Manual for finish pricing.
- When installed, 1/4" end skins provide a nearly flush end and need to be installed using adhesive.
- Matching specie interior components are not available for non-standard species.
- Conestoga's online software Con-Nex, will calculate pre-cut end skins for visible cabinet ends based on the cabinet size. Specify left, right or both sides that require end skins.

*MDF end skins are for painted applications. Face frames are not available in MDF and a specie and grade must be specified. Paint Grade Hard Maple (PGHM) is recommended.

**Custom face frames are not available in Knotty Pine. Frames are constructed using Clear Pine.
CSFFK – Loose Fixed Floor Kit

- Use Loose Fixed Floor Kits to horizontally segment almost any cabinet. Order cabinet without a front frame and order custom front frame as required.
- Loose Fixed Floor Kits are sized to fit between sides. Plywood cleats included to mount floors as needed behind front frame openings. Floors include pre-inserted spines.
- To order specify CSFFK and the cabinet width and depth. Conestoga calculates the kit dimension based on the cabinet interior dimension.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

- Option incorporates one of four valance designs on exposed or flush ends.
- To order, specify using Conestoga designations associated with the design – see shape options below.
- Specify “SS” – “L” (Left), “R” (Right) or “B” (Both).
- Design is centered on the length of the cabinet side.
- Not available with extended stiles, loose toe platform or flush unexposed ends.
- Toe space side option is not available.
- Available on most base, tall and vanity cabinets.
- Minimum cabinet depth is 15”.

</tbody>
</table>

- Prepares the sides of wall, base, tall or vanity cabinets to accept 3/4” thick doors as decorative, integral cabinet sides.
- False doors not included, must be ordered separately.
- Cabinet carcass width is reduced to provide a 13/16” extension of the front frame on left, right or both sides. Overall cabinet front width remains unchanged.
- Left and right stiles are 1-1/2” wide.
- Specify: “L” (Left), “R” (Right) or “B” (Both).
- Available on most wall, base and tall cabinets.
- Concealed Inset Hinges and Pull-Out Trays (POT’s) are not available with Prepare for False Door Side Option.
- Order false door width 3/4” less than overall cabinet depth. Height of false door equals cabinet height.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.
Extended Stiles (EXT)/Custom Extended Stiles (CSEXT)

- Provides 3” wide frame extension (standard) for field trimming or custom width stile extensions to avoid cutting at installation.
- If CSEXT is ordered, stile width can be specified between 1/4” and 3” in 1/16” increments.
- For standard 3” extension specify: EXL (Extended Left), EXR (Extended Right) or EXB (Extended Both).
- For custom extension specify: CSEXL (Custom Extended Left), CSEXR (Custom Extended Right) or CSEXB (Custom Extended Both) followed by the width required.
- Available on most wall, base, tall, vanity and home office units.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

Flush Toe (FT)

- Bottom rail height is 5-1/2”.
- Specify: “FT” (Flush Toe).
- Cabinet side is manufactured without toe notch.
- 96” tall cabinets do not use a toe platform.
- Available on most base and tall cabinets.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.
Shaped Bottom Rail (SBR)

- Rail height is 5-1/2". Flush toe is standard; cabinet side is constructed without toe notch.
- Roman, Elegant, Classic and Traditional Arch designs are centered on bottom rail.
- Elegant 2 and Traditional 2 designs are available on the left only, right only or both sides of the bottom rail.
- Elegant 2 and Traditional 2 designs rise to 1-1/2" framing. These designs will not match Elegant or Traditional Arch designs.
- Elegant 2 and Traditional 2 designs are not available with the Shaped Side Option.
- To order specify using CWS designations associated with the design.
- Not available with Loose Toe Platform Option for tall cabinets.
- Available on most base, tall and vanity cabinets.
- Minimum cabinet width is 15".
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

- Solid Wood Shelves
- Matching Interior
- Dust Top
- Natural Finished Bottom

Leg Extension (LE)

- Option extends exterior frame stiles to the floor into toe space for furniture "leg" styling.
- Specify "LE" – "L" (Left), "R" (Right) or "B" (Both).
- When "LE"-"B" is ordered with beaded inset, bottom opening will be beaded.
- Stile width is 1-1/2".
- Not available with loose toe platform or shaped bottom rail.
- Toe Space Side Option is available, not on the same side as the extension.
- Available on most base tall and vanity cabinets.
- Minimum cabinet width is 9".
- Toeboard backer available. Install prior to final cabinet installation
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

![Cabinet with Leg Extension (LE)](image)
**Toe Space Side Option (TSS)**

- Places standard toe space depth on the left, right or both sides of most base cabinets.
- Specify “TSS” – “L” (Left), “R” (Right) or “B” (Both).
- Toe Space Side is not available on the following cabinets: BLS, BSC, BCFD, BAE, BEAL/R, RTB, RTR, RTL, TCH, DB, DBFD, DB2D, DB3D, LF2D, ORS, DWEP, REP, BFC, WSUD and FS.
- Minimum cabinet width and depth is 15”. TSS both, both minimum depth is 18”.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

**Shelf Options**

**Omit Shelving (OS)**

- Choose to omit interior shelving in wall, base and tall cabinets.
- Wall and base omit option deletes all shelves.
- Tall cabinets: specify top, bottom or all shelves.
- Omits shelving only; if shelf holes are not required, specify No Shelf Hole Option.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

**No Shelf Hole Option (NSH)**

- Choose to omit line boring for shelf rests in wall, base and tall cabinets.
- Most wall and all base omit option deletes all holes.
- Two tiered wall cabinets (TTW) and tall cabinets: specify top, bottom or all holes.
- Omit shelf holes only; if shelves are not required, also specify Omit Shelving Option.
- No upcharge.
Solid Wood Shelf Upgrade (WS)

- Replaces 3/4” thick prefinished plywood shelving with 3/4” thick, prefinished solid wood shelving with a bullnose on front edge.
- Solid wood shelves available up to 18” deep.
- Solid wood shelf upgrade is not available with matching interior.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

Options Key:
- EXP = Exposed End(s)
- FL = Flush End(s)
- FUE = Flush Unexposed End(s)

- FT = Flush Toe
- SBR = Shaped Bottom Rail
- LE = Leg Extension
- TSS = Toe Space Side
- OS = Omit Shelving
- NSH = No Shelf Holes
- WS = Solid Wood Shelves
- MI = Matching Interior
- DT = Dust Top
- NB = Natural Finished Bottom

Matching Interior (MI)

- Cabinets will have unfinished matching specie interior sides, tops, bottoms, shelves and backs.
- Specify: “MI” (Matching Interior).
- Shelves are matching specie 3/4” plywood with veneer edgebanding on front edge.
- Hard Maple and Soft Maple cabinets have Hard Maple veneered interior components.
- Cabinets with matching interior standard do not have the matching interior upcharge included in the cabinet price.

Plywood Toeboard Backer

- 1/2” thick unfinished plywood strips.
- Designed to fully enclose base, tall and vanity toe spaces and provide a backer for finished toeboards or moldings.
- Backers are 4-15/16” high, sized to fit between cabinet sides in the toe space notch.
- To order, check toeboard backer option.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

Square Toe Notch Option

- Intersecting corner of toe kick notch is 90°.
- Aids in toeboard moulding installation.
- Available on most base, tall and vanity cabinets.
- Not available with flush toe or shaped bottom rail options.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.
Custom Top Reveal (CTR)

- Reduces door height to attach decorative moldings directly to a cabinet face frame.
- Left, right and bottom reveal remain unchanged.
- Available with 1-1/4" and 1-3/8" overlay only. 1-1/4" overlay – 1/2" top reveal is standard, CTR available – 9/16" – 1-1/4".
- 1-3/8" overlay – 1/4" top reveal is standard, CTR available – 5/16" – 1-1/4".
- Reveal can be specified in 1/16" increments.
- Specify: “CTR” followed by the total amount of top reveal required.
- Maximum reveal is 1-1/4".
- See the Doors/Overlay Options Section for standard overlay rules.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

Custom Bottom Reveal (CBR)

- Reduces door height to attach light rail or decorative moldings directly to the bottom rail of the cabinet face frame.
- Left, right and top reveal remain unchanged.
- Available with 1-1/4" and 1-3/8" overlay only – max CBR 1-1/4".
- Reveal can be specified in 1/16" increments.
- Specify: “CBR” followed by the total amount of bottom reveal required.
- Maximum reveal is 1-1/4".
- See the Doors/Overlay Options Section for standard overlay rules.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

4 – Sided Dovetail Drawer Boxes

- English dovetail construction.
- Drawer sides and ends are 5/8" thick solid Natural Birch with 1/4" Birch plywood bottoms.
- Drawer boxes are assembled and prefinished.
- Drawer slides are packaged separately from cabinets.
- Boxes will be notched and hook hole drilled accordingly, based on slide requirements. Appropriate upcharges apply.
- Hard Maple, Soft Maple and Walnut drawer boxes are available with Cabinet Systems orders; custom pricing and lead-times apply.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.
Drawer Slide Options

Blum TANDEM Plus BLUMOTION Integrated Soft Close

- Full extension zinc coated steel with rear mount screw-in bracket (15", 18", 21" or 24" deep).
- Cabinet backs have pilot holes to locate rear mounting brackets.
- Side mount with cleats (12", 27", or 30" deep).
- 1/2" bottom reveal, undermount notch and hook hole required. Blum TANDEM sizing without slides also available.
- Blum drawer slides carry a limited lifetime warranty.
- Use Conestoga's online ordering system, Con-Nex or Conestoga order entry for pricing.

Side Mount Slides – Ball Bearing Full Extension

- Standard slide for wall cabinets and POT's.
- Not available with base, vanity or tall cabinets.
- 1/2" bottom reveal is standard.

Cabinet Hinge Options

BLUM Hinge Program Overview
- 1-piece steel, nickel plated concealed hinges.
- Hinges packed in pairs or bulk pack and include mounting screws, installation instructions and warranty information.
- Hinge option is only available on door styles and edge profiles which support concealed hinge boring.
- Doors over 42” high will receive 3 hinges.
- Specify hinging left or right for single door cabinets if hinge boring option is selected.
- Blum hinges carry a limited lifetime warranty.

COMPACT BLUMOTION – Hinges with Integrated Soft Close

- Available for 1/2", 1-1/4" and 1-3/8" overlays.
- Soft close feature is integrated in the hinge cup itself.
- Soft close function can be easily deactivated with a switch on individual hinges as needed based on the door size and weight.
- All hinges feature side, height, and depth adjustment for fine tuning door spacing with wraparound face frame mounting for ease of installation.
- Blum COMPACT BLUMOTION hinges require Pattern "A" cup only boring.
- Note: When 1-1/4" or 1-3/8" overlay is ordered, extended stiles or loose filler strips may be required in applications where cabinets are installed next to a tall cabinet, corner cabinet or a wall.
- Hinges available packaged in pairs or bulk pack (50 hinges per pack, including mounting screws).

1/2" Overlay Hinge
Blum COMPACT BLUMOTION 38N
105˚ opening angle.

1-1/4" and 1-3/8" Overlay Hinge
Blum COMPACT BLUMOTION 39C
110˚ opening angle.

Blum Specialty Hinges

170° Hinges

- Provides full access to cabinet interiors with 170° opening angle for overlay and inset door applications.
- In 1-1/4" and 1-3/8" overlay applications, cabinets will have their doors sized as 1/2" overlay in width only.
- 2-piece, clip style hinge with side, height and depth adjustment points.
- 170° corner hinges require Pattern “B” cup only boring.
- BLUMOTION soft close feature is not available.
- Standard on WCP and BLS cabinets.
- To order loose, specify:
  - Overlay 170° – part # 2100063A.
  - Inset 170° – part # 2100509A.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

Inset Hardware

Inset Mounting Brackets for TANDEM plus BLUMOTION Drawer Slides

- Drawer slide adjustable mounting plate system for inset applications with framed cabinetry.
- Eliminates the need for supplemental blocking behind face frames to secure TANDEM slides.
- Sold in pairs, bracket sets include installation screws and instructions.
- Brackets afford up to 5/8" depth adjustment using standard TANDEM rear mounting brackets.
- To order loose, specify part # 2100200.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

Concealed Inset Hinges

- Hinge and mounting plate system for concealed inset applications with framed cabinetry.
- Soft close feature is integrated in the hinge cup.
- Hinge packs include screws and two adjustable door stops with bumpers.
- Concealed inset hinges require Pattern “B” cup only boring.
- Door and front frame thickness must match.
- To order loose, specify part # 2100067A.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.
Cabinet Hinge Options (continued)

SOSS Hinge Option

- SOSS Hinge Model 204 Invisible Hinge provides 180 degree bi-fold hinge for corner pie cut cabinets.
- Available with WCP/CSWCP, WCPLS/CSWCLPLS, BCP/CSBCP and BCPLS cabinets.
- Available in Brass or Chrome finish; specify finish when ordering.
- Includes SOSS hinge boring; Routs are placed 9" off center, measure from the vertical center of the door to the start of the rout.
- Not available on doors over 42" high or under 25-1/8" high.
Extended Height Option - Tall Cabinets

- Choose to extend height of Custom Size Tall Cabinets from 96-1/16" to 120".
- Available in Cherry and Hard Maple only.
- Flush ends only.
- Matching interiors not available. Natural Birch UV material will be used.
- Fixed section is based on cabinet configuration chosen.
- Separate 4" high toe platform is available in all heights and is strongly recommended for the extended height option.
- When cabinet height changes, top opening height changes accordingly.
- Maximum overall height is 120".
- 96-1/16" to 108" tall cabinets have eight shelves.
- 108-1/16" to 120" tall cabinets have nine shelves.
- Use Conestoga’s online ordering system, Con-Nex or Conestoga order entry for pricing.

Increase Side Reveal (ISR)

- Provides additional door clearance for 1-3/8" overlay when cabinets are installed adjacent to walls or deeper cabinetry.
- Standard reveal is changed from 1/8" to 1/4" and 1-1/4" overlay hinges will be provided when hinges are selected.
- Top and bottom reveal remain unchanged.
- Specify: "ISR" left, right or both.
- See the Doors/Drawer Fronts Section for standard overlay rules.
- Reveal increased on the hinged side of doors.
- Available on most wall, base, tall and vanity cabinets.
Finishing Program Overview

- Conestoga’s finishing capabilities allow our customers to simplify their shop process by eliminating the finishing of doors, mouldings, face frames, end panels and other products. Outsourcing finishing ultimately reduces VOC emissions and helps streamline throughput by minimizing the finishing bottleneck.

- Conestoga’s Cabinet System’s finishing program consists of traditional wiping stains, Truetimes, Colourtomes, Prism Paints, glazes, primers and topcoats. Combined, these finish options create a palette of over 1,600 unique combinations.

- Conestoga has two topcoats available: 15° (low sheen) and 40° (medium sheen). Topcoat glosses will not be custom matched.

- In addition to our standard colors, custom color matching is available for wiping stains. Consult the pricing page in this section for information on custom color charges.

- **We strongly recommend that sample doors be purchased in the desired specie, color and design prior to placing full kitchen orders. This will ensure that the chosen combination meets your expectations.**

Finishing Process

- Prior to finishing, Conestoga’s doors, drawer fronts and front frames are sanded on an automated sanding line to deliver a smooth, “finish-ready” product.

- To apply wiping stains and glazes, Conestoga uses a time-proven, hand-wiped technique which delivers more color consistency and depth than simple spray stain applications.

- Most Conestoga framing beads are designed with a slight back bevel, which allows the stain to penetrate beyond the juncture of the framing bead and panel raise. During the wiping stain process an air nozzle is used to blow stain under the framing bead, minimizing the possibility of “white line” appearing on the panel during expansion and contraction. All doors are matched to a control sample for color consistency during the staining process.

- After staining, doors and cabinet components receive a sealer and topcoat. Our sealer is a high solids material that is applied and then sanded with a fine grit sandpaper after drying. The final coat is the application of a high solids conversion varnish topcoat in either 15° or 40° sheen. Conversion varnishes provide a superior finish with exceptional clarity, resistance to moisture and excellent overall durability. Conestoga has selected the topcoat sheen that generally provides the most pleasing appearance for each finish type. However, in some cases customers do have the option of selecting an alternate topcoat sheen with no upcharge.

- Colourtomes and Prism Paints are applied using air-assisted, airless spray equipment.

- After curing, parts are inspected before being packaged for delivery to our customers.

Finishing Tolerances

- Conestoga’s finishing tolerances are designed for solid wood applications. Application of finish on plywood, veneers, decorative accent items and MDF may result in some color variation. Similarly, finishes applied by the customer may vary slightly from those products finished by Conestoga. See the DuraGuard System information in this section for loose finish purchase information. Instructions for application are also published in this section and enclosed with DuraGuard finish orders.

- Conestoga cannot predict how a door or cabinet part will accept finish. Therefore, if a piece meets our material specification standards in its unfinished state, it will be considered acceptable after finishing as well.
Finishing Warranties

- Conestoga’s finishes carry a one year limited warranty against peeling or blistering, but no warranty against discoloration. Conestoga assumes no responsibility for damages or poor color match when finish is applied by the customer.

- Most wood species will naturally darken with age. Conestoga will not be held liable for the change in appearance of any product, finished or unfinished, due to this aging process.

- We strongly recommend that a sample door be ordered in the desired specie, design and finish prior to ordering a full kitchen, regardless of the finish and specie combination.

- Conestoga’s finish materials are interior grade only and not intended for exterior use. Exposure to outdoor conditions will cause failure and will not be warranted.

Wiping Stains

- All Conestoga wiping stains are applied using a hand wiped application. The process provides superior grain penetration of the finish material and a greater degree of depth.

- Whiter stains such as Alpine are Not Available (X) over certain darker, high contrast species such as Mahogany or Walnut.

- Conestoga does not recommend darker finishes such as Colonial, Cordovan or Washington Cherry over light species such as Hard Maple or Soft Maple. The contrast, as well as the properties of Maple, creates a blotchy, uneven look. Therefore, these combinations are Not Recommended (NR), but can still be produced with a 20% upcharge and no warranty on color consistency.

- Because Conestoga uses wiping stains, and wiping stains penetrate into the wood grain, end grain will stain and glaze darker than other areas of the piece. This will not be considered defective.

Note: Utilizing Conestoga’s End Grain Sealant Option will minimize end grain contrast.

Custom Wiping Stain Match Program Guidelines

- A representative sample of the custom color and specie to be matched must be provided along with the Custom Wiping Stain Match Form found at the end of this section. Include a Purchase Order number on the form, as a non-refundable $250.00 net fee will be invoiced when custom stain sample is shipped to the customer. We will not begin the matching process unless a Purchase Order has been submitted. This fee applies regardless of whether the match is approved by the customer. Allow 10 business days for completion of individual color matches.

- Accompanying the custom stain sample will be a Stain Match Approval Form. If the match is acceptable, sign and return the approval form to our Finishing department and we will assign a custom color mix number. This unique finish number must be referenced each time an order is placed for the custom stain. A custom stain Design and Finishing Material Charge applies to each order.

- At times, customers submit multiple stain matches for a similar color with the intention of selecting only one match. On these occasions, a $250.00 net matching fee will apply to the primary stain match request, and a $100.00 net fee for each subsequent stain match requests. This reduced matching fee applies only when each of the stain colors are relatively close in appearance and submitted at the same time. Any stain not close in color to the primary submission will be invoiced at the $250.00 net fee. If an additional stain sample is submitted at a later date, it will be invoiced at the $250.00 net fee, regardless of whether the stain is close in color to a prior submission.

- Frequently, we receive requests for multiple species with a stain match, or to add additional species and/or glaze treatments to a previously approved stain match. When these requests are received, Conestoga will generate a hard sample of the approved custom stain on each new specie or requested glaze. A Purchase Order number must be submitted along with the request as a $30.00 net fee per individual request will be invoiced at the time the sample is shipped to the customer. Conestoga will retain a portion of the sample to serve as a control sample to be used for future production needs.
Custom Wiping Stain Match Program Guidelines (continued)

- Custom stain mixes are kept on record as long as the finish continues to be used. If no orders for a custom stain are placed for a period of 1 year, the mix will be voided. This guarantees our customers a truly unique stain since it is matched to their exact specifications. Conestoga will only custom match wiping stains and will do so using a pigmented wiping stain.

- Conestoga offers 2 topcoat glosses, 15° and 40°, with no option to custom match glosses.

- Quarts and gallons of custom stains can be purchased. Call Customer Service for pricing.

Hand Wiped Glazes

- All Conestoga glazes are applied using a hand wiped application process to the entire surface of both the face and back of every door and all applicable cabinet parts.

- Hand applied glazing is a very subjective treatment. Each door becomes “one-of-a-kind” and unique in appearance and could vary slightly from part to part but will blend within a job. Conestoga matches every glazed part to a control sample, however, color consistency is difficult to control with glazed finishes. Some factors that influence color consistency of glazed products are door design, profiles, grain patterns, wood density, base color and pre-glaze sanding processes. Conestoga will not warrant these variations and considers them to be acceptable on hand glazed products.

- We recommend that our customers develop a document that would be read and signed by the end user indicating their understanding of the potential color issues with stain/glaze and Colourtone/glaze combinations. Such a document will help set customer expectations and protect all parties in the event of a color-based issue.

- We strongly recommend that a sample door be ordered prior to ordering a full kitchen, regardless of the finish and specie combination.

- Conestoga maintains strict standards for its glazing processes. With this in mind, Conestoga will not customize glaze color or glaze placement. Therefore, we offer only our standard glazing options.

- Wiping stains with glaze receive standard 15° sheen topcoat; however, 40° sheen topcoat is available but must be specified when placing order.

- Glazes significantly alter the appearance of a stain/specie combination. An attractive finish may look quite different once glazed. With this in mind, we do not recommend certain glaze/finish combinations, and some combinations are not available. See the Offering and Availability Charts in this section for details.

- Conestoga’s standard hand wiped glaze offering is available in combination with some custom finish matches. For availability of glazing over custom stains, contact our Finishing Department (717) 445-3252.

Truetones

- Conestoga’s Truetone program consists of both High and Low complexity colors.

- Low Complexity Truetones are lightly pigmented spray to color stains that include a small percentage of solids. They produce a very clean look, with minimal blotchiness. After the Truetone application a sealer and conversion varnish are applied.

- High Complexity Truetones are a selection of deep, rich colors that are achieved through a two step application process. The first step is a hand wiped custom stain that brings out the color depth and grain clarity followed by a delicate application of a low solids spray stain. After this two-step application a sealer and conversion varnish are applied.

- Truetone finishes are also available with Brown, Caramel, Onyx, Oyster and Sable glazes.

- Specie availability with Cabinet Systems includes Cherry and Hard Maple.

- Non-glazed Truetone finishes receive a 40° sheen topcoat standard; however, 15° sheen topcoat is available but must be specified when placing order.
Truetones (continued)

- Glazed Truetone finishes receive a 15° sheen topcoat standard; however, 40° sheen topcoat is available, but must be specified when placing order.

- Normal contraction and expansion of the panels may cause unfinished areas. Normally hidden by the framing bead, this visible unfinished area is known as "white line".

- Profiled areas may appear lighter in color than flat areas on both Low and High Complexity Truetones because of the color application process. The effect could be enhanced by certain profiles, such as a square framing bead, deep grooves and anywhere there is a defined change in the plane of the part. Selecting a glaze option will minimize this effect on any Truetone color.

- Truetones range in color from light to dark. Therefore, they may or may not possess the ability to disguise material variations as well as wiping stains. The use of Premium grade material will mitigate some of these variations.

- End grain will appear darker than non-end grain areas, even when a glaze is applied. **Note: Utilizing Conestoga's End Grain Sealant Option will minimize end grain contrast.**
Primed Products

- Conestoga's priming capabilities allow you to outsource the time consuming process of prepping and priming your doors, drawer fronts, mouldings and Cabinet Systems parts. Outsourcing primed products reduces VOC emissions and increases the efficiency and throughput of your finishing area.

- Conestoga offers 3 substrate materials with the Standard Primer Option:
  - Solid wood – Paint Grade Hard Maple doors and drawer fronts are available in a wide variety of designs.
  - Hybrid doors and drawer fronts – hybrid products utilize Paint Grade Hard Maple framing in combination with 48-pound density MDF center panels. All published 1/4", 3/8", 5/8" and 3/4" panel raises are available in MDF material to use in a wide variety of wood framed door and drawer front designs.
  - MDF – a 48-pound density MDF material. MDF products are limited in design options. See the Alternative Materials Section of the Custom Manual for options.

- Conestoga's primers are post catalyzed, acid cured and compatible with many high quality topcoats. Primer is available in white, light grey, medium grey and dark grey.

- Prior to priming, the substrate is prepared to accept the coating material. Putty is applied to the joints, open-end grain, tear outs and other visible voids. The product is then hand sanded to remove excess putty and provide a smooth, uniform surface to accept the primer coat.

- Most Conestoga framing beads are designed with a slight back bevel to allow some primer material to penetrate beneath the framing bead. However, due to the high solids content of the primer itself, bridging of the primer material may occur between the panel and the framing bead on 5-piece products. Moderate bridging is not considered a defect.

- After curing, all components are inspected, individually wrapped, then packaged and shipped.

- There are many finishes available to paint residential cabinetry. While many of these products may work in combination with our primers, we recommend only acid cured conversion varnish topcoats. Testing for compatibility and adhesion between Conestoga's primers and customer's finish materials should take place on a test door prior to finishing any large items or multi-piece projects.

- Customers should scuff sand the primer using 280-grit sandpaper no more than 24 hours before applying any finish. All surfaces must receive this sanding step to achieve a mechanical bond.

- Conestoga's primed products receive putty prior to application of primer. Smaller voids will become apparent after the primer has been applied. These voids are acceptable and will require a second application of putty by the customer prior to painting.

- Conestoga's primed products are subject to some natural grain raise during the priming process, which is not considered defective. Normal sanding preparation for topcoat application will remove these wood fibers.

- Conestoga's primed products are manufactured using substrate materials that will expand and contract with fluctuations in climate, temperature and humidity. The movement of the substrate may cause fracturing anywhere sub-components have been joined together.

- This fracturing is not considered defective and will most likely occur in the following areas:
  - Framing joints – where the stiles meet the rails on the face and back of doors, 5-piece drawer fronts, wainscot panels and front frames. **Note: To reduce the chance of joint separation, Conestoga recommends using an MDF panel option for doors and drawer fronts.**
  - Edge profiles – in both mitered and mortise and tenon joint construction at the exterior edges of the product.
  - Center panels – where the panel recesses into the framing. Bridging of the coating materials can occur between the panel and framing. Natural expansion and contraction of the substrate may fracture the bridging.
Finishing Program

12

To Table of Contents

Primed Products (continued)

- Panel face – where individual adjacent staves in the panel expand and contract at different rates causing minor offsets or highlighting of glue joints. Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These will not be considered defective.

Note: To eliminate stave offsets, Conestoga recommends using an MDF panel option for doors and drawer fronts.

- Testing for compatibility and adhesion between Conestoga's primers and customer's finish materials should take place on a test door prior to finishing any large items or multi-piece projects. Conestoga assumes no responsibility for incorrect application of finish materials by the customer that may result in poor adhesion, color mismatch or other finish related issues. Conestoga will not warranty products due to incompatibility issues between our primers and non-DuraGuard finish materials.

- Primed products are individually wrapped, minimizing scuff marks.

Colourtones

- Colourtones are opaque finishes, similar in appearance to paint. The coatings are pigmented basecoats that must be catalyzed prior to application. Colourtones require the application of a clear coat of conversion varnish as the final coat.

- Colourtones have a high solids content, resulting in better build and lower VOC emissions.

- We recommend adding the antiquing option when Colourtones are ordered with Cherry. Characteristics common to Cherry, such as pin knots, mineral and pitch pockets will be present in finished products. Refer to the Offering and Availability Chart in this section for species, finish and glaze availability.

- Colourtones with Cabinet Systems are available on Cherry, Hard Maple, Red Oak and Soft Maple.

- All Colourtone finishes will receive a 15° topcoat.

- Veneer checking and seam separation are inherent characteristics of plywood panels and finished veneers that may appear to be cracks within the coating. These are caused by changes within the veneer and will not be considered defective.

Note: To eliminate veneer cracking, Conestoga recommends using an MDF panel option for doors and drawer fronts.

- Because Colourtones contain a high percentage of solids, certain characteristics such as joint fracturing will occur. Hairline cracks typically develop along joints on the face, back and edge profiles and can occur during normal handling or from the expansion and contraction of wood. Joint fracturing is not considered to be a defect.

- The machining of end grain or MDF on certain profiles may result in those surfaces being porous and the finish on these surfaces may not be as full as the finish on non-machined areas.

- Colourtone products are placed on drying racks after the coating application process. Small indentations or pin marks from drying racks may appear on the backs of Colourtone products and are not considered defects.

- Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These stave lines will not be considered defective.

Note: To eliminate stave offsets, Conestoga recommends using an MDF panel option for doors and drawer fronts.

- Colourtones may vary slightly from one batch to another, but will remain within a controlled color range.

- Minor flaws such as dust particles, dimples and lint are more apparent with opaque finishes than with wiping stains. The presence of small amounts of these minor occurrences will be considered acceptable.

- Coatings containing high solids are susceptible to bridging between the framing and center panel. Bridging occurs when the coating material joins the two separate surfaces together. This condition is common between multiple component products and is not considered defective. Over time, the natural expansion and contraction of wood may cause this bridging to fracture.
Colourtone (continued)

- As with most finishes, Colourtone colors will change over time due to exposure to light, pollution and chemicals. Additions or replacements to existing kitchens may not initially match finished products already in place.
- Customers interested in purchasing Colourtone finishing materials through the DuraGuard Program should reference DuraGuard Systems information found in this section for coatings pricing and availability.
- When purchasing multiple containers of loose Colourtone coating material, mix the contents of like finishes together prior to adding catalyst to achieve a consistent overall color.
- Catalyst must be added to all Colourtone finishes prior to application. The catalyzation process results in both a limited pot life and a recoat window. Mixture and application instructions are provided near the end of this section.
- Conestoga assumes no responsibility for incorrect application of DuraGuard materials by customers, which may result in poor adhesion, color mismatch or other finish related failures.
- We recommend that any topcoat other than DuraGuard products be tested for compatibility prior to application. Conestoga will not warrant products that fail due to non-compatible topcoat materials.

Prism Paints

- The Prism Paints program offers a selection of over 1,500 opaque colors. We do not recommend placing an order for a project in Prism Paints based on the color represented in the fan deck. We strongly recommend a door sample of the actual finish be ordered prior to placing an order for a complete job. Conestoga will not assume responsibility for color related issues resulting from orders being placed without first ordering a sample door.
- Prism Paint coatings are acid catalyzed, pigmented basecoats, much like the Colourtone products. These coatings require the application of a coat of clear conversion varnish.
- Prism Paints with Cabinet Systems are available on Cherry, Hard Maple, Red Oak and Soft Maple.
- All Prism Paints will receive a 15° topcoat, 40° topcoat is not available.
- Prism Paints are available on Cabinet Systems, however Prism Paints with glaze are not.
- Prism Paints are available on 14” sample chips, but not 36” sample chips. Square foot minimum apply.
- Because Prism Paints contain a high percentage of solids, certain characteristics such as joint fracturing will occur. Hairline cracks typically develop along joints on the face, back and edge profiles and can occur during normal handling or from the expansion and contraction of wood. Paint fracturing at joints is not considered to be a defect.
- The machining of end grain may result in those surfaces being porous and the finish on these surfaces may not be as full as the finish on non-machined areas.
- Products having been painted with these coatings will be placed on drying racks. Small indentations or pin marks from the drying racks may appear and will not be considered defects.
- Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These stave lines will not be considered defective.
  **Note:** To eliminate stave offsets, an MDF panel option is recommended for doors and drawer fronts.
- Veneer checking and seam separation are inherent characteristics of plywood panels that may appear to be cracks within the coating. These cracks are caused by changes within the veneer and will not be considered defective.
  **Note:** To eliminate veneer checking, an MDF panel option is recommended for doors and drawer fronts.
Prism Paints (continued)

- Prism Paints may vary slightly from one batch to another, but will remain within a controlled color range. To avoid color variations, order all components for a project at one time.

- Minor flaws such as dust particles, dimples and lint may be present with opaque finishes. The presence of a small quantity of these defects will be considered acceptable.

- Coatings containing high solids are susceptible to bridging between the framing and center panel. Bridging occurs when the coating material joins the two separate surfaces together. This condition is common between multiple component products and is not considered defective. Over time, the natural expansion and contraction of wood may cause this bridging to fracture.

- As with most finishes, Prism Paint colors will change over time due to exposure to light, pollution and chemicals. Additions or replacements to existing kitchens may not initially match finished products already in place.

- Customers interested in purchasing Prism Paint finishing materials through the DuraGuard Program should reference DuraGuard Systems information found in this section for coatings pricing and selection. It is strongly recommended that the paint be ordered at the same time as the finished parts to ensure an accurate color match.

- When purchasing multiple containers of loose Prism Paint coating material, mix the contents of like finishes together prior to adding catalyst to achieve a consistent overall color.

- Catalyst must be added to all Prism Paints prior to application. The catalyzation process results in both a limited pot life and a recoat window. Mixture and application instructions are provided near the end of this section.

- Conestoga assumes no responsibility for incorrect application of Prism Paint materials by customers, which may result in poor adhesion, color mismatch or other finish related failures.

- We recommend that any topcoat other than DuraGuard products be tested for compatibility prior to application. Conestoga will not warrant products that fail due to non-compatible topcoat materials.

Colourtones with Glazes

- Glazed treatments offer a distinctive appearance, significantly altering the base Colourtones color. The random nature of the glazing option ensures slight variation from one product to the next, giving a unique look to the finished kitchen.

- Each glaze possesses specific characteristics that determine the appearance of the glaze on finished doors, drawer fronts and mouldings. Caramel, Coffee, Pewter and White glazes are heavily pigmented glazes, creating a significant color change to the base Colourtone. Profiled areas where these glazes are applied develop heavy lines that outline the profile. Chai and Oyster glazes are lighter in color and intensity and produce a more subtle color change to the base Colourtone. They also produce much less of the highlighting effect in profiled areas.

- Because Cabinet Systems parts typically do not have profiled areas where glaze would hang, Cabinet Systems parts do not have a separate glaze applied. Instead, they will be finished with special Colourtones that have been tinted to match the overall color of a door that has been finished with select Colourtone and glaze combinations. The tinted Colourtones are limited in availability; selections can be found on the Cabinet Systems Finishing Pricing pages within this section.

- Tinted Colourtones blend well with the actual glazed parts (doors, drawer fronts, mouldings, etc.), but there will be some variation in the color between the parts that are actually finished with Colourtone and glaze versus the Cabinet Systems parts finished with specially tinted Colourtones. These variations will not be cause for replacement. We strongly recommend that a sample cabinet with doors be ordered and approved by your customer prior to placing an entire order.

- Colourtones parts receiving the glazed option will have slight inconsistencies in appearance. Variations, however slight, are inherent to these finish combinations. To successfully market this product, education of your production personnel, installers, sales staff, designers and clients must take place.
Colourtone with Glazes (continued)

- Characteristics of products finishes with Colourtone and glazed finishes include variations in:
  - Glaze “hang” with noticeable variations on edge profiles, panel raises and applied mouldings.
  - Absorption into end grain on framing and panel raises.
  - Highlighting of machined areas which normally do not appear with typical wiping stains or base Colourtone colors.
  - Appearance of blotsches and rag marks.

- Components finished with Colourtone and glazes will remain within a controlled range of color; however, individual pieces will vary slightly. This includes doors finished with a Colourtone and glaze compared to Cabinet Systems parts finished with non-glazed tinted Colourtone.

- As with any Colourtone product, we do not recommend ordering plywood panel doors or other veneered panel products due to the inherent cracking and checking that takes place in veneers. Veneer checking will not be considered a finishing defect.
  **Note:** To eliminate veneer checking and cracking, Conestoga recommends using a MDF center panel option for doors and drawer fronts.

- Use of glazes on mitered and applied moulding products will greatly enhance any offset that may be present in the joint construction.

- The machining of end grain on certain profiles may result in those surfaces being porous and the finish on these surfaces may not be as full as the finish on non-end grain areas. This will also cause the glaze to be heavier on these end grain surfaces and are not considered to be defective.

- MDF doors finished with Colourtone and glazes will have noticeable variations in glaze hang and absorption on profiled areas. Machined areas may contain small pinholes that are highlighted by the glaze and will not be considered defects.
Customer Responsibilities

- All sample doors and swatches should be properly labeled with species, finish color, date and sales order number.

- Sample doors and swatches should be stored in such a manner that they are not exposed to light or extreme heat for an extended period of time. Exposure to sunlight, indoor lighting or extreme heat will cause samples to discolor and they will no longer be an accurate representation of color. Sample swatches should be discarded and replaced when their expiration date is reached.

- **Sample doors and swatches should be replaced every 12 months or when they become discolored.** Cherry will need to be replaced more frequently than other species. Conestoga cannot guarantee that a current order will match a sample more than 12 months old. Jobs sold from a sample swatch older than one year will not be warranted for color match.

- We strongly recommend that a full kitchen **not be sold from a color swatch or fan pack.** Order a sample door to show a greater array of possible character effects on a particular color, design and specie combination.

- For displays that are older than one year or that may be discolored, we recommend that customers obtain a current sample door in that specie, stain and glaze combination. Remember, display kitchens do change color due to their exposure to natural light, indoor lighting, heat and other conditions. The change that takes place is very gradual and may be difficult to detect, especially if viewed daily.

- If a job is ordered based on the color of a sample door or display, make sure the sample is less than one year old and the color is accurate. Customers asking for replacements because the job does not match their sample will be asked to provide the original sample sales order number so the age of the sample may be determined. **Conestoga will not warrant products for color mismatch if the sample is more than 12 months old or is discolored due to excessive exposure.**

- Due to the complexity of our offering and our inability to predict a customer’s ordering habits, it is possible to receive parts that have been finished with the special tinted Colourtone and others that have been finished in Colourtone with a hand wiped glaze applied. While these parts should blend together well, there will be variation between these parts due to the differences in finish applications. These variations will not be cause for replacement.

- All Colourtone finishes are available on custom front frames, while Cabinet Systems have a limited finish offering. For instance, custom front frames are available with brushed glaze, but Cabinet Systems components are not. To attain a finish combination that is not available in Cabinet Systems, order a cabinet with no front frame and no finish. Then order a loose custom front frame sized for the cabinet and end skins, veneers or door end panels (to apply to any exposed areas) in the custom finish.
Finish Options

Cabinet Systems offers three finishing configurations for our cabinet parts - Exterior, Interior and Back - to give customers greater design flexibility. See diagrams below for listing of which pieces get finished with each configuration.

When filling out the order forms, the finish specified on Cabinet Systems Order Form #7 will be considered the standard and applied to all three options when matching interior is ordered. To order a different finish for the Interior or Back of a cabinet with Matching Interior, note the area with the finish on Cabinet Systems Order Form #7-A in the Special Instructions area per cabinet.

Exterior Finishing

Includes:

- Front Frame – face, interior and exterior edges, finish only on exposed edge on back of front frame.
- Exposed/flush sides – face only.

Interior Finishing (Only available with matching interiors)

Includes:

- Sides – 1 interior face.
- Top and Bottom – 1 interior face.
- Fixed Floor – 2 faces.
- Shelves – 2 faces, edgebanded edges.
- Any other matching interior components.

Back Finishing (Only available with matching interiors)

Includes:

- Backs – 1 interior face.
- Back Slants – 1 interior face.
Prism Paint Fan Deck

- Over 1,500 colors are showcased in this comprehensive fan deck.
- Divided into five sections: Colors, Neutrals, Whites & Pastel, Timeless and Historic.
- All paints are interior grade only, including the Historic Exterior Section.
- Each paint color is classified as either a Pastel or Deeptone. This determines the material cost category when finishing is requested, or loose paints are selected.
- Refer to the Conestoga website, www.conestogawood.com for a complete listing of paint colors and price categories.
- Prism Paints are available with Caramel, Chai, Coffee, Oyster and Pewter glaze options.
- Order Prism Paint fan decks using part #2602036A.

* Ebony Colourtones will magnify any small imperfection. Small imperfections such as dust or lint will not be considered defects.
† Doors, drawer fronts, mouldings and other Custom Products will be finished with Colourtone and glaze. Cabinet Systems parts will be finished with a Colourtone that has been tinted to match the overall color of those parts.

Using Offering and Availability Charts

Offering and Availability Charts should be referenced prior to placing an order.

- Locate the desired finish in the top row, then follow the row down to the desired specie/glaze combination found along the left column of the chart.
- The box where the finish, specie and glaze combination intersects will contain one of the following references:

  **R** = Recommended: These finish combinations refer only to the consistency of the finish application and not the aesthetic beauty of the combination.

  **NR** = Not Recommended: These finish combinations are problematic and do not meet Conestoga’s standards for color consistency. They also highlight various other characteristics such as machine marks and open end grain that will not be considered defective. NR combinations will receive a 20% upcharge to the Design Charge compensating for additional labor required for difficult combinations. Even if a sample door is purchased, we cannot guarantee that the next order will be an exact match to the sample door. Conestoga will not guarantee color consistency on NR combinations.

  **X** = Not Available: Such combinations present application challenges which result in finish appearances Conestoga cannot consistently reproduce, and are not available.

Standard Primer Only

### Specifications:
Swatch size 4-1/4" x 6-1/8".
Swatch has G-012 groove on face – except for finishes with Chai and Oyster glazes.
Each swatch is individually labeled and dated.

Kits are packed in a labeled file box, reducing the need to remove individual swatches for identification; this limits the exposure to light that accelerates color change.

### Larger Swatch Size
Individual Conestoga Recommended and Not Recommended finishes are available on 6-1/8" x 14" chips.
Conestoga DuraGuard System Overview

DuraGuard is a complete finishing material program designed to make it easy to match Conestoga’s prefinished products, in which all the wiping stains, Truetones, Colourtones, paints, glazes, primers, sealers and topcoats work together to create a lasting finish on our customer’s components.

- DuraGuard provides finishing materials, step-by-step instructions, access to our in-house finishing professionals and support products such as touch up kits.

DuraGuard System Features

- Access to all of Conestoga's topcoats, sealers, stains, paints, primers, glazes and other raw materials.
- Step-by-step instructions mailed with every shipment of finishing material detailing how to mix raw materials, sand the wood, apply the finish and spray the topcoat.
- Access to our Finishing Department at (717) 445-3252 every business day, from 7:00 a.m. to 3:30 p.m. (EST). Our professionals are dedicated to answering any finishing questions our customers may have.
- Inexpensive touch up kits are available; these kits are used to hide scratches or blemishes incurred in our customers' shop. These kits make a great gift for your satisfied customers. See bottom of DuraGuard Packaged Finish Pricing Chart in this section for details and pricing.

DuraGuard System Disclaimers

- Conestoga's finishes are industrial in nature, unlike finishes purchased at a retail store. Although they are of higher quality than most finishes, Conestoga’s coatings are also more combustible, more volatile and require a greater level of expertise to apply.
- Due to the complexities involved with any finishing process, Conestoga will not be liable for any damages or injuries resulting from the use of this product, even if every precaution is taken by the customer. Conestoga's liability is limited to the original purchase price of the finishing material.
- In order to best match any DuraGuard finish color, it is important to follow the processes outlined in our instruction documents. These instructions are found in this section of the manual. If the proper steps are not followed, the finished product may not match the finished doors that were purchased from Conestoga. However, please bear in mind that following these procedures will not always guarantee an exact match.
- Due to the many variables involved in any finishing process, Conestoga assumes no responsibility if products finished by the customer using the DuraGuard System do not produce an exact match to prefinished products purchased from Conestoga.
- The DuraGuard Finishing System is scientifically designed so that each of the materials, from base coat to topcoat, work with one another, thereby providing a beautiful protective finish for our customer’s products. Finishing products not sold by Conestoga may react unfavorably to the DuraGuard finishing materials causing poor topcoat adhesion, discoloration or other problems.
DuraGuard Finishing Instructions

All Wiping Stains (except Bordeaux, Dark Roast, Espresso, Nickel and Nitefall)

- Use this process to match all Conestoga wiping stains except Bordeaux, Dark Roast, Espresso Nickel and Nitefall stains.
- White wood sand with an oscillating palm sander using 180 grit sandpaper.
- Apply wiping stain over wood. Wipe all surfaces clean with lint-free rag.
- Allow wiping stain to dry for a minimum of 1 hour.
- Spray sealer to approximately 4 wet mil thickness.
- When the sealer is completely dry, sand sealer with fine grit (220-280) sandpaper using an oscillating palm sander on all flat surfaces. Hand sand all profiles with 220 grit sandpaper.
- Spray on topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Bordeaux, Dark Roast, Espresso, Nickel and Nitefall Finishing Process

- Use this process to match Conestoga’s Bordeaux, Dark Roast, Espresso, Nickel and Nitefall stains.
- White wood sand with an oscillating palm sander using 180 grit sandpaper.
- Moisten wood surface by lightly misting with water. Do not over saturate. Allow wood to completely dry for 30 to 60 minutes depending on relative humidity. This will open the grain allowing penetration of stain.
- Apply wiping stain over wood. Wipe all surfaces clean with a lint-free rag.
- Allow wiping stain to dry for a minimum of 1 hour.
- Spray sealer to approximately 4 wet mil thickness.
- When sealer is completely dry, sand sealer with fine grit (220-280) sandpaper using an oscillating palm sander on all flat surfaces. Hand sand all profiles with 220 grit sandpaper.
- Spray on topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Glaze Over Wiping Stains

- Use this process to apply glazes over all Conestoga wiping stains.
- White wood sand with an oscillating palm sander using 180 grit sandpaper.
- Apply wiping stain over wood per DuraGuard finishing instructions. Wipe all surfaces clean with lint-free rag.
- Allow wiping stain to dry for a minimum of 1 hour.
- Spray sealer to approximately 4 wet mil thickness.
- When sealer is completely dry, hand sand all surfaces using 320 grit sandpaper. Make sure to sand in same direction as the wood grain.
- Apply the glaze to the entire surface and wipe the excess glaze off with a lint-free rag, leaving the desired amount of glaze in profiled areas. When matching existing products, make sure the same amount of glaze is left on the surface of the product being glazed as is on the product to be matched. Allow glaze to dry for 1 hour.
- Spray on topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.
Mixing Topcoats and Sealers
Follow this process when using DuraGuard topcoats and sealers to match products finished by Conestoga.

- Always use a lined can or plastic container when adding catalyst. Do not catalyze in an unlined metal can.
- Slowly pour the pre-measured container of catalyst into the gallon container of sealer or topcoat. Thoroughly agitate topcoat material, making sure there is no residue on the bottom of the can. Agitation must be continuous. **Do not over catalyze!**
- Once the catalyst has been added, the chemical interaction of the mixture results in a 24 hour “pot life”. After this 24 hour time frame, the mixture begins to cure rendering it unusable.
- Catalyst ratios are listed below.
- We strongly recommend against attempting to extend the pot life of sealer or topcoat by adding virgin material, as it will disrupt the catalyst ratio.
- Spray topcoat to a thickness of 4 wet mils.

**Topcoat Application Guidelines**

- All standard Wiping and Truetone stains default to 40° topcoat; 15° topcoat available upon request.
- All standard Wiping and Truetone stains with glazes default to 15° topcoat; 40° topcoat available upon request.
- All Weathered Grain products finished with wiping stains, wiping stains with glazes, Colourtone and Colourtone with glaze default to 5° topcoat; 15° topcoat available upon request. 40° topcoat not available with Weathered Grain products.
- Antiquing, distressing and wear sanding options selected with wiping stains and wiping stains with glazes default to 15° topcoat; 40° topcoat is available upon request.
- Antiquing, distressing and wear sanding options and Heirloom finishes added to Colourtone, Colourtone with glaze, Prism Paint or Prism Paint with glaze default to 15° topcoat. 40° topcoat not available with any of these finish and option combinations.
DuraGuard Finishing Instructions (continued)

Truetones - Low Complexity
Use this process to match Conestoga's Low Complexity Truetone finishes.

- White wood sand with an oscillating palm sander using 180 grit sandpaper.
- Using spray equipment apply Truetone stain material over wood with even wet coats until the desired color is achieved. **Diaphragm pump and HVLP gun recommended for spray application.**
- Allow stain to dry for a minimum of 30 minutes.
- Spray sealer to approximately 4 wet mil thickness.
- When the sealer is completely dry, sand sealer with fine grit (220-280) sandpaper using an oscillating palm sander on all flat surfaces. Hand sand all profiles with 220 grit sandpaper.
- Spray on topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Truetones - High Complexity
Use this process to match Conestoga's High Complexity Truetone finishes.

- White wood sand with an oscillating palm sander using 180 grit paper.
- Apply the Truetone wiping stain as the base color over wood. Wipe all surfaces clean with a lint-free rag.
- Allow Truetone wiping stain to dry for a minimum of 1 hour.
- Using spray equipment apply the matching Truetone spray stain material over the pre-stained wood with multiple light passes until uniform coverage is achieved. It may take as many as 4 to 6 light passes spraying in opposite directions to get uniform coverage on the board surface. **DO NOT** apply heavy wet coats as this may cause modeling and blotchiness in the spray stain. **(Diaphragm pump and HLVP gun recommended for spray application)**
- Allow the spray stain to dry for a minimum of 30 minutes.
- Spray sealer to approximately 4 wet mil thickness.
- When the sealer is completely dry, sand sealer with fine grit (220-280) sandpaper using an oscillating palm sander on all flat surfaces. Hand sand all profiles with 220 grit paper.
- Spray topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Hand Wiped Glaze Over Truetones
Use this process to apply hand wiped glaze over all Conestoga Truetones.

- Follow application instructions for desired Truetone finish.
- Allow Truetone to dry for a minimum of 30 minutes.
- Spray sealer to approximately 4 wet mil thickness.
- When sealer is completely dry, hand sand all surfaces using 320 grit sandpaper. Make sure to sand in same direction as the wood grain.
- Apply the hand wiped glaze to the entire surface and wipe the excess glaze off with a lint-free rag, leaving the desired amount of glaze in profiled areas. When matching existing products, make sure the same amount of glaze is left on the surface of the product being glazed as is on the product to be matched.
- Allow glaze to dry for a minimum of 1 hour.
- Spray on topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.
DuraGuard Finishing Instructions (continued)

Colourtone and Prism Paints
Colourtone/Prism Paints are two-part, acid catalyzed, opaque basecoats, high in solids and similar to paint in appearance. Colourtone/Prism Paint finishing materials are non-catalyzed when purchased and must have catalyst purchased separately and added prior to application. These coatings are very durable and resistant to moisture.

Colourtone, Prism Paints and Catalyzation
Colourtone/Prism Paint finishing materials have superior film build, adhesion, excellent sanding properties and moisture resistance. It is extremely important to keep these materials thoroughly agitated while spraying. Coatings require the addition of an acid catalyst in order to cure. Since the catalyst has corrosive properties, neither the catalyst nor the catalyzed material should ever be stored in an unlined metal container. Thoroughly agitate material prior to the addition of catalyst. Add only the recommended ratio of catalyst and continue agitation for 5 minutes prior to spraying the material. Do not over catalyze! After catalyzation, material will have a maximum pot life of 24 hours.

Colourtone/Prism Paint materials have a limited amount of time between the application of the first and second coats and the application of topcoat. In order to achieve the proper chemical bond between coats, topcoat must be applied within 24 hours after applying the second coat. This time frame remains the same for both glazed and non-glazed products. The Colourtone/Prism Paint systems require a 15° conversion varnish topcoat. The use of any other topcoat material may result in lifting, discoloration, poor adhesion, cracking, poor moisture resistance and other finish related problems. Conestoga recommends the use of the DuraGuard glazes and topcoat in combination with Colourtone/Prism Paint finishing materials.

Surface Preparation for Colourtone and Prism Paints
- Fill all open voids with wood putty, sanding off excess putty.
- Sand surface of product with an oscillating palm sander using 180 grit sandpaper.

Spraying Colourtone and Prism Paints
- Thoroughly agitate Colourtone/Prism Paint material, add catalyst while material is under agitation. Add 4 ounces catalyst V66V21 to 1 gallon of Colourtone/Prism Paint in a lined metal can or plastic container. Pot life after catalyzation is 24 hours. Keep material under constant agitation.
- Spray Colourtone/Prism Paint material to a thickness of 4 wet mils.
- Allow first coat of material to dry for a minimum of 2 hours.
- Sand the entire surface with 280 grit sandpaper.
- Spray a second Colourtone/Prism Paint coat to a thickness of 4 wet mils.
- Allow the second coat to dry 2 hours before applying glaze or topcoat. A topcoat must be applied within 24 hours, whether product is glazed or non-glazed.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Glaze over Colourtone
- Cabinet components are available with specific Colourtone and glaze combinations only. Case parts (sides, tops, bottoms, backs and front frames) are finished with special Colourtones that have been tinted to match the overall color of components finished in specific Colourtone and glaze combinations. Application of these tinted finishes must follow the Spraying Colourtone application instructions above.
- For components accompanying cabinet parts finished with the specially tinted Colourtone finish, a separate Colourtone and hand wiped glazing application process must be used. Use the following Glaze over Colourtone application instructions for items that require an actual glaze hang. These components include doors, drawer fronts and ancillary items.
- Apply the glaze to all surfaces after the second coat of Colourtone is fully dry. Glaze may be applied with a rag and/or a brush.
DuraGuard Finishing Instructions (continued)

Glaze over Colourtone (continued)
- Wipe glaze off surfaces immediately using a “selective” wiping technique, leaving behind the desired amount of glaze in the profiled and flat areas. If matching to Conestoga prefinished products, ensure that the same amount of glaze is left in profiled areas and flat surfaces as on the Conestoga product.
- Allow glaze to dry for 1 hour.
- Spray with Conestoga’s DuraGuard 15° sheen conversion varnish topcoat to a thickness of 4 wet mils. A topcoat must be applied within 24 hours, whether product is glazed or non-glazed.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Topcoat over Colourtone and Prism Paints
- Thoroughly agitate topcoat material, ensuring there is no residue on bottom of can.
- Add 4 ounces of catalyst V66V21 per gallon of 15° sheen topcoat in a lined metal can or plastic container and agitate for 5 minutes prior to spraying. Keep topcoat under constant agitation. After catalyzation, the material has a 24 hour pot life. We do not recommend extending pot life by adding virgin material, as this will disrupt your catalyst ratio.
- Spray 4 wet mils of topcoat over Colourtone/Prism Paint.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Antiquing on Colourtone and Prism Paints
Antiquing is a process to create the appearance that portions of the finish and even some of the substrate have been worn away from prolonged daily use.
- After allowing the Colourtone/Prism Paint material to thoroughly dry, the entire piece must be sanded with an oscillating palm sander using 280 grit sandpaper. Randomly sand through both coats of finish to expose the raw wood on profiled areas, edges and corners to simulate an aged, worn appearance. If antiquing is used in combination with the wear sanding option, follow the areas previously wear sanded. The amount and location of the antiquing should vary by personal preference, but should be focused on areas that would typically show wear from daily use. Refer frequently to the sample door finished by Conestoga.

Primers
Conestoga’s Standard primer is available in white, light grey, medium grey and dark grey and are post catalyzed, acid cured primers, compatible with many high quality topcoats. While there are many topcoats available on the market today, Conestoga recommends only acid cured, pigmented conversion varnishes.

Surface Preparation for Primer
- Fill all open voids with wood putty, sanding off excess putty.
- Sand surface of product with an oscillating palm sander using 180 grit sandpaper.

Spraying Standard Primer
- Thoroughly agitate primer materials, ensuring there is no residue on bottom of can. Add catalyst while the primer is under agitation in a lined metal can or plastic container.
- Add 14 ounces catalyst 494 to 1 gallon of primer. Pot life after catalyzation is 24 hours. Keep material under constant agitation.
- Spray primer to a thickness of 5 wet mils.
- Allow primer to dry for a minimum of 1 hour before sanding.
- Sealer sand the entire surface with 280 grit sandpaper prior to applying a color coat.
DuraGuard Finishing Instructions (continued)

Legal Disclaimers

- DuraGuard finishes are industrial in nature, unlike finishes purchased at a retail store. Although DuraGuard offers a higher quality finish than most finishes, it also is more combustible, more volatile and requires a higher level of expertise to apply. Due to the complexities involved with any finishing process, Conestoga will not be liable for any damages or injury resulting from the use of this product, even when the customer has taken precautions. Conestoga's liability is limited to the original purchase price of the finishing material.

- In order to best match any DuraGuard finish color, it is important to follow the processes outlined on the previous pages. If these steps are not followed, your finished product may not match the products purchased from Conestoga. However, please bear in mind that following these procedures will not always guarantee an exact match. Due to the many variables involved in any finishing process, Conestoga assumes no responsibility if products that are finished by the customer using the DuraGuard System are not an exact match to the finished products sold by Conestoga.

Important Note: All drying times mentioned in this document are to be used as guidelines only. The actual drying time will vary according to the climate in which the finish is applied.

- The DuraGuard Finish System is scientifically designed so that each of the materials, from basecoat or stain, to topcoat, work with one another, thereby providing a beautiful protective finish for your wood products. Finish materials not sold by Conestoga may react unfavorably with DuraGuard finishing materials causing poor topcoat adhesion, discoloration or other problems.

- Color variation can occur on separately ordered jobs. Conestoga cannot guarantee color matches on material ordered at different times. Length of time between orders may also be a factor affecting color variation. Environmental factors where existing material is stored or installed may affect finished products to the degree of causing an appearance different to that of a newly finished product. To better ensure consistency of appearance, Conestoga recommends against placing partial orders.

Health and Safety Information

Refer to SDS for health and safety information. Log on to www.conestogawood.com/sds for 24 hour access to SDS information.

Care and Cleaning of Fine Kitchen Cabinetry

- The DuraGuard topcoat offers the utmost protection for kitchen cabinet applications and provides superior chemical and common kitchen stain resistance while maintaining color and sheen.

- DuraGuard topcoats require minimal care and cleaning. We recommend periodic cleaning with a mild detergent and water solution to remove dirt, dust and grease that buildup with routine usage. Dampen a soft, non-abrasive cloth and wipe entire exterior surface of cabinetry and dry with a soft cloth. Never use a wet cloth that allows water to run down the cabinetry and always dry cabinetry immediately if water is spilled onto the surface.

- Care should be taken not to use abrasive cleansers, ammonia or any other type of harsh chemical. These cleaning agents may cause discoloration, scratching, marring and dulling of the finish. We also discourage use of furniture polishes and waxes on finished cabinetry. Furniture polishes alter the original sheen level and may leave a film on the surface that attracts dust and dirt. These polishes may also cause an irregular or blotchy appearance because they are unable to stand up to many common kitchen stains.
