

About Conestoga Wood Specialties

Since 1964 Conestoga Wood Specialties has manufactured the highest quality cabinet doors and components for the Kitchen & Bath Industry. From our modest beginnings in a small garage in Lancaster County, Pennsylvania, we've grown to be the industry leader known for our consistent quality, breadth of selection and product performance.

While our roots run deep in producing finely crafted wood components, we've never stopped looking for "what's next", relentlessly searching for new designs, materials, accessories and services to assist our customers in keeping up with developing design trends. While predominantly known for our work with wood, Conestoga repeatedly steps outside our historic comfort zone to capitalize on developments in technologies and materials. We've routinely traveled to Europe to establish supplier relationships and explore revolutionary new materials such as Decorative Laminate Veneers and high textured Thermally Fused Laminates. We work with some of the world leaders in alternative sheet stock and make huge investments in inventories to help bring these products to our customers. Our latest Alternative Material investments included multiple High Gloss materials and Super Matte films... and our search continues.

Our commitment is not only to provide our customers with superior products, but to also monitor the market making every attempt to understand where it is heading; then doing our best to provide the products needed to allow customers to capitalize. Several years ago we anticipated the rise of painted finishes and aggressively promoted hybrid doors and introduced 5-Piece MDF doors well before they became widely accepted by the industry. Shortly after, we launched the Prism Paints Program, bringing over 1,400 paint colors and several treatment options to our standard finish offerings. Today, these programs continue to thrive and remain cornerstones of our custom product offering.

And while we've experienced a myriad of changes, our company has stayed true to its roots, continuing to produce thousands of wood doors, drawer boxes, front frames, mouldings and other components each day. Still a family owned business, we are committed to servicing the Custom, OEM and RTA Cabinet Systems Kitchen & Bath segments. With a proud history approaching 60 years, we remain dedicated to the principles that elevated Conestoga to the top of the kitchen component industry while understanding that we must be receptive to new ideas and agile enough to successfully institute them in order to stay relevant, and allow our customers to stay at the forefront of the custom kitchen market.

But most of all, we have never forgotten that relationships are built one delivery at a time.

Order Placement

Contact Customer Service when you require assistance with Quotes, Orders and Customer Service issues.

Conestoga offers four methods of order placement: Conestoga Con-Nex®, email, fax and mail. Fax, phone and email information for contacting Customer Service is listed on the first page of this manual.

- Our Con-Nex quoting and ordering program is a 24/7 order entry software package that provides an easy way to obtain instant quotes and electronically place orders. For more information on Con-Nex, contact our online help desk: 1-800-838-5850 option 2.
- Inbound fax lines are available 24 hours a day, seven days a week.
- Phone lines are open during office hours – 8:00 a.m. to 5:00 p.m. (EST), Monday through Friday.
- When sending orders via U.S. Mail, use the address below. The address **must** include "Attention: Customer Service", followed by the word "**ORDER**".

Conestoga Wood Specialties Corp.
ATTN: Customer Service – **ORDER**
245 Reading Road, PO Box 158
East Earl, PA 17519-0158

Order Forms

- All orders must be submitted written or typed on a Conestoga Order Form or on pre-approved customer purchase order forms. **Verbal orders will not be accepted.**
- When adding, correcting or otherwise modifying information on an order that has previously been submitted, all changes must be submitted in writing.
- All orders must be submitted in finished dimensions.
- For your convenience, a master copy of each order form can be found in Section 14 of this manual.
- Incomplete order forms will delay order processing. Complete all header information. If you use your own order forms, include all of the required fields. Customer Service is available to assist you in developing your forms.
- Use Conestoga terminology when placing orders.
- Refer to the back of Conestoga Order Forms for ordering instructions. If you have questions regarding the order forms or the product catalog, contact Customer Service.

Custom Product Quote Requests

- Immediate product quotations can be generated via Con-Nex; contact Customer Service for details 1-800-838-5850 option 2.
- All product quotation requests must be submitted in writing. Always clearly write or type **“QUOTE”** in the header of the form.
- Quotes will be processed within a timely manner of receipt and will be acknowledged by your preferred communication method.
- Log in to the Customer Business Portal (CBP), my.conestogawood.com, to convert your quote to a live order or sign the last page of your acknowledgement and return it to Conestoga.

Customer Purchase Orders

- Our computer system will allow the same purchase order number or name to be used more than once. To prevent duplicate orders, use unique purchase order numbers or names for every purchase order submitted to Conestoga.
- Orders that have been submitted to Conestoga more than once will be the responsibility of the customer. If you question whether your order has been received, check the CBP or contact Customer Service for verification.

Order Acknowledgements

- Conestoga acknowledges all orders online or through email or fax. Acknowledgements can also be viewed on the CBP.
- You can also access the status of your order on the CBP. These acknowledgements are sent to our customers to confirm the order we entered into our computer system is consistent with the information provided. Please review all acknowledgements for accuracy as soon as you receive them.
- If errors are found within the acknowledgement, contact Customer Service **immediately**.
- To access or update your preferred delivery method for acknowledgements, log in to the CBP to set up your preferences in “My Account”.

Order Changes/Cancellations

- Change and cancellation requests can be processed through the CBP or in writing. If in writing use the Conestoga acknowledgement with “Change Order” or “Replacement” written clearly on the top. Be sure to include the original purchase order and indicate which items are to be modified or cancelled.
- Orders that have been entered into the computer system but not released into production can be modified or cancelled with no upcharge.
- **Order change fees will be applied to the original purchase order for any modifications made to orders that have been released into production.** Order change fees vary and are determined by the manufacturing completion percentage.
- Change or cancellation requests may be denied altogether if the product has progressed beyond a critical manufacturing point and order lead-times may be affected.
- Certain products or order types cannot be modified or cancelled.

Credit Terms

- Conestoga has two standard types of terms: 100% prepay and open credit terms, subject to financial credit worthiness. 100% prepay accounts require full payment for orders before work begins. Open credit term accounts (2% 10, net 30) are subject to the terms and conditions as stated on Conestoga's Credit Application and will be reviewed periodically. Past due balances are subject to a late fee of 1.5% monthly or 18% annually.
- All new customer accounts are initially set up as 100% prepay until Conestoga has approved your Credit Application. For a Credit Application, please contact your Sales Representative or our Credit Department. Open credit term customers are subject to periodic review and credit limits adjusted accordingly.
- Methods of payment include: pay online through the CBP or mail payment.
- Payment types accepted: check, credit card (American Express, Discover, MasterCard and Visa), wire and Automated Clearing House (ACH).

State and Local Sales Tax

- Conestoga must have a valid state sales tax exemption certificate from customers requesting purchases to be exempt from state and local sales taxes. If we do not have your certificate on file, we are required to charge relevant state and local taxes on all purchases. A state sales tax license or seller's permit will not be sufficient to exempt your purchases.
- If your company makes purchases from us which we ship to other states, you may be charged sales tax applicable to the destination state; state laws vary.
- If your purchases are taxed and you submit a tax exemption certificate at a later date, be aware that Conestoga can only issue credit for taxes charged 60 days prior to the date we received the certificate.
- If you have questions regarding sales tax exemption, call our Credit Department at 1-800-863-9561.

Shipping Options and Methods

- Conestoga offers a wide variety of shipping methods, including our company-owned fleet trucks, common carriers and UPS Ground or FedEx Ground.
- Conestoga operates several daily and weekly route trucks to many parts of the Northeast, Southeast and Midwest. These route trucks are designed to deliver customer orders economically, reliably and damage free. This service provides a dependable daily or weekly arrival time at the customer's site. If you are interested in using the Conestoga route truck service, please contact your Sales Representative for more information. This service is available on a limited basis. Several guidelines and restrictions apply.

Restrictions include:

- ♦ Delivery Routes – Conestoga has several established delivery routes to service areas that support high amounts of freight deliveries. Areas outside these established delivery networks may not contain the necessary volume needed for cost effective delivery service. Customers located outside established delivery routes will be serviced by select common carriers.
- ♦ Purchase Quantities – we make every attempt to service high volume customers on Conestoga trucks. Customers located in close proximity to larger customers that order on a frequent basis may be eligible for Conestoga truck deliveries. Customers ordering on an infrequent basis or not near established delivery routes will be serviced by select common carriers.
- ♦ Delivery Frequency – Conestoga route trucks generally travel once per week to regions outside our local delivery areas unless the overall territory volume justifies multiple deliveries. Conestoga truck deliveries can be supplemented by common carrier if desired. However, common carrier deliveries will likely cost more than Conestoga deliveries.
- ♦ Receiving Deliveries – depending on the areas serviced, Conestoga will utilize either straight trucks with lift gates or tractor trailers. If located on a delivery route using tractor trailers, customer's facilities must have a loading dock and lift equipment to handle pallets.
- ♦ Residential/City Deliveries – some customers in residential and city locations may have insufficient space for tractor trailers to safely maneuver. Even if volume and location warrants Conestoga truck delivery, there may be facilities we cannot deliver to based on insufficient delivery space.

Shipping Options and Methods (continued)

- Common carriers are used to ship larger orders outside of our delivery routes, to lower volume customers or to regions more difficult to access. Conestoga has negotiated discounted rates with several carriers and will choose the most economical and timely carrier for your area.
- Customers' facilities must be able to accommodate LTL shipments. A truck dock and skid-handling equipment are required in order to receive these shipments.
- FedEx Ground and UPS Ground are the primary shipping methods used to ship smaller orders and groups of orders totaling less than five packages.
- Expedited services are available via UPS Ground and FedEx Ground for products whose weight and size qualify. Any special air freight premiums are the responsibility of the customer. Contact Customer Service with questions regarding your options when using these premium shipping services.
- Because all finishing materials are flammable, they are classified as Hazardous Materials by the shipping industry. Although limited quantities of finishing materials can be shipped by air, shipping charges are extremely expensive. Finishing materials shipped by common carrier require special handling designated by the shipping industry. Additional Hazmat charges will be assessed and are the responsibility of the customer, and will be added to your freight costs.
- Conestoga offers a packaging process called Zero Pack. This method utilizes far less corrugated material and significantly reduces the amount of time and labor required to receive and unpack product. The Zero Pack process will be utilized at Conestoga's discretion for shipments of 30 pieces or more. Shipments of 29 pieces or less will continue to use the box packaging method.
- Many common carriers have implemented a surcharge for large packages including those over 96" in length. Conestoga will select the most economical shipping method to minimize this surcharge. Conestoga will not charge the surcharge for packages delivered on our company-owned fleet trucks.
- Orders placed separately are not guaranteed to ship together, even if a requested ship date is supplied by customer.

Handling & Packaging Upcharges

- Small order quantity charge:
A net charge will be included for small quantity orders containing 1 to 3 pieces. This charge is necessary to offset costs associated with processing, handling and packaging small quantity orders and will be assessed on all custom product orders, including expedites. Cabinet Systems orders and Cabinet Systems parts orders are exempt from this fee.
- Oversize packaging charge:
Oversized products will be packaged using honeycomb cardboard to protect against shipping damage. A product will be considered oversized if it meets one of the following criteria:
 - ♦ Dimensions exceed 36" in width and 36" in length.
 - ♦ Dimensions exceed 84" in width or 84" in length.
 Each oversized product will incur a net charge for packaging. Customers requesting oversize packaging will also receive the per piece net charge. Mouldings and Cabinet Systems parts will not be included in the oversize packaging program and are exempt from this fee.

Handling & Packaging Upcharges (continued)

- **Crate Pack Option**
 - ♦ Robust packaging option used to mitigate potential damage arising from shipping.
 - ♦ Available for doors and drawer fronts only, this option must be requested by the customer.
 - ♦ Available on 63" x 45" pallet only. Doors and drawer fronts up to 60" in one dimension cannot exceed 42" in the other dimension.
 - ♦ Net charge per pallet.
 - ♦ 30 to 250 pieces will incur one pallet charge.
 - ♦ 251 to 500 pieces will incur two pallet charges.
 - ♦ 501 to 750 pieces will incur three pallet charges.
 - ♦ 751 to 1,000 pieces will incur four pallet charges.

Drawer Box and Cabinet Systems Orders

- If you are located in the following states: AL, FL, GA, MS, NC, SC or TN your order will ship from our Kenly, NC facility, all others will ship from our East Earl, PA location.
- Expedites will ship direct from our Kenly, NC facility. These costs are the responsibility of the customer.

Conestoga Freight Terms

- **Open Credit Terms**
 - ♦ Customers with open credit terms will be shipped prepaid via common carriers. A “freight only” invoice will be generated by Conestoga per delivery.
 - ♦ All orders that ship via Conestoga route truck service will be consolidated and one “freight only” invoice will be generated per delivery. Rates vary by zone and weight.
 - ♦ FedEx Ground and UPS Ground will be shipped prepaid and the charges will be added to each invoice.
- **100% Prepay**
 - ♦ Customers will be charged for shipping at the time the order is placed.
 - ♦ Conestoga will estimate the weight of the order and utilize a zone freight matrix to determine freight charges.

Customer Pickup

- A 2.5% handling fee (min. net) is added to all customer pickup orders due to staging, storage and double handling of the product. All customer pick-ups must be scheduled through Customer Service at least four business hours prior to the desired pickup time. Customers picking up their own orders are asked to do so within three days of the acknowledged ship date.
 - ♦ **Warehouse hours of operation are 7:00 a.m. - 3:30 p.m. (EST), Monday through Friday.**

Damaged and Defective Product Policies

- Notify Customer Service in writing, within 12 business days after receipt of shipment, if you receive products that are damaged, defective or in error. Submitted claims must include the following information:
 - ♦ Original order and line numbers.
 - ♦ A list of the defects or errors in the product(s).
- Returns of non-defective merchandise will not be accepted.

Damaged and Defective Product Policies (continued)

- Conestoga will ship replacements or missing items as soon as possible after a claim is reported. Replacement product(s) will be invoiced at the original product cost. A credit will be issued against the original purchase order once the claim has been investigated and the product has been deemed defective. In some instances Conestoga may require that the defective product be returned for inspection prior to a credit being issued, but this return will not impact the lead-time of the replacement item.
- A copy of our Return Merchandise Authorization Form, supplied by Customer Service, must accompany all returned merchandise.

Replacement Order Process

- Replacement orders will be processed as quickly as possible. See the Replacement Expedite Program Chart in the Lead-time Section of this manual for details.
- All replacement orders will be processed according to the customer's normal payment terms. A credit will be issued against the replacement order for all replacement items.

Return Merchandise Authorization (RMA)

- Because our products are custom manufactured from natural materials, we will occasionally ask to have incorrect products returned for quality inspection. This inspection process is necessary to identify how the issue occurred and to improve our overall quality and delivery performance.
- Customer Service will issue a Return Merchandise Authorization (RMA) form to you via e-mail, automated fax acknowledgement or mail. This RMA form will list the products that you have identified as defective. **Please mark your return cartons and boxes with the RMA number listed on this form.**
- All returned merchandise must be shipped with secure, protective packaging materials.

Freight Damage Claims

- **If a Common Carrier or freight shipment contains a damaged package or skid, the freight bill must be marked "DAMAGED". Both the receiving customer and delivery person must sign the freight document. If the freight bill contains no notation of damage, or is lacking the appropriate signatures, the freight carrier will deny the claim. Pictures of both the damaged box or pallet and the damaged product inside are necessary to file a claim with a carrier.**
- Conestoga will process all claims for damaged products shipped on Conestoga's trucks and our preferred common carriers (Ward, FedEx Freight, AAA Cooper and Averitt Express).
- Common carrier claims must be filled out by Conestoga with the appropriate freight carrier. Conestoga will replace damaged items with no expedite upcharges.
- FedEx and UPS Ground damage claims must be filed by Conestoga and will be paid to Conestoga. Valid claims will be credited to the customer. All packaging materials and damaged product must be retained by the customer for inspection or collection by the carrier.
- Damaged product must be reported within 12 business days after receipt of product. Claims for damaged product after 12 business days may be denied.

Missing Product Claims

- For missing product claims, Conestoga will initiate an investigation of the original shipment. The research will include our picking documents, skid listing and Bill of Lading. These documents will verify if the proper number of products were loaded on the delivery truck. The Bill of Lading will show proof of delivery or notations of any delivery or receipt issues.
- Based on the results of the investigation, Conestoga will either issue a credit to your account or notify you that your claim has been denied.
- Conestoga requests that customers verify the package count within 5 business days, and the total number of items and product sizes within 12 business days. Claims filed for missing products after 12 business days may be denied.
- If any portion of a shipment is lost, 7 business days must be given to locate it.

Customer Receiving Process

- For Conestoga route truck deliveries, Conestoga drivers will assist you in verifying that you have received all products listed on a skid report. The skid report documents each skid number and the number of packages on each skid. Any oversized or loose packages will also appear on the skid report. Your receiver will be asked to sign the skid ticket and Bill of Lading as verification that delivery of all packages listed has occurred.

Warranty Information

- Conestoga Wood Specialties Corporation warrants that, for a period of one year from date of shipment, our products will be reasonably free of defects in materials and workmanship. When properly handled, our products will conform, **within acceptable tolerances**, to applicable manufacturing specifications. This limited warranty applies only to Conestoga products which are stored, handled and installed properly. Conestoga will not be responsible or liable for any indirect, consequential or incidental damages or costs sustained by the user.
- Conestoga's warranty is limited solely to the value of the original materials purchased from Conestoga and is further limited in amount to the purchase price paid for such materials. Conestoga will not be liable for the cost of extraneous materials, labor, travel costs, installation expenses or other related expenditures.
- Conestoga will not be liable for damages to products caused by improper handling, storage, assembling, finishing or installation by the customer. Our products are not warranted against expansion occurring as a result of high moisture or humidity conditions.
- Natural characteristics in the wood (burls, grain patterns, pin knots, mineral deposits, sapwood, etc.) that fall within Conestoga's specifications will not be considered defects.
- Most wood species, particularly Cherry, will darken naturally with age. Conestoga is not liable for the change in appearance of any product, finished or unfinished, due to this aging process. Results of aging will be more obvious when using light colored or natural finishes.
- Mitered doors allow a .010" joint gap on the interior corners of the door for up to 1/3 of framing to allow for the expansion/contraction due to seasonal changes.
- Mitered doors are not warranted against joint separations that occur as a result of high humidity or moisture conditions.
- Veneered panel doors are not guaranteed to match solid wood framing on the same door in either the raw or finished state.
- Solid wood moulding color may differ from doors of the same specie.
- Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These stave lines will not be considered defective. **To eliminate the chance of stave offsets, Conestoga recommends utilizing an MDF panel option when using painted finishes.**
- Vertical grain panels that exceed 22" wide by 43-15/16" high or horizontal grain panels that exceed 43-15/16" wide by 22" high in either single or multi-panel products are not warranted against expansion, warpage, cracking or open framing joints.
- Conestoga will warrant 1-piece products against expansion, warpage or cracking if they are within the following parameters:
 - ◆ Product up to 12" wide and 21-15/16" high will be warranted if the expansion or warpage is greater than 1/8".
 - ◆ If the product measures between 12-1/16" to 22" in width, or 22" to 43-15/16" in height, it will be warranted if the expansion or warpage is greater than 1/4".
 - ◆ Any 1-piece product exceeding 22" in width or 43-15/16" in height will not be warranted.
- All solid wood 3-piece drawer fronts over 44" wide or 14" high are not warranted against expansion, warpage, cracking of panels or cracked joints.
- Conestoga expressly disclaims any and all other warranties, whether expressed or implied, including all warranties of merchantability and warranties of fitness for a particular purpose with respect to its products.

Warranty Information (continued)

- Allowable tolerances of bow, warp or twist for single panel, multi-panel, frame only and mullion doors are as follows:
 - ♦ Single panel up to 26" wide and 48" high = 1/8".
 - ♦ Multi-panel up to 26" wide and 48-1/16" to 64-15/16" high = 1/4".
 - ♦ Multi-panel up to 26" wide and 65" to 83-15/16" high = 5/16".
 - ♦ Single panel, single opening frame only and mullion doors over 26" wide and 48" high will not be warranted (mullion lites not to be included in opening count).
 - ♦ Any door exceeding 26" wide or 83-15/16" high will not be warranted.

Finishing Warranty Information

- Conestoga's finishes carry a one year limited warranty against peeling, blistering or cracking, but no warranty against discoloration. Conestoga assumes no responsibility for damages or poor color match when finish is applied by the customer.
- Most wood species will naturally darken with age. Conestoga will not be held liable for the change in appearance of any product, finished or unfinished, due to this aging process.
- Conestoga recommends that a finished sample door be ordered prior to ordering any finished job. We do not suggest ordering large or complex finished product based on small sample swatches.
- Conestoga has established an acceptable range of color for finished products. Orders placed over an extended period of time may vary in color due to the natural aging of the finished substrate and slight variations from batch to batch in finish materials. These variations will not be considered defective and will not be warranted by Conestoga.
- Conestoga's finish materials are interior grade only and not intended for exterior use. Exposure to outdoor conditions will cause failure and will not be warranted.
- Due to the many variables involved in any finishing process, Conestoga assumes no responsibility if products stained by the customer using the DuraGuard system do not produce an exact match to prefinished products purchased from Conestoga.
- Painted or opaque finishes are not recommended on mitered designs. To reduce the chance of joint separation, Conestoga recommends using an MDF panel option.
- Veneers will absorb stain differently than solid wood. The mismatch of solid wood and veneers is not considered defective.

General Lead-Time Information

- Lead-time scheduling may be delayed if order placement questions are encountered. Orders with questions will not be scheduled for production until all questions have been answered by the customer.
- Lead-times are based on normal business days, which excludes weekends, company holidays and non-workdays due to acts of nature. Lead-times do not include transportation time.
- Published lead-times provide an estimated range and will vary according to incoming order volume, material availability, capacity restraints, labor requirements and other factors.
- Following the order entry process, each order is scheduled and committed to a production schedule. This process is completed at the end of each day; assuming no questions are encountered, a ship date is assigned to the order. The ship date appears on the order acknowledgement and can be viewed on the CBP.
- Orders containing products with different lead-times are given the ship date of the product with the longest lead-time. Customers wishing to split their orders and receive products when ready must note this on their order.
- Published lead-time ranges do not include time needed for extra options. Option lead-times add-ons can be found in the Design Options Section of this manual.
- When using the Conestoga route truck delivery service, lead-times will vary according to your truck's delivery schedules. Consult Customer Service with route truck questions and schedules.
- Large quantities, complex orders and products processed through our Special Designs Department may experience extended lead-times.

Order Timing

- All standard orders processed with open terms and received by 9:00 a.m.(EST) on a business day will have the lead-time begin that day. Orders received after 9:00 a.m.(EST) will have the lead-time begin the following day.
- 100% prepay orders will begin the manufacturing process one business day after receipt of payment. Lead-time calculations begin upon the receipt of payment, **not receipt of order**. Orders prepaid using American Express, Discover, MasterCard or Visa obtain faster approval.

Expedite Programs

- Conestoga's expedite program is designed to aid our customers in **emergency** situations where product is needed to complete a job. The expedite program lead-time is based on available capacity.
- See charts on pages 2.2 and 2.3 for lead-time ranges, piece limits and upcharge percentages. Some outsourced products may not be eligible to be expedited; contact Customer Service for availability.
- Expedite charges are based on the net amount of all products ordered before shipping, special handling and taxes are applied. Expedite charges are shown as a line item at the bottom of both the acknowledgement and invoice.
- Code Green expedites can only be used with Cabinet Systems orders. These expedites ship in 4-5 days, with a 35% upcharge. There is a six piece limit on Cabinet Systems Code Green expedite orders.
- The lead-time for a custom door ordered with Cabinet Systems products will be based on the door design.
- Expedite orders received prior to 11:00 a.m.(EST) will be eligible to go into production the same day. **Any expedite order received after 11:00 a.m. (EST) will be eligible to go into production the following day.**

Lead-Time Schedule and Upcharges

Conestoga's lead-times are based on the type and complexity of the product. See previous pages for details on lead-times and expedite programs. All lead-times are subject to change due to incoming volumes and seasonal fluctuations. Options may add additional lead-time.

Replacement/Re-Order Program Lead-Time

- Products incorrectly produced by Conestoga will be replaced with no expedite upcharges.
- Customer re-orders must contain products that were previously ordered. All re-order requests must be submitted in writing and include the original Sales Order and Line numbers that are being re-ordered.
 - ♦ Individual products, up to 6 pieces, damaged or incorrectly ordered by the customer will be re-ordered as a Code Red expedite with no upcharge.
 - ♦ Entire orders, up to 30 pieces, damaged or incorrectly ordered by the customer will be re-ordered as a Code Blue expedite in approximately half the standard lead-time with no upcharge.
 - ♦ Cabinet Systems products damaged or incorrectly ordered by the customer will be re-ordered as a Code Green expedite with no upcharge.

Re-Order Expedite Program (customer issues)

Products	Expedite Code	Upcharge Rate	Restrictions	Lead-times
Custom	Red	No Upcharge	6 piece limit	See Lead-times Chart
Custom	Blue	No Upcharge	30 piece limit	See Lead-times Chart
Cabinet Systems	Green	No Upcharge	6 piece limit	See Lead-times Chart in the Cabinet Systems Manual

Size Specifications

- A minimum size dimension is listed for each door and drawer front. When ordering, one of the minimums must be exceeded by at least 3". For example, if a door minimum is listed at 10" x 10", the door must be ordered as either 10" x 13" or 13" x 10". A door ordered under the minimum listed will incur a list charge. Our minimums are designed to protect our employees by making sure there is always enough material to run through a given piece of equipment.
- If a door is ordered under the stated minimum, a cut-down charge will be incurred. Up to 1" of material may be trimmed from each stile and 3/4" trimmed from each rail, depending on design. Miter doors will not be cut-down.
- Conestoga measures all door framing by its widest dimension. When specifying wider framing, be sure to provide full framing width calculations including edge profile and framing bead.
- When calculating material costs, there is a one square foot minimum on doors only. No minimum on drawer fronts.
- Designs ordered over 26" wide or 48" high will be made with two panels unless specified otherwise by the customer, with the exception of miter designs, 10SQ1 and 10SQ2 MDF doors. One panel will be added for every 26" wide or 48" high. For example, a door measuring 27" x 49" will receive four panels.
- Conestoga will not warranty oversized single panel doors against warpage, cracking and failed corner joints that will develop.
- Unless otherwise specified by the customer, lower panels on multiple panel doors will be made with a square panel regardless of the design ordered. Exceptions include doors with matching top and bottom rails, such as a CRP-2020.
- The maximum height for a solid wood, single panel product is 113" for all species except Bamboo which is 95-3/4".
- The maximum height for a plywood single panel product is 95-1/2" for all species.
- Conestoga manufactures its products to the nearest 1/16" or 1.6mm. A tolerance of +/-1/32" or +/-0.8mm is considered acceptable.

Bow, Warp and Twist Tolerances

- Allowable tolerances of bow, warp or twist for single panel, multi-panel, frame only and mullion doors are as follows:
 - ♦ Single panel up to 26" wide and 48" high = 1/8".
 - ♦ Multi-panel up to 26" wide and 48-1/16" to 64-15/16" high = 1/4".
 - ♦ Multi-panel up to 26" wide and 65" to 83-15/16" high = 5/16".
 - ♦ Single panel, single opening frame only and mullion doors over 26" wide and 48" high will not be warranted (mullion lites not to be included in opening count).
 - ♦ Any door exceeding 26" wide or 83-15/16" high will not be warranted.
- Allowable tolerances for contraction, expansion, bowing, warping and twisting for 1-piece products are as follows:
 - ♦ Up to 12" wide and 21-15/16" high = 1/8".
 - ♦ 12-1/16" to 22" wide or 22" to 43-15/16" high = 1/4".
 - ♦ Any one-piece product exceeding 22" wide or 43-15/16" high will not be warranted.
- Allowable tolerances for contraction, expansion, bowing, warping and twisting for 3-piece products are as follows:
 - ♦ Up to 44" wide and 14" high = 1/4".
 - ♦ Any 3-piece solid product exceeding 44" wide or 14" high will not be warranted.

Mullion and Frame Only Door Specifications

- Frame only doors are constructed as single opening regardless of size. If a mid-rail is desired it must be requested, upcharge applies.
- When ordering any mullion door design, always specify the number of lites desired.
- All custom mullion doors are constructed using wooden splines at each mullion joint.

Effects of Moisture in Wood

- Any solid wood product will expand or contract over time as moisture and climate conditions change. Wood products need stable moisture conditions in order for the joints to remain tight. Refer to the “Expansion Due to Moisture” Chart in this section.
- Effects of moisture (addition to/loss of) may include panel expansion, panel contraction, joint expansion or opening (especially on miter doors), stile bowing, stile/rail expansion and stave to stave lines becoming visible in panels. Contraction of finished panels may also produce an effect called “white line”, in which a narrow strip of unfinished wood becomes visible at the point where the panel inserts into the framing. For details on what is considered acceptable, see “Tips for Avoiding Moisture Related Problems” in this section.
- Wood products located in humid climates are especially susceptible to expansion due to moisture. Conestoga will not warrant product failure caused by excessively humid conditions, including waterfront properties and coastal regions.
- Indoor pools or marine applications such as nautical vessels are considered to be in high humidity conditions regardless of any residential climate control system.
- Wood products located in dry climates are especially susceptible to contraction due to lack of moisture in the air. Conestoga will not warrant product failure caused by excessively dry conditions, such as desert and mountain locations.
- Cabinetry installed in new construction prior to climate control being activated will result in absorption of moisture from other building materials. These materials can include paints, drywall compound, concrete, stucco and wood framing material with high moisture content. Each of these construction materials releases high amounts of moisture into the home during the drying/curing process.
- Wood products installed in non-air conditioned homes, regardless of location, are very susceptible to expansion due to moisture and will not be warranted. All wood products, especially miter doors, need stable moisture conditions in order for the joints to remain tight. Refer to the Expansion Due to Moisture Chart in this section.
- To minimize moisture expansion of wood products, secondary and vacation homes should maintain some form of climate control, even in off season. Conestoga will not warranty products installed in uncontrolled environments.

Preparing Products to be Finished

- As a standard part of our manufacturing process, all non-contoured products are sanded on the face and back, typically using a wide belt sander, finishing with 220 grit prior to packaging and shipping the unfinished products. While this process ensures products that ship from Conestoga are free of surface flaws, upon receipt of the shipment, products can show signs of rub marks, scuffing and minor scratching that can sometimes occur during the shipping process.
- Please note that even when selecting the Cross Grain Removal option, products will not be ready to go directly into the finishing process. To properly prepare for finishing, it is imperative that all products be lightly sanded using automated sanding equipment or palm sanders to remove minor rub and scuff marks, as well as scratches or drag marks. Use 180 grit sandpaper during the final step in the prep-sanding process to ensure the surface of the raw wood is smooth, yet allows the finish to penetrate the wood’s surface.
- Conestoga will not authorize credit requests or process no-charge replacement orders if the customer has failed to properly prepare the product prior to finishing.

Tips for Avoiding Moisture-related Problems

- Many of Conestoga's products possess miter joint applications beyond the listed miter door offering. Examples include Presidential doors and applied moulding doors. Consult your Sales Representative or Customer Service before purchasing any of these products for use in high humidity environments.
- Door expansion experienced prior to installation on the cabinet box will usually recede once the kitchen has been installed in an air conditioned environment. For this reason, we do not recommend trimming or "shaving" the edges of the doors, because once they return to original sizing, the doors will be too narrow. Conestoga will not warrant doors that have been trimmed by the customer.
- Unfinished doors exposed to humid conditions will absorb moisture rapidly and expand. Finished products will also absorb moisture and expand, but at a slower rate. Be aware of these conditions when storing, installing or finishing products.
- Always go to extra lengths to ensure that all wood products are being stored in the proper environment. Conestoga will assume no responsibility for improper storage, handling, packaging, finishing or installation of its products in high moisture/humidity conditions.
- Doors that have been exposed to high moisture conditions and then finished by the customer have an increased chance of white line or halo developing around the panels after the doors have contracted to their original size. We recommend doors be finished in their non-expanded state as soon after delivery as possible.
- Conestoga doors are engineered with a back bevel on all our framing beads. This back bevel allows stains to penetrate the panel raise/framing bead area, helping to reduce the possibility of white line.
- Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These stave lines will not be considered defective. **Utilize Conestoga's hybrid doors or 5-piece MDF products to eliminate stave offset.**
- Conestoga's miter doors feature one of the most durable joint construction methods available. However, panel expansion in high humidity climates will put pressure on any joint, regardless of construction. Therefore, we strongly urge the use of plywood or MDF panel doors to help reduce panel expansion if the kitchen will be in either a high humidity or non-climate controlled location. Please note that even a plywood panel will not inhibit wood movement of the door framing.
- The wider the framing, the greater the chance that the miter joint will open.
- Inset doors are prone to binding inside the cabinet frame as moisture in the environment increases.
- Allow room for expansion when boring for hinges. Hinges must be placed at least 3/4" away from the framing bead. Conestoga will not be liable for improperly bored products.
- Joint failure will result if panels are glued, pinned, stapled or secured to the framing on any wood door. Conestoga will not be held liable in these instances.

Expansion Due to Moisture

How moisture levels effect movement in wood

Wood is a hygroscopic material, meaning that it will absorb and release moisture until it is in equilibrium with the moisture in the air. This is true of all wood, whether it is raw or finished. Finishing will tend to slow down this process, but will not eliminate it. When wood is exposed to a constant humidity, it will achieve a constant moisture content (MC). Wood will increase in width and thickness as it increases in MC, and will decrease in width and thickness as it decreases in MC. Conestoga manufactures its products to an MC of approximately 7%, a level typical in climate-controlled homes.

The graph below indicates how much a 10" wide panel of various species can expand as a result of an increase in moisture content at 10% and 13%. For instance, the chart reveals that a Red Oak panel 10" wide could expand by more than 7/32".

Wood expansion caused by an increase in moisture content				
10" wide sample of wood	7%	10%	13%	
Bamboo	10.00"	10.06"	10.11"	
White Pine	10.00"	10.06"	10.13"	
Mahogany	10.00"	10.07"	10.14"	
Alder/Cherry/Soft Maple	10.00"	10.08"	10.15"	
Walnut	10.00"	10.08"	10.16"	
White Birch/Red Birch	10.00"	10.09"	10.18"	
Hard Maple	10.00"	10.11"	10.21"	
White Oak	10.00"	10.11"	10.22"	
Red Oak	10.00"	10.11"	10.22"	
Hickory	10.00"	10.12"	10.25"	

The chart below shows how the moisture content of wood increases with an increase in relative humidity.
Example: At 70°F, relative humidity in the room is 23%. This means the wood will stabilize at 5% moisture content.

Moisture Content/Relative Humidity in Wood	
Moisture Content	Relative Humidity at 70°
5%	23%
6%	30%
7%	36%
8%	43%
9%	50%
10%	55%
12%	66%
14%	75%
16%	80%
28%	99.9%

Specie and Grade Characteristics

Why Have Different Grades?

Conestoga has developed different grades of material to utilize our natural resources to the fullest. These distinct material grades have been established, allowing you to choose the best alternative for a particular job or finish.

Premium

Conestoga's Premium grade has been developed for those jobs where a more uniform look is needed. This grade contains less of the natural material characteristics and is produced within a more uniform color range.

Premium orders will be matched to obtain a look that is as uniform as possible. However, since each board is different, there may be slight differences in appearance and color between pieces. Premium products will contain fewer and smaller mineral streaks and pin knots than Standard grade. A Premium grade order will give you a job that is consistent throughout for color and material characteristics.

In Heartwood species, such as Cherry or Red Oak, no sapwood will be seen on the face of the door; in Sapwood species, such as Hard Maple, no heartwood will be seen on the face of the door.

Conestoga recommends Premium grade for natural and light tinted finishes.

Hickory is an exception to our normal Premium grade guidelines in that the color variations and lack of uniformity are a characteristic of Hickory. A Premium grade of this specie will include a narrower range of variation and fewer natural characteristics, but will not be uniform in heartwood or sapwood color.

Standard

Conestoga's Standard grade has been developed to meet a wide variety of applications and will provide a very versatile product at a reasonable cost. Standard grade material allows for many of the natural characteristics of the wood to be present in the product while limiting or eliminating the most objectionable. This material grade allows Conestoga to utilize as much of the natural resource as possible while still producing a product that meets the needs of our customers.

Even though each board has its own unique color and grain, staves will be matched for a pleasing appearance. Colors will be blended within each door. Character marks such as pin knots and mineral streaks are limited in size.

At times, vertical cuts will cross glue lines and may leave exposed glue on the edges of the product. While this is common in all species, the glue used in the production of Bamboo is dark in color and may be more apparent than is typical on hardwoods. Visible glue on the edges of Bamboo product is not considered defective.

In Heartwood species, such as Cherry or Red Oak, the amount of sapwood that is present on the face of a door is limited and will only be present in the profiled areas. Sapwood species, such as Hard Maple, limit heartwood to the machined areas.

Conestoga utilizes steamed Walnut. The steaming process turns light colored sapwood to grey. Conestoga's Standard grade Walnut allows a mix of heartwood and grey sapwood throughout both the face and profiled areas of the product. This grade is recommended for medium and dark finishes on Walnut. If no sapwood is desired, order Premium grade Walnut which eliminates all sapwood from the face.

Standard grade works well with most finishes. Light tinted and clear finishes will accentuate the natural characteristics and color differences within the product. Two or more sample doors should be ordered and finished prior to ordering an entire kitchen.

Specie and Grade Characteristics (continued)

Value

Conestoga's "Value" grade material has been developed as an alternative price point product for medium and darker finishes and is only available in Cherry and Red Oak. This grade improves utilization of natural resources by allowing more color variation and other natural characteristics than our Standard grade.

While each board has its own individual appearance in color and grain pattern, staves will be moderately matched for color. Sapwood may be present on the face. Character marks such as pin knots and mineral streaks, although limited in size and amount, will be more prevalent and numerous than in Standard grade.

This grade works very well with most medium to dark finishes. Light tinted and natural finishes will accentuate the natural color differences within the product. Two or more sample doors should be ordered and finished prior to ordering an entire kitchen.

Paint Grade

Conestoga's "Paint Grade" was developed for paint applications and will be comprised of a random mix of four different species – Hard Maple, Red Birch, Soft Maple and White Birch. This grade allows the natural color range of the wood as well as some stain and mineral. This product will not be matched for color and will have heartwood and sapwood present in varying amounts. Knots, wormholes, and other defects that would cause voids are limited, providing a smooth paintable surface.

Individual components of each product will be comprised of a mix of Paint Grade species. Products within the same order may contain varying amounts of Hard Maple, Red Birch, Soft Maple and White Birch. **This grade is intended for painting only and is also available with an MDF panel option.**

Paint Grade Hard Maple

Conestoga's "Paint Grade Hard Maple" was developed specifically for those customers that prefer to use only Hard Maple components for paint applications. This grade will allow the natural color range of Hard Maple including stain and mineral. Products made from this grade will not be matched for color, with heartwood and sapwood present in varying amounts. Knots, wormholes and other defects that would cause voids are limited, providing a smooth paintable surface. **This grade is intended for painting only and is also available with an MDF panel option.**

Rustic Knotty

Conestoga's "Rustic Knotty" grade is available in Alder, Cherry, Hard Maple, Hickory and Red Oak. This grade was developed to provide our customers with a material that allows knots, split knots, ingrown bark, character marks and other natural characteristics. The knots are of varying size, both sound and unsound. This grade allows the natural color of the specie, wormholes and any other naturally occurring defects that may be present in wood. This product will not be matched for color and may have both sapwood and heartwood present in varying amounts. Voids will not be puttied.

Quarter Sawn

Conestoga's "Quarter Sawn" grade is specially cut White Oak lumber where logs are quartered and sliced across the grain resulting in a straight grain pattern. While maintaining the normal color range of flat cut Oak, this method of cutting eliminates cathedral grain, but still allows limited amounts of mineral and pin knots. Quarter Sawn lumber also contains a distinct characteristic called medullary wood rays or "flake". These flakes are clearly noticeable and will appear in a variety of sizes, patterns and directions that become more pronounced after finish is applied. Flakes will be present on the door panels, however, framing will consist of straight grain material that may or may not contain flakes.

Specie and Grade Characteristics (continued)

Rift Cut

Conestoga's "Rift Cut" grade is specially cut White Oak lumber where logs are quartered, then sliced perpendicular to the growth rings of the tree. The result is a grain pattern that is relatively straight, but the spacing between the grain will vary. While maintaining the normal color range of plain sawn White Oak, this method of cutting eliminates cathedral grain, but still allows limited amounts of mineral and pin knots. Rift Cut White Oak material differs from Quarter Sawn White Oak in that only limited amounts of medullary rays or flakes will be present. While the desired overall appearance of Rift Cut is straight grain, angled grain will occasionally be present, especially in longer length boards.

The chart below shows our published specie and grade combinations. Many other species and grades are available with extended lead-times. Contact our Special Designs Department for non-published specie information.

Specie	Grade Availability					
	Premium	Standard	Value	Rustic Knotty	Quarter Sawn	Rift Cut
Alder	No	Yes	No	Yes*	No	No
Bamboo**	No	Yes	No	No	No	No
Birch, Red	No	Yes	No	No	No	No
Birch, White	Yes	Yes	No	No	No	No
Cherry	Yes	Yes	Yes	Yes*	No	No
Hickory	Yes	Yes	No	Yes*	No	No
Mahogany	No	Yes	No	No	No	No
Maple, Hard	Yes	Yes	No	Yes*	No	No
Maple, Soft	No	Yes	No	No	No	No
Oak, Red	Yes	Yes	Yes	Yes*	No	No
Oak, White	Yes	Yes	No	No	Yes*	Yes
Paint Grade	No	Yes	No	No	No	No
Paint Grade Hard Maple	No	Yes	No	No	No	No
Pine, Clear	Yes	No	No	No	No	No
Pine, Knotty	No	Yes*	No	No	No	No
Walnut	Yes	Yes	No	No	No	No

* All mouldings will be clear; Knotty Pine, Quarter Sawn, Rift Cut and Rustic Knotty mouldings are not available.

** Bamboo products are limited to 95-3/4" in length and 47-1/4" in width when ordering vertical grain or 47-1/4" in length and 95-3/4" in width when ordering horizontal grain.

Alternative Material Characteristics

Decorative Laminate Veneer (DLV)

Conestoga's Allure DLV program provides an attractive, dimensionally stable and cost effective door, drawer front and accessory offering for the kitchen, bath and closet industries. All products are made with a TSCA/CARB2 compliant MDF substrate that is molded to create the desired framing and moulding profiles. These profiles are then profile wrapped with the same base materials as used with LPL and HPL decorative surfaces, but these wrapping grade materials have been specially treated to make them pliable without danger of fracturing during the wrapping process. DLV materials are extremely durable and in some, but not all cases, contain an anti-microbial agent that lasts for the lifetime of the product. The center panel materials are thermally fused melamine over a TSCA/CARB2 compliant MDF core. DLV materials come in a variety of colors and patterns commonly found across the U.S. market. Our 5-Piece doors and drawer fronts come in textures that will vary from smooth/satin surfaces to matte finishes, to linear textured patterns, to textured, registered and indexed panels. No finishing is necessary; doors can be removed from the packaging, hardware attached and mounted directly onto the cabinetry.

Medium Density Fiberboard (MDF)

Conestoga's MDF offering was developed as an alternative to solid wood panels for high humidity regions. MDF may be manufactured using a combination of softwood and hardwood fibers, adhesive and resins, resulting in materials that may vary in color depending on the wood fiber used. This mixture is inserted into a press and using high pressure and heat is compressed to the desired density and thickness. The end result is a very stable product that resists expansion and contraction as well as eliminating offset stave lines typically found in solid wood. Our MDF is sanded smooth by our suppliers, however, the finished product will require a primer before being painted to obtain a consistent finished appearance. Cutting through the outer surface to create a panel raise, decorative rout or edge profile will expose the board's internal fibers which are coarse and do not finish as consistently as the board's outer surface. To greatly reduce finishing issues associated with fiber raise, Conestoga recommends ordering our MDF Prep & Seal option (see Design Options section), which provides finish ready profiles.

Conestoga offers 1-Piece MDF, 5-Piece MDF, hybrid products (MDF panel with hardwood framing) and 1SGP (One Side Glueable Paintable) MDF. 1SGP MDF consists of a 3/4" thick MDF substrate with a paintable melamine film laminated to the back. The melamine film increases the stability of the routed 1-Piece recessed panel MDF products that use 1SGP MDF. There is a large selection of MDF board available in the market which can vary greatly in overall quality, density, internal bond and stability. Conestoga has tested many brands and grades of MDF and has chosen the material that provides the best quality results for machining and finishing. All MDF products offered by Conestoga are TSCA/CARB2 compliant.

Thermally Textured Surfaces (TTS)

Conestoga's Intrigue, Strata and Vogue TTS programs are designed with the transitional and contemporary markets in mind. These panels are manufactured by some of the world's premier producers of textured panels. The surfaces emulate traditional and rustic woods, rift cut lumber and a variety of other wood replicas in a diverse selection of textures. Textures range from straight grains to registered and indexed wood patterns complete with cathedrals, knots and other natural characteristics. These materials lend themselves to edgebanded Slab, 3-Piece and 5-Piece doors and drawer fronts. The specially treated surfaces are extremely durable and are applied to a TSCA/CARB2 compliant particleboard substrate using intense heat and pressure. Available in a large number of colors and patterns, finishing is not necessary as these products can go from the carton to the hardware table and right onto the cabinet, minimizing internal costs and lead-time.

Alternative Material Characteristics (continued)

High Gloss

Conestoga’s Synchronicity High Gloss program features two different gloss materials:

PET (Polyethylene Terephthalate) – a 90° sheen high gloss board manufactured to a finished thickness of 19mm. The PET high gloss products are made by laminating a blended 3mil foil sheet of color and an acrylic topcoat to the surface of a TSCA/CARB2 compliant MDF substrate. The back of each sheet is laminated with a matching color, low texture material. Aggressively priced, PET high gloss surfaces are anti-microbial, food and beverage safe and can be used in kitchens, scholastic, medical and pharmaceutical applications.

UV Lacquer – gloss products consisting of a printed melamine paper applied to the face of a TSCA/CARB2 compliant substrate and a high solids UV (ultraviolet) cured topcoat applied over the melamine paper. The UV topcoat layer dries almost instantaneously and results in a 90° sheen level that is extremely durable. The back of the high gloss board is coated with a low texture, matching color melamine; whether the face is a solid color, wood grain, textile or other pattern.

Super Matte

Conestoga’s Synchronicity Super Matte program offers 19mm panels that are composed of a TSCA/CARB2 compliant substrate. The MDF or particle board core (color specific) is bound between 5° sheen matte films on the face of the panel and a matching color melamine on the back. For additional stability and abrasion resistance, the matte films are covered with a layer of polyurethane and transparent primer, a layer of lacquer coating, and topped off with a protective, removable peel coat.

Pricing Procedure for Doors and Drawer Fronts

The price for any custom door or drawer front can be easily calculated by inserting the relevant numbers into the chart below. A brief explanation for reference is given for each required number.

Example 1 – 1 CRP-10 in Standard Grade Hard Maple, 3/4" thick, 15" x 25"

Example 2 – 1 CRP-10 with radius corners in Premium Hard Maple, 1" thick, 15" x 25"

Product Design Choices

All of Conestoga's door and drawer front prices include a choice of edge profile, framing bead and panel raise. However, L-297, L-304 and LC-Inset edge profiles incur an extra charge. For complete details on available options and associated prices, see the Design Options Section.

Before pricing a door or drawer front, verify the availability of the desired options on the design by referring to the Offering and Availability information found immediately after each door design page.

Multiple panel doors have Design Charges equivalent to the number of panels ordered. As an example, a CRP-10 with three panels uses the Design Charge. This policy excludes doors that come standard with multiple panels (i.e. CRP-10102). *Due to construction complexity, all multiple panel miter doors include an additional charge per center stile or midrail plus the per-panel Design Charge.*

CRP-20

8-1/4" x 9-1/4"

2-1/4" framing

Slant raise shown

Due to construction complexity, all multiple panel CRP-10382MT, CRP-10605MT, CRP-10751MT and CRP-1389MT doors include an additional charge per middle rail and middle stile plus the per-panel Design Charge. Vertical grain direction standard unless otherwise noted; horizontal grain available upon request. Minimums listed are based on panel raise shown and will vary by raise; see Offering and Availability for additional options. Framing width listed is determined by measuring across the back of the framing unless otherwise noted. Narrow point of arched and cathedral rails are equal to the width of the stiles.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	CRP-10, CRP-10102 and CRP-20 – all 3/4" and 1" species available. Crawford – all 3/4" species available. CRP-10382MT, CRP-10605MT, CRP-10751MT and CRP-1389MT – all 3/4" species available except Rustic Knotty.
Edge Profiles	
pg 7.1	CRP-10, CRP-10102 and CRP-20 – all 3/4" and 1" profiles available. Crawford, CRP-10382MT, CRP-10605MT, CRP-10751MT and CRP-1389MT – all 3/4" profiles only.
Framing Beads	
pg 7.2	Crawford, CRP-10382MT, CRP-10605MT, CRP-10751MT and CRP-1389MT – design specific, no options available. All other designs all 3/4" and 1" profiles available.
Panel Raises	
pg 7.2A	CRP-10, CRP-10102 and CRP-20 - all 3/4" and 1" profiles available. Crawford, CRP-10382MT, CRP-10751MT and CRP-1389MT – all 3/4" profiles only. CRP-10605MT – P-016, P-057, P-106 and Reverse G-Cove only.
Options	
pgs 7.3-7.15	All options available except Essex Rout on CRP-10605MT, CRP-10751MT and CRP-1389MT.

TW-10916

matching drawer front available

7" x 5-7/8"
Face - 1-7/8" framing
Back - 2-1/4" framing
9/16" Veneered panel

Due to construction complexity, all multiple panel RutlandMTPP doors include an additional charge per middle rail and middle stile plus the per-panel Design Charge. All plywood panel designs use a veneered, composite core panel. All plywood panels except Red and White Birch and Quarter Sawn and Rift White Oak use a plain sliced or half round face and plain sliced or rotary back veneer. Red and White Birch use a rotary face and back. Quarter Sawn White Oak uses a quarter sawn face and plain sliced back. Rift Cut White Oak uses a rift cut face and plain sliced back. Vertical grain direction standard unless otherwise noted; horizontal grain available upon request. Framing width listed is determined by measuring across the back of the framing unless otherwise noted.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	RutlandMTPP - All 3/4" species available except Rustic Knotty, Rift Cut White Oak and Soft Maple. SavannahPP and TW-10 – all 3/4" species available except Rustic Knotty and Soft Maple. TW-10 – all 1" species available except Rustic Knotty and Soft Maple. TW-1038 – 3/4" Cherry, Hard Maple, Paint Grade Hard Maple Hybrid, Quarter Sawn White Oak, Red Oak, Rift Cut White Oak and Walnut only. TW-10716 – 3/4" Cherry, Hard Maple and Paint Grade Hard Maple Hybrid only. TW-10916 – 3/4" Cherry, Hard Maple, Paint Grade Hard Maple Hybrid, Red Oak, Rift Cut White Oak and Walnut only.
Edge Profiles	
pg 7.1	All 3/4" edge profiles available. TW-10 – all 3/4" and 1" edge profiles available.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	Wayland and Ridgemont – all 3/4" species available. Verona – all 3/4" species available except Rustic Knotty and Soft Maple. Note: Applied moulding designs produced in Quarter Sawn and Rift Cut White Oak utilize Standard grade applied mouldings and may contain small cathedrals, angled grain or other characteristics of flat cut White Oak lumber, which are considered acceptable.
Edge Profiles	
pg 7.1	All designs – all 3/4" profiles available.
Framing Beads	
pg 7.2	All designs – design specific, no options available. Note: Verona – applied moulding is installed against the framing bead, but does not overlap. This construction can result in a black line between the framing bead and applied moulding when using painted finishes and is not considered a defect. To avoid this potential issue, order the TW-101728 when utilizing a painted finish.
Panel Raises	
pg 7.2A	Verona – 1/4" veneered panel only. Ridgemont – P-057, P-602 and Reverse G-Cove only. Wayland – P-057, P-602, M-Bead, Presidential, Reverse G-Cove and RM only.
Options	
pgs 7.3-7.15	All options available.
Mullions/Frame Only	
pgs 6.1-6.13	All designs available in frame only and mullions except Verona. For Verona frame only or mullion design, order as CRP-101728 with 2-7/16" framing. Ridgemont mullion – incurs special lite charges. Wayland mullion – incurs standard lite charges.
Matching/Complementary Drawer Fronts	
pgs 4.38-4.39, 4.62-4.63	All available.

*Due to construction complexity, all multiple panel Madison doors include an additional charge per middle and upright rail plus the per-panel Design Charge. All plywood panel designs use a veneered, composite core panel. All plywood panels except Red and White Birch and Quarter Sawn and Rift White Oak use a plain sliced or half round face and plain sliced or rotary back veneer. Red and White Birch use a rotary face and back. Quarter Sawn White Oak uses a quarter sawn face and plain sliced back. Rift Cut White Oak uses a rift cut face and plain sliced back. Vertical grain direction standard unless otherwise noted; horizontal grain available upon request. Minimums listed are based on panel raise shown and will vary by raise; see Offering and Availability for additional options. Framing width listed is determined by measuring across the back of the framing unless otherwise noted.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	Albany, Amesbury, Fairhaven and Sheldon – all 3/4" species available. Bristol and Cortland – 3/4" Cherry, Hard Maple, Paint Grade Hard Maple Hybrid, Red Oak, Rift Cut White Oak and Walnut only. Madison – all 3/4" species available except Rustic Knotty. Stockbridge – all 3/4" species available except Rustic Knotty and Soft Maple.
Edge Profiles	
pg 7.1	Fairhaven – all 3/4" profiles available except LC Inset, L-297 and L-304. All other designs – all 3/4" profiles available.
Framing Beads	
pg 7.2	All designs – design specific, no options available.
Panel Raises	
pg 7.2A	Amesbury – 3/8" and 5/8" Reverse G-Cove. Stockbridge – 1/4" veneered panel only. All other designs – design specific, no options available
Options	
pgs 7.3-7.15	All designs – all options available.
Mullions/Frame Only	
pgs 6.1-6.13	All designs – available in frame only and mullions. Amesbury, Bristol, Cortland and Fairhaven mullion default to CRP-10 with Square bead mullions. Madison mullion defaults to CRP-10751MT with Regular bead mullions, Square bead mullions also available.
Matching/Complementary Drawer Fronts	
pgs 4.46-4.47, 4.62-4.63	All available except Sheldon. Sheldon – order TW-1038 drawer front.

3-Piece and Batten Doors

Aurora

matching drawer front available

7-1/2" x 7-1/2"

Stiles - 2-1/4" framing on face.

Horizontal grain standard on panel.

Solid wood framing sits slightly higher than 3/4" thick plywood panel.

MDF core plywood panel.

Flush Batten

matching drawer front available

6" x 7-1/2"

Battens are attached to back.

See Batten Specifications below.

Batten Specifications

Batten location - 3" from top and bottom of door. 1-7/8" from each door edge.

All plywood panel designs use a veneered, composite core panel. All plywood panels except Red and White Birch and Quarter Sawn and Rift Cut White Oak use a plain sliced or half round face and plain sliced or rotary back veneer. Red and White Birch use a rotary face and back. Quarter Sawn White Oak uses a quarter sawn face and plain sliced back. 3/4" thick Rift Cut panels use rift cut on face and back. All other Rift Cut plywood uses rift cut veneer on face, plain slice on back. Vertical grain direction standard unless otherwise noted; horizontal grain available upon request. Framing width listed is determined by measuring across the back of the framing unless otherwise noted.

**See the one-piece design pricing chart on the opposite page for additional pricing information.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide Aurora – pg 4.61	Aurora – panel available in 3/4" plywood in species listed in chart at bottom of page; framing available in all 3/4" species except Rustic Knotty. Matching specie solid wood edgeband on top and bottom of panel. Flush Batten - all 3/4" species available.
Edge Profiles	
pg 7.1	Aurora – top and bottom, design specific; stiles – all 3/4" profiles available. Flush Batten designs – all 3/4" available.
Framing Beads	
pg 7.2	All designs – design specific, no options available.
Panel Raises	
pg 7.2A	All designs – design specific, no options available.
Options	
pgs 7.3-7.15	Aurora – concealed hinge boring, pegs, radius corners, sample ID label and putty pin holes only. Flush Batten – all options available except Essex Rout.
Mullions/Frame Only	
pgs 6.1-6.13	All designs – frame only not available. For mullions order as a CRP-10 mullion door with Square bead framing.
Matching/Complementary Drawer Fronts	
pgs 4.62-4.63	Available for Aurora and Flush Batten.

Astoria

Savoy

Min: 2" x 6"
Max: 48" x 96"
2mm matching specie
veneer edgeband.
Vertical grain standard on
doors and drawer fronts.

Min: 2" x 6"
Max: 48" x 96"
.5mm matching specie
veneer edgeband.
Vertical grain standard on
doors and drawer fronts.

Astoria/Savoy – Material Charges
(1 sq. ft. min.)

Bamboo (Caramelized)	
Cherry	
Maple, Hard	
Oak, White, Rift Cut	
Walnut	

Bamboo – uses Grade A vertical/caramelized veneers on face and back. Cherry and Walnut – use Grade A book matched veneers on face with Grade 1 veneers on back. Hard Maple and Rift Cut White Oak – use Grade A slip matched veneers on face with Grade 2 veneers on back. All species use 3/4" thick composite TSCA/CARB2 compliant substrates.

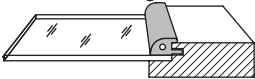

Contrasting Specie Edgeband Option

Panel Specie	2mm Edgeband Specie
Bamboo (Caramelized)	Bamboo (Caramelized)
Cherry	Cherry
Maple, Hard	Maple, Hard
Oak, White, Rift Cut	Oak, White, Rift Cut
Walnut	Walnut

An assortment of 3/4" panel and 2mm edgeband species can be combined to create a striking appearance. Use square footage pricing of the desired panel specie plus a 10% upcharge.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	Astoria and Savoy – 3/4" thick Caramelized Bamboo, Cherry, Hard Maple, Rift Cut White Oak and Walnut plywood only.
Edge Profiles	
pg 7.1	All designs – design specific, no options available. For accompanying wood or MDF products, order Machine Edge to replicate Savoy and L-034 edge to replicate Astoria.
Options	
pgs 7.3-7.15	<p>All designs – weathered grain, concealed hinge boring and Soss hinge boring. Horizontal grain direction available. Sequential grain matching available; see following page for program details and pricing. Sequential Grain Match Order Form in Order Forms Section of manual.</p> <p>Note: Colourtones, primers and Prism Paints are not available on edgeband doors. Use MDF slab with L-034 edge to replicate Astoria or Machine Edge to replicate Savoy as an alternative to utilize Colourtones, primers and Prism Paint finishes.</p>
Mullions/Frame Only	
pgs 6.1-6.13	<p>Mullion designs are available in solid Caramelized Bamboo, Cherry, Hard Maple, Rift Cut White Oak and Walnut only; order as CRP-10 door with square bead. Astoria and Savoy designs are available as frame only. Design Charges: Astoria, Savoy.</p> <p>Note: Solid wood mullion doors may accept stain different than plywood doors.</p> <p>Please note that when Astoria or Savoy frame only is ordered, a medium gray retainer moulding is automatically included (upcharge applies). The retainer moulding covers the raw substrate eliminating the need to mask visible substrates.</p> <p>Note: Astoria and Savoy frame only pricing is calculated using the Design Charge above plus the actual square footage multiplied by the material square foot charge. In addition, the following upcharge must be applied for retainer moulding:</p> <div> <div> 1.0 to 4.0 sq. ft. 4.01 to 7.0 sq. ft. 7.01 sq. ft. or larger </div> <div>  <p>Retainer Moulding</p> </div> </div>

Note: Astoria and Savoy designs will receive a stamp on the back of the door in the bottom left corner to indicate which side is the back of the door. The stamp consists of three small indentations in a triangular pattern which in most cases will be eliminated or partially eliminated when bored for concealed hinges. Frame only options will not receive this stamp.

Sequential Grain Matching

- Sequential Grain Matching is available with Astoria and Savoy doors and drawer fronts.
- Vertical or horizontal grain orientation is available and must be specified.
- Grain matching will flow through all of the associated doors and/or drawer fronts on individual cabinets. A maximum of 6 pieces is permitted within a single cabinet.
- Grain will not match from cabinet to cabinet.
- Due to the cutter diameter required to cut panel blanks, spacing is 1/8" between sequentially matched components unless otherwise noted on specific templates.
- Each door and drawer front will be identified to designate its sequence within a cabinet. Doors and drawer fronts will be stamped on the edge in the lower right corner with a numeric/alpha code combination to represent your item number and all of the related pieces to that specific item. (Example: 1A, 1B, etc.)
- Doors and drawer fronts that require sequential matching are priced using the Material Charges listed below by specie.
- Maximum cabinet sizes cannot exceed 46" across the grain or 94" with the grain.
- Additional information regarding the Sequential Grain Matching program, including configuration templates, is available on the Customer Business Portal or in a PDF file. Contact your Sales Representative or Customer Service.
- In the event that a replacement is needed, the entire template (series of doors and drawer fronts) will need to be reordered to ensure a consistent grain match.

Design Charge (Per Door/Drawer Front)	
Astoria	
Savoy	

Material Charge - Astoria/Savoy (1 sq. ft. min.)			
Bamboo (Caramelized)		Oak, White, Rift Cut	
Cherry		Walnut	
Maple, Hard			

Ordering Instructions

- To achieve Sequential Grain Matching, all corresponding doors and drawer fronts will be cut from an oversized blank.
- Doors and drawer fronts requiring Sequential Grain Matching must be ordered using Conestoga's Sequential Grain Matching (SGM) Templates and Order Form #2 to identify the specific cabinet configuration, position and sequence of the individual pieces within a cabinet. Templates for cabinet configurations from 2 - 6 pieces.
- Select the appropriate SGM template number from PDF that matches your cabinet configuration. Indicate the grain direction of your doors and drawer fronts (vertical or horizontal).
- Following the alpha sequence of the template, enter your doors and drawer fronts in positions A, B, C etc., width x height.
- Indicate whether each piece is being used as a door or a drawer front.
- Specify concealed hinge boring and grain direction, as well as any special instructions in the notes section.

Conestoga Material Pricing Guide

- Premium Grade Upcharge** Add 35% to Standard grade price. Veneer doors ordered in Premium grade will receive Premium framing and Standard grade panel.
- 1" Thick Material Upcharge** Add 30% to Standard grade price for doors and drawer fronts.
- Ordering both Premium and 1"** Material Charges are cumulative. Example: . (Premium upcharge)
- Frame Only Glass Doors** Refer to "Frame-Only" page 6.1 in Accent Doors and Panels for pricing instructions.

*Knotty Pine crown and trim mouldings will be manufactured using Clear White Pine materials. If Clear White Pine doors, drawer fronts and front frames are desired signify Premium grade upgrade.

**Hybrid Products – Defined as solid wood framing with MDF panels. Hybrid Products are recommended when using opaque finishes such as Colourtones, Primers and Prism Paints to avoid stave lines and veneer checking after finish is applied.

Conestoga Material Pricing Guide

Effective July 1, 2024
All prices are per square foot.

Exterior Materials			
Species	Standard Grade Pricing		
	Material Category		
	A	B	C
Cypress*	Not Available		
Mahogany (Sapele)*			
Teak**	Not Available		Not Available
Thermally-Treated Poplar**	Not Available		

*Exterior grade adhesive option available and recommended for any exterior use: upcharge per panel.
**Manufactured with exterior grade adhesives - no upcharge.
1" thick material available in Cypress and Mahogany.
Additional lead-time may be required.
Conestoga finishes are intended for interior use only. Exterior grade finish materials must be used for exterior cabinetry.

The chart below indicates how much a 12" wide panel of various exterior species can expand as a result of an increase in moisture content from 5% to 14%. For example, the chart reveals that a Teak panel that is 12" wide could expand by more than 3/16". A lower value, as shown in the chart below, is directly related to the dimensional stability of the panel. For example, Teak (12.20") and Thermally Treated Poplar (12.11") are more dimensionally stable and consequently have a reduced risk of bow/warp/twist than the other species listed on this chart; however, bow/warp/twist are never eliminated. As shown in the chart on page 3.4 and below, Hard Maple is used as the baseline for wood expansion; however, it is not intended to be used as an external specie.

Wood expansion caused by an increase in moisture content	
12" wide sample of wood at 5% moisture content	... and at 14%
Thermally-Treated Poplar	12.11"
Teak	12.20"
Cypress	12.23"
Mahogany (Sapele)	12.26"
Hard Maple	12.38"

Alternative Materials

Designer and consumer preferences are constantly evolving, with painted finishes and textured Thermally Fused Laminates & melamines continuing to play a prominent role in the kitchen market.

For painted finishes, Conestoga offers a broad selection of MDF doors and drawer fronts, in both 1-Piece and 5-Piece products, including 1-Piece face routed designs and 5-Piece mortise & tenon, mitered, applied moulding and grooved panel doors and drawer fronts. With over 50 MDF door designs to choose from, our MDF products provide the perfect canvas for painted finishes without the expansion-contraction issues associated with painted wood.

Conestoga’s Alternative Material programs consist of six different material collections, with a palette of more than 70 colors in varying textures and finishes. Programs include Decorative Laminate Veneers (DLV - Allure), Thermally Textured Surfaces (TTS - Intrigue, Strata & Vogue), Synchronicity High Gloss and Synchronicity Super Matte. Ranging from the ultra-modern High Gloss and Super Matte Slab doors and drawer fronts, to the more transitional 5-Piece DLV products and Slab, 3-Piece and 5-Piece TTS door designs, these products provide the versatility needed in the kitchen, bath, closet or other rooms throughout the house.

Additional design options include High Gloss and TTS Sequential Grain Matching, and Aluminum Hand Pulls for all Slab designs. Matching accessories are also available within each product line, but vary by collection.

Alternative Materials Table of Contents

MDF – 1-Piece Doors & Drawer Fronts	5.2-5.9
MDF – 5-Piece Doors & Drawer Fronts	5.10-5.29

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Material	
Material Pricing Guide	Corsica – 3/4" MDF only. All other designs – 3/4" and 1" MDF. Note: There is a maximum of 7 square feet for products made with 1" thick MDF. Any 1" MDF product exceeding 7 square feet will be processed through Special Designs and incur additional fees due to labor charges to safely handle these heavy items.
Edge Profiles	
pg 7.1	Corsica – design specific, no options available. All other designs – B-2, C-2, H-2, L-059 L-149, L-253, L-382, L-686, L-803, L-1160, LC-2, Machine Edge, PRS-2 and V-2 available in 3/4" and 1". L-034 – available in 3/4" only.
Framing Beads	
	All designs – design specific, no options available.
Panel Raises	
pg 7.2A	All profiles are design specific, no options. The 10RC and 10RC2 doors are radiused on the inside corners of the framing. The 10SQ1, 10SQ2 and 10SQ3 are square on the inside corners of the framing. MDF products greater than 26" wide or 48" high will be made with two equal panels, unless otherwise specified by the customer, except the 10SQ1 and 10SQ2 designs which are available in single panel only.
Finishing	
pgs 8.1-8.18	All available with Colourtones, primers and Prism Paints.
Options	
pgs 7.3-7.15	All designs – back-routed hand pull, distressing levels 1 and 2, sample ID label, seal coat, concealed hinge boring and Soss hinge rout only. Concealed hinge boring Pattern B not available with 10RC2.
Mullions/Frame Only	
pg 6.1-6.3	All designs - available in frame only and mullions except Slab. Standard lite mullion configurations available with Corsica, 10RC, 10RC2 and 10SQ3. Mullions not available with Slab, 10SQ1 and 10SQ2.
Matching/Complementary Drawer Fronts	
pgs 5.6-5.7	All available except 10SQ1.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Material Pricing	
	See chart below.
Colors	
	Veracruz 225 – Bright White in smooth texture only. Tobago 225 - Bright White, White Dove, Anthracite Matte, Black Matte, Light Grey Matte and White Matte in smooth texture only. Sorrento 225 and Sorrento 300 – White Dove in smooth texture only. Montego 225 - Canadian Grey in smooth texture; Skye in medium texture, registered and indexed pattern.
Construction/Framing	
	All designs – 3/4" thick miter construction, design specific framing beads, no options available. Edge profiles and framing widths design specific, no options available.
Panel	
	All designs – matching color and texture center panel recessed 11/32" from face of framing.
Options	
pgs 7.11-7.15	All designs – concealed hinge boring and sample ID label only. Montego 225 and Tobago 225 - Soss hinge rout.
Mullions/Frame Only	
	<p>Mullion doors not available. Frame only – all available. Medium grey retainer moulding included (additional charge applies). Retainer moulding conceals all visible substrate, eliminating the need to paint or mask these areas.</p> <p>Note: Frame only door pricing is calculated using the Design Charge plus the actual square footage multiplied by the material square foot charge. In addition the following upcharge must be applied for retainer moulding:</p> <p>1.0 to 4.0 sq. ft. 4.01 to 7.0 sq. ft. 7.01 sq. ft. or larger</p> <div data-bbox="917 1194 1169 1302">  <p>Retainer Moulding</p> </div>
Matching/Complementary Drawer Fronts	
pgs 5.34-5.35	All available. To achieve a smaller height drawer front, use the 2-1/4" framing drawer front with the wide frame model.

Allure DLV Filler

- Allure Filler (19mm thick) can be utilized as a functional filler, or applied as a full overlay trim application.
- All edges are banded with matching edgeband – no options.
- Filler width can be customized in 1/16" increments.
- Minimum size – all colors 2-3/4" x 6-3/8".
- Maximum size – Bright White, White Dove – 46" x 96".
- Maximum size – Anthracite Matte, Black Matte, Light Grey Matte, White Matte – 47-1/2" x 96".
- Maximum size – Canadian Grey, Clearwater Oak, Dering Forest, Helena Walnut, Sabine Walnut, Valley Forge Elm, White Chocolate and White Cypress – 34-1/2" x 96" vertical grain.
- Anthracite Matte, Black Matte, Bright White, Light Grey Matte, White Dove and White Matte fillers are manufactured using 19mm board. Canadian Grey, Clearwater Oak, Dering Forest, Helena Walnut, Sabine Walnut, Skye, Valley Forge Elm, White Chocolate and White Cypress fillers are manufactured using 6mm DLV center panel material sandwiched to 1/2" MDF, then edgebanded. Back of fillers using sandwiched construction method is raw MDF.

DLV Veneers

- DLV veneers are .8mm thick with a phenolic backer.
- One end and one side are guaranteed to be free from physical damage.
- Per manufacturer's recommendations, veneers should be unrolled, placed flat and allowed to acclimate 48 hours prior to application.
- Available with PSA backer option - upcharge and additional lead-time applies.
- 3-day lead-time.

Allure DLV Veneers	
	Size
Bright White	48-1/2" x 120"
Canadian Grey, Monaco, White Chocolate, White Dove	48-1/2" x 96-1/2"
Skye	60" x 108"
Anthracite Matte, Black Matte, Light Grey Matte, White Matte	48" x 120"
Clearwater Oak, Dering Forest, Helena Walnut, Ocala Walnut, Sabine Walnut, Valley Forge Elm and White Cypress	48" x 96"

PSA Backer Option

DLV veneers can be ordered with a PSA (Pressure Sensitive Adhesive) backer option. Veneers will be shipped with the PSA adhesive layer protected by a peel coat covering that must be removed prior to application.

- PSA upcharge for Canadian Grey, Clearwater Oak, Dering Forest, Helena Walnut, Monaco, Ocala Walnut, Sabine Walnut, Valley Forge Elm, White Chocolate, White Cypress and White Dove.
- PSA upcharge for Anthracite Matte, Black Matte, Bright White, Light Grey Matte, White Matte and Skye.
- PSA layer is a .1mm thick 3M clear pressure transfer adhesive membrane.
- PSA layer will be applied within 1/4" from one long edge the entire length of the veneer sheet.
- Adhesive width on veneer back is 48", regardless of veneer width.
- One end and one side are guaranteed to be free from physical damage.
- Per manufacturer's recommendations, veneers should be unrolled, placed flat and allowed to acclimate 48 hours prior to application.
- PSA veneers should not be applied to bare solid wood or surfaces covered with sanding sealers, high pressure laminates, melamine or other plastic materials.
- Conestoga is not liable for product failure due to improper surface preparation or installation technique.
- Add 4 days to the veneer lead-time.

Allure DLV Touch Up Kits

Allure DLV material is resistant to surface scratches, dents and normal wear. For care of minor surface abrasions, Touch Up Kits have been carefully matched for each Allure color.

- Kit includes a color marker and fil-stick.
- Order kit by color from chart below.

Allure DLV Touch Up Kits			
Anthracite Matte	Dering Forest	Sabine Walnut	White Dove
Black Matte	Helena Walnut	Skye	White Matte
Bright White	Light Grey Matte	Valley Forge Elm	
Canadian Grey	Monaco	White Chocolate	
Clearwater Oak	Ocala Walnut	White Cypress	

Moulding Cut-Down Option

To combat the exorbitant fees freight carriers are charging for packages 96" or longer, Conestoga offers an option to cut-down any of our mouldings to 90". This includes both trimming of the moulding to length and creating the associated packaging.

- net upcharge per piece.
- To order specify "Cut-Down to 90 inch" Option.

Product Care

Allure DLV products should be cleaned using a mild non-abrasive detergent and damp sponge or cloth. Avoid using abrasive cleaners, brushes, rags or cloths and never saturate DLV products with water or other liquids.

1-Year Limited Warranty

For a period of 1-year from the date of shipment, Allure products will be reasonably free of defects in materials and workmanship. When properly handled, Allure products will conform, within acceptable tolerances, to applicable manufacturing specifications. This limited warranty applies only to those Allure products which are stored, handled, and installed in the manner consistent with Conestoga's wood components. Conestoga will not be responsible or liable for any indirect, consequential or incidental damages or cost sustained by the user.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

TTS Color Selections	
	See Color Availability and Pricing Chart on previous page.
Edge Profiles	
	Design specific – 1mm PVC edgeband has slightly eased edges. Matching color edgeband.
Options	
pgs 5.56, 7.11-7.15	All designs – concealed hinge boring, Soss hinge boring and Sample ID label. Vertical grain direction standard on Slab door and drawer front. Horizontal grain panel standard on 3-Piece door and drawer front; vertical grain panel not available. Slim 5-Piece and 5-Piece doors: vertical grain panel standard; horizontal grain panel option available. Horizontal grain panel standard on a Slim 5-Piece and 5-Piece drawer front; vertical grain panel option available. Sequential grain matching available on Slab design only; see following page for program details and pricing. Sequential Grain Match Order Form located in Order Forms Section of manual. Multi-panel doors available in Slim 5-Piece and 5-Piece designs only. Multi-panel maximum size is 48" x 96". Midrail minimum width is 3" regardless of design selected.
Mullions/Frame Only	
	<p>Mullions not available. Frame only doors available in all Vogue colors eligible for Slim 5-Piece and 5-Piece designs. A medium grey retainer moulding is automatically included (upcharge applies). The retainer moulding covers the raw substrate, eliminating the need to paint or mask visible substrate.</p> <p>Note: Frame only door pricing is calculated using a (list) Design Charge, plus the actual square footage of the door multiplied by the material square foot charge. In addition the following upcharge must be added:</p> <p>1.0 to 4.0 sq. ft. 4.01 to 7.0 sq. ft. 7.01 sq. ft. or larger</p> <div data-bbox="920 1162 1176 1269" data-label="Image">  </div> <p>Retainer Moulding</p>

Sequential Grain Matching

- Sequential Grain Matching is available on all Strata, Vogue and most Intrigue Thermally Textured Surfaces (TTS) edgebanded Slab doors and drawer fronts. Not available in Intrigue TTS U7779 Fog Grey or W1050 Coastal White.
- Vertical or horizontal grain orientation is available on Slab doors and drawer fronts and must be specified.
- Grain matching will flow through all of the associated doors and/or drawer fronts on individual cabinets. A maximum of 6 pieces is permitted within a single sequenced grouping.
- Grain will not match from cabinet to cabinet.
- Due to the total cutter diameter required to cut panel blanks, spacing is approximately 1/8" between sequentially matched components unless otherwise noted on specific templates.
- Each door and drawer front will be identified to designate its sequence within a cabinet. Doors and drawer fronts will be labeled on the face in the lower right corner with a numeric/alpha code combination to represent your item number and all of the related pieces to that specific item. (Example: 1A, 1B, etc.)
- Doors and drawer fronts requiring sequential matching are priced using the Material Charges listed in the chart below.
- Maximum cabinet sizes cannot exceed 46" across the grain or 94" with the grain.
- Additional information regarding the Sequential Grain Matching program, including configuration templates, is available on the Customer Business Portal or in a PDF file. Contact your Sales Representative or Customer Service.
- In the event that a replacement is needed, the entire template (series of doors and drawer fronts) will need to be reordered to ensure a consistent grain match.

Strata Slab - Tier 3		
Vogue Slab		

Ordering Instructions

- To achieve Sequential Grain Matching, all corresponding doors and drawer fronts will be cut from an oversized blank.
- Doors and drawer fronts requiring Sequential Grain Matching must be ordered using Conestoga's Sequential Grain Matching (SGM) Templates and Order Form #2 to identify the specific cabinet configuration, position and sequence of the individual pieces within a cabinet. Templates for cabinet configurations range from 2 pieces to 6 pieces.
- Select the appropriate SGM template number that matches your cabinet configuration. Indicate the grain direction of your doors and drawer fronts (vertical or horizontal).
- Following the alpha sequence of the template, enter your doors and drawer fronts in positions A, B, C etc., width x height.
- Indicate whether each piece is being used as a door or a drawer front.
- Specify concealed hinge boring and grain direction, as well as any special instructions in the notes section.

Thermally Textured Surface Accessories

Complementary accessories to fabricate casework and ancillary items are available in matching TTS color components. Textures do not match panel stock.

TTS Veneers (Intrigue, Strata and Vogue)

- Available in all TTS colors.
Note: Textures on veneers range from linear to registered and embossed and are more subtle compared to panel texture.
- TTS veneers are .8mm thick with a phenolic backer.
- One end and one side are guaranteed to be free from physical damage.
- Per manufacturer’s recommendations, veneers should be unrolled, placed flat and allowed to acclimate 48 hours prior to application.
- Available with PSA backer option - upcharge and additional lead-time applies.
- 3-day lead-time.

TTS Veneers		
Intrigue	Sheet Thickness	Sheet Size

Thermally Textured Surface Accessories (continued)

PSA Backer Option (Intrigue, Strata and Vogue)

TTS veneers can be ordered with a PSA (Pressure Sensitive Adhesive) Backer Option. Veneers will be shipped with the PSA adhesive layer protected by a peel coat covering that must be removed prior to application.

- PSA layer is a .1mm thick 3M clear pressure transfer adhesive membrane.
- PSA layer will be applied within 1/4" from one long edge the entire length of the veneer sheet.
- Adhesive width on veneer back is 48", regardless of veneer width.
- One end and one side are guaranteed to be free from physical damage.
- Proper surface conditions and preparation is essential to successful application and performance of veneered surfaces.
- Per manufacturer's recommendations, veneers should be unrolled, placed flat and allowed to acclimate 48 hours prior to application.
- PSA veneers should not be applied to bare solid wood or surfaces covered with sanding sealers, high pressure laminates, melamine or other plastic materials.
- Conestoga is not liable for product failure due to improper surface preparation or installation technique.
- Add 4 days to TTS veneer lead-time.

TTS PSA Backer			
Veneer	Sheet Size	Thickness w/PSA	PSA Upcharge
Intrigue TTS	49" x 97"	.9mm	
Strata TTS	51" x 120"	.9mm	
Vogue TTS	51" x 120"	.9mm	

*Add PSA application charge to the veneer sheet cost.

TTS Narrow Overlay Filler (Intrigue, Strata and Vogue)

- Narrow Overlay Filler (19mm thick) can be applied to installation fillers for full overlay trim applications.
- Filler width can be customized in 1/16" increments from 1-1/2" to 2-11/16" in width and lengths from 12" to 96".
- All edges are banded with matching edgeband – no option.
- Sold in pairs – no option.

TTS Scribe Moulding (Intrigue, Strata and Vogue)

- Intrigue Scribe Moulding is 3/8" thick x 3/4" wide x 96" long.
- Intrigue Scribe is manufactured utilizing 19mm edgebanded panels edgebanded on the face and both short edges of the moulding, while the two 3/8" thick long edges are the matching TFL board surface. The back of the moulding is uncoated for installation.
- Intrigue Scribe Mouldings are shipped with an additional support piece to provide reinforced stability throughout the delivery process.
- Strata & Vogue Scribe Moulding is 8mm thick x 1-1/4" wide x 96" long.
- Strata & Vogue Scribe is manufactured utilizing edgebanded 8mm material, banded on one long edge and both short edges with matching edgeband.
- Moulding Cut-Down Option is available, but will remove one short edgebanded end.
- Sold in pairs – no option.

TTS Textured Full Sheets 8mm & 19mm for Strata and Vogue, 1/4" and 19mm for Intrigue

- Full sheet dimensions vary by thickness. See chart below for details.
- TTS board surfaces are textured both on face and back.
- **Note:** There are multiple texture combinations within the TTS offerings. In some cases, these textures differ from face to back. When boring for hinges or drilling for decorative hardware, make sure to use the correct surface for the face of all doors, drawer fronts, filler strips, etc.
- Core material consists of TSCA/CARB2 compliant particle board.
- Full sheets will not be edgebanded. If an edgebanded full sheet is desired, order as TTS Slab.

TTS 38mm Slabs (Strata, Vogue)

- Available in Strata and Vogue colors only. 38mm Slabs not available in Intrigue colors.
- Edgebanded on all 4 edges.
- Construction method utilizes two 19mm TTS panels sandwiched together.
- Ideal for use as built-in end panels and columns.
- Vertical grain standard. Horizontal grain option.
- Minimum size – 9" x 9".
Maximum size – Width maximum is 34-1/2" with vertical grain or 96" with horizontal grain. Length maximum is 96" with vertical grain or 34-1/2" with horizontal grain, but due to overall weight of this product, maximum square footage may not exceed 16 square feet per panel.
- Follow standard pricing methodology – (total sq. footage x Material Charge) + Design Charge.

Lightweight TTS 38mm Slabs

- Available in most Strata and Vogue colors. Not available in Intrigue colors.
- Edgebanded on all 4 edges.
- Construction utilizes 7/8" thick, 2" wide wood internal support frame with 7/8" thick polystyrene core material sandwiched between two 8mm TTS panels.
 - ♦ Construction method allows Lightweight 38mm Slabs to be ordered up to a maximum of 23 sq. ft. per panel.
- Vertical grain standard. Horizontal grain option.
- Minimum size – 9" x 9". A 2 square foot minimum charge applies, regardless of actual size. Maximum size – Vertical grain 34-1/2" x 96", Horizontal grain 96" x 34-1/2".
 - ♦ Any panel over 48" in width or height will receive a 2" wide center stile within the internal support frame.
- Follow standard pricing methodology – (total sq. footage x Material Charge) + Design Charge.

Touch Up Kits for TTS Surfaces

Intrigue, Strata and Vogue TTS materials are resistant to surface scratches, dents and normal wear. For care of minor surface abrasions, a Touch Up Kit has been carefully matched for each TTS color.

- Kit includes a color marker and fil-stick.
- Order kit by ID# and color from chart below.
- Many TTS products contain several colors within the overall product appearance. Depending on the location of the area being retouched, it may be necessary to blend the touch up material to achieve the desired appearance.

Synchronicity Super Matte Doors & Drawer Fronts

Conestoga's edgebanded Synchronicity Super Matte Program offers several popular color selections that can provide a contemporary look regardless of installation location. These 5° sheen matte doors and drawer fronts incorporate fingerprint resistance along with a high degree of durability. The Super Matte offering also provides resistance to many household chemicals, scratches, abrasions and effects of UV lighting.

Synchronicity High Gloss Doors & Drawer Fronts

Sequential Grain Matching

- Sequential Grain Matching is available with Synchronicity High Gloss woodgrain and patterned UV Lacquer foil edgebanded Slab doors and drawer fronts. Eligible foils include: Bronze 662, Cobalto 663, Cuzco Oro 633, Gris Metallic 625, Guayana 617, Olmo 634, Olivo 618, Platino 660, Roble Frapé 627 and Titanio 661.
- Vertical or horizontal grain orientation is available and must be specified.
- Grain matching will flow through all of the associated doors and drawer fronts on individual cabinets. A maximum of 6 pieces is permitted within a sequenced grouping.
- Grain patterns will not flow continuously from cabinet to cabinet.
- Because of the width of the tooling used to cut high gloss blanks, 1/8" is consumed between each sequentially matched component.
- Each door and drawer front will be identified to designate its sequence within a cabinet. Doors and drawer fronts will be labeled on the face in the lower right corner with a numeric/alpha code combination to represent the item number and all of the related pieces to that specific item. Example: 1A, 1B, etc.
- Doors and drawer fronts requiring the Sequential Grain Match Option are priced using the Material Charge shown in the chart below.
- Maximum cabinet sizes cannot exceed 46" across the grain, or 94" with the grain.
- Additional information regarding the Sequential Grain Match Option, including configuration templates are available on the Customer Business Portal or as a PDF file. Contact your Conestoga Sales Representative or Customer Service.
- In the event that a replacement part is needed, the entire template (series of doors and drawer fronts) will need to be reordered to ensure a consistent grain match.

----------------------------------	--

Ordering Instructions

- To achieve Sequential Grain Matching, all corresponding doors and drawer fronts will be cut from an oversized blank.
- Doors and drawer fronts requiring Sequential Grain Matching must be ordered using Conestoga's Sequential Grain Matching (SGM) Templates and Order Form #2 to identify the specific cabinet configuration, position and sequence of the individual pieces within a cabinet. Templates for cabinet configurations range from 2 pieces to 6 pieces.
- Select the appropriate SGM template number that matches your cabinet configuration. Indicate the grain direction of your doors and drawer fronts (vertical or horizontal).
- Following the alpha sequence of the template, enter your doors and drawer fronts in positions A, B, C etc., width x height.
- Indicate whether each piece is being used as a door or a drawer front.
- Specify concealed hinge boring and grain direction, as well as any special instructions in the notes section.

Synchronicity Accessories

Synchronicity Edgeband

- Available in all Synchronicity High Gloss and Super Matte colors in full rolls or 125' increments.
- 1mm thick ABS High Gloss banding can be applied with PUR or EVA adhesives.
- Edgeband width is 23mm.
- Full rolls of Synchronicity edgeband vary in length. See chart below for details.

Synchronicity Edgeband Rolls

Synchronicity Veneers

- Available in select High Gloss and all Super Matte colors.
 - One end and one side are guaranteed to be free from physical damage.
 - Per manufacturer's recommendations, veneers should be unrolled, placed flat and allowed to acclimate 48 hours prior to application
 - High Gloss UV Lacquer and Super Matte phenolic-backed veneers are available with PSA (Pressure Sensitive Adhesive) backer option – upcharge and additional lead-time applies.
 - High Gloss PET foil veneers are only available with PSA backer option.
- PSA layer is a .1mm thick 3M clear pressure transfer adhesive membrane.
 - PSA layer will be applied within 1/4" from one long edge the entire length of the veneer sheet.
 - Adhesive width on veneer back is 48", regardless of veneer width.
 - Proper surface conditions and preparation is essential to successful application and performance of veneered surfaces.
 - PSA veneers should not be applied to bare solid wood or surfaces covered with sanding sealers, high pressure laminates, melamine or other plastic materials.
 - Conestoga is not liable for product failure due to improper surface preparation or installation technique.

Cut-to-Size Synchronicity Panels

- It is assumed that all Synchronicity High Gloss and Super Matte Cut-to-Size Panels, regardless of size, will be mounted onto or against another surface leaving the melamine backer hidden after installation. Therefore, Conestoga's specifications allow scuffs, scratches, drag marks, small indentations and slight color variations on panel backs, which will not be considered defective. Cut-to-Size Panel faces and edges, whether banded or non-banded will be produced to the same high quality standards as our doors and drawer fronts. Should a clear panel back be required for a specific application, order as a door.
- Cut-to-Size pricing:
 - Design Charge.
 - Non-edgebanded panel: Min. – 2-1/2" x 2-1/2".
Max. – 48" x 96" (vertical grain).
- Edgeband Options:
 - Design Charge, regardless of number of edges receiving edgeband.
 - ABS edgeband applied to 1 to 4 edges.
 - Edgebanded panel: Min. – 2-3/4" x 6-3/8", Max. – 47-1/2" x 96" (vertical grain).

Synchronicity High Gloss and Super Matte Full Sheets

- Full sheets dimensions vary. See chart below for details.
- Face of all sheet stock consists of Synchronicity High Gloss and Super Matte film with protective peel coat. Back of all sheet stock consists of a matte laminate.
- The substrate of all Synchronicity materials consists of TSCA/CARB2 compliant composite material.
- Full sheets of Synchronicity High Gloss and Super Matte material will not be edgebanded. If a full sheet requires edgeband order as a Mera, Multa or Super Matte Slab door.

Synchronicity Full Sheets				
Material	Color	Sheet Thickness	Sheet Size	Price per sheet

	Calm Sea, Eucalyptus, Midnight Sun, North Wind, Sunflower	19mm	49" x 108"	

Synchronicity Accessories (continued)

Heat Shield

- 1-1/2" x 30" epoxy coated finish.
- 22 gauge aluminum, pre-drilled for easy installation.
- Designed to be mounted on cabinet sides next to heat generating appliances such as ovens and protects edges of doors from heat during oven cleaning.
- Should be installed flush with face of door.
- To order, use part #2602591A for Flat Black or part #2602592A for Flat White.

Synchronicity Super Matte Touch Up Kits

Synchronicity Super Matte material is resistant to surface scratches, dents and normal wear. For care of minor surface abrasions, a Touch Up Kit has been carefully matched for each Super Matte color.

- Kit includes a color marker and fil-stick.
- Order kit by color from chart below.

Synchronicity Super Matte Touch Up Kit	
Color	
Anthracite	Calm Sea
Black	Eucalyptus
Light Grey	Sunflower
White	Midnight Sun
	North Wind

High Gloss Peel Coat Eraser

- 3-7/8" x 1-5/8" x 1-5/8".
- Wooden handle with specialized rubber base that helps grip protective peel coat.
- Used to ease removal of the protective peel coat from the face and edges of high gloss products after cabinet installation is complete, but prior to installation of decorative hardware.
- To order, use part #2602540A.

Please refer to pricing through Con-Nex,
our online ordering program

5-Piece Wood and MDF Frame Only Doors

Most Conestoga wood and MDF door designs are available with a frame only option to complement your solid panel door designs. Frame only doors are a perfect accent and can accommodate a wide array of decorative glass, wire mesh, Leather Panels and other inserts.

Frame Only Pricing

To calculate frame only door square footage, first determine the square footage of the door using the actual exterior door dimensions. If the door is 3.00 square feet or less, substitute 10" for the width of the door, regardless of actual width. If the door is 3.01 square feet or larger, substitute 12" for the width of the door, regardless of the actual width. Use the 10" or 12" width multiplied by the actual height, divided by 144 to arrive at the square footage that will be invoiced. Multiply the square footage by the appropriate Material Charge found in the Material Pricing Guide. Add the Material Charge to the Design Charge of the desired door style. A retainer moulding fee as described below will be added to the frame only door charge.

Note: For TW and CRP designs, use the CRP Design Charge and Category B Material Charge. For example: TW-10 and CRP-10 both use the CRP-10 Design Charge. Most applied moulding designs use Material Category C.

Frame only products exceeding 50" in width and height receive an upcharge for manual sanding and special handling.

Frame Only Retainer Moulding

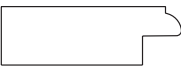

All frame only doors are automatically grooved to accept our clear glass moulding. The clear glass retainer moulding is shipped with the door unless one of the four alternative wood retainer mouldings shown below is requested. Even if a wood retainer is selected, the framing will be grooved to accept the clear retainer moulding unless the customer requests that the framing not be grooved. Clear retainer moulding will be shipped as one continuous piece and must be cut to size and installed by the customer. All wood retainer mouldings are cut to size by Conestoga and must be installed by the customer. Linear inch pricing for all retainer mouldings appears in the illustrations below. The appropriate moulding charge is multiplied by the total number of inches required and included within the frame only door price.

Frame Only and Mullion Framing Options

Regular bead shown

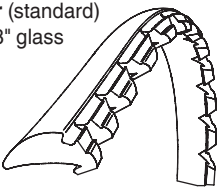

Frame only doors come standard with glass retainer moulding groove.

Non-grooved framing is available. Simply specify "No rout for retainer moulding" in the special instructions portion of the order form.

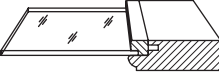

Retainer Moulding Options (specify moulding number)

Clear (standard) for 1/8" glass only.

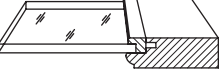

Clear - \$.05 per linear inch.

#906 for 1/8" glass only.

#907 for 1/4" glass.

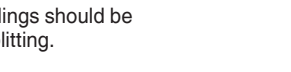

#906 and #907 - \$.10 per linear inch.

#52 for varying glass thickness.

#83 (similar to #52) for Bristol, Cortland and TW-10916. Wood retainer mouldings should be predrilled to avoid splitting.

#52 and #83- \$.10 per linear inch.

5-Piece Wood and MDF Mullion Doors

Conestoga offers a wide variety of mullion configurations and options. Mullions illustrated on the following pages are only a representation of the available patterns. Contact our Special Designs Department for additional mullion information. MDF mullion doors will be constructed with MDF framing and Paint Grade Hard Maple mullion strips.

Mullion Pricing

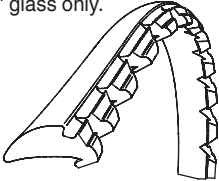

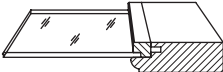

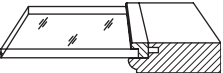

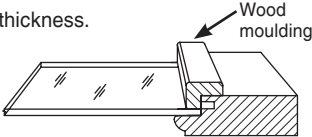

To calculate mullion door square footage, first determine the square footage of the door using the actual exterior door dimensions. If the door is 3.00 square feet or less, substitute 10" for the width of the door, regardless of actual width. If the door is 3.01 square feet or larger, substitute 12" for the width of the door, regardless of the actual width. Use the 10" or 12" width multiplied by the actual height, divided by 144 to arrive at the square footage that will be invoiced. Multiply the square footage calculation by the appropriate Material Charge found in the Material Pricing Guide. Add the Material Charge to the Design Charge of the desired door style. Lite charges and a retainer moulding fee as described below must be added to the framing charge.

- For TW and CRP designs, use the CRP Design Charge and Category B Material Charge. For example: TW-10 and CRP-10 both use the CRP-10 Design Charge.
- Availability of miter and applied moulding mullion doors is listed throughout the Doors and Drawer Fronts Section and the MDF/Alternative Materials Section. Use published Design Charge plus Material Category.
- Most miter designs default to Regular bead profile on the mullion strips. Contact Customer Service for mullion profile confirmation.

- 11-lite Offset Mullion features 2" x 2" corner lites standard.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 framing beads receive Regular bead mullion profile.
- Minimum door size – 11-7/8" x 14-5/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Odd mullion configurations upcharge applies.
- True divided lite option available. Upcharge applies.

***Caution:** Long, continuous mullion strips are highly susceptible to bowing and warping. This condition is typically the result of moisture absorption and expansion of door framing which applies pressure against the mullion strips. Conestoga does not warranty mullions that bow due to exposure to high humidity conditions or environments. A clear adhesive applied between the back of the mullion strip and glass panel may help reduce the amount of noticeable mullion movement. Standard lite mullions are recommended for use in high moisture conditions.

Mullion Doors (continued)

Diamond Double Cross Mullion

- Features 7 radius lites.
- 3/4" F-007, F-1223, Regular, Ogee and Square framing beads available. Regular, Ogee and Square also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square.
- Minimum door size – 8-5/8" x 15-15/16" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Must be quoted through Special Designs.
- Configuration not available with all sizes. A drawing will be sent to customer for approval prior to manufacturing process beginning.

Diamond Mullion*/Double Diamond Mullion*

- Diamond Mullion features a 4" x 4" diamond lite centered in the width of the door opening and 4-1/2" from the top rail. The Double Diamond Mullion features two 4" x 4" diamond lites centered in the width of the door opening and 4-1/2" from top and bottom rails.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 framing beads receive Regular bead mullion profile.
- Diamond Mullion minimum door size – 12-5/8" x 18-5/8" with 2-1/4" wide framing. Double Diamond minimum door size – 12-5/8" x 25-1/4" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Diamond Mullion receives a 5 lite Design Charge. Double Diamond Mullion receives an 8 lite Design Charge.
- Odd mullion configurations upcharge applies.
- For Diamond Mullion pricing add list to door Design Charge, then add individual lite charges and odd configuration upcharge. For Double Diamond Mullion pricing add list to door Design Charge, then add individual lite charges and odd configuration upcharge.

Arched Lite Mullion*

- Arched Lite Mullions feature 7 radius lites.
- All 3/4" framing beads available except F-877, F-1223 and Elite. Regular, Ogee and Square also available in 1". Ogee and F-007 framing beads may burnish when coped.
- Matching mullion profiles in F-007, Regular, Ogee and Square.
- Minimum door size – 11-5/8" x 9-5/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Arched Lite Mullions will be quoted through Special Designs.
- Configuration not available in all sizes. A drawing will be sent to customer for approval prior to manufacturing process beginning.

***Caution:** Long, continuous mullion strips are highly susceptible to bowing and warping. This condition is typically the result of moisture absorption and expansion of door framing which applies pressure against the mullion strips. Conestoga does not warranty mullions that bow due to exposure to high humidity conditions or environments. A clear adhesive applied between the back of the mullion strip and glass panel may help reduce the amount of noticeable mullion movement. Standard lite mullions are recommended for use in high moisture conditions.

Mullion Doors (continued)

Arch Lite with Horizontal Lite Mullion

- Features 11 radius lites – rectangular lites will vary depending on height of door.
- 3/4" F-007, F-1223, Regular, Ogee and Square framing beads available. Regular, Ogee and Square also available in 1". Ogee and F-007 framing beads may burnish when coped.
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square.
- Minimum door size – 11-5/8" x 9-5/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Must be quoted through Special Designs.
- Configuration not available in all sizes. A drawing will be sent to customer for approval prior to manufacturing process beginning.

Continuous Double Arched Lite Mullion*

- Continuous Double Arched Lite Mullions feature 12 radius lites.
- All 3/4" framing beads available except F-877 and Elite. Regular, Ogee and Square also available in 1". Ogee and F-007 framing bead may burnish when coped.
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square.
- Minimum door size – 11-5/8" x 14-15/16" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Continuous Double Arched Lite Mullions quoted through Special Designs.
- Configuration not available in all sizes. A drawing will be sent to customer for approval prior to manufacturing.

Double Bow Mullion

- Features 4 radius lites. Two symmetrical arches intersect in center of door opening.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 framing beads receive Regular bead mullion profile.
- Minimum door size – 11-5/8" x 11-5/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Must be quoted through Special Designs.
- Configuration not available with all sizes. A drawing will be sent to customer for approval prior to manufacturing process beginning.

***Caution:** Long, continuous mullion strips are highly susceptible to bowing and warping. This condition is typically the result of moisture absorption and expansion of door framing which applies pressure against the mullion strips. Conestoga does not warranty mullions that bow due to exposure to high humidity conditions or environments. A clear adhesive applied between the back of the mullion strip and glass panel may help reduce the amount of noticeable mullion movement. Standard lite mullions are recommended for use in high moisture conditions.

Mullion Doors (continued)

Vesica Mullion

- Features 7 radius lites.
- 3/4" F-007, F-1223, Regular, Ogee and Square framing beads available. Regular, Ogee and Square also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square.
- Minimum door size – 8-5/8" x 15-15/16" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Must be quoted through Special Designs.
- Configuration not available with all sizes. A drawing will be sent to customer for approval prior to manufacturing process beginning.

Double Bow Elipse Mullion

- Features 5 radius lites.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 framing beads receive Regular bead mullion profile.
- Minimum door size – 11-5/8" x 11-5/8" and 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Must be quoted through Special Designs.
- Configuration not available in all sizes. A drawing will be sent to customer for approval prior to manufacturing process beginning.

Single/Double Diamond Swag Mullion

- Features concave-shaped diamond(s) with 5 lites for Single Mullion and 8 lites for Double Mullion.
- All 3/4" framing beads available except F-877 and Elite. Regular, Ogee and Square also available in 1". Ogee and F-007 framing beads may burnish when coped.
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square.
- Minimum door size –
Single – 11-5/8" x 11-5/8" with 2-1/4" wide framing.
Double – 11-5/8" x 23".
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Must be quoted through Special Designs.
- Configuration not available with all sizes. A drawing will be sent to customer for approval prior to manufacturing process beginning.

Mullion Doors (continued)

Double Bow Diamond Mullion

- Features double arch mullions and centered diamond with total of 12 lites.
- All 3/4" framing beads available except Elite. Regular, Ogee and Square also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. F-877 framing bead receives Regular bead mullion profile.
- Minimum door size – 11-5/8" x 14-15/16" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Must be quoted through Special Designs.
- Configuration not available with all sizes. A drawing will be sent to customer for approval prior to manufacturing process beginning.

Elliptical Mullion*

- Features an elliptical shape centered in the middle of the door opening.
- Minimum opening of the elliptical shape is 2-1/2" x 5". Must specify size of the centered elliptical shape.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 framing beads receive Regular bead mullion profile.
- Minimum door size – 12-5/8" x 13-5/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Must be quoted through Special Designs.
- A drawing will be sent to customer for approval prior to manufacturing process beginning.

X-Lite Mullion*

- Features diagonal crisscrossed mullion pattern.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite beads also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 framing beads receive Regular bead mullion profile.
- Minimum door size – 8-5/8" x 8-5/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- X-Lite Mullion receives a 4 lite Design Charge.
- Odd mullion configurations upcharge applies.
- For X-Lite Mullion pricing add list to door Design Charge, then add individual lite charges and odd configuration upcharge.

***Caution:** Long, continuous mullion strips are highly susceptible to bowing and warping. This condition is typically the result of moisture absorption and expansion of door framing which applies pressure against the mullion strips. Conestoga does not warranty mullions that bow due to exposure to high humidity conditions or environments. A clear adhesive applied between the back of the mullion strip and glass panel may help reduce the amount of noticeable mullion movement. Standard lite mullions are recommended for use in high moisture conditions.

Mullion Doors (continued)

Double X Mullion / Double X Horizontal Lite Mullion

- Features two diagonal crisscrossed mullion patterns.
- Available with or without one centered horizontal mullion.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite beads also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 framing beads receive Regular bead mullion profile.
- Minimum door size – 8-5/8" x 13-1/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Double X Mullion receives a 7 lite Design Charge; Double X Horizontal Lite Mullion receives an 8 lite Design Charge.
- Double X and Double X Horizontal Lite Mullion openings are equal.
- Odd mullion configurations upcharge applies.
- For Double X Mullion pricing add list to door Design Charge, then add individual lite charges and odd configuration upcharge. For Double X Horizontal Lite Mullion pricing add list to door Design Charge, then add individual lite charges and odd configuration upcharge.

Triple X Mullion / Triple X Horizontal Lite Mullion

- Features three diagonal crisscrossed mullion patterns.
- Available with or without two centered horizontal mullions.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite beads also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 framing beads receive Regular bead mullion profile.
- Minimum door size – 8-5/8" x 17-3/4" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- Triple X Mullion receives a 10 lite Design Charge; Triple X Horizontal Lite Mullion receives a 12 lite Design Charge.
- Triple X and Triple X Horizontal Lite Mullion openings are equal.
- Odd mullion configurations upcharge applies.
- For Triple X Mullion pricing add list to door Design Charge, then add individual lite charges and odd configuration upcharge. For Triple X Horizontal Lite Mullion pricing add list to door Design Charge, then add individual lite charges and odd configuration upcharge.

***Caution:** Long, continuous mullion strips are highly susceptible to bowing and warping. This condition is typically the result of moisture absorption and expansion of door framing which applies pressure against the mullion strips. Conestoga does not warranty mullions that bow due to exposure to high humidity conditions or environments. A clear adhesive applied between the back of the mullion strip and glass panel may help reduce the amount of noticeable mullion movement. Standard lite mullions are recommended for use in high moisture conditions.

Mullion Doors (continued)

X-Lite w/Solid Hub

X-Lite w/Open Hub

X-Lite with Solid Hub Mullion* / X-Lite with Open Hub Mullion*

- Features diagonal crisscrossed mullion pattern with hub centered in the door opening. Hub can be open or solid.
- Open hub diameter is dependent on framing bead profile. Open hub with F-1223, Regular, Square and Elite beads will receive 3" diameter hub. Ogee bead will receive a 3-1/4" diameter hub. F-007 bead will receive a 3-7/8" diameter hub.
- Solid hubs for F-1223, Regular, Square and Elite bead mullions receive a 2" diameter hub. F007 and Ogee beads will receive a 3" diameter hub.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite beads also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 beads receive Regular bead mullion profile.
- Minimum door size – 9-5/8" x 9-5/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- X-Lite with Open Hub Mullion receives a 5 lite Design Charge; X-Lite with Solid Hub Mullion receives a 4 lite Design Charge.
- Odd mullion configurations upcharge applies.
- For X-Lite with Open Hub Mullion pricing add list to door Design Charge, then add individual lite charges. For X-Lite with Solid Hub Mullion pricing add list to door Design Charge, then add individual lite charges.
- Contact Special Designs for quote.

X-Lite Panel Mullion

- Features two-panel door with diagonal crisscrossed mullion pattern in top opening and a panel or frame only in the bottom opening.
- Customer must specify top opening size.
- All 3/4" framing beads available. Regular, Ogee, Square and Elite beads also available in 1".
- Matching mullion profiles in F-007, F-1223, Regular, Ogee and Square. Elite and F-877 beads receive Regular bead mullion profile.
- Minimum door size – 8-5/8" x 15-1/8" with 2-1/4" wide framing.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding or no retainer moulding options available.
- X-Lite with Panel Mullion receives a 4 lite Design Charge.
- Odd mullion configurations upcharge applies.
- For X-Lite with Panel Mullion pricing add list to door Design Charge, then add individual lite charges and odd configuration upcharge.

***Caution:** Long, continuous mullion strips are highly susceptible to bowing and warping. This condition is typically the result of moisture absorption and expansion of door framing which applies pressure against the mullion strips. Conestoga does not warranty mullions that bow due to exposure to high humidity conditions or environments. A clear adhesive applied between the back of the mullion strip and glass panel may help reduce the amount of noticeable mullion movement. Standard lite mullions are recommended for use in high moisture conditions.

Mullion Doors (continued)

QC1000

QC2000

QC1000 / QC2000 Mullions

- Design Charge.
- Quarter Circle mullion doors are typically ordered in sets. When left and right doors are paired on a cabinet, display case or piece of furniture, they create a highly attractive design element.
- 3/4" F-007, F-1223, Regular, Ogee and Square framing beads available.
- Matching mullion profiles available in F-007, F-1223, Regular, Ogee and Square.
- Minimum door width is 10" x 17" with 2-1/4" wide framing on face and 1-13/16" framing on back. Door height must always exceed the door width by at least 2-1/2".
- Specify the number of lites desired when ordering. The visual appeal of the QC mullion doors is greatly impacted by the number of lites.
 - ♦ For the QC1000 mullion design, consult the chart on page 6.12 to see the recommended number of lites per door size.
 - ♦ For the QC2000 mullion design, consult the chart on page 6.13 to see the recommended number of lites per door size.
- Clear plastic retainer moulding standard unless otherwise specified. Wood retainer moulding and no retainer moulding options available.
- True divided lite option available. Upcharges apply.

QC3000 Mullion

QC3000

- Design Charge.
- Quarter Circle mullion doors are typically ordered in sets. When left and right doors are paired on a cabinet, display case or piece of furniture, they create a highly attractive design element.
- 3/4" F-007, F-1223, Regular, Ogee and Square framing beads available.
- Matching mullion profiles available in F-007, F-1223, Regular, Ogee and Square.
- Minimum door width is 10" x 17" with 2-1/4" wide framing on face and 1-13/16" framing on back. Door height must exceed the door width by at least 2-1/2".
- Specify the number of lites desired when ordering. The visual appeal of the QC mullion doors is greatly impacted by the number of lites.
 - ♦ For the QC3000 mullion design, consult the chart on page 6.13 to see the recommended number of lites per door size.
- Clear plastic retainer moulding standard unless otherwise specified. #52 wood retainer moulding and no retainer moulding options available.

Quarter Circle 1000 Radius Mullion Recommendations

Use this chart to determine the ideal number of mullion lites for a given Quarter Circle 1000 door size or to determine availability for a given door size.

CRP-10 and TW-10 Pilaster Doors

CRP-10 Pilaster Door

5-3/4" x 7-3/8"
Slant raise shown

TW-10 Pilaster Door

3-3/4" x 5"
1/4" Veneered panel

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs shown above. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	CRP-10 – all 3/4" species available. TW-10 – all 3/4" species available except Rustic Knotty and Soft Maple.
Edge Profiles	
pg 7.1	Design specific, no options available (Machine edge only).
Framing Beads	
pg 7.2	All 3/4" profiles available.
Panel Raises	
pg 7.2A	CRP-10 – all 3/4" profiles available. TW-10 – 1/4" panel only.
Options	
pgs 7.3-7.15	Available with pegs, cut-downs, distressing, cross grain sanding, antiquing, non-standard width framing, putty pin holes, weathered grain, back-routed hand pull and G-012, G-015 and G-056 panel grooving.

All plywood panel designs use a veneered, composite core panel. All plywood panels except Red and White Birch and Quarter Sawn and Rift White Oak use a plain sliced or half round face and plain sliced or rotary back veneer. Red and White Birch use a rotary face and back. Quarter Sawn White Oak uses a quarter sawn face and plain sliced back. Rift Cut White Oak uses a rift cut face and plain sliced back. Vertical grain direction standard unless otherwise noted; horizontal grain available upon request. Minimums listed are based on panel raise shown and will vary by raise; see Offering and Availability for additional options. Framing width listed is determined by measuring across the back of the framing unless otherwise noted.

CRP-10 and TW-10 Pilaster Posts

Minimums listed are based on panel raise shown and will vary by raise.

- Standard framing widths: 1-1/2" stiles, 2-1/4" rails and 2-1/2" middle rails.
- Posts cannot exceed 12" x 96".
- Standard lead-time 10 days; add 5-6 days for finishing.
- 2-sided and 3-sided pilaster posts are available assembled only.
- Loose side option available only with 4-sided Pilaster Post; no additional charge. Post will be constructed as an assembled 3-sided post with the fourth side held in place with loose splines which can be easily removed, then reinserted at the jobsite.
- During the finishing process it is possible that some finish materials may get on exposed edges. This finishing material should be removed before glue is applied to allow for a proper glue bond.
- CRP-10 and TW-10 Pilaster Posts have the option to receive a slab on any side. When ordering refer to drawing (left) and specify side(s) receiving slab.
- 4-sided posts with slab will not be warranted for open joints or a crack in slab due to expansion and contraction of the post itself.

Wood Accent Doors

6

Accent Doors & Panels

**Crossbuck**

8" x 8"
 2-1/4" framing
 1/4" Veneer panel

**CWS-10302**

7-1/2" x 7-1/2"
 Stiles - 2-1/4" framing
 Rail width varies from 2"
 to 2-13/16" depending on
 height of door.

**CWS-10446**

7-1/2" x 7-1/2"
 Stiles - 2-1/4" framing
 Top rail - 2-1/4" framing
 on face
 Bottom rail - framing
 varies from 2-1/8" to
 2-15/16" on face.

**Half Circle**

8-1/2" x 13"
 Max. width - 26"
 2-1/4" framing
 Slant raise shown

**HL/HR-20**

8-1/4" x 9"
 2-1/4" framing
 HL-20
 (left side door shown)
 Slant raise shown

**Presidential Cathedral**

12" x 11-1/8"
 2-3/4" framing
 Presidential raise shown

Due to construction complexity, all multi-panel Presidential Cathedral doors include an additional charge of per middle rail and middle stile plus the per panel Design Charge. Minimums listed are based on panel raise shown and will vary by raise; see Offering and Availability for additional options. Framing width listed is determined by measuring across the back of the framing unless otherwise noted. Narrow point of arched and cathedral rails are equal to the width of the stiles.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	Crossbuck – all 3/4" species available except Rustic Knotty and Soft Maple. HL/HR-20 and Half Circle – all 3/4" species available, all 1" species available. CWS-10302 and CWS-10446 – all 3/4" species available except Quarter Sawn White Oak, Rift Cut White Oak and Rustic Knotty. Presidential Cathedral – all 3/4" species available.
Edge Profiles	
pg 7.1	HL/HR-20 and Half Circle – all 3/4" and 1" profiles available. Crossbuck, CWS-10302, CWS-10446 and Presidential Cathedral – all 3/4" profiles available.
Framing Beads	
pg 7.2	HL/HR-20 and Half Circle – all 3/4" and 1" profiles available. Crossbuck, CWS-10302, CWS-10446 and Presidential Cathedral – design specific, no options available.
Panel Raises	
pg 7.2A	HL/HR-20 and Half Circle – all 3/4" and 1" profiles available. Crossbuck, CWS-10302 and CWS-10446 – design specific, no options available. Presidential Cathedral – all available except Louis XIII and P-602.
Options	
pgs 7.3-7.15	HL/HR-20 and Half Circle – all options available. Crossbuck, CWS-10302, CWS-10446 and Presidential Cathedral – all options available except panel grooves. Note: CWS-10302 available with non-glazed Colourtones and Prism Paints, glazed and non-glazed wiping stains and Truetones. CWS-10446 available in glazed and non-glazed wiping stains only.
Mullions/Frame Only	
pgs 6.1-6.11	All designs - available in frame only and mullions except CWS-10302 and CWS-10446, which are only available in mullions. Crossbuck mullion – Square bead X-lite recommended. Half Circle, HL/HR-20 and Presidential Cathedral – all available, Presidential Cathedral incurs special lite charge. CWS-10302 and CWS-10446 – order as CRP-10 mullion with Square bead and Square bead mullions. Note: Half Circle mullion placement varies according to door width. Specify configuration to ensure that mullions align when using Half Circle doors with varying widths, or with other mullion designs.
Matching/Complementary Drawer Fronts	
pgs 4.14-4.15, 4.58-4.59	Crossbuck – Slab drawer front recommended. CWS-10302, CWS-10446, HL/HR-20 and Half Circle – CRP-10 drawer front recommended. Presidential Cathedral – Presidential drawer front recommended.

Wood Accent Doors (continued)

6

Accent Doors & Panels

**X Side Panel****X Side Open**

9-1/2" x 12-1/2"
 3" stiles and top rail
 6" bottom rail
 1/4" Veneer panel

9-1/2" x 12-1/2"
 3" stiles and top rail
 6" bottom rail
 Open frame

- 1" thick X Side decorative panels are available as both open frame and with a plywood center panel.
- The X Side overlay has numerous applications including: single panel wall and base end panel overlays, double panel upright refrigerator end panel overlays, and 2 and 3 panel side by side wainscot panel overlays.
- Stiles, top rail and diagonal cross members are 3" wide, bottom rail is 6" wide. All exterior framing can be modified in width, but diagonal cross members are fixed at 3" in width.

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs above. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	All designs – 1" Alder, Cherry, Hard Maple, Hickory, Paint Grade Hard Maple, Rift Cut White Oak, Walnut and White Oak only.
Edge Profiles	
pg 7.1	All designs – all 1" profiles available.
Framing Beads	
pg 7.2	All designs – design specific, no options available.
Panel Raises	
pg 7.2A	All designs – design specific, no options available.
Options	
pgs 7.3-7.15	All options available except panel grooves.
Mullions	
pgs 6.1-6.11	X Side Panel – frame only and mullions not available. X Side Open – mullions not available.
Matching/Complementary Drawer Fronts	
pgs 4.58-4.59	1" Slab drawer front recommended.

*Note: Material calculated on overall width and height.

Wire Grille Inserts

- An accent option for frame only and mullion doors, Conestoga's Wire Grille Inserts are woven, not welded, and crimped to achieve specific patterns and designs. Wire Grille Inserts feature an electroplated finish with a clear lacquer topcoat for durability.
- Grille mesh patterns are size specific – no options.
- Available in three attractive finishes.
- Purchase as cut-to-size pieces.
- Cut-to-size Wire Grille Inserts have pattern centered side to side, top to bottom.
- Wire Grille Inserts will be packaged separate from door.
- Minimum size of all inserts is 6" x 6", maximum size is 20" x 48".
- Wire Grilles can be held in place with standard clear plastic retainer moulding or wood retainer moulding. If 1/8" glass is used in conjunction with Wire Grille Insert use #52 moulding (requires trimming) or #907 moulding. Inserts and Retainer Mouldings must be inserted by the customer.
- Grilles will flex during shipping and handling, but can be gently pulled back to original dimensions.
- Lead-time for all Wire Grille Inserts is 10 business days.
- Expedite program not available.
- Exterior edges of Wire Grille Inserts are sharp. Caution should be used when opening package and handling grille inserts to avoid cuts and other injuries.

WG100 – Round Wire

- Double crimped, 1/16" round wire with 3/4" mesh openings.
- Finishes: Antique Brass, Oil-Rubbed Bronze and Satin Steel.

WG102 - Reeded Wire

- Single crimped, 1/16" x 1/8" reeded wire with 3/4" mesh openings.
- Finishes: Antique Brass, Oil-Rubbed Bronze and Satin Steel.

Please refer to pricing through Con-Nex,
our online ordering program

Wire Grille Inserts (continued)

**WG103 – Flat Wire**

- Single crimped, 1/16" x 1/8" flat wire with 3/4" mesh openings.
- Finishes: Antique Brass, Oil-Rubbed Bronze and Satin Steel.

**WG104 – Reeded Wire**

- Double crimped, 1/16" x 1/8" reeded wire with 1-1/4" mesh openings.
- Finishes: Antique Brass, Oil-Rubbed Bronze and Satin Steel.

**WG105 – Flat Wire**

- Double crimped, 1/16" x 1/8" flat wire with 1-1/4" mesh openings.
- Finishes: Antique Brass, Oil-Rubbed Bronze and Satin Steel.

**WG106 – Reeded Wire**

- Double crimped, 1/16" x 1/8" reeded wire with a combination of 1/2" and 1-1/2" mesh openings.
- Finishes: Antique Brass, Oil-Rubbed Bronze and Satin Steel.

**Please refer to pricing through Con-Nex,
our online ordering program**

Wire Grille Inserts (continued)

WG107 – Flat Wire

- Double crimped, 1/16" x 1/8" flat wire with a combination of 1/2" and 1-1/2" mesh openings.
- Finishes: Antique Brass, Oil-Rubbed Bronze and Satin Steel.

Wire Grille Display Unit

- Features 7 Wire Grille patterns and 3 program finishes.
- Unit is dual sided 11" x 21".
- Maple framing is finished in a medium brown finish.
- Order using part #2601790A.
- Lead-time is 4 days.

Please refer to pricing through Con-Nex,
our online ordering program

Leather Panel Inserts

An accent option for frame only and mullion doors, Conestoga's Leather Panel Inserts are made using recycled leather veneer (RLV™), which is reprocessed leather remnants finished with a layer of resin, making RLV both durable and versatile.

- All Leather Panel Inserts are 4mm thick double-sided sustainable leather veneers. Leather veneers are laminated to both sides of a TSCA/CARB2 compliant composite.
 - Available in seven attractive colors with a random "Buffalo" embossed pattern:
Bright White, Coal, Cocoa, Gold Grey Metallic, Grey Umber, Maple, Paloma Grey.
 - Square foot price: list per square foot for all colors.
 - Can be ordered in combination with frame only doors and drawer fronts, mullion doors, as cut-to-size panels, or 48" x 96" full sheets.
- Note:** Leather Panel Inserts can be ordered in combination with any frame only or mullion door design. CRP-10 and TW-10 frame only drawer fronts are also available with Leather Panel Inserts
- If ordering frame only doors and drawer fronts with Leather Panel Inserts, Conestoga will calculate the required panel sizes.
 - Minimum panel size is 3" x 3"; maximum size is 48" x 96". A 1 square foot minimum charge applies, regardless of actual panel size.
 - Leather Panel Inserts are packaged separately from doors and drawer fronts.
 - Leather Panel Inserts can be installed using standard clear plastic retainer moulding. Panels and retainer mouldings must be inserted by the customer.
 - Lead-time for all Leather Panel Inserts is 15 business days.
 - Expedite program not available.

Leather Panel Insert Sample Kit

- Features 7 attractive double-sided 4mm Leather Panel Insert color samples, a single-sided round leather coaster and a small vile of recycled leather fibers to use in your selling process.
- The attractive glossy black display box ships in a protective outer carton to ensure the display box inside remains free from scuffs, scratches and dirt.
- The Leather Panel Insert Sample Kit measures 3" x 6-3/8" x 6-3/8". Actual samples are approximately 5" x 5", and are individually labeled.
- Net price.
- Order using part #2601791A.
- Lead-time: 3 days.

Wainscot Panels

Wainscot panels can be ordered to match most door styles that Conestoga offers. Each wainscot panel is custom made to meet your exact size, panel and framing specifications.

Wainscot panels are typically constructed with multiple panels and/or wide bottom rails. A wainscot product is defined as any door or panel that exceeds 36" in width and 36" in height, when the length or width exceeds 84", or that contains any framing (stile or rail) 6" in width or wider.

- When ordering wainscot products, specify all rail and stile widths, including center framing pieces. Framing width of the wainscot panel will match the standard framing width of the door design requested unless otherwise noted by customer.
- Dimensioned sketches are preferred with each order to ensure correct order entry.
- Wainscot panels over 119" in width or height, or wainscot products that require more than six panels, will be processed by Special Designs; upcharges apply.
- Bamboo cannot be ordered over 95-3/4" in length due to material availability.
- Stiles or rails over 2-1/4" in width may utilize framing material containing one or more glue joints. Number of glue joints is dependent on the overall width and length of the framing in question. See page 7.10 for framing width glue joint guidelines.
- Finished wainscot panels will have the face and exterior edges fully finished and topcoated. The back of the panel will receive only a clear coat of sealer or primer unless "Finished Back" Option is requested. See the Finish Program Section for pricing of Finished Back Option.

Pricing

- Wainscot panel pricing is calculated using the door Design Charge multiplied by the number of panels specified, then added together with the Material Charge and any wide framing charges.
- If a wainscot panel exceeds 50" in width and 50" in height, a upcharge will be incurred due to the manual sanding process and special handling.
- Wainscot panels with stiles 8-13/16" to 15" will automatically receive a mullion type spline as structural reinforcement. The spline charge is list per stile.
- Wainscot panels will receive an additional charge for oversize packaging if the panel exceeds 36" in width and 36" in height, or if any dimension exceeds 84".

Options

5/16" Square and Diamond Pegs

- Square Peg, list per Diamond Peg.
- For F-007, F-877, F-1223, Regular, Ogee and Square framing beads, pegs will be centered on stile one half of the total width of the stile and one half of the total width of the rail.
- For Elite framing bead submit dimensioned sketch showing peg location.
- When ordering two pegs per corner, specify either diagonal Square or diagonal Diamond pegs.
- Pegs will be sanded flush with face of framing.
- Available in all published species; peg specie must be specified.
- Multi-panel doors will be drilled for one peg at each interior joint, if requested.

5/16" Pyramid Pegs

- list per peg.
- Pyramid Pegs will ship loose and doors will be pre-drilled to accept pegs.
- Pegs will be centered on stiles one half of the total width of the stile and one half of the total width of the rail.
- For Elite framing bead submit dimensioned sketch showing peg location.
- When ordering two pegs per corner, order as diagonal pyramid pegs.
- Multi-panel doors will be pre-drilled for one peg at each interior joint if requested.
- Available in all published species; peg specie must be specified.

Radius Corners

- list per door.
- Specify 1/8", 1/4", 1/2" or 1" radius.
- Available with B-2, C-2, CFP-2, H-2, L-059, L-149, L-281, L-772, L-1160, LC-2, Machine Edge, PRS-2 and V-2 edge profiles only.

Options (continued)

Groove width: 1/4"
Groove depth: 1/16"

G-012 Panel Groove

- list per panel.
- 1-1/2" spacing from center of groove to center of groove standard. Groove pattern begins from center of panel.
- Custom spacing available upon request.

Groove width: 3/32"
Groove depth: 3/64"

G-015 Panel Groove

- list per panel.
- 1-1/2" spacing from center of groove to center of groove standard. Groove pattern begins from center of panel.
- Custom spacing available upon request.

Groove width: 3/8"
Groove depth: 1/8"

G-056 Panel Groove

list per panel.

- 1-1/2" spacing from center of groove to center of groove standard. Groove pattern begins from center of panel.
- Custom spacing available upon request.

Options (continued)

Essex Rout

- list per door.
- Rout is machined on full length of stiles.
- Rout is approximately 3/32" wide x 1/32" deep.
- Cannot be used with applied moulding designs, CRP-10141, CRP-10382MT, CRP-10605MT, CRP-10751MT, Fairhaven, Madison, SavannahMT, RutlandMT, RutlandMTPP, miter designs or Presidential series.
- Add 1 day to lead-time.

Hybrid Panel Prep & Seal Option

- list per panel.
- Hybrid doors and drawer fronts consist of 5-Piece construction utilizing solid wood framing with MDF panels. The MDF panel eliminates stave to stave glue lines that are sometimes visible after painting solid wood panels, as well as veneer seams and splits in plywood panel products.
- The Hybrid Panel Prep & Seal Option eliminates the problematic step of sealing machined areas of MDF panels in an assembled door. This option is especially recommended for products utilizing raised panels. Option not available with P-057 raise.
- This Prep & Seal Option consists of the application of a sealant on the machined areas of the panel. After curing, the sealant is scuff sanded to provide a smooth, finish ready surface. Normal prep sanding of the solid wood framing is still necessary.
- The Hybrid Panel Prep & Seal Option is valid only with unfinished doors and drawer fronts.

MDF 1-Piece, 5-Piece and Hybrid Seal Coat Option

- 1-Piece MDF – list per door, drawer front, Slab door or Slab drawer front.
- 5-Piece MDF and 5-Piece Hybrid – list per door or drawer front.
- The Hybrid and MDF Seal Coat Option consists of an initial machine sanding step in the manufacturing process, followed by the application of a sealant on the face and all machined surfaces including the panel raise, framing bead and edge profile. No sealant is applied to the back and there is no further sanding after the seal coat is applied to the face. Must be scuff sanded by customer before primer is applied.
- Solid wood framing in Hybrid products may show wood characteristics such as pin knots, sap pockets on Cherry and mineral streaks.
- Testing for compatibility and adhesion between Conestoga's Seal Coat and customer's finish materials should take place on a sample door prior to finishing any large items or multi-piece projects. We recommend only **acid cured conversion varnish topcoats**. Conestoga assumes no responsibility for incorrect application of finish materials by the customer that may result in poor adhesion, color mismatch or other finish related issues. Conestoga will not warrant products due to incompatibility issues between our seal coat and non-DuraGuard finish materials.
- All 1-Piece MDF, 5-Piece MDF and 5-Piece Hybrid doors and drawer fronts are available to receive this option.
- This option is available on Hybrid and MDF unfinished products only.
- Add 1 day to lead-time.

Putty Pin Holes

Options (continued)

End Grain Sealant Option

- list per door or drawer front. Multi-panel products will incur a charge per panel.
- Sealant is applied to the end grain of the panel raise and framing which results in a more uniform appearance between the end grain and face grain after finish is applied. While the End Grain Sealant Option will greatly improve the end grain appearance, end grain will still appear somewhat darker than non-end grain areas.
- The End Grain Sealant Option is available on all published species, panel raises and edge profiles.
- The End Grain Sealant Option is available with wiping and spray stains with the exception of Bordeaux, Dark Roast, Espresso, Nickel and Nitefall. End Grain Sealant Option is not available with primers, Colourtones or Prism Paints.
- Add 1 day to lead-time.

Wood Conditioner Option

- Sanding methods used to sand the face of contoured miter framing differs from how center panels are sanded. Depending on specie and finish combinations chosen, stains sometimes absorb quite differently between components resulting in a picture frame effect.
- To minimize color contrast between framing and panels, Conestoga developed a process to apply a wood conditioning treatment to the face of contoured miter framing, crown and trim mouldings. The result is a more uniform finished appearance of all components.
- Available on unfinished and finished miter doors and drawer fronts that meet both the design and specie criteria listed below.
- List pricing for the Wood Conditioner Option:
 - ♦ Doors and wainscot panels – list per panel.
 - ♦ Drawer Fronts – list per panel.
 - ♦ Mouldings: Wood Conditioner is automatically added to moulding finish pricing for applicable specie/finish combinations. Unfinished mouldings may receive this option for the following price:
 - 8' length - per stick
 - 9' to 12' length - per stick
- Any door design with a flat surface on the framing face (regardless of construction type) is not eligible for the Wood Conditioner Option because the wide belt sanding process negates the effect of the conditioner.
- Eligible published miter designs: CRP-10191, CRP-10318, CRP-10334, CRP-10875, CRP-10946, CRP-1420, LaSalle, Prestige, Rothsford and Woodridge.
- The Wood Conditioner Option is limited to select Alder, Cherry, Hard Maple, Soft Maple and White Birch mitred designs.
- Eligible finishes include Autumn, Chestnut, Colonial, Cordovan, Driftwood, Ginger, Harvest Gold, Honey, Portabella, Saddle and Washington Cherry wiping stains.
- Available on unfinished miter designs and species listed above. Wood Conditioner Option must be selected.
- All prefinished miter door and drawer front designs that meet the design, specie and finish criteria will automatically receive Wood Conditioner on framing. Customers have the option to decline this service, but must notify Customer Service via phone, email or through Con-Nex, our online ordering program.
- All prefinished mouldings that meet the specie and finish criteria will automatically receive Wood Conditioner.
- The Wood Conditioner Option does not include sealing center panel end grain. To further enhance the appearance of panel end grain, select the End Grain Sealant Option.

Options (continued)

Weathered Grain Option

- per panel.
 - The Weathered Grain Option consists of random removal of surface material from panels, framing and edge profiles. Softer portions of the wood's surface are removed from the product's face, resulting in a highly textured look and feel.
 - On 5-Piece products such as the CRP-10 door, only the face of the panel and framing and the outside edges of the door will receive the weathering process. Recessed machined areas such as panel grooves and framing beads will not be weathered.
- Only a limited portion of our product offering including door designs, profiles and species are eligible to receive the Weathered Grain Option. This offering was arrived at by running a series of tests on a wide variety of products and product options.
 - ♦ Eligible 3/4" door and drawer front designs: Albany, Amesbury, Ardmere, Astoria, Bristol, Cortland, Crossbuck, CRP-10, CRP-10 Pilaster, CRP-10102, CRP-20, CRP-30, Flush Batten, Geneva, Juno, Lafayette, Radcliffe, Savoy, Sheldon, Slab, Stockbridge, TW-10, TW-10 Pilaster, TW-1038, TW-10716, TW-10916, Venus, Vulcan and Yardley. Select 1" thick designs and profiles available – contact Customer Service.
 - ♦ Eligible 3/4" species: Alder, Bamboo, Cherry, Hickory, Knotty Pine, Quarter Sawn White Oak, Red Oak, Rustic Knotty Alder, Rustic Knotty Cherry, Rustic Knotty Hickory, Rustic Knotty Red Oak, Thermally Treated Poplar, Walnut, White Oak and Rift Cut White Oak. All species listed also available in 1", except Bamboo and Thermally Treated Poplar.
 - ♦ Eligible framing beads: F-1223, Regular and Square only. Framing beads will not receive the weathering feature.
 - ♦ Eligible panel raises: P-057, Reverse G-Cove, and plywood center panels.
 - ♦ Eligible edge profiles: L-034, L-149, L-1160 and Machine Edge – edge profiles receive the Weathered Grain Option.
 - ♦ Eligible options with Weather Grain: back routed hand pull, concealed hinge boring, cross grain sand (back only), cut down framing, distressing levels 1 and 2, à la carte distressing options except wormhole clusters, G-012, G-015, G-056 panel grooves, putty pin holes, Soss hinge boring and wear sanding.
 - ♦ Eligible finishes: all Colourtones, Prism Paints, Truetones and wiping stains, both with and without glazes are available. Finish options include Antiquing. All finishes default to a 5° sheen topcoat, 10° sheen topcoat is also available upon request.

Note: the Weathered Grain Option increases fiber raise which results in minor sand through in random areas. This is not considered defective and may actually enhance the weathered appearance.
 - Maximum panel width is 35".
 - Complementary products: non-beaded front frames, Plywood Pilaster Posts, raised panel valances, slab fillers, fluted fillers, mouldings, S4S cabinet framing, B09 Beaded Panel, #13 Batten, #14 Scribe, #381 Baseboard, #538 Shaker Crown, #1126 Shaker Crown, #1529 Reverse Shaker Crown, #1809 Scribe, #2073 Refacer's Moulding, #2316 Scribe and #2317 Scribe.

Options (continued)

Rendering represents example only. Distressing is a random treatment; appearance of distressing will vary from piece to piece. A physical sample should be purchased before placing an order.

Distressing

- Level 1 – a random distribution of nicks and impressions. Design Charge, per square foot Material Charge.
- Level 2 – a random distribution of nicks and impressions, simulated wormholes, razor cuts and cut joints. Design Charge, per square foot Material Charge.
- Level 3 – a random distribution of nicks and impressions, simulated wormholes, rasp marks and cracks. Design Charge, per square foot Material Charge.
- Front frames, mouldings, ornaments and range hoods will receive modified distressing. Treatments on range hoods will be limited in intensity and will vary by style of hood.
- Not eligible on 1-Piece MDF, 5-Piece MDF or Hybrid products.
- Add 1 day to lead-time.

Distressing À La Carte

- Any of four distressing treatments can be ordered individually, or grouped in various combinations.
- Distressing treatments create a look of aged cabinetry that has withstood years of everyday use. Each treatment option will be applied in a random fashion to simulate varying degrees of wear.
- Not eligible on 1-Piece MDF, 5-Piece MDF or Hybrid products.
- Distressing treatment selections can be tailored to include one, two, three or four selections from the following options:
 - ♦ **Nicks and Impressions** – a number of indentations and nicks will be randomly applied across the face of the door or drawer front. Indentations of various shapes and sizes will be found on framing and panel.
 - ♦ **Rasp Marks** – located on the exterior edges of doors and drawer fronts, rasp marks are created by applying downward pressure on a large-tooth file which is dragged at an angle across the edge of the door's exterior profile.
 - ♦ **Razor Cuts & Cut Joints** – will give the appearance of splits or surface cracks radiating from the ends of framing or panel and will run parallel to the grain. Random cuts typically range from 2-1/2" to 5" in length and may vary in width. Cut joints consist of highlighting or widening random joints with a utility knife to create a look of joints that have slightly opened from years of stress and frequent use.
 - ♦ **Wormhole Clusters** – appearance of wormhole clusters will be spaced randomly on the face of the door or drawer front. Clusters will vary in size, shape and appearance.
- Pricing is based on a Design Charge plus a material square footage charge. The first option will incur a Design Charge, regardless of the treatment chosen. Each subsequent treatment will incur an additional Design Charge. The Material Charge will remain at per square foot, regardless of the number of treatments selected.

Pricing example: Wormhole Clusters and Rasp Marks on a 15" x 25" door.

Wormhole Clusters + Rasp Marks + Material Charge

Options (continued)

Cross Grain Sanding

- The Cross Grain Sanding Option is available only on unfinished doors and drawer fronts.
- Please note, even with cross grain removal, doors are not finish-room ready. To prepare properly for finishing, we recommend a light white wood sand.
- This option is automatically included at no charge on prefinished products. Prices below are per panel for unfinished doors, wainscoting and appliance panels, and per piece for other unfinished products such as drawer fronts and 1-Piece valances.
 - ◆ Face, back and edge profile
 - ◆ Face and edge profile only
 - ◆ Face and back only
 - ◆ Edge profile only
 - ◆ Face only

Wear Sanding

- list per panel.
- The Wear Sanding Option provides an aged appearance to unfinished doors and drawer fronts. On raised panel designs, sanding is applied to the corners of the panel and the outside corners of the framing. Recessed panels, mullions and frame only designs will receive sanding on the outside corners of the frame. Sanding will be random and each corner will vary in appearance.
- Wear Sanding is available on range hoods, but will be limited in intensity depending on the style of hood selected.
- Wear Sanding is not available on front frames.

Antiquing

- Design Charge, per square foot Material Charge.
- Antiquing is a random post-finish sanding treatment that exposes raw wood corners and edges. This treatment provides a complementary worn look to our distressing packages.
- To achieve a heavier level antiquing, combine this option with the Wear Sanding Option.
- Antiquing is not available on front frames.
- Antiquing is available on range hoods, but will be limited in intensity and will vary by style of hood.

Options (continued)

Back Routed Hand Pull

- list per door.
- Specify location: top or bottom and left, right or centered.
- Rout is 3-5/8" wide and 3/8" deep. When specifying left or right hand, pull will start 3" in from edge of door. Hand Pull is centered on doors less than 10" wide.
- Available with the following published edge profiles: L-034, L-059, L-149, L-281, L-382, L-803, L-1160, LC-2, Machine Edge and V-2.
- Add 1 day to lead-time.

Non-Standard Width Framing

Non-Standard Width Framing (1-1/4" minimum width) Only available on mortise and tenon constructed doors

Width	Cost per stile and rail
1-1/4" to standard width	
Standard width to 6-7/16"	
6-1/2" to 8-3/4"	
*8-13/16" and wider	

*Stiles 8-13/16" wide and over automatically receive a mullion-type spline as a structural reinforcement. Charge for spline is list per stile. Add 4 days to lead-time.

Wide framing may contain one or more glue joints, depending on overall desired width. The chart below lists the number of glue joints allowed in the different framing widths. These glue joints are considered acceptable.

Framing Glue Joint Parameters	
Framing Width	Number of Acceptable Glue Joints
2-3/8" to 4" width	1 glue joint is acceptable
4-1/16" to 6" width	2 glue joints are acceptable
Over 6" in width	2 or more glue joints are acceptable

Miter Bead Design with Non-Standard Framing Widths

CRP-10382MT, CRP-10605MT, CRP-10751MT, CRP-1389MT,
Madison, Presidential, RutlandMT, RutlandMTPP & SavannahMT

Framing Width	Cost per stile and rail
Standard width to 6-7/16"	
6-1/2" to 8-3/4"	
*8-13/16" and wider	

*Stiles 8-13/16" wide and over automatically receive a mullion-type spline as a structural reinforcement. Charge for spline i list per stile. Add 4 days to lead-time.

Options (continued)

Cut Down (Width or Height)

- list per door.
- The Cut Down Option is available for Wood/MDF mortise and tenon doors and drawer fronts and 3-Piece and 5-Piece Intrigue, Strata and Vogue TTS Alternative Materials products that are manufactured to the minimum size and cut down to achieve a smaller size. This option is not available for mitered designs.

Soss Hinge Boring

- list per door. (assumes two bores).
- Routs are placed 9" off center, measured from the vertical center of the door to the start of the rout.
- Not available on doors over 42" high or under 25-1/8" high.
- Boring available on the following edge profiles only: L-149, L-1160 and Machine Edge.

Concealed Hinge Boring: Pattern "A" 2.5mm

- list per door (assumes two bores).
- Hole placement primarily designed for framed cabinetry.
- Boring consists of a 35mm diameter hole, 13.5mm deep with a 2.5mm tab dimension from the edge of the door.
- Insert holes are 8mm in diameter, 11.9mm deep, located 9.5mm from the center of the 35mm bore to the center of the 8mm insert bore.
- Specify with insert holes or cup only.
- Doors 8-13/16" – 42" long receive two bores.
- Doors 42-1/16" – 72" receive three bores (\$1.00 upcharge applies).
- Doors 72-1/16" and longer receive four bores with center holes set 25" in from each end (\$2.50 upcharge applies).
- Boring available on the following edge profiles only: B-2, CFP-2, H-2, L-034, L-059, L-149, L-281, L-297, L-382, L-803, L-1160, LC-2, LC-Inset, Machine Edge, PRS-2 and V-2.
- Concealed Hinge Boring is available on inset/prefit doors. Pattern "A" with or without insert holes, L-149, L-1160 and Machine Edge only.
- Pattern "A" accommodates the following hinge models for framed cabinetry:
 - Blum: Compact 33, 38C, 38N and 39C series.
 - Grass: TEC series.
 - Amerock: Matrix and 2811 series.
 - Mepla: ACC162 (screw-in version).
 - Salice: "S" series.
- Custom boring locations available – list per door. Specify dimension from top or bottom edge of door to center of cup locations.

With insert holes

Cup Only

Options (continued)

With insert holes

Cup Only

Concealed Hinge Boring: Pattern "B" 5mm

- list per door (assumes two bores).
- Hole placement primarily designed for frameless cabinetry.
- Boring consists of a 35mm diameter hole, 13.5mm deep with a 5mm tab dimension from the edge of the door.
- Insert holes are 8mm in diameter, 11.9mm deep, located 9.5mm from the center of the 35mm bore to the center of the 8mm insert bore.
- Specify with insert holes or cup only.
- Doors 8-13/16"– 42" receive two bores.
- Doors 42-1/16"– 72" receive three bores with the third centered on the height of the door (\$1.00 upcharge applies).
- Doors 72-1/16" and greater receive four bores with center holes set 25" in from each end (\$2.50 upcharge applies).
- Boring available on the following edge profiles only: B-2, CFP-2, H-2, L-034, L-059, L-149, L-281, L-297, L-382, L-803, L-1160, LC-2, LC-Inset, Machine Edge, PRS-2 and V-2.
- Concealed Hinge Boring is available on inset/prefit doors with the following edge profiles: L-149, L-253, L-686, Machine Edge, L-947, L-967, L-304, L-996 and L-1160.
- Pattern "B" accommodates the following hinge models for frameless cabinetry:
 - Blum: 107, 120, 120+, 170, Diagonal 20, 30, 37, 45, Angle 25 and CLIP Top Series.
 - Grass: TEC, Nexis and Tiomos Series.
 - Salice: 200 Series (use 2mm mounting plate).
- Custom boring locations available - list per door. Specify dimension from top or bottom edge of door to center of cup locations.

Concealed Hinge Boring: Pattern "C" 5mm

- list per door (assumes two bores).
- Hole placement primarily designed for frameless cabinetry.
- Boring consists of a 35mm diameter hole, 13.5mm deep with a 5mm tab dimension from the edge of the door.
- Insert holes are 8mm in diameter, 11.9mm deep, located 9.5mm from the center of the 35mm bore to the center of the 8mm insert bore.
- Specify with insert holes or cup only.
- Doors 10"– 42" receive two bores.
- Doors 42-1/16"– 72" receive three bores with the third centered on the height of the door (\$1.00 upcharge applies).

Options (continued)

With insert holes

Cup Only

Concealed Hinge Boring: Pattern "C" 5mm (continued)

- Doors 72-1/16" and greater receive four bores with center holes set 25" in from each end (\$2.50 upcharge applies).
- Boring available on the following edge profiles only: B-2, CFP-2, H-2, L-034, L-059, L-149, L-281, L-297, L-382, L-803, L-1160, LC-2, LC-Inset, Machine Edge, PRS-2 and V-2.
- Concealed Hinge Boring is available on inset/prefit doors with the following edge profiles: L-034, L-149, L-253, L-686, Machine Edge, L-947, L-967, L-304, L-996 and L-1160.
- Pattern "C" accommodates the following hinge models for frameless cabinetry:
 - Blum: 107, 120, 120+, 170, Diagonal 20, 30, 37, 45, Angle 25 and CLIP Top Series.
 - Grass: TEC, Nexis and Tiomos Series.
 - Salice: 200 Series (use 2mm mounting plate).
- Custom boring locations available - list per door. Specify dimension from top or bottom edge of door to center of cup locations.

With insert holes

Cup Only

Concealed Bi-Fold Hinge Boring

- Hole placement is primarily designed for edge-mount style bi-fold hinges.
- Boring available on the following edge profiles only: B-2, CFP-2, H-2, L-034, L-059, L-149, L-281, L-297, L-382, L-803, L-1160, LC-2, LC-Inset, Machine Edge, PRS-2 and V-2.
- Boring consists of a 35mm diameter hole, 13.5mm deep, 12.5 mm on center from edge of the door.
- Insert holes are 8mm in diameter, 11.9mm deep, located 9.5mm from the center of the 8mm insert bore.
- Specify with insert holes or cup only.
- Doors 9-1/2" – 42" receive two bores.
- Doors 42-1/16" – 72" receive three bores with the third centered in the height of the door (\$1.00 upcharge applies).
- Concealed bi-fold rout accommodates Blum's CLIP top 60 degree bi-fold hinge (CWS #2103583).
- Custom boring locations available. Specify dimension from top or bottom edge to the center of cup locations.

Options (continued)

HK-XS Hinge Boring

Pattern A

Pattern B

- Boring location designed specifically for Blum HK-XS lift mechanisms (CWS#'s 2103577, 2103578, 2103579 and 2103580).
 - ♦ Door width range: 12" – 72".
 - ♦ Door height range: 9-3/8" – 24".
- Hole placement is designed to rail mount concealed framed or frameless style hinges.
- HK-XS Pattern A Rout has a 2.5mm tab dimension from the edge of the door, primarily for framed cabinetry.
- HK-XS Pattern B Rout has a 5mm tab dimension from the edge of the door, primarily for frameless cabinetry.
- Boring consists of a 35mm hole 13.5mm deep placed on each end of the door 1-1/4" + the stile width of the door design.
- Specify with insert holes or cup only.
- Insert holes are 8mm in diameter, 11.9mm deep, located 9.5mm from the center of the 35mm cup bore.
- Doors 12" – 42" receive two bores.
- Doors 42-1/16" – 72" receive 3 bores (\$1.00 upcharge applies).
- Boring available on the following edge profiles: B-2, CFP-2, H-2, L-034, L-059, L-149, L-281, L-382, L-803, L-1160, LC-2, Machine Edge, PRS-2, V-2, L-297 and LC-Inset.
- Custom boring locations are not available.

Aluminum Hand Pulls

Front View
J-Style

Side View
C-Style

- Design Charge: list per Slab door or drawer front, regardless of hand pull design selected.
- Material Charge:
 - J-Style – Natural Aluminum: \$.45 per linear inch.
 - J-Style – Polished Chrome: \$.60 per linear inch.
 - C-Style – Natural Aluminum: \$.50 per linear inch.
- Widths: Min. – 6", Max. – 48".
- Available on Astoria and Savoy, all Intrigue, Strata and Vogue TTS Slab products, Synchronicity Super Matte Slab products and Synchronicity High Gloss Mera Slab products.
- Not available with Sequential Grain Match Option.
- Doors and drawer fronts are routed on the top or bottom edge to accept hand pull – side rout not available.
- Hand pulls are cut-to-size, labeled to match the corresponding panel, wrapped and shipped separately.
- Hand pulls are designed with an integrated inset spline. Silicone caulk or construction adhesive should be used to affix the hand pull to the panel.
- Aluminum hand pull only option is available.
- When ordering Slab doors or drawer fronts with the Aluminum Hand Pull Option specify the total height of the door, including hand pull. Conestoga will subtract the height of the hand pull and size the panel accordingly.
- When ordering Slab doors or drawer fronts with the Hand Pull Option and concealed hinge boring, specify top or bottom for hand pull and left or right for hinge boring. For hinge bore to be located 3" from top edge, order as follows for each available hand pull:
 - ♦ J-Style – request 1-13/16" bore location on top/bottom of door.
 - ♦ C-Style – request 1-5/8" bore location on top/bottom of door.

Options (continued)

Conestoga Design: CRP-10772
Specie/Grade: Alder/Standard
Bead: Regular
Raise: Slant
Edge Profile: L-149
Options:

Pack:
 1/1/21

Finish: Honey Finish, Sable Glaze, 15 sheen topcoat

Wood/MDF Sample ID Label

Conestoga Design: Strata Slab

Color: B011 Bianco

Options:

Order # 123456

Pack:
 1/1/21

Alternative Material Sample ID Label

Sample ID Label

- The Sample ID Label Option identifies specific attributes of door and drawer front samples. Labels are tack-free and easy to remove. Label is intended to be replaced with your company's customized label.
- Available on doors and drawer fronts only; this option is not available on specialty or accessory products.
- ID labels are available on unfinished and finished doors and drawer fronts.
- Sample ID labels utilize Conestoga nomenclature, customization is not available.
- Label content will vary depending on material selected.
- Wood/MDF label includes: Conestoga design, specie/grade, bead, raise, edge profile, selected options, finishing information and package date.
- Alternative Materials label includes: Conestoga Design, color, selected options, order number and package date.
- All finished doors or drawer fronts will receive a second disclaimer label along with an ID label.

Toe Kick Notch

- Available in 3/4" thick 5-Piece mortise and tenon doors with square bottom rails and Slab doors only.
- Standard Toe Kick Notch Option is 3" deep by 4" high and requires a bottom rail of 6" wide or greater. All other dimensions within the minimum and maximum depths and heights will be processed by Special Designs at no upcharge.
- Toe Kick Notch sizing is available in 1/16" increments.
- Minimum custom notch size is 2" deep by 2" high. Maximum custom notch size is 6" deep by 10" high.
- Width of bottom rail must exceed height of Toe Kick Notch by at least 2" to ensure joint integrity.
- Specify location of notch – left side, right side or with both left and right side notched.
- The inside corner of the Toe Kick Notch Option will have a 1/8" radius.
- Toe Kick Notch Option not valid with hinge boring.

Finishing Program Overview

- Conestoga's finishing capabilities allow our customers to simplify their shop process by eliminating the finishing of doors, mouldings and other products. Outsourcing finishing ultimately reduces VOC emissions and helps streamline throughput by minimizing the finishing bottleneck.
- Conestoga's finishing program consists of traditional wiping stains, Truetones, Colourtones, Prism Paints, glazes, primers and topcoats. Combined, these finish options create a palette of over 7,000 unique combinations.
- Conestoga has two topcoats available: 10° (low sheen) and 30° (medium sheen). Topcoat glosses will not be custom matched.
- In addition to our standard colors, custom color matching is available for wiping stains. Consult the pricing page within this section for information on custom color charges.
- **We strongly recommend that sample doors be purchased in the desired color and design prior to placing full kitchen orders. This will ensure that the combination of specie, finish and glaze meets your expectations.**

Finishing Process

- Prior to finishing, Conestoga's doors are sanded on the automated sanding line to deliver a smooth, "finish-ready" product.
- To apply wiping stains and glazes, Conestoga uses a time-proven, hand wiped technique which delivers more color consistency and depth than simple spray stain applications.
- Most Conestoga framing beads are designed with a slight back bevel, which allows the stain to penetrate beyond the juncture of the framing bead and panel raise. During the wiping stain process an air nozzle is used to blow stain under the framing bead, minimizing the possibility of "white line" appearing on the panel raise during expansion and contraction. All doors are matched to a control sample for color consistency during the staining process.
- Colourtones and Prism Paints are applied using air-assisted, airless equipment.
- After staining or painting products are loaded onto our flat line finishing system to receive a sealer and/or topcoat. Our sealer is a high solids material that is applied and then sanded with a fine grit sandpaper after drying. The final coat is the application of a high solids conversion varnish topcoat in either 10° or 30° sheen. Conversion varnishes provide a superior finish with exceptional clarity, resistance to moisture and excellent overall durability. Conestoga has selected the topcoat sheen that generally provides the most pleasing appearance for each finish type. However, in some cases customers do have the option of selecting an alternate topcoat sheen with no upcharge.
- After curing, doors are inspected before being packaged for delivery to our customers.

Finish Type	Standard Sheen	Optional Sheen
Colourtone	10°	NA
Colourtone w/glaze	10°	NA
Prism Paints	10°	NA
Prism Paints w/glaze	10°	NA
Truetones	30°	10°
Truetones w/glaze	10°	30°
Weathered Grain (all)	5°	10°
Wiping Stains	30°	10°
Wiping Stains w/glaze	10°	30°

Finishing Tolerances

- Conestoga's finishing tolerances are designed for solid wood applications. Application of finish on veneers, decorative accent items and MDF may result in some color variation. Similarly, finishes applied by the customer may vary slightly from those products finished by Conestoga. See the DuraGuard System information in this section for loose finish purchase information. Instructions for application are also published in this section and enclosed with DuraGuard finish orders.
- Conestoga cannot predict how a door, or portions of a door, will accept finish. Therefore, if a door meets our material specification standards in its unfinished state, it will be considered acceptable after finishing as well.

Finishing Warranties

- Conestoga's finishes carry a one year limited warranty against peeling or blistering, but no warranty against discoloration. Conestoga assumes no responsibility for damages or poor color match when finish is applied by the customer.
- Most wood species will naturally darken or yellow with age. Conestoga will not be held liable for the change in appearance of any product, finished or unfinished, due to this aging process.
- We strongly recommend that a sample door be ordered in the desired specie, design and finish prior to ordering a full kitchen, regardless of the finish and specie combination.
- Conestoga's finish materials are interior grade only and not intended for exterior use. Exposure to outdoor conditions will cause failure and will not be warranted.

Wiping Stains

- All Conestoga wiping stains are applied using a hand rubbed application. The process provides superior grain penetration of the finish material and a greater degree of depth.
- Lighter or white stains such as Alpine are not available over certain darker, high contrast species such as Mahogany or Walnut.
- Conestoga does not recommend darker finishes such as Colonial, Cordovan or Washington Cherry over light species such as Hard Maple or White Birch. The contrast, as well as the properties of these species, creates a blotchy, uneven look. Therefore, these combinations are Not Recommended (NR), but can still be produced with a 20% upcharge on the Design Charge and no warranty on color consistency.
- Because Conestoga uses wiping stains, and wiping stains penetrate into the wood grain, end grain will accept stain and glaze darker than other areas of the piece. This end grain contrast will not be considered defective.

Note: Utilizing Conestoga's End Grain Sealant Option will minimize end grain contrast.

Custom Wiping Stain Match Program Guidelines

- A representative sample of the custom stain color and specie to be matched must be provided. Prior to shipping the color sample to Conestoga, customers must contact Customer Service to obtain a Return Merchandise Authorization (RMA) number that must be included with the sample being sent, along with a Custom Wiping Stain Match form found at the end of this section. A non-refundable net fee will be invoiced when the custom stain match sample is recieved to the customer. Conestoga will not begin the matching process unless a Purchase Order has been provided. The matching fee applies regardless of whether the match is approved by the customer. Allow 10 business days for the completion of individual color matches.
- Accompanying the custom stain sample will be a Stain Match Approval Form. If the match is acceptable, sign and return the approval form to our Finishing department and we will assign a custom color mix number. This unique finish number must be referenced each time an order is placed for the custom stain. A custom stain Design and Finishing Material Charge applies to each order.
- At times, customers submit multiple stain matches for a similar color with the intention of selecting only one match. On these occasions, a net matching fee will apply to the primary stain match request, and a net fee for each subsequent stain match requested. This reduced matching fee applies only when each of the stain colors are relatively close in appearance and submitted at the same time. Any stain not close in color to the primary submission will be invoiced at the net fee. If an additional stain sample is submitted at a later date, it will be invoiced at the net fee, regardless of whether the stain is close in color to a prior submission.
- Frequently, we receive requests for multiple species with a stain match, or to add additional species and/or glaze treatments to a previously approved stain match. When these requests are received, Conestoga will generate a hard sample of the approved custom stain on each new specie or requested glaze. A Purchase Order number must be submitted along with the request as a net fee per individual request will be invoiced at the time the sample is shipped to the customer. Conestoga will retain a portion of the sample to serve as a control sample to be used for future production needs.

Custom Wiping Stain Match Program Guidelines (continued)

- Custom stain mixes are kept on record as long as the finish continues to be used. If no orders for a custom stain are placed for a period of 1 year, the mix will be voided. This guarantees our customers a truly unique stain since it is matched to their exact specifications. Conestoga will only custom match wiping stains and will do so using pigmented wiping stain materials.
- Conestoga offers 2 topcoat glosses, 10° and 30°, with no option to custom match glosses.
- Quarts and gallons of custom stains can be purchased. Call Customer Service for pricing.

Truetones

- Conestoga's Truetone program consists of both High and Low complexity colors.
- Low Complexity Truetones are lightly pigmented spray to color stains that include a small percentage of solids. They produce a very clean look, with minimal blotchiness. After the Truetone application a sealer and conversion varnish topcoat are applied.
- High Complexity Truetones are a selection of deep, rich colors that are achieved through a two step application process. The first step is a hand wiped custom stain that brings out the color depth and grain clarity followed by a delicate application of a low solids spray stain. After this two-step application a sealer and conversion varnish topcoat are applied.
- Truetone finishes are also available with Brown, Onyx, Oyster and Sable wiping glazes.
- Specie availability includes Cherry, Hard Maple, Walnut and White Oak.
- Color range in an identical stain can and will vary from specie to specie, sometimes significantly.
- Non-glazed Truetone finishes receive a 30° sheen topcoat standard; however, 10° sheen topcoat is available but must be specified when placing order.
- Glazed Truetone finishes receive a 10° sheen topcoat standard; however, 30° sheen topcoat is available but must be specified when placing order.
- Normal contraction and expansion of the panels may cause unfinished areas, normally hidden by the framing bead to become visible, known as "white line".
- Profiled areas may appear lighter in color than flat areas on both Low and High Complexity Truetones because of the color application process. The effect could be enhanced by certain profiles, such as a square framing bead, deep grooves and anywhere there is a defined change in the plane of the part. Selecting a glaze option will minimize this effect on any Truetone color.
- As with any stain, veneers will absorb finish materials differently than solid wood. This absorption difference may result in a slight appearance variation between solid wood and veneered components and is not considered defective.
- Truetones range in color from light to dark. Therefore, they may or may not possess the ability to disguise material variations as well as wiping stains. The use of Premium grade material will mitigate some of these variations.
- End grain will appear darker than non-end grain areas, even when a glaze is applied.
Note: Utilizing Conestoga's End Grain Sealant Option will minimize end grain contrast.
- When a distressing option is ordered, we recommend also adding a glaze to any Truetone finish to achieve the best overall appearance.

Wiping Stains and Truetones with Hand Wiped Glazes

- All Conestoga hand wiped glazes are applied using a hand rubbed application process to the entire surface of both the face and back of every door.
- Hand applied glazing is a very subjective treatment. Each door becomes a "one-of-a-kind" and unique appearance and could vary slightly from door to door, but will blend within a job. Conestoga matches every glazed part to a control sample, however, color consistency is difficult to control on hand wiped glaze finishes. Factors that influence color consistency of hand wiped glaze finishes include door design, profiles, grain patterns, wood density, base color and the pre-glaze sanding process. Conestoga will not warrant these variations and considers them to be acceptable on hand wiped glaze products.

Wiping Stains and Truetones with Hand Wiped Glazes (continued)

- We recommend that our customers develop a document that would be read and signed by the designer or end user indicating their understanding of the potential color issues with any stain and glaze finish. Such a document will help set customer expectations and protect all parties in the event of a color-based issue.
- **Conestoga strongly recommends a sample door be ordered in the desired design, specie and finish combination prior to ordering a full kitchen.**
- Conestoga maintains strict standards for its glazing processes. With this in mind, Conestoga will not custom match glaze colors or glaze application placement. Therefore, we offer only our standard glazing colors and treatment options.
- Wiping stain and Truetones with any glaze treatment receive a 10° sheen topcoat standard, however, 30° sheen topcoat is available but must be specified when placing order.
- Hand wiped glazes significantly alter the appearance of the stain/specie combination. An attractive finish may look quite different once glazed. With this in mind, Conestoga does not recommend certain finish/glaze/specie combinations, and some combinations are not available. See the Offering and Availability Charts in this section for details.
- Conestoga's standard glaze offerings are available in combination with some custom wiping stain finish matches. For availability of glazing with custom stains, contact our Finishing Department 717-445-3252.

Wiping Stains with Pinstriped Glazes

- Conestoga's Pinstripe Glaze Option allows the true base color of wiping stains to remain intact while providing contrasting, clean glaze lines that are applied by hand using a finely trimmed brush.
- Pinstripe glazes are applied to the face and edge profiles of doors and drawer fronts, but not the backs. Panel Grooves are not available with Pinstripe glaze.
- Door designs and profile selections are critical to determine the glaze line placements and will vary in intensity depending on the depth or width of the profile areas being glazed.
- Pinstripe glazes are available on select door/drawer front designs, mouldings, ornaments and specialty products.
- Pinstripe glaze lines will show some degree of variation from door to door depending on the design selected, but will not necessarily duplicate all of the glaze lines that appear in the hand wiped glaze application. In some cases there will be fewer glaze lines with Pinstripe glazing compared to hand wiped glazes.
- Available glaze colors for Pinstripe glazing on hand wiped stains include Brown, Caramel, Pewter and Sable.
- Pinstripe glazes on wiped stains receive a 10° sheen topcoat; 30° sheen topcoat not available.

Primed Products

- Conestoga's priming capabilities allow you to outsource the time consuming process of prepping and priming your doors, drawer fronts and accessories. Outsourcing primed products reduces your company's VOC emissions and increases the efficiency and throughput of your finishing area.
- Conestoga offers 3 substrate materials for priming which include:
 - ♦ Solid wood – Cherry, Hard Maple, Paint Grade Hard Maple, Red Oak, Soft Maple and White Birch products are available in a wide variety of designs.
 - ♦ Hybrid Products – hybrid products utilize Paint Grade Hard Maple framing in combination with 48-pound density MDF center panels. All published 1/4", 3/8", 5/8" and 3/4" panel raises are available in MDF material to use in a wide variety of wood framed door and drawer front designs.
 - ♦ MDF – a 48-pound density MDF material. MDF products are limited to 1-Piece and 5-Piece design options. (See the Alternative Materials Section of this manual.)

Primed Products (continued)

- Conestoga offers 3 different types of primer applications:
 - ♦ Low Cost Primer – only available on Hybrid products, 1-Piece MDF and 5-Piece MDF products and is meant to achieve a modest price point. Solid wood and plywood products are not available with the Low Cost Primer Option. Before priming, any obvious voids or character marks will be filled and sanded, then a full coat of white primer is applied to the face and back. After the primer is applied, limited areas of roughness and open voids may be present. Conestoga will not fill or sand these characteristics after the primer is applied and they will not be considered defects.
 - ♦ Standard Primer – Standard Primer on wood products will be puttied and sanded, then a full coat of primer is applied to the face and back. All MDF and Hybrid products will also receive a detail coat of primer applied to all machined areas on the face (panel raises, framing beads and edge profiles). Once dry, the detail coat is scuff sanded and a full coat of primer is applied to the face and back. After the priming process is completed, limited areas of roughness and open voids may be present. The amount of these areas will vary from door to door and will not be filled or sanded by Conestoga.
 - ♦ Double Coat Primer – Double Coat primed wood products will be puttied and sanded, then receive a coat of primer applied to the face and back of the product. After drying, any voids that become apparent are puttied and any excess putty removed. The first primer coat is scuff sanded then a second full coat of primer is applied to the face and back. No further sanding will be done. MDF and Hybrid products will be puttied and sanded, then receive a detail coat of primer applied to all machined areas (panel raises, framing beads and edges profiles). Once dry, the detail coat is scuff sanded and a full coat of primer is applied to the face and back. After the first coat dries, any apparent voids are puttied. The first coat of primer is scuff sanded and a second full coat of primer is applied to the face and back. No further puttying or sanding will be done by Conestoga.
- Conestoga's primers are post catalyzed, acid cured and compatible with many high quality topcoats. Primer is available in white, light grey, medium grey, dark grey and black. Black primer is available in double coat application only.
- Prior to priming, the substrate is prepared to accept the coating material. Putty is applied to the joints, open-end grain, tear outs and other visible voids. The product is then hand sanded to remove excess putty and provide a smooth, uniform surface to accept the primer coat.
- Most Conestoga framing beads are designed with a slight back bevel to allow some primer material to penetrate beneath the framing bead. However, due to the high solids content of the primer itself, bridging of the primer material may occur between the panel and the framing bead on 5-piece products. Moderate bridging is not considered a defect.
- After curing, doors are inspected, then packaged and shipped.
- There are many finishes available to paint residential cabinetry. While many of these products may work in combination with our primers, we recommend **only acid cured conversion varnish topcoats**. Testing for compatibility and adhesion between Conestoga's primers and customer's finish materials should take place on a test door prior to finishing any large items or multi-piece projects.
- Customers should scuff sand the primer using 280-grit sandpaper no more than 24 hours before applying any finish. All surfaces must receive this sanding step to achieve a mechanical bond.
- Conestoga's primed products receive one coat of putty prior to application of primer. Smaller voids will become apparent after the primer has been applied. These voids are acceptable and will require a second coat of putty by the customer prior to painting.
- Conestoga's primed products are subject to some natural grain raise during the priming process, which is not considered defective. Normal sanding preparation for topcoat application will remove these wood fibers.
- Conestoga's primed products are manufactured using substrate materials that will expand and contract with fluctuations in climate, temperature and humidity. The movement of the substrate will cause fracturing anywhere sub-components have been joined together.
- This fracturing is not considered defective and will most likely occur in the following areas:
 - ♦ Framing joints – where the stiles meet the rails on the face and back of doors, 5-piece drawer fronts, wainscot panels and front frames.

Note: To decrease the chance of joint separation, utilize the MDF center panel option.

Primed Products (continued)

- ♦ Edge profiles – in both mitered and mortise and tenon joint construction at the exterior edges of the product.
- ♦ Center panels – where the panel recesses into the framing. Bridging of the coating materials can occur between the panel and framing. Natural expansion and contraction of the substrate may fracture the bridging.
- ♦ Panel face – where individual adjacent staves in the panel expand and contract at different rates causing minor offsets or highlighting of glue joints. Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These stave lines will not be considered defective.

Note: To eliminate panel stave offsets, utilize the MDF center panel option.

- Testing for compatibility and adhesion between Conestoga's primers and customer's finish materials should take place on a test door prior to finishing any large items or multi-piece projects. Conestoga assumes no responsibility for incorrect application of finish materials by the customer that may result in poor adhesion, color mismatch or other finish related issues. Conestoga will not warrant products due to incompatibility issues between our primers and non-DuraGuard finish materials.
- Primed products are individually wrapped, minimizing scuff marks.

Colourtones

- Colourtones are opaque finishes, identical in appearance to paint. The coatings are pigmented basecoats that must be catalyzed prior to application. Colourtones require the application of a clear coat of conversion varnish as the final coat.
- Colourtones have a high solids content, resulting in better build and lower VOC emissions.
- We recommend adding the antiquing option when Colourtones are ordered with Cherry. Characteristics common to Cherry, such as pin knots, mineral and pitch pockets will be present in finished products. Presence of these characteristics will not be considered defective. Refer to the Offering and Availability Chart in this section for specie, finish and glaze availability.
- All Colourtone finishes will receive a 10° topcoat; 30° topcoat is not available.
- Veneer checking and seam separation are inherent characteristics of plywood panels and finished veneers that may appear to be cracks within the coating. These cracks are caused by changes within the veneer and will not be considered defective.

Note: To eliminate veneer checking, utilize the MDF center panel option.

- Because Colourtones contain a high percentage of solids, certain characteristics such as joint fracturing will occur. Hairline cracks typically develop along joints on the face, back and edge profiles and can occur during normal handling or from the expansion and contraction of wood. Joint fracturing is not considered to be a defective.
 - The machining of end grain or MDF on certain profiles may result in those surfaces being porous and the finish on these surfaces may not be as full as the finish on non-machined areas.
 - Colourtone products are placed on drying racks after the coating application process. Small indentations or pin marks from drying racks may appear on the backs of Colourtone products and are not considered defects.
 - Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These stave lines will not be considered defective.
- Note: To eliminate panel stave offsets, utilize the MDF center panel option.**
- Colourtones may vary slightly from one batch to another, but will remain within a controlled color range.
 - Minor flaws such as dust particles, dimples and lint are more apparent with opaque finishes than with wiping stains. The presence of small amounts of these minor occurrences will be considered acceptable.
 - Coatings containing high solids are susceptible to bridging between the framing and center panel. Bridging occurs when the coating material joins the two separate surfaces together. This condition is common between multiple component products and is not considered defective. Over time, the natural expansion and contraction of wood may cause this bridging to fracture.

Colourtones (continued)

- As with most finishes, Colourtone colors will change over time due to exposure to light, pollution and chemicals. Additions or replacements to existing kitchens may not initially match finished products already in place.
- Customers interested in purchasing Colourtone finishing materials through the DuraGuard Program should reference DuraGuard Systems information found in this section of the manual for coatings pricing and availability.
- When purchasing multiple containers of loose Colourtone coating material, mix the contents of like finishes together prior to adding catalyst to achieve a consistent overall color.
- Catalyst must be added to all Colourtone finishes prior to application. The catalyzation process results in both a limited pot life and a recoat window. Mixture and application instructions are provided near the end of this section.
- Conestoga assumes no responsibility for incorrect application of DuraGuard materials by customers, which may result in poor adhesion, color mismatch or other finish related failures.
- We recommend that any topcoat other than DuraGuard products be tested for compatibility prior to application. Conestoga will not warrant products that fail due to non-compatible topcoat materials.

Prism Paints

- The Prism Paints program offers a selection of 1,400 opaque colors. We do not recommend placing an order for a project in Prism Paints or Prism Paint with glaze based on the color represented in the fan deck. We strongly recommend a door sample of the actual finish be ordered prior to placing an order for a complete job. Conestoga will not assume responsibility for color related issues resulting from orders being placed without first ordering a sample door.
- Prism Paint coatings are acid catalyzed, pigmented basecoats, identical to Colourtone finishes. These coatings require the application of a final coat of clear conversion varnish.
- Prism Paints may differ in appearance to other types of coatings such as acrylic, latex, enamels, or other paint systems with the same color name and number. Both the clear topcoat and spray application will effect texture, sheen and color of this product. It is strongly recommended that a finished sample door in the selected color to be ordered prior to ordering a full kitchen.
- Prism Paints are available on Cherry, Hard Maple, Paint Grade Hard Maple, Paint Grade Hard Maple Hybrid, Red Oak and MDF.
- All Prism Paints will receive a 10° topcoat; 30° topcoat is not available.
- Prism Paints are available with Chai, Coffee, Oyster, Pewter hand wiped glazes and Pinstriped glazes. Onyx glazes also available with Pinstripe application only.
- Prism Paints are available with Pinstripe glaze on Cherry, Hard Maple, Paint Grade Hard Maple and Paint Grade Hard Maple Hybrid.
- Prism Paints are available on Advantage and Vesta Cabinet Systems. However, Prism Paints with glaze are not.
- Prism Paints are available on 14" sample chips, but not on 36" sample chips. Square foot minimums apply.
- Because Prism Paints contain a high percentage of solids, certain characteristics such as joint fracturing will occur. Hairline cracks typically develop along joints on the face, back and edge profiles and can occur during normal handling or from the expansion and contraction of wood. Paint fracturing at joints is not considered to be a defect.
- The machining of end grain or MDF on certain profiles may result in those surfaces being porous and the finish on these surfaces may not be as full or smooth as the finish on non-machined areas.

Prism Paints (continued)

- Products having been painted with Prism Paints will be placed on drying racks. Small indentations or pin marks from the drying racks may appear and are not to be considered defective.
- Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These stave lines will not be considered defective.
Note: To eliminate stave offsets, utilize the MDF center panel option.
- Veneer checking and seam separation are inherent characteristics of plywood panels that may appear to be cracks within the coating. These cracks are caused by changes within the veneer and will not be considered defective.
Note: To eliminate veneer checking, utilize the MDF center panel option.
- Prism Paints may vary slightly from one batch to another, but will remain within a controlled color range. To avoid color variations, order all components for a project at one time.
- Minor flaws such as dust particles, dimples and lint may be present with opaque finishes. The presence of a small quantity of these defects will be considered acceptable.
- Coatings containing high solids are susceptible to bridging between the framing and center panel. Bridging occurs when the coating material joins the two separate surfaces together. This condition is common between multiple component products and is not considered defective. Over time the natural expansion and contraction of wood may cause this bridging to fracture.
- As with most finishes, Prism Paint colors will change over time due to exposure to light, pollution and chemicals. Additions or replacements to existing kitchens may not initially match finished products already in place.
- Customers interested in purchasing Prism Paint finishing materials through the DuraGuard Program should reference DuraGuard Systems information found in this section of the manual for coatings pricing and selection. It is strongly recommended that the DuraGuard paint be ordered at the same time as the finished parts to ensure an accurate color match.
- When purchasing multiple containers of loose Prism Paint coating material, mix the contents of like finishes together prior to adding catalyst to achieve a consistent overall color.
- Catalyst must be added to all Prism Paints prior to application. The catalyzation process results in both a limited pot life and a recoat window. Mixture and application instructions are provided near the end of this section.
- Conestoga assumes no responsibility for incorrect application of Prism Paint materials by customers, which may result in poor adhesion, color mismatch or other finish related failures.
- We recommend that any topcoat other than DuraGuard products be tested for compatibility prior to application. Conestoga will not warrant products that fail due to non-compatible topcoat materials.

Colourtones and Prism Paints with Hand Wiped Glazes

- Hand wiped glaze treatments offer a distinctive appearance, significantly altering the base Colourtone/Prism Paint color. The random nature of the hand wiped glazing option ensures slight variations from one product to the next, giving a unique look to the finished kitchen.
- Each hand wiped glaze possesses specific characteristics that determine the appearance of the glaze on finished parts. Coffee and Pewter glazes are heavily pigmented glazes; therefore, they create a significant color change to the base Colourtone/Prism Paint. Profiled areas where these glazes are applied develop dark lines that outline the profile. Chai and Oyster glazes are lighter in color and produce a more subtle color change to the base Colourtone/Prism Paint. They also produce much less of the highlighting effect in profiles areas.
- Colourtones/Prism Paints receiving the hand wiped glazed option will have slight inconsistencies in appearance. Variations, however slight, are inherent to this finish combination. To successfully market this product, education of your production personnel, installers, sales staff, designers and clients must take place.

Colourtones and Prism Paints with Hand Wiped Glazes (continued)

- Characteristics of hand wiped glaze finishes include variations in:
 - ♦ Glaze “hang” with noticeable variations on edge profiles, panel raises and applied mouldings.
 - ♦ Absorption into end grain on framing and panel raises.
 - ♦ Highlighting of machined areas, which normally do not appear with typical wiping stains or base Colourtone/Prism Paint colors.
 - ♦ Appearance of blotches and rag marks.
- Glazed Colourtones/Prism Paints will remain within a controlled range of color. However, individual pieces will vary slightly.
- As with any Colourtone/Prism Paint product, we do not recommend ordering plywood panel doors or other veneered products due the inherent cracking and checking that takes place in veneers. Veneer checking will not be considered a finishing defect.
Note: To eliminate veneer checking, utilize the MDF center panel option.
- Use of hand wiped glazes on mitered and applied moulding products will greatly enhance any offset that may be present in the joint construction.
- MDF doors finished with Colourtones/Prism Paints and hand wiped glazes will have noticeable variations in glaze hang and absorption on profiled areas. Machined areas may contain small pinholes that are highlighted by the glaze and will not be considered defects.
- Cabinet Systems – when selecting a Colourtone/glaze finish on Cabinet Systems, be aware that some of the more popular Colourtone/glaze combinations have been matched with what is termed a Post Glaze finish. Post Glaze finishes are applied to the Cabinet Systems front frames and end panels and closely resemble the hand applied Colourtone/glaze combination. Be aware that while hand applied Colourtone/glaze and Post Glaze finishes provide a very close match on flat surfaces such as end panels, when glazes are hand applied to contoured areas such as profiled door framing, the appearance can vary and slight mismatches between end panels, front frames, doors and drawer fronts may occur. Slight mismatches between components finished with hand glazed Colourtones and Post Glazed Colourtone finishes are not considered defective as this same result can occur when the entire cabinet is finished with hand applied Colourtone/glaze finishes.
- The machining of end grain on certain profiles may result in those surfaces being porous and the finish on these surfaces may not be as full as the finish on non-end grain areas. This machining will cause the glaze to be darker on these areas than on non-end grain surfaces and are not considered to be defective.

Colourtones and Prism Paints with Pinstriped Glazes

- Conestoga’s Pinstripe Glaze Option allows the true base color of Colourtones and Prism Paints to remain intact while providing contrasting, clean glaze lines that are applied by hand using a finely trimmed brush.
- Pinstripe glazes are applied to the face and edge profiles of doors and drawer fronts, but not the backs. Panel Grooves are not available with Pinstripe glaze.
- Door designs and profile selections are critical to determine the glaze line placements and will vary in intensity depending on the depth or width of the profile areas being glazed.
- Pinstripe glazes are available on select door/drawer front designs, mouldings, ornaments and specialty products.
- Pinstripe glaze lines will show some degree of variation from door to door depending on the design selected, but will not necessarily duplicate all of the glaze lines that appear in the hand wiped glaze application. In some cases there will be fewer glaze lines with Pinstripe glazing compared to hand wiped glazes.
- Available glaze color for Pinstripe glazing on Colourtones and Prism Paints include Coffee, Pewter and Onyx.
- Pinstripe glazes on Colourtones and Prism Paints receive a 10° sheen topcoat; 30° sheen topcoat not available.

Antiquing

- Antiquing is a random sanding process that takes place prior to glaze and topcoat. It is a rub through process, performed on corners and edges exposing bare wood, which will then be glazed and topcoated.
- Antiquing is not available on 1-piece or 5-piece MDF products or Hybrid doors with a raised panel face.
- To achieve a heavier level of antiquing, combine this option with our wear sanding option. Wear sanding is a process that softens and reshapes some profiled areas prior to finishing. Antiquing is the perfect complement to wear sanding and produces an authentic, worn look. See the Design Options Section for pricing.
- Antiquing and wear sanding are not available on front frames.
- Antiquing and wear sanding are available on range hoods, but may be limited in intensity depending on the style of the hood.

End Grain Sealant

- A sealant material is applied to the end grain of the panel raise and framing which results in a more uniform appearance between the end grain and face grain after finish is applied. While the End Grain Sealant Option will greatly improve the end grain appearance, end grain will still appear somewhat darker than non-end grain areas.
- The End Grain Sealant Option is available on all published species, panel raises, framing beads and edge profiles.
- The End Grain Sealant Option is available with wiping and spray stains with the exception of Bordeaux, Dark Roast, Espresso, Nickel and Nitefall. End Grain Sealant Option is not available with primers, Colourtones or Prism Paints.

Distressing

- Distressing Levels
 - ◆ Level 1 – a random distribution of nicks and impressions.
 - ◆ Level 2 – a random distribution of nicks and impressions, simulated wormholes, razor cuts and cut joints.
 - ◆ Level 3 – a random distribution of nicks and impressions, simulated wormholes, rasp marks and simulated cracks.
 - ◆ Individual distressing treatments are also available. See Design Options Section for treatment descriptions and pricing.
- Keep in mind that each option is random in application, designed to give doors and drawer fronts an aged, antique-like appearance. Most distress markings will typically not appear on raise profiles.
- Different door designs, styles and species will display distressing differently.
- Conestoga recommends ordering distressing with all prefinished Pine products because of the softness of Pine.
- Antiquing and distressing are subjective treatments. Conestoga only offers standard versions of these treatments. Custom antiquing and distressing is not available. See the Custom Finishing Chart in this section for pricing.
- Front frames and range hoods will receive a modified distressing package. Distressing on range hoods may be limited in intensity depending on the style of the hood.

Cross Grain Sanding

- This option is automatically included at no charge on prefinished doors and drawer fronts.

Customer Responsibilities

- All sample doors and swatches should be properly labeled with specie, finish color, date and sales order number.
- Sample doors and swatches should be stored in such a manner that they are not exposed to light or extreme heat for an extended period of time. Exposure to sunlight, indoor lighting or extreme heat will cause samples to discolor and will no longer be an accurate representation of color. Sample swatches should be discarded and replaced when their expiration date is reached.
- **Sample doors and swatches should be replaced every 12 months or when they become discolored.** Cherry will need to be replaced more frequently than other species. Conestoga cannot guarantee that a current order will match a sample more than 12 months old. Jobs sold from a sample swatch older than one year will not be warranted for color match.
- We strongly recommend that a full kitchen **not be sold from a color swatch or fan deck**. Order a sample door to show a greater array of possible character effects on a particular color, design and specie combination.
- For displays that are older than one year or that may be discolored, we recommend that customers obtain a current sample door in that specie, stain and glaze combination. Remember, display kitchens do change color due to their exposure to natural light, indoor lighting, heat and other conditions. The change that takes place is very gradual and may be difficult to detect, especially if viewed daily.
- If a job is ordered based on the color of a sample door or display, make sure the sample is less than one year old and the color is accurate. Customers asking for replacements because the job does not match their sample will be asked to provide the original sample sales order number so the age of the sample may be determined. **Conestoga will not warrant products for color mismatch if the sample is more than 12 months old or is discolored due to excessive exposure.**

* Ebony Colourtones will magnify any small imperfection. It is strongly recommended that Ebony be sold only with antiquing or distressing. Small imperfections such as dust or lint will not be considered defects.

Using Offering and Availability Charts

Offering and Availability Charts should be referenced prior to placing an order.

- Locate the desired finish in the top row, then follow the row down to the desired specie/glaze combination found along the left column of the chart.
- The box where the finish, specie and glaze combination intersects, will contain one of the following references:

R = Recommended: These finish combinations refer only to the consistency of the finish application and not the aesthetic beauty of the combination.

NR = Not Recommended: These finish combinations are problematic and do not meet Conestoga's standards for color consistency. They also highlight various other characteristics such as machine marks and open end grain that will not be considered defective. NR combinations will receive a 20% upcharge to the Design Charge compensating for additional labor required for difficult combinations. Even if a sample door is purchased, we cannot guarantee that the next order will be an exact match to the sample door. Conestoga will not guarantee color consistency on NR combinations.

X = Not Available: Such combinations present application challenges which result in finish appearances Conestoga cannot consistently reproduce, and are not available.

R = Recommended: These finish combinations refer only to the consistency of the finish application and not the aesthetic beauty of the combination.

NR = Not Recommended: These finish combinations are problematic and do not meet Conestoga's standards for color consistency. They also highlight various other characteristics such as machine marks and open end grain that will not be considered defective. NR combinations will receive a 20% upcharge to the Design Charge compensating for additional labor required for difficult combinations. Even if a sample door is purchased, we cannot guarantee that the next order will be an exact match to the sample door. Conestoga will not guarantee color consistency on NR combinations.

X = Not Available: Such combinations present application challenges which result in finish appearances Conestoga cannot consistently reproduce, and are not available.

Pricing per kit: Wiping stains (Cherry, Hard Maple, Hickory/Walnut or Oak) and Truetone kit. Colourtone kit.

Specifications: Swatch size: 4-1/4" x 6-1/8".
Swatch has G-084 groove on face – except for finishes with Chai and Oyster glazes.
Each swatch is individually labeled.

Kits are packed in a labeled file box, reducing the need to remove individual swatches for identification; this limits the exposure to light that accelerates color change.

Larger Swatch Size

Individual Recommended and Not Recommended finishes are available on 6-1/8" x 14" chips.

Wiping stains and Truetones
Colourtones
Prism Paint Pastels
Prism Paint Deeptones

Sample ID Label

- The Sample ID Label Option identifies specific attributes of door and drawer front samples. Labels are low tack and easy to remove. It is intended to be replaced with your company's customized label.
- Available on doors and drawer fronts only; this option is not available on specialty or accessory products.
- ID labels are available on unfinished and finished doors and drawer fronts.

- Sample ID labels will include Conestoga nomenclature only, customization is not available.
- Each label includes: Conestoga design name, specie/grade, framing bead, raise, edge profile, selected options, finishing information and package date.
- All finished doors or drawer fronts will receive a second disclaimer label along with an ID label.

Prism Paint Fan Deck

- 1,400 colors are showcased in this comprehensive fan deck.
- Divided into five sections: Colors, Neutrals, Whites & Pastel, Timeless and Historic. Please note that approximately 200 of the more vibrant colors have been excluded from the Prism Paints offering.
- All paints are interior grade only, including the Historic Exterior section.
- Each paint color is classified as either a Pastel or Deeptone. This classification determines the material cost category when finishing is requested, or loose paints are selected.
- Refer to the Customer Business Portal for a complete listing of the eligible paint colors and price categories.
- Prism Paints are also available with Chai, Coffee, Oyster and Pewter glaze options.
- Order Prism Paint fan decks using part #2602036A.
-

DuraGuard System Overview

DuraGuard is a complete finishing material program designed to make it easy to match Conestoga's prefinished products, in which all the base stains, Colourtones, paints, glazes, primers, sealers and topcoats work together to create a lasting finish on our customer's components.

- DuraGuard provides finishing materials, step-by-step instructions, access to our in-house finishing professionals and support products such as touch up kits.

DuraGuard System Features

- Access to all of Conestoga's topcoats, sealers, stains, paints, primers, glazes and other finishing materials.
- Every shipment of finishing material includes a label with QR codes to provide step-by-step instructions detailing how to mix raw materials, sand the wood, apply the finish and spray the topcoat.
- Access to our Finishing Department at (717) 445-3252 every business day, from 7:00 a.m. to 3:30 p.m. (EST). We are dedicated to answering any finishing questions our customers may have.
- Inexpensive touch up kits are available; these kits are used to hide scratches or blemishes incurred in our customers' shop. These kits make a great gift for your satisfied customers. See DuraGuard Packaged Finish Pricing Chart for details and pricing.

DuraGuard System Disclaimers

- Conestoga's finishes are industrial in nature, unlike finishes purchased at a retail store. Although they are of higher quality than most finishes, Conestoga's coatings are also more combustible, more volatile and require a greater level of expertise to apply.
- Due to the complexities involved with any finishing process, Conestoga will not be liable for any damages or injuries resulting from the use of this product, even if every precaution is taken by the customer. Conestoga's liability is limited to the original purchase price of the finishing material.
- In order to best match any DuraGuard finish color, it is important to follow the processes outlined in our instruction documents. These instructions are found in this section of the manual. If the proper steps are not followed, the finished product may not match the finished doors that were purchased from Conestoga. However, please bear in mind that following these procedures will not always guarantee an exact match.
- Due to the many variables involved in any finishing process, Conestoga assumes no responsibility if products finished by the customer using the DuraGuard System do not produce an exact match to prefinished products purchased from Conestoga.
- The DuraGuard Finishing System is scientifically designed so that each of the materials, from base coat to topcoat, work with one another, thereby providing a beautiful protective finish for our customer's products. Finishing products not sold by Conestoga may react unfavorably to the DuraGuard finishing materials causing poor topcoat adhesion, discoloration or other problems.

Lead time for any single DuraGuard item including Stain, Colourtone, Glaze, Primer, Thinner, Catalyst, Topcoat or Sealer materials are as follows: 5 gallons or less - 3 business days. Can ship UPS or FedEx small package, Common Carrier or Conestoga Wood Transportation. 5-1/4 to 14-3/4 gallons - 5 business days. Can only ship Common Carrier or Conestoga Wood Transportation. 15 gallons or more - 8 business days. Can only ship Common Carrier or Conestoga Wood Transportation.

Custom stain match materials and Prism Paints are mixed on a per-order basis and cannot be expedited.

***Touch Up Kits:** Wiping stain, Truetone, Glaze and Colourtone kits include a stain marker and fil-stick. Prism Paint and Custom Stain kits include a marker and a vial of 10° sheen topcoat. Colourtone aerosol cans are 12 oz.

DuraGuard Finishing Instructions

All Wiping Stains (except Bordeaux, Dark Roast, Espresso, Nickel and Nitefall)

- Use this process to match all Conestoga wiping stains except Bordeaux, Dark Roast, Espresso Nickel and Nitefall stains.
 - White wood sand with an oscillating palm sander using 180 grit sandpaper.
 - Apply wiping stain over wood. Wipe all surfaces clean with lint-free rag.
 - Allow wiping stain to dry for a minimum of 1 hour.
 - Spray sealer to approximately 4 wet mil thickness.
 - When the sealer is completely dry, sand sealer with fine grit (220-280) sandpaper using an oscillating palm sander on all flat surfaces. Hand sand all profiles with 220 grit sandpaper.
 - Spray on topcoat to approximately 4 wet mil thickness.
 - Allow topcoat to dry for a minimum of 4 hours before handling.
-

Bordeaux, Dark Roast, Espresso, Nickel and Nitefall Finishing Process

- Use this process to match Conestoga's Bordeaux, Dark Roast, Espresso, Nickel and Nitefall stains.
 - White wood sand with an oscillating palm sander using 180 grit sandpaper.
 - Moisten wood surface by lightly misting with water. Do not over saturate. Allow wood to completely dry for 30 to 60 minutes depending on relative humidity. This will open the grain allowing penetration of stain.
 - Apply wiping stain over wood. Wipe all surfaces clean with a lint-free rag.
 - Allow wiping stain to dry for a minimum of 1 hour.
 - Spray sealer to approximately 4 wet mil thickness.
 - When sealer is completely dry, sand sealer with fine grit (220-280) sandpaper using an oscillating palm sander on all flat surfaces. Hand sand all profiles with 220 grit sandpaper.
 - Spray on topcoat to approximately 4 wet mil thickness.
 - Allow topcoat to dry for a minimum of 4 hours before handling.
-

Hand Wiped Glaze Over Wiping Stains

- Use this process to apply hand wiped glazes over all Conestoga wiping stains.
- White wood sand with an oscillating palm sander using 180 grit sandpaper.
- Apply wiping stain over wood per DuraGuard finishing instructions. Wipe all surfaces clean with lint-free rag.
- Allow wiping stain to dry for a minimum of 1 hour.
- Spray sealer to approximately 4 wet mil thickness.
- When sealer is completely dry, hand sand all surfaces using 320 grit sandpaper. Make sure to sand in same direction as the wood grain.
- Apply the glaze to the entire surface and wipe the excess glaze off with a lint-free rag, leaving the desired amount of glaze in profiled areas. When matching existing products, make sure the same amount of glaze is left on the surface of the product being glazed as is on the product to be matched. Allow glaze to dry for 1 hour.
- Spray on topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.

DuraGuard Finishing Instructions (continued)

Mixing Topcoats and Sealers

Follow this process when using DuraGuard topcoats and sealers to match products finished by Conestoga.

- Always use a lined can or plastic container when adding catalyst. Do not catalyze in an unlined metal can.
- Slowly pour the pre-measured container of catalyst into the gallon container of sealer or topcoat. Thoroughly agitate topcoat material, making sure there is no residue on the bottom of the can. Agitation must be continuous. **Do not over catalyze!**
- Once the catalyst has been added, the chemical interaction of the mixture results in a 24 hour “pot life”. After this 24 hour time frame, the mixture begins to cure rendering it unusable.
- Catalyst ratios are listed below.
- We strongly recommend against attempting to extend the pot life of sealer or topcoat by adding virgin material, as it will disrupt the catalyst ratio.
- Spray topcoat to a thickness of 4 wet mils.

Topcoat/Sealer	Amount of Catalyst
Conversion Varnish Products	
Sealer	4.0 ounces of catalyst V66V21 per gallon
10° (low sheen) topcoat	4.0 ounces of catalyst V66V21 per gallon
30° (medium sheen) topcoat	4.0 ounces of catalyst V66V21 per gallon

Topcoat Application Guidelines

- All standard hand wiped and Truetone stains default to 30° topcoat; 10° topcoat available upon request.
- All standard hand wiped and Truetone stains with glazes default to 10° topcoat; 30° topcoat available upon request.
- All weathered grain products finished with wiping stains, wiping stains with glazes, Colourtones and Colourtones with glazes default to 5° topcoat; 10° topcoat available upon request. 30° topcoat not available with weathered grain products.
- Antiquing, distressing and wear sanding options selected with wiping stains and wiping stains with glazes default to 10° topcoat; 30° topcoat is available upon request.
- Antiquing, distressing and wear sanding options added to Colourtone, Colourtone with glaze, Prism Paint or Prism Paint with glaze default to 10° topcoat. 30° topcoat not available with any of these finish and option combinations.

DuraGuard Finishing Instructions (continued)

Truetones - Low Complexity

Use this process to match Conestoga's Low Complexity Truetone finishes.

- White wood sand with an oscillating palm sander using 180 grit sandpaper.
- Using spray equipment apply Truetone stain material over wood with even wet coats until the desired color is achieved. **(Diaphragm pump and HVLP gun recommended for spray application).**
- Allow stain to dry for a minimum of 30 minutes.
- Spray sealer to approximately 4 wet mil thickness.
- When the sealer is completely dry, sand sealer with fine grit (220-280) sandpaper using an oscillating palm sander on all flat surfaces. Hand sand all profiles with 220 grit sandpaper.
- Spray on topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Truetones - High Complexity

Use this process to match Conestoga's High Complexity Truetone finishes.

- White wood sand with an oscillating palm sander using 180 grit paper.
- Apply the Truetone wiping stain as the base color over wood. Wipe all surfaces clean with a lint-free rag.
- Allow the Truetone wiping stain to dry for a minimum of 1 hour.
- Using spray equipment apply the matching Truetone spray stain material over the wiping stain with multiple light passes until uniform coverage is achieved. It may take as many as 4 to 6 light passes spraying in opposite directions to get uniform coverage on the board surface. **DO NOT** apply heavy wet coats as this may cause modeling and blotchiness in the spray stain. **(Diaphragm pump and HVLP gun recommended for spray application).**
- Allow the spray stain to dry for a minimum of 30 minutes.
- Spray sealer to approximately 4 wet mil thickness.
- When the sealer is completely dry, sand sealer with fine grit (220-280) sandpaper using an oscillating palm sander on all flat surfaces. Hand sand all profiles with 220 grit paper.
- Spray topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Hand Wiped Glaze Over Truetones

Use this process to apply hand wiped glaze over all Conestoga Truetones.

- Follow application instructions for desired Truetone finish.
- Allow Truetone to dry for a minimum of 30 minutes.
- Spray sealer to approximately 4 wet mil thickness.
- When sealer is completely dry, hand sand all surfaces using 320 grit sandpaper. Make sure to sand in same direction as the wood grain.
- Apply the hand wiped glaze to the entire surface and wipe the excess glaze off with a lint-free rag, leaving the desired amount of glaze in profiled areas. When matching existing products, make sure the same amount of glaze is left on the surface of the product being glazed as is on the product to be matched.
- Allow glaze to dry for a minimum of 1 hour.
- Spray on topcoat to approximately 4 wet mil thickness.
- Allow topcoat to dry for a minimum of 4 hours before handling.

DuraGuard Finishing Instructions (continued)

Colourtones and Prism Paints

Colourtones/Prism Paints are two-part, acid catalyzed, opaque basecoats, high in solids and match paint in appearance. Colourtone/Prism Paint finishing materials are non-catalyzed when purchased and must have catalyst purchased separately and added prior to application. These coatings are very durable and resistant to moisture.

Colourtones, Prism Paints and Catalyzation

Colourtone/Prism Paint finishing materials have superior film build, adhesion, excellent sanding properties and moisture resistance. It is extremely important to keep these materials thoroughly agitated while spraying. Coatings require the addition of an acid catalyst in order to cure. Since the catalyst has corrosive properties, neither the catalyst nor the catalyzed material should ever be stored in an unlined metal container. Thoroughly agitate material prior to the addition of catalyst. Add only the recommended ratio of catalyst and continue agitation for 5 minutes prior to spraying the material. **Do not over catalyze!** After catalyzation, material will have a maximum pot life of 24 hours.

Colourtone/Prism Paint materials have a limited amount of time between the application of the first and second coats and the application of topcoat. In order to achieve the proper chemical bond between coats, topcoat must be applied within 24 hours after applying the second coat. This time frame remains the same for both glazed and non-glazed products. The Colourtone/Prism Paint systems require a 10° conversion varnish topcoat. The use of any other topcoat material may result in lifting, discoloration, poor adhesion, cracking, poor moisture resistance and other finish related problems. Conestoga recommends the use of the DuraGuard glazes and topcoat in combination with Colourtone/Prism Paint finishing materials.

Surface Preparation for Colourtones and Prism Paints

- Fill all open voids with wood putty, sanding off excess putty.
- Sand surface of product with an oscillating palm sander using 180 grit sandpaper.

Spraying Colourtones and Prism Paints

- Thoroughly agitate Colourtone/Prism Paint material, add catalyst while material is under agitation. Add 4 ounces catalyst V66V21 to 1 gallon of Colourtone/Prism Paint in a lined metal can or plastic container. Pot life after catalyzation is 24 hours. Keep material under constant agitation.
- Spray Colourtone/Prism Paint material to a thickness of 4 wet mils.
- Allow first coat of material to dry for a minimum of 2 hours.
- Sand the entire surface with 280 grit sandpaper.
- Spray a second Colourtone/Prism Paint coat to a thickness of 4 wet mils.
- Allow the second coat to dry 2 hours before applying glaze or topcoat. A topcoat must be applied within 24 hours, whether product is glazed or unglazed.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Glaze over Colourtones and Prism Paints

- Apply the glaze to all surfaces after the second coat of Colourtone/Prism Paint is fully dry. Glaze may be applied with a rag and/or a brush.
- Wipe glaze off surfaces immediately using a “selective” wiping technique, leaving behind the desired amount of glaze in the profiled and flat areas. If matching to Conestoga prefinished products, ensure that the same amount of glaze is left in profiled areas and flat surfaces as on the Conestoga product.
- Allow glaze to dry for 1 hour.
- Spray with Conestoga’s DuraGuard 10° sheen conversion varnish topcoat to a thickness of 4 wet mils. A topcoat must be applied within 24 hours, whether product is glazed or unglazed.
- Allow topcoat to dry for a minimum of 4 hours before handling.

DuraGuard Finishing Instructions (continued)

Topcoat over Colourtones and Prism Paints

- Thoroughly agitate topcoat material, ensuring there is no residue on bottom of can.
- Add 4 ounces of catalyst V66V21 per gallon of 10° sheen topcoat in a lined metal can or plastic container and agitate for 5 minutes prior to spraying. Keep topcoat under constant agitation. After catalyzation, the material has a 24 hour pot life. We do not recommend extending pot life by adding virgin material, as this will disrupt your catalyst ratio.
- Spray 4 wet mils of topcoat over Colourtone/Prism Paint.
- Allow topcoat to dry for a minimum of 4 hours before handling.

Antiquing on Colourtones and Prism Paints

Antiquing is a process to create the appearance that portions of the finish and even some of the substrate have been worn away from prolonged daily use.

- After allowing the Colourtone/Prism Paint material to thoroughly dry, the entire piece must be sanded with an oscillating palm sander using 280 grit sandpaper. Randomly sand through both coats of finish to expose the raw wood on profiled areas, edges and corners to simulate an aged, worn appearance. If antiquing is used in combination with the wear sanding option, follow the areas previously wear sanded. The amount and location of the antiquing should vary by personal preference, but should be focused on areas that would typically show wear from daily use. Refer frequently to the antiqued sample door finished by Conestoga.

Colourtone Touch Up Aerosol

This aerosol can is for minor touch up only and is not formulated to be used as a Colourtone paint substitute. Light scuff sanding of the defective area with a 320 grit sponge is recommended prior to spray application for increased adhesion. This product is not a final topcoat and must receive a coat of clear surface repair lacquer to match sheen and ensure durability.

Surface Preparation: Surface should be clean and dry. Remove dirt, grease, oil, wax and loose paint.

For instructions on the use of touch up aerosol, see directions printed on can label: Use outdoors or in a well ventilated area when temperature is between 68° to 78°F (20° to 26°C) and humidity is below 60% to ensure proper drying. Mask surrounding area where over spray might settle. Shake can for at least one minute, listening for rattle of mixing ball. Shake for 10 seconds at 1-2 minute intervals during application. Hold can 6 to 10 inches from surface. Press spray button firmly. Do not cover with continuous spray. Move back and forth releasing spray head after each stroke. Overlap each stroke. Apply two thin coats rather than one heavy coat.

Clean up: If spray button becomes clogged, pull off and clean with solvent.

Primers (Standard Primer Process)

Conestoga's primers are available in white, light grey, medium grey, dark grey and black (double coat) and are post catalyzed, acid cured primers, compatible with many high quality topcoats. While there are many topcoats available on the market today, Conestoga recommends only acid cured, pigmented conversion varnishes.

Surface Preparation for Primers

- Fill all open voids with wood putty, sanding off excess putty.
- Sand surface of product with an oscillating palm sander using 180 grit sandpaper.

Spraying Primers

- Thoroughly agitate primer materials, ensuring there is no residue on bottom of can. Add catalyst while the primer is under agitation in a lined metal can or plastic container.
- Add 3 ounces catalyst V66V21 to 1 gallon of primer. Pot life after catalyzation is 24 hours. Keep material under constant agitation.
- Spray primer to a thickness of 5 wet mils.
- Allow primer to dry for a minimum of 1 hour before sanding.
- Sealer sand the entire surface with 280 grit sandpaper prior to applying a color coat.

DuraGuard Finishing Instructions (continued)

Pinstripe Glaze Process over Colourtones and Prism Paints

After applying your desired Colourtone or Prism Paint follow this process to apply Pinstripe glaze.

- Select your desired glaze color (Coffee, Pewter or Onyx).
- Using a finely trimmed 1" paint brush or a fine artist brush, apply glaze lines to the deep profiled areas of your doors and drawer fronts.
- Only apply the lines to the profiled areas on the face and edges of the components. Do not apply glaze to any other surface areas.
- It is not necessary to apply any glaze to sheet stock, refacing stock, cabinet parts or any other products that do not have a deep profile for glaze to hang.
- Should any glaze accidentally get applied to non-glazed areas, use mineral spirits to remove excess glaze and clean areas around the Pinstripe lines where glaze may have smeared or smudged.
- Allow glaze to dry for a minimum of 1 hour.
- All Pinstripe glazes on Colourtones or Prism Paints require a coat of DuraGuard 10° sheen conversion varnish topcoat applied to a thickness of 4 wet mils within 24 hours.
- Allow topcoat to dry a minimum of 4 hours before handling.

Pinstripe Glaze Process over Wiping Stains

After applying your desired Wiping Stain, follow this process to apply Pinstripe glaze.

- Spray sealer to approximately 4 wet mil thickness.
- When sealer is completely dry, hand sand all surfaces using 320 grit sandpaper. Make sure to sand in same direction as wood grain.
- Select your desired glaze color (Brown, Caramel, Pewter or Sable).
- Using a finely trimmed 1" paint brush or a fine artist brush, apply glaze lines to the deep profiled areas of your doors and drawer fronts.
- Only apply the lines to the profiled areas on the face and edges of the components. Do not apply glaze to any other surface areas.
- It is not necessary to apply any glaze to sheet stock, refacing stock, cabinet parts or any other products that do not have a deep profile for glaze to hang.
- Should any glaze accidentally get applied to non-glazed areas, use mineral spirits to remove excess glaze and clean areas around the Pinstripe lines where glaze may have smeared or smudged.
- Allow the glaze to dry for a minimum of 1 hour.
- All Pinstripe glazes on Wiping Stains require a coat of DuraGuard 10° sheen conversion varnish topcoat applied to a thickness of 4 wet mils within 24 hours.
- Allow topcoat to dry a minimum of 4 hours before handling.

DuraGuard Finishing Instructions (continued)

Legal Disclaimers

- DuraGuard finishes are industrial in nature, unlike finishes purchased at a retail store. Although DuraGuard offers a higher quality finish than most finishes, it also is more combustible, more volatile and requires a higher level of expertise to apply. Due to the complexities involved with any finishing process, Conestoga will not be liable for any damages or injury resulting from the use of this product, even when the customer has taken precautions. Conestoga's liability is limited to the original purchase price of the finishing material.
- In order to best match any DuraGuard finish color, it is important to follow the preparation and application processes outlined on the previous pages. If these steps are not followed, your finished product may not match the products purchased from Conestoga. However, please bear in mind that following these procedures will not always guarantee an exact match. Due to the many variables involved in any finishing process, Conestoga assumes no responsibility if products that are finished by the customer using the DuraGuard System are not an exact match to the finished products sold by Conestoga.

Important Note: All drying times mentioned in this document are to be used as guidelines only. The actual drying time will vary according to the climate in which the finish is applied.

- The DuraGuard finish system is scientifically designed so that each of the materials, from basecoat or stain, to topcoat, work with one another, thereby providing a beautiful protective finish for your wood products. Finish materials not sold by Conestoga may react unfavorably with DuraGuard finishing materials causing poor topcoat adhesion, discoloration or other problems.
- Color variation can occur on separately ordered jobs. Conestoga cannot guarantee color matches on material ordered at different times. Length of time between orders may also be a factor affecting color variation. Environmental factors where existing material is stored or installed may affect finished products to the degree of causing an appearance different to that of a newly finished product. To better ensure consistency of appearance, Conestoga recommends against placing partial orders.

Health and Safety Information

Refer to SDS for health and safety information. Log on to www.conestogawood.com/sds for 24 hour access to SDS information.

Care and Cleaning of Fine Kitchen Cabinetry

- The DuraGuard topcoat offers the utmost protection for kitchen cabinet applications and provides superior chemical and common kitchen stain resistance while maintaining color and sheen.
- DuraGuard topcoats require minimal care and cleaning. We recommend periodic cleaning with a mild detergent and water solution to remove dirt, dust and grease that buildup with routine usage. Dampen a soft, non-abrasive cloth and wipe entire exterior surface of cabinetry and dry with a soft cloth. Never use a wet cloth that allows water to run down the cabinetry and always dry cabinetry immediately if water or other liquids are spilled onto the surface.
- Care should be taken not to use abrasive cleansers, ammonia or any other type of harsh chemical. These cleaning agents may cause discoloration, scratching, marring and dulling of the finish. We also discourage use of furniture polishes and waxes on finished cabinetry. Furniture polishes alter the original sheen level and may leave a film on the surface that attracts dust and dirt. These polishes may also cause an irregular or blotchy appearance because they are unable to stand up to many common kitchen stains.

Customer Supplied Parts for Finishing

- Conestoga's premium finishes are available on wood and MDF components not currently supplied by Conestoga through our Customer Supplied Products (CSP) program. While limited to products not currently available from Conestoga, the program is subject to size restrictions. Range hoods, assembled cabinetry and products supplied by direct competitors to Conestoga will be considered, but Conestoga reserves the right to refuse to finish any item.

Maximum Size Parameters (thickness x width x length)		
Mouldings	Plywood	Misc. Parts
2" x 12" x 144"	3/4" x 30" x 96"	15" x 36" x 96"

- Conestoga utilizes the standard finishing processes outlined in the Finishing Program Section to finish all customer supplied items. Parts submitted for finishing should be in finish ready condition and it is assumed that all parts will be in such condition that our standard finish processes and materials will produce the desired finished appearance.
- Additional charges will apply for those parts received that require additional labor such as puttying, sanding, and repair. Conestoga reserves the right to reject parts that are not in finish ready condition or that may contain materials that pose a contamination threat to our operation.
- For standard species, the CSP finish selection is limited to Recommended and Not Recommended offerings listed in the finishing Offering and Availability Chart.
- Stain and glaze finish topcoat glosses are 10° or 30° sheen. Paint or paint with glaze finishes are available with 10° sheen topcoat only.
- Parts having machining defects, material defects, or poor sanding will produce less desirable results than parts that have been properly prepared for finishing and will likely have a different finished appearance than accompanying items. Appearance variations of CSP products are not considered defective.
- It is likely that CSP exotic or non-domestic species will not match components manufactured and finished by Conestoga.
- It is assumed that parts shipped directly to Conestoga from vendors are the correct parts and will be processed as such. Conestoga will not be responsible for any shipping errors, delays or damages incurred on CSP parts.
- Customer is responsible for shipping these parts to Conestoga. Due to our truck routes and backhauls, customer supplied parts cannot be shipped to Conestoga on Conestoga trucks.
- All CSP shipped to Conestoga must include the appropriate sales order number provided by Conestoga.
- Standard finishing lead-times apply and will begin when part has been received, inspected and found to be in finish-ready condition and a customer approved quote is on file.
- CSP items cannot be expedited through the finishing process. Orders consisting of multiple parts or involving preparation labor may require additional lead-time.
- Contact Special Designs or your Sales Representative to properly complete the Request For Finish Quote Order Form found on the following page.

Moulding Program

Conestoga offers several different moulding programs for your convenience.

Program Selection	Species	Grade	Minimum Order Quantity	Maximum Order Quantity	Lead-Time, Days
8 ft. Standard Profiles	Stock	Choice	1 piece	25 pieces*	3
	Non-stock	Choice	1 piece	None	10
12 ft. Standard Profiles	Non-stock	Choice	1 piece	None	10
8 ft. Non-standard and Special Order Profiles	Any	Choice	1 piece**	None	10
12 ft. Non-standard and Special Order Profiles	Any	Choice	1 piece**	None	10
Random Length Cabinet Framing/S4S	Any	Prime	100 ft.	None	10

*Maximum stock order per specific profile and specie is 25 pieces. Orders exceeding 25 pieces require 10 day lead-time.

**Non-standard profile orders of less than 100 lineal feet will incur a set-up charge.

Solid Wood Moulding Specifications

- Eight foot standard and non-standard mouldings will be shipped 94" to 97" in length.
- Twelve foot standard and non-standard mouldings will be shipped 142" to 146" in length.
- Natural specie characteristics that exhibit the character and beauty of wood will be evident on mouldings. These characteristics will include, but not be limited to, color variations, heartwood, sapwood, pin knots, worm holes and surface and end checks. Conestoga specifications do not allow these characteristics to affect structural integrity of the mouldings.
- Natural characteristics that become evident through machining, environmental or atmospheric conditions such as minor bows, twists and crooks, may be evident but will not affect product quality or impede workability. Machining marks may be evident, but will not affect structural integrity. Moulding profiles 3-1/2" or larger may have at least one glue joint running the length of the piece.
- Solid wood mouldings utilize "Choice" grade material as defined below. Mouldings are classified differently than our door/drawer front wood grading of Premium, Standard and Value grade. Moulding grade refers to the usability of the lumber.
 - ♦ **Choice** – All moulding programs utilize Choice grade material. Each piece will exhibit similar material quality characteristics on the face of the moulding that we offer on our Standard grade doors. Ends will be trimmed. Depending on profile depth and specie ordered, sapwood or heartwood may appear on the moulding face. This is our highest grade for mouldings.
- **MDF Mouldings** - Produced from TSCA/CARB2 compliant MDF, these mouldings are ideal for high humidity or arid conditions as they are resistant to expansion, contraction, warping and twisting. Available raw, primed and painted.

Variable Width Light Rail #2578 Moulding

A variation of the #2380 Light Rail, the #2578 Variable Width Light Rail combines a matching specie mounting plate and the flexibility of a variable front height ranging from 1-1/2" to 5-1/2". Besides a light rail application, this moulding profile could be used as crown or fascia.

- Option to order both long edges profiled to match the doors' outside edge profile, or choose two different profiles.
- All published edge profiles available except B, C, FP, L-034, L-253, L-304, and L-686.

Specialty Mouldings

Shiplap #2580 Moulding

The 8' Shiplap moulding program provides a variety of moulding widths in 12 species, allowing designers to achieve a wide variety of looks from farmhouse to modern.

- Mouldings are profiled to automatically leave a 3/16" gap between the face of adjacent sticks during installation, creating the signature Shiplap appearance.

#2580 Shiplap Moulding*							
Species	4-9/16" width (4" face)	5-9/16" width (5" face)	6-9/16" width (6" face)	Species	4-9/16" width (4" face)	5-9/16" width (5" face)	6-9/16" width (6" face)

Maple, Hard				Walnut			

1/4" Solid Refacer's Program

- Moulding #2073 is solid 1/4" thick and designed to be applied over the face frames of existing cabinetry in field refacing applications.
- Available in 1/16" width increments from 1" to 6" wide x 96" long.
- Variable width refacer's moulding is available in Choice grade material. Sizes shown in the table below are for 1/4" thick "surfaced four sides" (S4S) square stock, molded and sanded.
- Available finished or unfinished. If finish option is chosen, moulding will be finished on face and two long edges only.

Ordering and Sizing Specifications

- Moulding is categorized and priced by width. Moulding width refers to the smallest whole-inch dimension of the refacing segment required. If the moulding is 1-1/4" wide, the appropriate pricing will be located in the 2" column. This rule is applicable to all sizes.
- Moulding wider than 5-1/16" may have one glue joint running the entire length.

Moulding Assembly Options

Conestoga's pre-assembled moulding options provide a cost effective alternative to installing mounting cleats and decorative accessory mouldings. By eliminating the need to assemble mouldings in your shop, you can increase throughput and focus your skilled labor on more profitable tasks. Assembled mouldings also finish more attractively, providing additional area for glaze hang up, accentuating the entire profile of decorative accessory mouldings.

Mounting Plate Installation Option

- The Mounting Plate Installation Option allows mounting plates to be pre-applied to select crown and light rail mouldings. For assembled mouldings over 8 feet in length, mounting plate will consist of two lengths cut to size.
- Eligible profiles include all published standard and non-standard crowns, 345 Reversible Frieze and 1448 Light Rail.
- Pricing is calculated by adding the cost of both eight foot moulding lengths plus for the Mounting Plate Installation option.
- Mounting Plate will consist of Paint Grade Hard Maple unless matching specie is otherwise requested.
- To order, designate "Mounting Plate Installation" next to each piece of moulding to be pre-assembled.
- Finishing Option is available for pre-assembled mouldings. See the Finishing Program Section for pricing and finish availability.

Decorative Moulding Assembly Option

- The Decorative Moulding Assembly Option allows customers to order select crown mouldings with accessory mouldings pre-assembled.
- 342, 343, 344 and 2057 Crown mouldings can be combined with the 7/8" Dentil, 1" Egg & Dart and 3/4" Rope mouldings.
- 1621, 1622 and 1623 Crown mouldings can be combined with the 1-1/2" Dentil, Egg & Dart and Rope mouldings.
- Pricing is calculated by adding the cost of both eight foot moulding lengths plus for the Decorative Moulding Assembly Option.
- To order designate "Decorative Moulding Assembly" next to each piece of moulding to be pre-assembled.
- Finishing Option is available for pre-assembled decorative mouldings. See the Finishing Program Section for pricing and finish availability.

Moulding Cut-Down Option

To combat the exorbitant fees freight carriers are charging for packages 96" or longer, Conestoga now offers an option to cut-down any of our mouldings to 90". This includes both trimming of the moulding to length and creating the associated packaging.

- upcharge per piece.
- To order specify "Cut-down to 90 inch" Option.

Special Order Moulding Program

- 8 foot special order mouldings are categorized and priced by width. Moulding width is the smallest whole-inch dimension necessary to manufacture that particular moulding profile. For example: 1-1/4" wide moulding pricing is in the 2" moulding width column. This rule is applicable to all sizes.
- Special order mouldings are only available in Choice grade material. Standard 8 foot length is 94" to 97". Any length greater than 97" and up to 12 foot lengths may be ordered in all Standard species except Bamboo, Red Birch and 1" White Birch. There will be a net upcharge per piece, in addition to the extra Material Footage Charge. Extended 15 day lead-time applies to 10 to 12 foot mouldings.

Contact Customer Service for specie availability and pricing.

Special Order Moulding - 8 ft. Choice Grade Pricing, per linear ft. (10 day lead-time)						
Specie	Moulding Width

*Bamboo, Red Birch and 1" White Birch available in 8 foot lengths only.

**Alder available up to a maximum of 115".

- A setup charge will be applied to all non-standard profile orders totaling less than 100 feet.
- Prices given in the chart are for 3/4" thick mouldings. 1" thick mouldings incur a 30% upcharge.
- Volume discounts per ft.
 - 1,000–3,000 ft.
 - 3,001–5,000 ft.
 - Over 5,000 ft.
- Many carriers have instituted oversize package surcharges. 8' mouldings are subject to these surcharges. These surcharges do not apply if delivered on a Conestoga truck.

Random Length Cabinet Framing

- Random length cabinet framing is available only in Prime grade material. Sizes shown in the pricing table below are for 3/4" thick "surfaced four sides" (S4S) square stock. Optional sanding is available at no additional cost. Specify sanded or unsanded when ordering.
- These pieces may contain a limited amount of defects and color variation permitted in the established rules of the National Hardwood Lumber Association for this grade. Pieces over 8 foot in length will be approximately 80% defect-free. Pieces under 8 foot in length will be approximately 90% defect-free. Defect locations will vary.

Ordering and Sizing Specifications

- Framing is categorized and priced by width. Framing width refers to the smallest whole-inch dimension necessary to manufacture that particular frame. For example: if the framing is 1-1/4" wide, the appropriate pricing will be located in the 2" framing width column, or if the framing is 2-11/16" wide, the appropriate pricing will be located in the 3" framing width column. This rule is applicable to all sizes.
- Random length framing is available in 4 to 12 foot lengths. Exact lengths may not be specified.
- Framing wider than 5-1/16" may have one glue joint running the entire length of the framing.
- Minimum order quantity is 100 feet.
- Optional grooving for Conestoga's Cabinet System's assembly splines is available. Stile and rail material must be ordered separately.

 - Many carriers have instituted oversize package surcharges. 8' mouldings are subject to these surcharges. These surcharges do not apply if delivered on a Conestoga truck.

Custom Dovetail Drawer Boxes

- Conestoga’s Drawer Box program offers multiple wood specie selections and custom options. Information about dovetail drawer boxes and related options are found on the following pages.
- Dovetail drawer boxes are fully assembled; Hard Maple, Soft Maple and Walnut can be ordered unfinished or finished; Natural Birch drawer boxes are only available finished. See finishing information contained in this section.
- Natural Birch, Hard Maple, Soft Maple and Walnut drawer box options and accessories have a 7 day standard lead-time, and a 2 day Code Red expedite lead-time; add 2 days for finishing. All other non-published drawer box species, add 5 additional days.

Custom Dovetail Drawer Box Specifications

The following species are available for the 5/8" Custom Dovetail Drawer Box program:

- Hard Maple and Soft Maple boxes are constructed with solid Maple sides, fronts and backs and 1/4" or 3/8" thick Maple veneer (wood composite core) bottom.
- Natural Birch drawer boxes are constructed with solid Birch sides, fronts, backs and 1/4" or 3/8" thick Birch veneer face and sound back plywood bottom.
- Walnut boxes are constructed with solid Walnut sides, fronts, backs and Walnut 1/4" or 3/8" thick veneer plywood bottom.
- Two finishing options are available with custom drawer boxes.
 - ◆ Standard finish on all program species is a durable, low emission UV topcoat.
 - ◆ Hand sprayed, catalyzed conversion varnish is available at an additional upcharge on Hard Maple, Soft Maple and Walnut drawer boxes.
- Both finish options have a 15° sheen topcoat. See Additional Options and Pricing Chart.
- Natural Birch drawer boxes are also available with unsanded/unfinished dovetails as a cost savings. Sides, backs and bottoms have a clear UV finish. Unfinished dovetails not available on Hard Maple, Soft Maple or Walnut when finishing option is selected.

To determine the list price of a Dovetail Drawer Box:

- Multiply the perimeter of the box in linear inches (2 x [width + depth]) by the appropriate height/specie price.
- Add the mandatory assembly charge per box. All drawer boxes are assembled.
- Add the price of all selected options.
- A minimum of 50 linear inches applies.

Pricing Example:

Hard Maple 4" high x 12" wide x 21-1/2" deep, assembled, finished, 1/4" bottom, undermount notching

Dovetail Drawer Box Options

Custom Logo – Laser Engraving

- All Laser Engraved logos will be located on the interior upper left front corner of the drawer box. Custom locations not available.
- A minimum drawer box height of 3" is required for the Laser Engraving option. Drawer boxes with modified side heights are not eligible for the Laser Engraving option.
- Custom Logo Laser Engraving is available in two resolutions:
 - Standard resolution produces a detailed engraved image:
 - Enhanced resolution products a deeper, darker engraved image.
- Customers must supply a digital image of their logo. The file/image provided will significantly impact the quality of the engraved logo. The digital image must be provided in one of the following file formats:
 - Adobe Illustrator (.AI)
 - Scalable Vector Graphic (.SVG)
 - Encapsulated Post Script (.EPS)
- Upon receipt of an acceptable logo file, Conestoga will produce samples of both the Standard and Enhanced versions of the logo on the eligible specie or species of your choice. These samples will be shipped to the customer for review to select the preferred version.
- Upon receipt of the signed Approval Form indicating the preferred resolution, Conestoga will program our system to default to the customer selected resolution. This resolution will automatically be designated each time the Laser Engraved Logo option is ordered.

Private Label Logo Burn

- The Private Label Logo Burn is the approved customer logo branded into the wood drawer side.
- The Logo Burn will be located on the interior upper left front corner of the drawer box. Custom locations not available.
- A minimum drawer box height of 3" is required for the Logo Burn option. Drawer boxes with modified side heights are not eligible for the Private Label Logo Burn option.
- The Private Label Logo Burn is priced at \$.90 list per drawer box.
- To initiate the creation of a brand with your company logo, contact your Conestoga Sales Representative or Customer Service for instructions.

No Bottom Option

- No upcharge.
 - ◆ All cutlery divider designs are constructed with a 1/4" bottom unless "NO BOTTOM" is specified.
 - ◆ Maximum height of cutlery dividers with no bottom is 2-7/8".

Reduced Height Option

- ◆ All divider designs can be reduced in height for specialty applications.
- ◆ Specify divider height when ordering.
- ◆ Minimum divider height with bottom is 1-5/8".
- ◆ Minimum divider height without bottom is 1-3/8".

Sliding Cutlery Divider

- Divider Design Charge.
 - ◆ Available with all divider configurations; specify design when ordering.
 - ◆ Top divider is 1-3/8" high mounted on a 1/4" base.
 - ◆ Minimum overall drawer box height is 3-15/16".
 - ◆ Recommended maximum drawer box width is 24" to ensure proper operation.

Custom Drawer Accessories (continued)

Fineline Cutlery Dividers

- Unique, tapered divider design affords sturdy compartment divisions with pleasing minimal profile.
- Available in Natural Birch or Walnut with a clear finish.
- Unit size prior to trimming is 1-15/16" high x 20-13/16" long. Standard widths shown in the pricing chart below.
- Base plate is designed to be trimmed to fit the interior dimensions of a specific drawer box.
- Each unit includes a trimmable depth extender for a truly custom fit and maximum storage.
- Optional knife block can be incorporated into cutlery units for maximum utensil storage.
 - ◆ Knife block measures 5-7/16" wide x 16-11/16" deep and accommodates 5 pieces of cutlery.
- **Cut-to-Size Option**
 - ◆ All Fineline dividers can be cut to fit inside a drawer box. Specify interior dimensions of drawer box.
 - ◆ Dividers will be packaged independently of the drawer box.
 - ◆ Cut-to-Size Option: list per kit.

- Dovetailed drawer boxes with hand pulls and interior dividers accommodate Conestoga's standard size sample finish chips (3/8" thick x 4-3/8" wide x 6-1/8" high). Custom box sizing is also available to accommodate custom dimensioned chips.
- Finish sample chip sets must be ordered separately.
- Matching specie wooden spacers are installed in the front and back of each display box to allow easy indexing of samples.
- 5" high boxes standard.
- Sizing for standard Conestoga 26 piece chip sets:
- Single set design: 5" high x 5-3/4" wide x 14" deep.
- Double set design: 5" high x 10-5/8" wide x 14" deep.
- Triple set design: 5" high x 15-1/2" wide x 14" deep.
- To accommodate 32 piece chip sets, depth for all designs should be ordered 16-5/8" deep.
- Sample box price follows drawer box specie per lineal inch Material Charge, assembly and finishing charges plus the Design Charges.
- To order customized Finish Sample Chip Display Boxes, follow these min./max. size guidelines:
- Single set design: min. width 5-3/4", max. width 15", max. depth 21".
- Double set design: min. width 10-5/8", max. width 24", max. depth 21".
- Triple set design: min. width 15-1/2", max. width 31", max. depth 21".

Custom Drawer Accessories (continued)

Non-Slip Drawer Liners

- Non-Slip Drawer Liners keep utensils in place as drawers are opened and closed.
- A non-slip rubber surface is applied to a polystyrene backer to deaden sound and protect drawer bottoms against drips and minor spills.
- The attractive grey fiber pattern goes well with Birch, Maple and Walnut drawer boxes.
- Available in sheet form, is easily trimmed-to-size with a sharp utility knife and straight edge.
- Non-Slip Drawer Liners can be installed in both framed and full access cabinet drawers, including Conestoga's Advantage and Vesta RTA lines.

Girasolo Blind Corner Optimizer

- Girasolo Blind Corner Optimizer units provide a unique way to utilize the storage area within blind base corner cabinets.
- Revolutionary in design, Girasolo Blind Corner shelving provides the maximum surface area while allowing swing out shelves to fully function in openings as narrow as 12" in width.
- A single pivot post makes installation quick and easy, with just 8 installation screws.
- The unique pull-out motion limits interference with adjacent cabinets.
- Soft open and close system ensures smooth, quiet operation.
- Each unit includes two Maple patterned TSCA compliant swing-out shelves with metal side rails to secure stored items.
- Adjustable height shelves, each with 44 lb. weight capacity.
- Girasolo Blind Corner units can be installed in both framed and full access cabinetry, including Conestoga's Advantage and Vesta RTA lines.

Custom Valances - Special Designs

Conestoga offers a wide variety of arched panel configurations and options. Valances illustrated on the following pages represent popular custom arched panel designs. The manufacturing of custom valances is based off of customer-supplied dimensioned drawings. **If any of the following illustrations below match the look you desire, please copy the appropriate page, designate the necessary dimensions and forward it to Customer Service.**

- Arched panel valances are available in most mortise and tenon and miter designs. Applied moulding designs, while commonly available, depend on the radius of the panel.
- Design options include, but are not limited to all published panel raises and framing beads, edge profiles, grooved panels, wide framing, and custom rise dimensions.
- A CAD drawing will be created prior to the manufacturing of any custom arched panel. After a review and sign off by the customer, the drawing must be returned to Special Designs in order for production to begin. Lead-time calculations will not begin until Conestoga has received an approved drawing.
- Framing widths will match door style selected unless otherwise noted by customer.
- Please provide all necessary dimensions when ordering.

Standard 1-Piece Valances

- 1-Piece Valances are available in 4-1/2" to 6" heights except Traditional Arch which is available in 6" height only.
- 1-Piece Valance pricing is determined using design plus material calculations. See the drawings below to determine appropriate Design Charge. Calculate overall square footage of valances and refer to Category B of the specie desired in the Material Pricing Guide to determine Material Charge.

Classic Arch

Valances 21" to 60" – Design Charge Valances
60-1/16" to 96"– Design Charge

Elegant Arch

Valances 21" to 60" – Design Charge
Valances 60-1/16" to 96"– Design Charge

Roman Arch

Valances 12" to 60" – Design Charge Valances
60-1/16" to 96"– Design Charge

Straight

Valances 12" to 60" – Design Charge
Valances 60-1/16" to 96"– Design Charge

Traditional Arch

Valances 16" to 60" – Design Charge
Valances 60-1/16" to 96"– Design Charge

Edge Profile Options

- Straight valance comes standard with Machine Edge, but is available with any edge profile. Specify which edges receive an edge profile, other than Machine Edge.
- Roman Arch valance and Traditional Arch valance come standard with Machine Edge. These valances are available with edge profiles: B-2, C-2, CFP-2, E-2, H-2, J-2, L-059, L-120, L-149, L-281, L-382, L-772, L-803, L-1160, LC-2, PRS-2, RC-2 and V-2. Specify which edges receive profiles other than Machine Edge.
- Classic Arch valance and Elegant Arch valance are available with a Machine Edge only.
- See matrix on next page to determine pattern related dimensions.

Standard 1-Piece Valances (continued)

Valance Matrix Instructions

Use the matrix below to determine the specifications for patterned valances. Find the desired valance length in one of the C rows. The top number (white numbers in black) in the column with the desired length is the pattern length. The pattern will be centered on the valance.

From the C block containing the desired overall valance length, the extreme right number in that row, which is under column B is the size of the flat areas on the left and right side of the pattern.

Example: If ordering a Traditional Arch valance with an overall length of 30" (dimension C), note that:

- 30" appears in the sixth C row, fourth column of the matrix.
- Referring to the top of the column, in row A, a pattern length of 19" will be found.
- Referring back to the 30" C row, at the right end of the row, in column B, flat areas of 5-1/2" on both the left and right ends of the valance will be found.
- The selected 30" valance will have a pattern 19" wide, centered on the valance, with 5-1/2" wide flat areas at both ends of the valance.

Valance Matrix											
A*	9"	11"	14"	19"	24"	30"	42"	54"	66"	78"	B
C	15"	17"									3"
C	16"	18"	21"	26"	31"	37"	49"	61"	73"	85"	3-1/2"
C		19"	22"	27"	32"	38"	50"	62"	74"	86"	4"
C		20"	23"	28"	33"	39"	51"	63"	75"	87"	4-1/2"
C			24"	29"	34"	40"	52"	64"	76"	88"	5"
C			25"	30"	35"	41"	53"	65"	77"	89"	5-1/2"
C					36"	42"	54"	66"	78"	90"	6"
C						43"	55"	67"	79"	91"	6-1/2"
C						44"	56"	68"	80"	92"	7"
C						45"	57"	69"	81"	93"	7-1/2"
C						46"	58"	70"	82"	94"	8"
C						47"	59"	71"	83"	95"	8-1/2"
C						48"	60"	72"	84"	96"	9"

***Note:** Dimensions above are based on a 6" height. Any increment 1/2" or less round down to nearest measurement in row "A". Any increment 9/16" or greater round up to nearest measurement in row "A".

Slab Fillers

Slab Filler

- Slab fillers can be ordered in widths from 1-1/2" to 48" and heights from 4-1/2" to 96". Available in all 3/4" and 1" species.
- All 3/4" and 1" edge profiles are available.
- Slab fillers are available with pegs, radius corners, grooves, back-routed hand pulls, distressing, wear sanding and weathered grain.

Any solid wood Slab products exceeding 35-15/16" in width (across the grain) will be quoted by Special Designs.

***100 to 119-15/16" specie availability:** 3/4" thick species include Cherry, Hard Maple, Hickory, Paint Grade Hard Maple, Quarter Sawn White Oak, Red Oak, Rift Cut White Oak, Rustic Knotty Cherry, Rustic Knotty Hard Maple, Soft Maple, Walnut and White Oak. 1" thick species (1" upcharge applies) include Cherry, Hard Maple, Red Oak and Soft Maple.

†120" to 144" specie availability: 3/4" thick species include Cherry, Hard Maple, Hickory, Paint Grade Hard Maple, Quarter Sawn White Oak, Red Oak, Rift Cut White Oak, Soft Maple, Walnut, White Birch and White Oak. 1" thick species (1" upcharge applies) include Cherry, Hard Maple, Paint Grade Hard Maple and Soft Maple.

Glass Shelves

1/8" depth

1/4" depth

Grafton

8" x 12"
2" Framing

- Used in conjunction with a frame only door or a Wire Grille Insert.
- Allows light to flow through the entire cabinet, accentuating fine dinnerware, glassware or other collectibles.
- All 3/4" and 1" species available.
- Maximum size – 23-15/16" deep x 36" long.
- Edge profiles – defaults to machine edge on all 4 edges. Additional edge profiles include B-2, C-2, CFP-2, H-2, J-2, L-034, L-059, L-149, L-382, L-803, L-1160, LC-2 and PRS-2.
- Two framed options accept either 1/8" or 1/4" glass (glass not included).

Fluted Fillers

Tapered Flute

Rounded Flute

- Fluted Fillers can be ordered in custom widths from 3" to 15-15/16" and heights up to 96" in all standard 3/4" species.
- Choose from either Tapered or Rounded flutes. If not specified, flutes will be produced using the Tapered design.
- Non-fluted or "flat" areas are design specific, but can be customized to meet your design needs. Simply specify the flat dimensions desired. Specify "Flats to measure 0" to extend flutes the entire length of filler.
- Fluted Filler pricing is determined using design plus material calculations. See the chart below to determine appropriate Design Charge. Calculate overall square footage of filler and refer to category B of the specie desired in the Material Pricing Guide to determine Material Charge.
- The number of flutes per filler width is indicated in the chart below. Custom flute spacing is available through Special Designs.

Fluted Filler Pricing			
Filler Width	# Flutes	Under 60" in length	60" or greater in length
3" to 3-15/16"	3		
4" to 4-15/16"	4		
5" to 5-15/16"	5		
6" to 6-15/16"	6		
7" to 7-15/16"	7		
8" to 8-15/16"	9		
9" to 9-15/16"	10		
10" to 10-15/16"	11		
11" to 11-15/16"	12		
12" to 12-15/16"	14		
13" to 13-15/16"	15		
14" to 14-15/16"	16		
15" to 15-15/16"	17		

Edge Profile Options

- Fluted Fillers come standard with a Machine Edge, but can be ordered with a variety of edge profiles including B-2, C-2, LC-2, L-034, L-059, L-149, L-253, L-382, L-686, L-1160, PRS-2, RC-2 and V-2.
- Beveled edge profile selections include the L-991 (45 degree back bevel) and the L-423 (22-1/2 degree back bevel).
- Premium edge profiles include the L-297, L-304 and LC-Inset edge. Upcharge applies.

Wood Floating Shelves

The Floating Shelf is a functional way to add style to the interior décor of kitchens, bathrooms and other living areas throughout a home. These shelves have a support frame that must be mounted securely to the studs in the wall, then the exterior portion of the shelf slides over the support frame to completely conceal the sub-structure. The result is an attractive, fashionable shelf to display pictures, dishware and other interior design accents.

Mini Plain, Plain, Beaded and Crown Floating Shelves

- Available species include Cherry, Hard Maple, Paint Grade Hard Maple Hybrid, Quarter Sawn White Oak, Rift Cut White Oak, Red Oak and Walnut.
- The front and sides of the shelves are made from 3/4" solid hardwoods, mitered at the two front corners.
- The Beaded Floating Shelf includes a decorative bead on both the top and bottom of the front and side returns.
- The Crown Floating Shelf includes a modified crown moulding on the front and side returns.
- The shelf top and bottom is 3/8" thick plywood, matching the specie of the hardwood, except for Paint Grade Hard Maple Hybrid, which uses 3/8" MDF for the shelf top and bottom.
- Once the Floating Shelf is fully installed, it is recommended that the shelf be secured to the support frame using headless pins or small finishing nails so the shelf cannot inadvertently slide off of the support frame.
- Custom lengths available. Pricing rounded to next largest published size plus an additional.

Support Frame

- Manufactured using 3/4" thick unselected hardwoods.
- It is imperative that Floating Shelves be mounted to the recommended number of wall studs using two or more coarse thread screws at least 2-1/2" in length per stud. The 6" and 12" Floating Shelves should be mounted to one or more wall stud, the 24" to 48" Floating Shelves should be mounted to two or more studs, the 60" Floating Shelf should be mounted to three or more studs, the 72" and 84" Floating Shelf should be mounted to four or more studs.
- Maximum load capacity for the shelf and support frame is 10 lbs. per linear foot. While Floating Shelves are built from strong, sturdy materials, the load capacity of these shelves is dependent upon the quality of the installation screws and whether the shelves are secured into the wall studs. If not secured into the recommended number of studs using two or more high quality installation screws per stud, the shelf may not support the desired weight. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.
- All models of Wood Floating Shelves are available with primers, wiping stains, Truetones, Colourtones, Prism Paints and glazes.
- Finish pricing: Design Charge multiplier – 1.5x
Material Charge – actual sq. footage x 1.25

Wood Floating Shelves (continued)

L-Style Wood Floating Shelves

The L-Style Wood Floating Shelf is a functional way to add style to the interior décor of kitchens, bathrooms and other living areas throughout a home. These shelves include two-part reinforced nylon support clips that must be securely mounted to the shelf itself and to the studs in the wall. The support clips interlock, completely concealing the mounting hardware. The result is a sturdy, attractive, and fashionable shelf to display pictures, dishware and other interior design accents.

L-Style Wood Floating Shelf

- The shelf is produced from solid hardwoods and is shipped assembled and ready to be installed.
- The back of the shelf is routed out along nearly the length of the entire shelf so that the support clips can be installed where needed to align with the available wall studs and remain fully concealed after installation.
- Custom lengths available. Pricing rounded to next largest published size plus an additional. **Support**

Clips

- Manufactured using high strength reinforced nylon.
- Clips are designed to interlock and are extremely strong and durable.
- Mounting fixtures are secure and concealed.
- Secure clips to the L-Style shelf using #8 pan head screws.
- It is imperative that support clips be mounted to two or more wall studs using four or more coarse thread screws at least 2-1/2" in length.
- Installation jigs are provided to aid with positioning the clips correctly to the shelf and wall studs.
- Maximum load capacity for the shelf and support clips is 10 lbs. per linear foot. While L-Style Floating Shelves are built from sturdy hardwood materials, the load capacity of these shelves is dependent upon the quality of the installation screws and whether the support clips are properly secured into the shelf and wall studs and the support clips are interlocked properly. If the support clips are not secured to the shelf properly, or the shelf is not secured into two or more studs using two or more high quality installation screws per stud, the shelf may not support the desired weight. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.
- L-Style Wood Floating Shelves are available with primers, wiping stains, Colourtones, Prism Paints and glazes.
- Finish pricing: Design Charge multiplier – 1.5x, Material Charge – actual sq. footage x 1.25

Specialty Products

Super Matte Floating Shelves

- Available in select Super Matte colors – see pricing chart below.
- The front and sides of the shelf are made from 3/4" edgebanded material, mitered at the two front corners.
- The shelf top and bottom is 6mm thick Super Matte material.
- Once the Floating Shelf is fully installed, it is recommended that the shelf be secured to the support frame using headless pins, small screws or small finishing nails so the shelf cannot inadvertently slide off of the support frame.
- Custom lengths available - pricing rounded to next largest published size, plus an additional charge.

Support Frame

- Manufactured using 3/4" thick unselected hardwoods.
- It is imperative that Floating Shelves be mounted to two or more wall studs using four or more coarse thread screws at least 2-1/2" in length. The 60" Floating Shelf should be mounted to three or more studs.
- Maximum load capacity for the shelf and support frame is 10 pounds per linear foot. While Super Matte Floating Shelves are built from strong, sturdy materials, the load capacity of these shelves is dependent upon the quality of the installation screws and whether the shelves are secured into the wall studs. If not secured to two or more studs using two or more high quality installation screws per stud, the shelf may not support the desired weight. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.

Alternative Material Floating Shelves (continued)

Decorative Laminate Veneer Floating Shelves

- Available in all Allure colors - see pricing chart below.
- The front and sides of the shelf are made from 3/4" banded DLV material, mitered at the two front corners.
 - Bright White and White Dove, front of shelf and edges are manufactured using 19mm DLV board; Canadian Grey, Clearwater Oak, Dering Forest, Helena Walnut, Monaco, Ocala Walnut, Sabine Walnut, Valley Forge Elm, White Chocolate and White Cypress. Shelves are manufactured using DLV center panel material sandwiched to 1/2" MDF, then edgebanded. Interior of sandwiched material is raw MDF.
- The shelf top and bottom utilizes DLV center panel material.
- Once the Floating Shelf is fully installed, it is recommended that the shelf be secured to the support frame using headless pins, small screws or small finishing nails so the shelf cannot inadvertently slide off of the support frame.
- Custom lengths available - pricing rounded to next largest published size, plus an additional charge.

Support Frame

Stemware Holders

- Stemware holders are available in Cherry, Hard Maple and Red Oak.
- 30" (7 slots) or 36" (8 slots) lengths.
- Spacing between slats:
30" stemware holder – 1-1/8".
36" stemware holder – 1-3/8".
- Depth 11-1/4".
- Thickness 1-1/2".
- Accommodates most stemware styles.
- Available unfinished or finished. See the Finishing Program Section for pricing.

Custom Cutting Boards

1-Piece Slab

3-Piece Slab

1-Piece Barrel

3-Piece Barrel

Hand Pull - 1/4" deep,
3-1/2" long, 1/2" wide

Drip Groove - 5/32" deep

- Cutting boards are available in all published species except Rustic Knotty.
- All cutting boards utilize Category B Material Charge.
- Cutting boards available in 3/4" and 1" thickness.
- Minimum size for all styles is 10" x 10", maximum size is 18" x 22".
- All designs include 3/4" radius corners and 3/32" radius edges.
- 3-Piece designs are made using 2-5/16" wide rails on face (horizontal grain) with pinless construction.
- All cutting boards have a routed drip groove into the face of the board to collect liquids.
- No oils or finishing treatments will be applied by Conestoga.
- Care instructions for wood cutting boards:
 - ♦ Treat wood with butcher block oil or mineral oil only.
 - ♦ To clean, wipe with a mixture of warm water and a mild dish detergent. Never submerge cutting boards in water or place in dishwasher.
- Hand pull option on back of cutting board is available: per pull.
- Due to repetitive exposure to liquids, cutting boards will not be warranted against bowing, warping, splitting or twisting.

Please refer to pricing through Con-Nex,
our online ordering program

Front Frame Specifications

- Double dowel construction on standard width framing.
- Material will be Standard grade unless otherwise noted. Premium grade available, upcharges apply.
- Standard framing width is 1-1/2"; additional widths available, upcharges apply.
- 3/4" framing thickness standard; 1" thick material is available, upcharges apply.
- Minimum framing width 3/4"; 15/16" for front frames with an edge profile.
- Material surfaced on four sides.
- Assembled frames sanded on front only with 220 grit sandpaper.
- Maximum front frame sizes are 120" in one direction and 48" in the other direction. For example, a front frame can be ordered 48" x 120" or 120" x 48" but not 120" x 120".
- Framing wider than 4-1/2" may have one glue joint. Framing wider than 6-1/2" may have two glue joints.
- Minimum glue-in trimmable insert width is 1/2"; maximum glue-in trimmable insert width is 3".

Front Frame Tolerances

- A tolerance of +/- 1/32" is considered acceptable on front frame exterior and interior opening dimensions.
- A tolerance of +/- 1/16" out of square is considered acceptable on all front frames.
- 1/32" offset on frame back at any joint is considered acceptable.
- 1/64" offset at any exterior joint on the outside perimeter is considered acceptable.

Front Frame Ordering Information

- Conestoga's custom front frames can be ordered as beaded, non-beaded or profiled. To specify, check the appropriate box in the beaded area of the order form.

Non-beaded

1/4" Bead

3/8" Bead

3/8" Ogee

1/4" V-Bead

- Front frame exterior dimensions, interior opening dimensions and framing widths can be ordered to the nearest 1/16".
- On beaded orders, customers may select specific openings to be "non-beaded" by specifying the opening letter designation. Example: "Do not bead opening S."
- When ordering custom front frames for Conestoga Cabinet Systems, all framing and opening sizes must be specified by the customer. Only standard groove locations available.
- Front Frame Configuration Template Packet can be found on the Customer Business Portal. Contact Customer Service for sign on information or, request the Front Frame Configuration Template Packet.

Front Frame Pricing

Pricing Instructions

- Front frame pricing is based on the number of openings and the external frame perimeter.
- Use frame perimeter (linear inches) x specie price per linear inch. Use the appropriate column to determine the material price based on specie and the number of openings.
- Add the appropriate cost per opening charges from the chart below.

Cost per Opening	
First opening	
Additional openings, each	

Material Charge per Opening

Oversize front frame sanding (frames exceeding 48" in width or height)	
Unassembled front frames	

*Indicates premium specie availability – upcharges apply.

Pricing Methodology for Finishing Custom Front Frames

Front frame Material Charges are calculated using the perimeter of the front frame multiplied by 4, and then divide the result by 144. Multiply the result by the applicable Material Charge. Add the appropriate number of Design Charges based on the number of front frame openings.

Example: 2 opening front frame 30" x 36" in Harvest Gold

Pricing for all parts will be based on design + material methodology using material charges from Conestoga's finishing program (see Finishing Program Section for Material and Design Charges).

Custom Front Frame Finishing	
Number of openings	Design Charge Multiplier
1	1
2 to 3	1.5
4 to 5	2
6 to 7	2.5
8+	3

Orders containing products with different lead-times are given the longest lead-time date.

Inset Door and Drawer Front Information

- The following edge profile options are recommended for use with inset doors and drawer fronts.
- These edges have a 5 degree back bevel edge to ensure sufficient door clearance. Machine Edge and L-149 are available upon request at no additional upcharge.
- Front frames ordered with inset doors and drawer fronts will be pre-fit to the opening size. A 3/32" margin will be used on all sides for single doors and drawer fronts and between butt door pairs.

L-304

L-996

Design Exceptions

- The following door and drawer front styles are not available for inset applications due to their unique design characteristics: 1-1/8" Sandwich Drawer Front, #10 Drawer Front, 10141 Drawer Front, Alexandria, Aspen, AspenPP, Astoria, Aurora, Boulder, BoulderPP, CRP-1420, CRP-10191, CRP-10318, CRP-10334, CRP-10827, CRP-10875, CRP-10946, Fairhaven, Fargo, FargoPP, Hastings, Juno, Keystone Drawer Front, LaSalle, Marcel Drawer Front, Omaha, OmahaPP, Prestige, Rothbury, Rothsford, Savoy, Topeka, TopekaPP, TW-10827 and Venus.
- Alternative Material doors and drawer fronts are not available for inset applications, including Allure DLV, Intrigue TTS, Strata TTS, Vogue TTS, Synchronicity High Gloss and Super Matte products.
- Openings with trimmable inserts are not available beaded.
- L-253 and L-686 – only edge profiles available in MDF pre-fit products.
- Finished front frames are not available with antiquing or wear sanding.
- Distressed front frames will receive a modified distressing package.

Inset Door and Drawer Front Information (continued)

- Custom front frames that are ordered with Colourtones and glazes will receive the same hand glazed finishes as doors. Cabinet Systems parts that are ordered with Colourtones and glazes will be finished with the special Colourtones that have been tinted to match the Colourtones and glaze combination. They will not receive a hand rubbed glaze.

Inset Option with Miter Designs Not Recommended

Only miter door designs with edge profile options are available with the inset option; however, miter designs are not recommended with the inset option. The following issues are associated with inset miter designs, and will not be considered defective:

- ♦ **Miter joint lines may not intersect door corner after pre-fit sanding.** This is not considered a defect as it is a necessary part of the pre-fit process to ensure the proper fit within the frame openings. This condition may not be pleasing to some customers.
- ♦ **Panel expansion caused by high humidity may cause miter doors to bind inside frame openings.** Although Conestoga's miter door joint construction is one of the most durable in the industry, high humidity will cause solid wood center panels to expand in width. This pressure can result in framing pushing outward and creating a "barrel" effect where the framing rubs against the front frame.
- ♦ If a miter design is selected, it is highly recommended that doors and drawer fronts be manufactured as 5-piece MDF, Hybrid products with MDF center panels or with plywood center panels. These materials will reduce the likelihood of product expansion and binding of inset doors within the front frame. While reducing the possibility of binding, expansion of solid wood framing can still occur and will not be considered defective.

1/8", 1/4" and 3/4" Plywood Program

- 1/8" thick sheet stock with Grade A face veneer applied over veneer core with sound back.
- 1/4" thick sheet stock with Grade A face and #1 back veneers applied over MDF core.
- 3/4" thick sheet stock with Grade A face veneer applied over veneer core with prefinished Natural Birch back, except where otherwise noted.
- 3/4" thick full sheets or cut-to-size panels over 96-1/16" up to 120" in length of Hard Maple/Hard Maple will have an MDF core.
- All 1/8", 1/4" and 3/4" sheet stock is available in full 4' x 8' sheets, with the exception of Hard Maple/Hard Maple which is also available in 4' x 10' sheets. All sheet stock including 4' x 10' material is also available as cut-to-size panels.
- Plywood finished in Colourtones may have pin marks and small scratches from drying racks, veneer checks, seam separation, glaze smudges, fingerprints, overspray and some dirt in topcoat. Such defects will be kept to a minimum, but are unavoidable when finishing large parts and will not be considered defective. 3/4" thick edges will not be finished unless edgeband has been applied.
- Lead-time 5 days cut-to-size, unfinished; 3 days for full sheets. Add 5-6 days for finishing.
- Additional sheet stock is available through Special Designs in common species, grades and thickness in single sheet minimums. Specify thickness, core type, specie (face and back), veneer grade (face and back) and veneer cut (face and back). Lead-times and pricing are subject to availability.
- Oversized packaging charge of per item applies for large cut-to-size pieces or full 4' x 8' sheets of 1/8", 1/4" or 3/4" material. Oversize packaging parameters and conditions apply when the size exceeds 36" wide and 36" long, if any dimension exceeds 84", or when a customer requests oversize packaging.

1/8", 1/4" and 3/4" Plywood Program (continued)

Pricing Instructions

- Multiply actual square footage of panel by the appropriate specie Material Charge.
- Add the Design Charge per panel and applicable options.

Options

- When ordering cut-to-size plywood, specify width, height and grain direction.
- Edgeband charges (3/4" plywood only):
 - ♦ .5mm edgeband 1 to 4 edges: per panel.
 - ♦ 2mm edgeband 1 to 4 edges: per panel.
 - ♦ For edgeband on specific edges of cut-to-size plywood, specify edges as follows: top, bottom, left, right or all edges.
- Grooving available (1/4" material only):
 - ♦ G-012, G-015 or G-056 groove profiles.
 - ♦ Spacing available in increments starting at 1/2" up to 4".
- When ordering primed or painted 3/4" cut-to-size MDF panels, exterior edges will not be profiled, sanded or prepped for finishing and panel edges will appear somewhat porous. To receive edges that are profiled and sanded prior to finishing, order as a Slab door design with the Machine Edge profile.
- Panel Grooving charges (per panel):
 - ♦ Up to 24" wide and 48" or under in length.
 - ♦ Up to 24" wide and over 48" in length
 - ♦ Over 24" wide and 48" or under in length.
 - ♦ Over 24" wide and over 48" in length.
- Cut-to-size or full sheets of plywood also available finished; see Finishing Program Section for finish options and pricing.
- Colourtone finishes are available on Cherry, Hard Maple and Red Oak plywood only.

1/4" Short Grain Plywood Program

- 96" x 48" panel for island back or wall panel applications.
- Grain runs vertically in the 48" direction.
- 1/4" thick material with Grade A face veneers applied over MDF core with sound back.
- Available unfinished or finished; see Finishing Program Section for finish options and pricing.
- Lead-time 3 days unfinished, add 5-6 days for finishing.
- Oversize packaging fee applies.

Veneers

11

Specialty Products

- All veneers are approximately 1/32" thick and have real wood veneer faces.
- One end and one side of any veneer sheet is guaranteed to be free from physical damage.
- Wood back veneers have a cross grain wood backer which allows trim edges to be finished to reduce "black line" effect.
- Poly back veneers are applied to a polymer resin impregnated membrane. They contain no added urea formaldehyde (NAUF), are rigid yet pliable and provide excellent moisture resistance.
- Wood back and Poly back veneers are available with their applicable backer with an optional pressure sensitive adhesive (PSA) backer. PSA backed veneers have a pre-glued adhesive layer protected by a peel coat covering that must be removed prior to application.
- Phenolic Back veneers will be used in place of 48-1/4" x 96-1/2" Wood back or Poly back when ordered with Colortones, Prism Prints or primers. Upcharge applies.
- Veneers are not guaranteed to perfectly match solid wood doors. Veneer is sliced from premium material; color and grain match will be more uniform than solid wood doors. Hickory veneers may contain mineral streaks and peck marks.
- Proper surface conditions and preparation is essential to successful application and performance of veneered surfaces.
- Per manufacturer's recommendations, veneers of all backer types should be placed flat and allowed to acclimate 48 hours before installation.
- Pressure sensitive veneers should not be applied to bare wood or surfaces covered with sanding sealers, high pressure laminates, melamine or other plastic materials.
- Wood back and Poly back veneers are best applied with roller grade adhesives. Sufficient adhesive coverage on both the veneer and substrate surface will ensure proper adhesion and performance.
- Conestoga is not liable for product failure due to improper surface preparation, adhesive selection or installation technique.
- Finishing Option available. Stained veneers may vary slightly in color from solid wood products of the same specie. Finishing adds 5-6 days to standard lead-time.
- Conestoga does not accept returns of veneers.

Wood Edgeband Program

Conestoga offers 7/8" wide x 500' rolls of .5mm wood edgeband to complete your panel processing requirements. Select species are also offered in 250' rolls. See charts below for specie availability.

- Real wood veneer applied to an unglued fleece backer.
- Edgeband is not guaranteed to perfectly match solid wood doors or sheet stock. Veneer edgeband is sliced from premium material; color and grain match will be more uniform than solid wood doors.
- Edgeband will contain multiple splice joints which will not be considered a defect.
- Conestoga is not liable for product failure due to improper surface preparation, adhesive selection or installation technique.
- All Conestoga finishing options are available as outlined in the Finishing Program Section of this manual.
- Lead-time 5 days unfinished for stock species, add 5-6 days for finishing. Expedite lead-times not available.
- Conestoga does not accept returns of finished edgeband.
- See the Finishing Program Section for finish pricing.

PVC Edgeband Program

Thermoplastic PVC Edgeband

- PVC edgeband rolls are 15/16" wide, 600' in length and .018" (.5mm) thick.
- Rolls of PVC edgeband are available in over 120 colors and grain patterns to match popular Conestoga finishes.
- The back side of the edgeband is coated with a bonding agent for superior adhesion when used with hot melt glues or solvent-based adhesives.
- PVC edgebands are impact resistant and perform well with cutting tools.
- The PVC edgebands listed provide a close match in appearance to the specie and finish referenced, however, due to color variations in wood substrates we cannot guarantee a perfect match. Some edgebands contain a slight texture and are identified with an asterisk in the chart. Edgeband finishes with two asteriks are 1mm thick and have a slight texture.
- Conestoga is not liable for product delamination or adhesion failure due to improper surface preparation, adhesive selection or installation technique.
- Full rolls only, partial rolls are not available through this program.
- Lead-time is 4 days, expedites not available.

Since Conestoga offers thousands of specie, finish and glaze combinations, customers may have a need for an edgeband not listed in our standard offering. In this case, Conestoga will attempt to work with our suppliers to see if an existing match can be identified. Since a sample chip of the specie/finish must be produced and shipped to the supplier, there will be a fixed charge of for this exercise, regardless if a match is found or not.

For a complete list of our current PVC Edgeband offering, please refer to the PVC Edgeband guide on the Customer Business Portal or Con-Nex, our online ordering program.

our online ordering program**

3D Panels

3D Panels are a functional way to create built-in appearances, commonly used as refrigerator end panels, at the end of cabinet runs, a bridge above or beneath wall cabinets, and as island ends. All three panel models include inner supports to prevent panels bowing or cupping. 3D Panels up to 96" are made from 3/4" thick composite core plywood. Panels above 96" will be either composite core plywood or veneer core plywood. Species available are Plain Sliced Cherry, Hard Maple, Raw MDF, Rift Cut White Oak and Walnut.

Sizing

- Custom sizing is available to the nearest 1/16" in width, depth and height within program parameters.
- Minimum height for all models is 24", maximum standard height is 96" with vertical grain, maximum height for MDF is 96". Taller MDF heights available, but must be quoted through Special Designs. Additional lead-time required.

Pricing

- Calculate the actual square footage of the exposed/exterior side. Multiply the panel square footage by the appropriate specie list price. A 3 square foot minimum applies, regardless of actual size.
 - ♦ Cherry & Hard Maple – per square foot.
 - ♦ MDF – per square foot.
 - ♦ Rift White Oak – per square foot.
 - ♦ Walnut – per square foot.
- Multiply the total material cost established in the prior step by the model multiplier:
Box Panel – 2.2, J-Panel - 1.5, U-Panel - 2.0.

Order Placement

- When placing order for any of the 3D Panel models, include the following dimensions:
 - ♦ Width of front panel (B side and/or D side).
 - ♦ Depth of exterior/exposed side panel (A side and/or C side).
 - ♦ Height of exterior/exposed side panel (A side and/or C side).
 - ♦ Vertical or horizontal grain direction.

Program Features

- Specify vertical or horizontal grain. (maximum size perimeters vary by grain direction).
- Finish options – available unfinished or finished in all published specie/finish selections except Distressing.
 - ♦ Finishing charges follow Conestoga's design plus material pricing method.
 - A minimum of 3 square feet will be applied, regardless of actual size.
 - 3.00 to 6.00 square feet – 2x Design Charge plus actual square footage charge of the exterior panel.
 - 6.01 square feet to 10.00 square feet – 3x Design Charge plus the actual square footage charge of the exterior panel.
 - 10.01 square feet and greater – 4x Design Charge plus the actual square footage charge of the exterior panel.
- Internal supports in 3-D Panel ends and backs are positioned 1" in from edges to fit over cleats mounted to the floor, wall and/or ceiling.
- Lead-time is 10 business days unfinished. Add 5 to 6 days for finishing.
- Expedites are not available.

3D Panels (continued)

11

Specialty Products

Box Panel

- Primarily used as island ends when both the front and back edges are exposed.
- Both ends of the Box Panel will be equal in width and height (B and D sides).
- Both side panels of the Box Panel will be equal in depth and height (A and C sides).
- Width range of front and back panels: 1-1/2" to 3" (B and D sides).
- Depth range of side panels: 12" to 47" (vertical grain). Horizontal grain depth range is 12" to 95" (A and C sides).
- Height range of side panels: 24" to 96" (vertical grain), 96" MDF. Veneered panels available 96-1/16" to 120" – additional lead-time required. Horizontal grain height range 24" to 48".

J-Panel

- Typically mounted against wall as base and refrigerator cabinet ends. Unfinished back edge must butt against a wall.
- The interior leg of the J-Panel (C side) is fixed at 8" depth, regardless of overall exterior panel depth.
- Width range of front panels 1-1/2" to 3" (B side).
- Depth range of side panel: 12" to 36" (A side).
- Height range of side panel: 24" to 96" (vertical grain), 96" MDF. Veneered panels available 96-1/16" to 120" – additional lead-time required. Horizontal grain height range 24" to 48".

U-Panel

- Primarily used against wall, base and refrigerator ends as well as a bridge above or beneath wall cabinets to create a built in appearance. Unfinished back edges must butt against a wall.
- Both side panels of the U-Panel will be equal in depth and height (A and C sides).
- Width range of front panels 1-1/2" to 3" (B side).
- Depth range of side panel: 12" to 47" (A and C sides).
- Height range of side panels: 24" to 96" (vertical grain), 96" MDF. Veneered panels available 96-1/16" to 120" – additional lead-time required. Horizontal grain height range 24" to 48".

Blum COMPACT BLUMOTION Hinge Program

1/2" Overlay Hinge
COMPACT BLUMOTION 38N
105° opening angle

1-1/4" and 1-3/8" Overlay Hinge
COMPACT BLUMOTION 39C
110° opening angle

Blum Hinges with Integrated Soft Close

- One-piece steel, concealed, self closing hinges designed for use with 3/4" thick front frames.
- Available for 1/2", 1-1/4" and 1-3/8" overlays.
- Soft close feature is integrated in the hinge cup itself.
- Soft close function can be easily deactivated with a switch on individual hinges as needed based on the door size and weight.
- Hinges packed in pairs with mounting screws.
- All hinges feature side, height, and depth adjustment for fine tuning door spacing with wraparound face frame mounting for ease of installation.
- All hinges require Pattern A – Cup Only concealed hinge boring.
- COMPACT BLUMOTION hinges carry a limited lifetime warranty.
- Lead-time is 5 days.

Blum Frameless Cabinetry Hinge Program

- Hinge and in-line mounting plate systems for standard, specialty and angled frameless cabinets.
- Soft close feature is integrated in the hinge cup itself unless otherwise noted.
- Soft close function can be easily deactivated with a switch on individual hinges as needed based on the door size and weight.
- Hinges packed in pairs with mounting plates and instructions.
- No screws required for hinge or mounting plate installation unless otherwise noted. Most hinges use cam style insert plugs.
- In-line mounting plates utilize 32mm system holes and are concealed behind the hinge arm when installed for a clean interior appearance.
- Hinge and mounting plate feature side to side, height and depth adjustment for fine tuning of door spacing.
- Hinges require Pattern B with Insert Holes concealed hinge boring unless otherwise noted.
- Blum hinges carry a limited lifetime warranty.
- Lead-time is 5 days.

CLIP top BLUMOTION 110° hinge
EXPANDO in-line mounting plate

Blum INSERTA 110° Hinges

- Hinge and in-line mounting plate system for standard frameless wall, base and tall cabinetry. Will not work in angle or specialty frameless cabinetry.
- 110° opening angle.
- Part number: 2103574A.

CLIP top 170° corner hinge
EXPANDO in-line mounting plate

Blum INSERTA 170° Corner Hinges

- Provides full access to corner cabinet interiors.
- 170° opening angle.
- Does not include soft close feature.
- INSERTA feature is not available on mounting plate. Kit includes installation screws.
- Part number: 2103575A.

Please refer to pricing through Con-Nex,

Blum 60° Bi-Fold Door Hinge

- Hinge and edge style mounting plate to join two doors in a bi-fold application.
- INSERTA installation feature is not available on hinge or mounting plates. Kit includes installation screws.
- Use with an 170° corner hinge on adjacent door (part number 2103575A).
- Does not include soft close feature.
- Requires Bi-Fold Hinge Bore without Insert Holes – See Section 7.
- 60° opening angle.
- Part number: 2103583A.

CLIP top -45° hinge
EXPANDO in-line mounting plate

Blum INSERTA Negative -45° Hinge

- Hinge and in-line mounting plate system for frameless angle cabinets or cabinet hinging on the opposite side of a 45°.
- 110° opening angle.
- Part number: 2103584A.

CLIP top 110° Partial Overlay hinge
EXPANDO in-line mounting plate

Blum INSERTA 110° Partial Overlay Hinge

- Hinge and in-line mounting plate system for frameless applications where there is a center partition.
- 110° opening angle.
- Part number: 2103675A.

Blum AVENTOS Door Lift System Hardware

- Blum's AVENTOS Door Lift Systems are available for hinge upward applications.
- AVENTOS HK models provide all the necessary hardware to install lift up door access for wall and tall cabinets. AVENTOS HK-XS models utilize conventional door hinges.
- Kits are designed to accommodate different door design types, weights and overlay options as well as for framed or frameless cabinet construction.
- All AVENTOS mechanisms have an integrated BLUMOTION soft close feature and include installation instructions and screws.

To determine which AVENTOS Lift System is suited for your particular application, two reference sources are available:

- A file containing our AVENTOS Lift System Calculator is provided on Conestoga's Customer Business Portal under the Marketing Resources tab. Use this tool to calculate the weight of your door and select the appropriate lift kit for your application.
- Using the charts which correspond to the different AVENTOS models below, determine the weight of the door then calculate the Blum Power Factor required to adequately lift the door as follows:
Door Weight + (Handle/Pull Weight X 2) = Subtotal X Door Height = Power Factor
Specie and Door Weight reference chart applies to both HK-XS and HK lift systems

Specie & Door Design Weight (approx. weight of 1 sq. ft. 3/4" thick door)				
Specie (all grades)	Slab Design	TW-series Design	CRP-series Design	Frame Only*
Alder	1.6 lb.	1.2 lb.	1.5 lb.	1.0 lb.

Vogue TTS	2.6 lb.	1.9 lb.	NA	1.6 lb.

*Does not include weight of glass.

Blum AVENTOS Door Lift System Hardware (continued)

Blum AVENTOS HK-XS

- XS-Series utilize conventional hinges (not included).
- Units are symmetrical and can be installed on one or both sides.
- Cabinet heights from 9-1/2" to 24" and cabinet widths up to 72".
- Minimum interior depth required is 5".
- Four AVENTOS kits provide all the necessary hardware designed for different weight doors for both framed and frameless cabinet construction.

AVENTOS HK-XS Reference Chart

Power Factor (1 Lift)	Power Factor (2 Lifts)	Door Weight	Part No.
Framed Cabinet Construction			
17 – 84	34 – 124	Light	2103578A
113 – 180	225 – 336	Heavy	2103580A

Stanisci Design Range Hoods

Stanisci Design is the leading manufacturer of wood range hoods for the custom kitchen industry. This program allows for convenient ordering of custom range hoods and ventilation units. Conestoga's published offering includes several popular hood designs with panel raise and bead options. Both plywood and raised panel hoods are available in a wide variety of heights and widths.

Program Details

- Range hoods are available unfinished or finished; see Finishing Program Section for finish options and pricing.
- Most prefinished hoods will ship from Conestoga's Kenly, N.C. facility.
- Custom species include African Mahogany, Hickory and Rustic Knotty Alder. Contact Special Designs for other specie availability.
- Custom sizes and designs are available. Contact Special Designs for a quote.

Examples of custom designs:

Hood shown with single panel valance

Hood shown with integrated corbels

Hood shown with stainless steel base

Hood shown with metal banding

- Liners are not included with hood unless otherwise noted. Stainless steel ventilation units and liners are available from Stanisci Design with discounted Conestoga program pricing. Contact Stanisci Design at (248) 572-6880.
- Recommended ventilator: Stainless steel units from 300 to 1500 CFM are available through Stanisci Design (248) 572-6880.
- Stanisci hoods are available in catalog format, compatible with 20/20 Design software. Contact your Sales Representative for information.
- Value line ventilation systems are also available for Stanisci Design range hoods: silver metallic powder coat finish, 390 CFM multi-blower with two 40w lights (no discount available).

PLEASE NOTE: All Stanisci Range Hoods should be mounted no closer than 30" above cook tops, although some cook tops require additional clearance. Please check local building codes and appliance specifications.

Removable Options

Removable Applied Panel

- Available on I-Series hood design only.
- Allows for easy installation and access for Building Inspectors.
- Panel features applied moulding for finished look after installation.
- Specify "Removable Panel Option", Upcharge applies.

**Please refer to pricing through Con-Nex,
our online ordering program**

Stanisci Design Range Hoods (continued)

Removable Front

- Available on P and Z200 Series hoods at no additional charge.
- With this option, the entire front fascia lifts straight up for easy removal. When installed, the hood face is secured in place with concealed clips.
- If this option is selected, the depth of the P and Z200 box will be modified to 16" deep. Overall hood depth will remain the same as standard depth.
- No additional lead-time required.
- When ordering, specify the hood design then "Removable Option".

Face

Box

Removable Top

- Available on the CHW, CHWB, E, FX2HW, FX2PL, G, GRA, S, T and TRA Series hoods at no additional charge.
- This option allows the base of the hood to be installed separately, followed by the ventilation. After ventilation hookup has been completed, the top portion of the hood can lower into place and be secured to the base.
- No additional lead-time required.
- When ordering, specify the hood design then "Removable Option".

Stanisci Design Range Hoods (continued)

Optional Moulding Packages

- Several hoods are available with a choice of Classic, Simple or Basic moulding packages. See illustrations below for examples of differences between the three moulding profiles.
- Classic package is a more traditional style moulding. Simple and Basic packages are made for contemporary/transitional kitchens.
- Moulding packages have no effect on pricing, lead-time or overall dimensions.
- Moulding packages available on all Stanisci hoods except B, BX, BXB, CHW, CHWB, E3, FX, FXBPUP, FX2HW, M, VCHM-AV, VCHM-SV and VCHM-VRS hoods.
- Moulding packages below are available for E, FX2PL, G, GRA, H2, I, S, SRA, T and TRA hoods (P and Z200 available in Basic package only).
- When ordering a range hood specify the desired moulding package.

Classic Package

Simple Package

Basic Package

Antiquing, Distressing and Wear Sanding

To allow our customers to purchase prefinished Stanisci range hoods with the same overall appearance of their doors, Conestoga offers a modified version of our Antiquing, Distressing and Wear Sanding Options on the solid wood portions of Stanisci hoods.

- These treatment options available with Stanisci-brand range hoods only.
- Not available on Paint Grade Hard Maple Hybrid specie hoods.
- Availability of these options varies by hood design.
- Wear Sanding Design Charge is per panel.
- Antiquing Design Charges and square foot Material Charges are equal to published finishing fees.
- Distressing Design Charges and square foot Material Charges are equal to published finishing fees.

Decorative Elements and Accents

Conestoga has partnered with some of the leading industry providers of decorative woodcarvings to bring you this inclusive collection. Conestoga's accessory offering includes a wide variety of corbels, legs, columns, corner posts, and other decorative elements. Items ordered from this collection will be consolidated with the rest of your Conestoga products and ship as a complete order. Because of transportation time required from some suppliers, additional lead-time may be necessary.

- Specie availability varies by product and is indicated by the specie part number listed with each product drawing. Pricing for all items can be found on the Customer Business Portal.
- Because of the various manufacturing and sanding techniques used to produce these decorative products, slight variations in finished appearance may occur. These variations will not be considered defective.
- Due to the size and complexity of design, many of these products utilize edge glued lumber. This may result in grain pattern, wood color and finish variations.
- In addition to the wood carvings and turnings shown on the following pages, Conestoga has established a comprehensive program with Art For Everyday. Known for their exquisite carving capabilities, Art for Everyday is a leader in carved components and provides Conestoga access to thousands of carved items. Complete images and price lists can be found on the Customer Business Portal, under the Marketing Resources tab. All Art For Everyday products can receive any of Conestoga's standard finishes.

Finishing

Conestoga offers finishing on all decorative elements and accents. This allows you to simplify your shop process and purchase accessories along with your finished door order. See the Finishing Program Section for available stain, Colourtone, primer, Prism Paint and glaze combinations.

Decorative Turning Program

Conestoga's turning offering features a large collection of columns, table legs, island posts and feet. The offering consists of standard products shown on the following pages, as well as the capability to produce a variety of custom turnings. These items may include stair and furniture parts, tall columns and non-standard species.

Standard Offering

- Conestoga's standard offering of table legs, island posts and feet is typically available in the industry's most popular species. Depending on the item, Paint Grade will be an unselected closed-grain hardwood.
- The majority of table legs and island posts are available in three options - whole, split and 3/4. This allows for consistency within the design of the kitchen or bath while also providing flexibility in the manner in which the legs are used.
- Whole and 3/4 items can be ordered individually, while splits must be ordered in pairs.
- Lead-times for table legs, island posts and feet are 7-10 days. Some items can be expedited; refer to footnotes at the bottom of each page for expedite availability.
- Parts must be ordered by part number according to specie and whole, split or 3/4.

Receptacle Notching

- Receptacle notching is a custom millwork option developed to allow electrical service installations on island post applications.
- Receptacle notching is available on select table legs/posts only and is not available on feet, corbels, appliques or other ornaments.
- Available only with whole legs – splits and 3/4 options are not available.
- Receptacle box and wiring is not included. Check your building codes for proper box and wiring codes.
- Holes for the wiring will be drilled in only one of the four locations – left, right, top or back. You must specify the hole location for wiring. We do not drill through the entire length of the table leg/post.
- If choosing 3-1/2" wide table legs, please be aware that some outlet covers may extend beyond the column width. This is due to +/- tolerances of both the table leg and the outlet cover.
- The dimensions of the rout are 2.375" wide, 2.875" deep and 4.125" high.
- For a beginning point of reference for machining the notch, you must indicate the height from the top of the leg to the start of the rout (see drawing on following page).
- Receptacle covers are available through Conestoga's Wood Outlet Cover program, or through many home centers.
- Customization of receptacle notch not available.
- Lead-time of 5 additional days is required for this option.

Vent Covers

- All vent covers crafted from solid hardwoods and made in the USA.
- Vent covers are made to fit seamlessly with your hardwood floors, against the toe kicks of your kitchen cabinets, against baseboards and walls.
- Toe Kick Vent Cover is pre-drilled to accept two mounting screws.
- Fixed slats diffuse air in two directions (non-adjustable).
- Custom sizes and designs are available. Contact Special Designs for a quote.
- Vent covers are available unfinished or finished; reference the Finishing Program Section for finish options and pricing.
- Lead-time 10 days unfinished, add 5 days for finishing.

Metal Feet

Triframe Foot

- Made from steel, laser cut, then hand welded.
- Choice of Gunmetal Grey and Wrought Iron powder coated finishes.
- Available in 6" and 9" heights.
- Usable outdoors as well as indoors.
- Works well with free-standing cabinets. 9" feet make free standing cabinets ADA compliant.
- Sold as individual pieces – for a pair, must order two feet.

Triframe Foot Part Number*		
Finish	6" Foot	9" Foot
Gunmetal Grey	2655973A	2655978A
Wrought Iron	2655976A	2655981A

*Part number reflects each.

Standard lead-time is 7-10 days, expedites not available.

Metal Shelf Supports

Shelf Supports

- Provide attractive alternatives to the traditional floating shelf.
- The Shelf Strap and Elliptical Bracket are available in 8" and 12" depths.
- Finish options include Gold, Gunmetal Grey, Stainless Steel and Wrought Iron powder coated finishes. Installation screws in matching finish are included.
- It is imperative that the shelf supports are secured into wall studs with installation screws. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.
- Wood shelves not included. Wood shelves can be ordered as 3/4" or 1" thick slabs in any specie. Note: 60" max. length for two shelf straps.
- For an aged or rustic look on wood shelving, add distressing and wear sanding or utilize the weathered grain option.
- Sold as individual pieces – for a pair, must order two supports.

Shelf Strap Part Number*		
Finish	8" Depth	12" Depth
Gold	2655944A	2655950A
