

Custom Valances - Special Designs

Conestoga offers a wide variety of arched panel configurations and options. Valances illustrated on the following pages represent popular custom arched panel designs. The manufacturing of custom valances is based off of customer-supplied dimensioned drawings. **If any of the following illustrations below match the look you desire, please copy the appropriate page, designate the necessary dimensions and forward it to Customer Service.**

- Arched panel valances are available in most mortise and tenon and miter designs. Applied moulding designs, while commonly available, depend on the radius of the panel.
- Design options include, but are not limited to all published panel raises and framing beads, edge profiles, grooved panels, wide framing, and custom rise dimensions.
- A CAD drawing will be created prior to the manufacturing of any custom arched panel. After a review and sign off by the customer, the drawing must be returned to Special Designs in order for production to begin. Lead-time calculations will not begin until Conestoga has received an approved drawing.
- Framing widths will match door style selected unless otherwise noted by customer.
- Please provide all necessary dimensions when ordering.

Standard Arched Valances

Arched Valance

Valances 30" to 48" – Design Charge

Valances 51" to 72" – Design Charge

- Standard Arched Raised Panel Valances are available in three inch wide increments from 30" to 72" only.
- Minimum size – 30" wide x 12-1/2" high. Maximum size – 72" wide x 30" high.
Framing widths: 2-3/4" stiles, 2-5/16" rails, 2-1/2" center stile. The rise is always 4-1/2", regardless of valance width.
- Horizontal grain panels are standard, vertical grain is available with a per valance upcharge.
- Design standard as shown. Individual designs, including applied moulding, must be ordered through Special Designs.

Offering And Availability	
Species	
Material Pricing Guide	All 3/4" and 1" species available except Rustic Knotty.
Edge Profiles	
pg 7.1	Machine Edge only.
Framing Beads	
pg 7.2	All 3/4" and 1" available.
Panel Raises	
pg 7.2A	All 3/4" and 1" available.
Options	
pgs 7.3-7.15	Available with pegs, distressing, cross grain sanding, wear sanding, putty pin holes, weathered grain and cut down in width only.

Standard 1-Piece Valances

- 1-Piece Valances are available in 4-1/2" to 6" heights except Traditional Arch which is available in 6" height only.
- 1-Piece Valance pricing is determined using design plus material calculations. See the drawings below to determine appropriate Design Charge. Calculate overall square footage of valances and refer to Category B of the specie desired in the Material Pricing Guide to determine Material Charge.

Classic Arch

Valances 21" to 60" – Design Charge
 Valances 60-1/16" to 96" – Design Charge

Elegant Arch

Valances 21" to 60" – Design Charge
 Valances 60-1/16" to 96" – Design Charge

Roman Arch

Valances 12" to 60" – Design Charge
 Valances 60-1/16" to 96" – Design Charge

Straight

Valances 12" to 60" – Design Charge
 Valances 60-1/16" to 96" – Design Charge

Traditional Arch

Valances 16" to 60" – Design Charge
 Valances 60-1/16" to 96" – Design Charge

Edge Profile Options

- Straight valance comes standard with Machine Edge, but is available with any edge profile. Specify which edges receive an edge profile, other than Machine Edge.
- Roman Arch valance and Traditional Arch valance come standard with Machine Edge. These valances are available with edge profiles: B-2, C-2, CFP-2, E-2, H-2, J-2, L-059, L-120, L-149, L-281, L-382, L-772, L-803, L-1160, LC-2, PRS-2, RC-2 and V-2. Specify which edges receive profiles other than Machine Edge.
- Classic Arch valance and Elegant Arch valance are available with a Machine Edge only.
- See matrix on next page to determine pattern related dimensions.

Standard 1-Piece Valances (continued)

Valance Matrix Instructions

Use the matrix below to determine the specifications for patterned valances. Find the desired valance length in one of the C rows. The top number (white numbers in black) in the column with the desired length is the pattern length. The pattern will be centered on the valance.

From the C block containing the desired overall valance length, the extreme right number in that row, which is under column B is the size of the flat areas on the left and right side of the pattern.

Example: If ordering a Traditional Arch valance with an overall length of 30" (dimension C), note that:

- 30" appears in the sixth C row, fourth column of the matrix.
- Referring to the top of the column, in row A, a pattern length of 19" will be found.
- Referring back to the 30" C row, at the right end of the row, in column B, flat areas of 5-1/2" on both the left and right ends of the valance will be found.
- The selected 30" valance will have a pattern 19" wide, centered on the valance, with 5-1/2" wide flat areas at both ends of the valance.

Valance Matrix

C	NA	NA	NA	NA	NA	48"	60"	72"	84"	96"	9"

***Note:** Dimensions above are based on a 6" height. Any increment 1/2" or less round down to nearest measurement in row "A". Any increment 9/16" or greater round up to nearest measurement in row "A".

Slab Fillers

Slab Filler

- Slab fillers can be ordered in widths from 1-1/2" to 48" and heights from 4-1/2" to 96". Available in all 3/4" and 1" species.
- All 3/4" and 1" edge profiles are available.
- Slab fillers are available with pegs, radius corners, grooves, back-routed hand pulls, distressing, wear sanding and weathered grain.

Any solid wood Slab products exceeding 35-15/16" in width (across the grain) will be quoted by Special Designs.

***100 to 119-15/16" specie availability:** 3/4" thick species include Cherry, Hard Maple, Hickory, Paint Grade Hard Maple, Quarter Sawn White Oak, Red Oak, Rift Cut White Oak, Rustic Knotty Cherry, Rustic Knotty Hard Maple, Soft Maple, Walnut and White Oak. 1" thick species (1" upcharge applies) include Cherry, Hard Maple, Red Oak and Soft Maple.

†120" to 144" specie availability: 3/4" thick species include Cherry, Hard Maple, Hickory, Paint Grade Hard Maple, Quarter Sawn White Oak, Red Oak, Rift Cut White Oak, Soft Maple, Walnut, White Birch and White Oak. 1" thick species (1" upcharge applies) include Cherry, Hard Maple, Paint Grade Hard Maple and Soft Maple.

Glass Shelves

1/8" depth

1/4" depth

Grafton

8" x 12"
2" Framing

- Used in conjunction with a frame only door or a Wire Grille Insert.
- Allows light to flow through the entire cabinet, accentuating fine dinnerware, glassware or other collectibles.
- All 3/4" and 1" species available.
- Maximum size – 23-15/16" deep x 36" long.
- Edge profiles – defaults to machine edge on all 4 edges. Additional edge profiles include B-2, C-2, CFP-2, H-2, J-2, L-034, L-059, L-149, L-382, L-803, L-1160, LC-2 and PRS-2.
- Two framed options accept either 1/8" or 1/4" glass (glass not included).

Fluted Fillers

Tapered Flute

Rounded Flute

- Fluted Fillers can be ordered in custom widths from 3" to 15-15/16" and heights up to 96" in all standard 3/4" species.
- Choose from either Tapered or Rounded flutes. If not specified, flutes will be produced using the Tapered design.
- Non-fluted or "flat" areas are design specific, but can be customized to meet your design needs. Simply specify the flat dimensions desired. Specify "Flats to measure 0" to extend flutes the entire length of filler.
- Fluted Filler pricing is determined using design plus material calculations. See the chart below to determine appropriate Design Charge. Calculate overall square footage of filler and refer to category B of the specie desired in the Material Pricing Guide to determine Material Charge.
- The number of flutes per filler width is indicated in the chart below. Custom flute spacing is available through Special Designs.

Fluted Filler Pricing

Filler Width	# Flutes	Under 60" in length	60" or greater in length
3" to 3-15/16"	3		
4" to 4-15/16"	4		
5" to 5-15/16"	5		
6" to 6-15/16"	6		
7" to 7-15/16"	7

9" to 9-15/16"	10		
10" to 10-15/16"	11		
11" to 11-15/16"	12		
12" to 12-15/16"	14		
13" to 13-15/16"	15		
14" to 14-15/16"	16		
15" to 15-15/16"	17		

Edge Profile Options

- Fluted Fillers come standard with a Machine Edge, but can be ordered with a variety of edge profiles including B-2, C-2, LC-2, L-034, L-059, L-149, L-253, L-382, L-686, L-1160, PRS-2, RC-2 and V-2.
- Beveled edge profile selections include the L-991 (45 degree back bevel) and the L-423 (22-1/2 degree back bevel).
- Premium edge profiles include the L-297, L-304 and LC-Inset edge. Upcharge applies.

Wood Floating Shelves

The Floating Shelf is a functional way to add style to the interior décor of kitchens, bathrooms and other living areas throughout a home. These shelves have a support frame that must be mounted securely to the studs in the wall, then the exterior portion of the shelf slides over the support frame to completely conceal the sub-structure. The result is an attractive, fashionable shelf to display pictures, dishware and other interior design accents.

Mini Plain, Plain, Beaded and Crown Floating Shelves

- Available species include Cherry, Hard Maple, Paint Grade Hard Maple Hybrid, Quarter Sawn White Oak, Rift Cut Red Oak, Rift Cut White Oak, Red Oak and Walnut.
- The front and sides of the shelves are made from 3/4" solid hardwoods, mitered at the two front corners.
- The Beaded Floating Shelf includes a decorative bead on both the top and bottom of the front and side returns.
- The Crown Floating Shelf includes a modified crown moulding on the front and side returns.
- The shelf top and bottom is 3/8" thick plywood, matching the specie of the hardwood, except for Paint Grade Hard Maple Hybrid, which uses 3/8" MDF for the shelf top and bottom.
- Once the Floating Shelf is fully installed, it is recommended that the shelf be secured to the support frame using headless pins or small finishing nails so the shelf cannot inadvertently slide off of the support frame.
- Custom lengths available. Pricing rounded to next largest published size plus an additional .

Support Frame

- Manufactured using 3/4" thick unselected hardwoods.
- It is imperative that Floating Shelves be mounted to the recommended number of wall studs using two or more coarse thread screws at least 2-1/2" in length per stud. The 6" and 12" Floating Shelves should be mounted to one or more wall stud, the 24" to 48" Floating Shelves should be mounted to two or more studs, the 60" Floating Shelf should be mounted to three or more studs, the 72" and 84" Floating Shelf should be mounted to four or more studs.
- Maximum load capacity for the shelf and support frame is 10 lbs. per linear foot. While Floating Shelves are built from strong, sturdy materials, the load capacity of these shelves is dependent upon the quality of the installation screws and whether the shelves are secured into the wall studs. If not secured into the recommended number of studs using two or more high quality installation screws per stud, the shelf may not support the desired weight. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.
- All models of Wood Floating Shelves are available with primers, wiping stains, Truetones, Colourtones, Prism Paints and glazes.
- Finish pricing: Design Charge multiplier – 1.5x
Material Charge – actual sq. footage x 1.25

Wood Floating Shelves (continued)

L-Style Wood Floating Shelves

The L-Style Wood Floating Shelf is a functional way to add style to the interior décor of kitchens, bathrooms and other living areas throughout a home. These shelves include two-part reinforced nylon support clips that must be securely mounted to the shelf itself and to the studs in the wall. The support clips interlock, completely concealing the mounting hardware. The result is a sturdy, attractive, and fashionable shelf to display pictures, dishware and other interior design accents.

L-Style Wood Floating Shelf

- The shelf is produced from solid hardwoods and is shipped assembled and ready to be installed.
- The back of the shelf is routed out along nearly the length of the entire shelf so that the support clips can be installed where needed to align with the available wall studs and remain fully concealed after installation.
- Custom lengths available. Pricing rounded to next largest published size plus an additional .
- **Support Clips**
 - Manufactured using high strength reinforced nylon.
 - Clips are designed to interlock and are extremely strong and durable.
 - Mounting fixtures are secure and concealed.
 - Secure clips to the L-Style shelf using #8 pan head screws.
 - It is imperative that support clips be mounted to two or more wall studs using four or more coarse thread screws at least 2-1/2" in length.
 - Installation jigs are provided to aid with positioning the clips correctly to the shelf and wall studs.
 - Maximum load capacity for the shelf and support clips is 10 lbs. per linear foot. While L-Style Floating Shelves are built from sturdy hardwood materials, the load capacity of these shelves is dependent upon the quality of the installation screws and whether the support clips are properly secured into the shelf and wall studs and the support clips are interlocked properly. If the support clips are not secured to the shelf properly, or the shelf is not secured into two or more studs using two or more high quality installation screws per stud, the shelf may not support the desired weight. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.
 - L-Style Wood Floating Shelves are available with primers, wiping stains, Colourtones, Prism Paints and glazes.
 - Finish pricing: Design Charge multiplier – 1.5x, Material Charge – actual sq. footage x 1.25

Wood Floating Shelves (continued)

Solid Wood Floating Shelves

Solid Wood Floating Shelves provide a functional way to add elegance and flair into any room within the home. Each solid wood shelf is produced from North American hardwoods and machined with a series of unique contoured patterns across the front and both side edges, providing the look of live-edge shelving, but with shorter lead-times and at a fraction of the cost.

Solid Wood Floating Shelf

- Solid Wood Floating Shelves are available in 24", 30" and 36" lengths. Custom lengths not available.
- Each Solid Wood Floating Shelf is produced from domestic hardwoods and shipped ready for installation.
- Each shelf includes six 2-1/2" hex head lag screws, and installation instructions.
- The edges of the front and both sides are machined in one of three different randomly selected contoured patterns.
- The back of the shelf is routed and bored to accept and completely conceal the steel hanging bracket, allowing the shelf to fit flush against the wall.
- Solid Wood Floating Shelves are 1-3/4" thick and a depth reaching 10" at its deepest point. Due to the decorative contours machined into the front edge of the shelf there are areas that will be less than 10" in depth.
- All of Conestoga's stains, paints, primers and glazed finishes are eligible.
- Finish pricing: Design Charge multiplier: 1.5x. Material Charge: actual sq. footage x 1.25.

Support Bracket

- Manufactured using high strength raw steel.
- 24" and 30" support brackets utilize two round steel support rods, 36" support brackets utilize three round support rods.
- A small rare earth magnet is attached to the shelf back, which secures the shelf to the support bracket.
- It is imperative that support brackets be mounted to two wall studs using the six 2-1/2" long hex head lag screws included with the shelf.
- Maximum load capacity for the shelf and support bracket is 25 lbs. per linear foot. The load capacity of these shelves is dependent upon whether the support bracket is properly secured to the wall studs and the shelf. If the shelf is not secured to the support bracket properly, or the shelf is not secured into two wall studs using the six 2-1/2" long hex head lag screws, the shelf will not support the desired weight. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.

Alternative Material Floating Shelves (continued)

Super Matte Floating Shelves

- ◆ Available in select Super Matte colors – see pricing chart below.
- ◆ The front and sides of the shelf are made from 3/4" edgebanded material, mitered at the two front corners.
- ◆ The shelf top and bottom is 6mm thick Super Matte material.
- ◆ Once the Floating Shelf is fully installed, it is recommended that the shelf be secured to the support frame using headless pins, small screws or small finishing nails so the shelf cannot inadvertently slide off of the support frame.
- ◆ Custom lengths available - pricing rounded to next largest published size, plus an additional charge.

Support Frame

- ◆ Manufactured using 3/4" thick unselected hardwoods.
- ◆ It is imperative that Floating Shelves be mounted to two or more wall studs using four or more coarse thread screws at least 2-1/2" in length. The 60" Floating Shelf should be mounted to three or more studs.
- Maximum load capacity for the shelf and support frame is 10 pounds per linear foot. While Super Matte Floating Shelves are built from strong, sturdy materials, the load capacity of these shelves is dependent upon the quality of the installation screws and whether the shelves are secured into the wall studs. If not secured to two or more studs using two or more high quality installation screws per stud, the shelf may not support the desired weight. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.

Alternative Material Floating Shelves (continued)

Decorative Laminate Veneer Floating Shelves

- Available in all Allure colors - see pricing chart below.
- The front and sides of the shelf are made from 3/4" banded DLV material, mitered at the two front corners.
 - Bright White and White Dove, front of shelf and edges are manufactured using 19mm DLV board; Canadian Grey, Clearwater Oak, Dering Forest, Helena Walnut, Monaco, Ocala Walnut, Sabine Walnut, Valley Forge Elm, White Chocolate and White Cypress. Shelves are manufactured using DLV center panel material sandwiched to 1/2" MDF, then edgebanded. Interior of sandwiched material is raw MDF.
- The shelf top and bottom utilizes DLV center panel material.
- Once the Floating Shelf is fully installed, it is recommended that the shelf be secured to the support frame using headless pins, small screws or small finishing nails so the shelf cannot inadvertently slide off of the support frame.
- Custom lengths available - pricing rounded to next largest published size, plus an additional charge.

Support Frame

YouK Open Shelving Units

YouK Open Shelving Units are a functional way to add style to the interior décor of kitchens, bathrooms and other living areas throughout a home. The YouK Open Shelving Units have metal support ladders that must be mounted securely to the studs in the wall, and shelves must be secured to the metal support ladders. The result is a sturdy, attractive and fashionable shelf unit to display pictures, dishware and other interior design accents.

YouK Open Shelving Program

- 10 standard configurations as well as individual components and accessories are available.
- 6 metal support ladders are available in varying heights and depths.
- Metal support ladders with depth of 12-5/8" require the use of an adjustable height foot when mounting the metal ladder onto the floor. Adjustable height feet are included when ordering pre-configured units.
- If shelves are selected, they will be Slabs. Material options include solid wood, MDF and Alternative Materials.
 - ◆ Shelf depths are fixed at 6-5/8" or 11-5/16" depending on the depth of the metal support ladders selected.
 - ◆ The number of shelves is determined by the height of the metal support ladders selected.
 - ◆ The shelf thickness, specie, grade and length must be specified when ordering.
 - ◆ Shelf lengths over 36" will require an additional metal support ladder to prevent shelves from sagging.
 - ◆ Shelf thickness is 3/4" for Alternative Materials and 3/4" or 1" for solid wood and MDF.
 - ◆ When ordering solid wood or MDF shelving, shelf options include edge profiles and finishing options.
 - ◆ All solid wood and MDF shelves default to Machine Edge. Additional edge profile options are available.
 - ◆ A No Shelf Option is available.
- Once the metal support ladder is fully installed, each shelf must be secured to the metal support ladders using screws so the shelf cannot inadvertently slide off the metal support ladders. Pre-drilled holes are provided in the ladders to allow the shelves to be easily secured.

Metal Support Ladders

- Manufactured using jet black scratch-resistant powder-coated rails with welded frames to ensure smooth, strong connections. All metal support ladder frames are 1-1/4" deep by 5/8" wide.
- It is imperative that every metal support ladder be mounted to wall studs using two or more coarse thread screws at least 2-1/2" in length per metal support ladder. Pre-drilled holes are provided to allow the metal support ladders to be easily secured to the wall studs.
- Maximum load capacity for the shelves and metal support ladders is 10 lbs. per linear foot. While YouK Open Shelving Units are built from strong, sturdy materials, the load capacity of these units is dependent upon the quality of the installation screws and whether the metal support ladders are properly secured to the wall studs, and each shelf is properly secured to the metal support ladders. If each metal support ladder is not secured to a stud using two or more high quality installation screws per stud, and shelves are not properly secured to the metal support ladders, the YouK Open Shelving Unit may not support the desired weight. Conestoga will not be responsible for metal support ladder or shelf failure due to inadequate or improper installation techniques or materials.

Individual YouK Components and Accessories

- The YouK Open Shelving program allows customers to configure their own Open Shelving Unit by ordering individual metal ladder shelf supports, adjustable feet and Slab shelving. When configuring a custom YouK Open Shelving Unit, customers are responsible for ordering the correct number and sizes of metal ladder shelf supports, adjustable feet, corresponding Slab shelves and accessories. Please note that if ordering shelving longer than 36", or the total weight of the items stored on individual shelves surpasses 10 lbs. per linear foot, additional support must be added to avoid shelf sag. Shelf supports can be in the form of additional metal ladders, or other type of support provided by the customer.

CSYOSU - YouK Open Shelving Unit Components and Accessories

Individual YouK Components and Accessories

The YouK Open Shelving program allows customers to configure their own Open Shelving Unit by ordering individual metal ladder shelf supports, adjustable feet, shelving and cabinetry. When configuring Open Shelving Units, customers must initiate the number and sizes of metal ladder shelf supports, adjustable feet, corresponding shelving, cabinets, support brackets and accessories.

Please note that if ordering shelving longer than 36", or the total weight of the items stored on the individual shelf surpasses 10 lbs. per linear foot, additional support must be added to avoid shelf sag. Shelf supports can be in the form of an additional metal ladder or other type of support provided by the customer. See following page for ordering templates.

- Shelf supports are fixed, no options.
- Drawings 1 and 2 measure 7-7/8" deep outside dimension and 6-5/8" deep inside dimension.
- Drawings 3 - 6 are 12-5/8" deep outside dimension and 11-3/8" deep inside dimension.
- Due to the material and assembly tolerances, rail spacing dimensions may vary +/- 1/16". This is considered acceptable for manufactured components.

YouK Cabinets

To incorporate cabinetry into your YouK system, start by selecting the necessary components; ladders, cabinets, and shelves to complete your custom layout. Begin by determining the overall width and height of your available wall space. The ladders serve as the structural framework and are available in various heights to support different configurations. Once your layout dimensions are established, choose from a range of cabinets, including wall cabinets, drawer units, open cubbies, and closed-door cabinets. YouK cabinetry is available with the same doors, drawer fronts, species, finishes, and Alternative Materials options offered in the Vesta RTA Cabinet program.

Each cabinet is designed to span two or more ladders, so it's important to ensure the cabinet dimensions align with your ladder spacing. After the cabinets are selected, shelves can be added in your choice of materials and finishes to create additional open storage or display space. Please note that if placing shelves in the same width span of your cabinetry, shelves must be 1.5" wider than cabinets. Each component, cabinets and shelves, requires specific mounting brackets based on type and placement. External mounting brackets must be used to support the outer sides of cabinets, while central brackets are needed where cabinets are adjacent to another cabinet or shelf. See page 11.15 for weight limitations.

YouK cabinets are built with screw and dowel construction, with dowels pre-inserted for ease of assembly. Functional hardware is bulk-packed, and all critical holes for glides, hinges, and alignment with metal ladders are pre-drilled to simplify installation. Cabinet tops are secured using self-tapping screws and extend an additional 7/8" to align with the cabinet fronts. For safety and stability, **ladders and cabinetry must be attached to the wall.** **NOTE:** hinges and glides automatically provided with cabinets.

CSYOUKW

Custom Size Ranges

Single Door Width: 9" - 24"

Butt Door Width: 24" - 36"

Height: 6" - 72"

Depth: 13"

- Specify single or butt doors on custom size cabinets 24" wide.
- 6" - 18" high has no shelves.
- 18"- 24" high has one shelf.
- 24" - 36" high has two shelves.
- 36" - 48" high has three shelves.
- 48" - 60" high has four shelves.
- 60" - 72" high has five shelves.
- Recommended heights for the cabinet to align with the ladder rails: 13.875", 23.25", 27.75", 31.25", 41.625", 51", or 64.875".

Stemware Holders

- Stemware holders are available in Cherry and Hard Maple.
- 30" (7 slots) or 36" (8 slots) lengths.
- Spacing between slats:
30" stemware holder – 1-1/8".
36" stemware holder – 1-3/8".
- Depth 11-1/4".
- Thickness 1-1/2".
- Accommodates most stemware styles.
- Available unfinished or finished. See the Finishing Program Section for pricing.

Custom Cutting Boards

1-Piece Slab

3-Piece Slab

1-Piece Barrel

3-Piece Barrel

Hand Pull - 1/4" deep,
3-1/2" long, 1/2" wide

Drip Groove - 5/32" deep

- Cutting boards are available in all published species except Rustic Knotty.
- All cutting boards utilize Category B Material Charge.
- Cutting boards available in 3/4" and 1" thickness.
- Minimum size for all styles is 10" x 10", maximum size is 18" x 22".
- All designs include 3/4" radius corners and 3/32" radius edges.
- 3-Piece designs are made using 2-5/16" wide rails on face (horizontal grain) with pinless construction.
- All cutting boards have a routed drip groove into the face of the board to collect liquids.
- No oils or finishing treatments will be applied by Conestoga.
- Care instructions for wood cutting boards:
 - ♦ Treat wood with butcher block oil or mineral oil only.
 - ♦ To clean, wipe with a mixture of warm water and a mild dish detergent. Never submerge cutting boards in water or place in dishwasher.
- Hand pull option on back of cutting board is available:
- Due to repetitive exposure to liquids, cutting boards will not be warranted against bowing, warping, splitting or twisting.

our online ordering program**

Front Frame Specifications

- Double dowel construction on standard width framing.
- Material will be Standard grade unless otherwise noted. Premium grade available, upcharges apply.
- Standard framing width is 1-1/2"; additional widths available, upcharges apply.
- 3/4" framing thickness standard; 1" thick material is available, upcharges apply.
- Minimum framing width 3/4"; 15/16" for front frames with an edge profile.
- Material surfaced on four sides.
- Assembled frames sanded on front only with 220 grit sandpaper.
- Maximum front frame sizes are 120" in one direction and 48" in the other direction. For example, a front frame can be ordered 48" x 120" or 120" x 48" but not 120" x 120".
- Framing 2-3/8" to 4" may have one glue joint. Framing wider than 4-1/16" may have two glue joints.
- Minimum glue-in trimmable insert width is 1/2"; maximum glue-in trimmable insert width is 3".

Front Frame Tolerances

- A tolerance of +/- 1/32" is considered acceptable on front frame exterior and interior opening dimensions.
- A tolerance of +/- 1/16" out of square is considered acceptable on all front frames.
- 1/32" offset on frame back at any joint is considered acceptable.
- 1/64" offset at any exterior joint on the outside perimeter is considered acceptable.

Front Frame Ordering Information

- Conestoga's custom front frames can be ordered as beaded, non-beaded or profiled. To specify, check the appropriate box in the beaded area of the order form.

Non-beaded

1/4" Bead

3/8" Bead

3/8" Ogee

1/4" V-Bead

- Front frame exterior dimensions, interior opening dimensions and framing widths can be ordered to the nearest 1/16".
- On beaded orders, customers may select specific openings to be "non-beaded" by specifying the opening letter designation. Example: "Do not bead opening S."
- When ordering custom front frames for Conestoga Cabinet Systems, all framing and opening sizes must be specified by the customer. Only standard groove locations available.
- Front Frame Configuration Template Packet can be found on the Customer Business Portal. Contact Customer Service for sign on information or, request the Front Frame Configuration Template Packet.

Front Frame Pricing

Pricing Instructions

- Front frame pricing is based on the number of openings and the external frame perimeter.
- Use frame perimeter (linear inches) x specie price per linear inch. Use the appropriate column to determine the material price based on specie and the number of openings.
- Add the appropriate cost per opening charges from the chart below.

Cost per Opening

Options Pricing

Option	Additional Cost
Premium grade material (subject to availability)	35% of material price
1" thick framing (Bamboo not available)	30% of material price
Face and back sand	per frame
Beaded inset framing (1/4" or 3/8" bead)	per opening
Ogee or V-Bead framing	per opening
Pre-fit inset door or drawer front	per door or drawer front
Groove to fit Conestoga Cabinet Systems	per frame
Edge profile around outside perimeter	per frame
Glue-in trimmable inserts	per opening
Cut Backs	per opening
Roman shaped rails - non-beaded	per rail
Beaded shaped rails available through Special Designs	Call for quote
Oversize front frame assembly Tier 1: 58" to 99-15/16" in width and height	per frame
Oversize front frame assembly Tier 2: 100"+ in width or height	per frame
Oversize front frame sanding (frames exceeding 48" in width or height)	per frame
Unassembled front frames	No upcharge

Pricing Methodology for Finishing Custom Front Frames

Front frame Material Charges are calculated using the perimeter of the front frame multiplied by 4, and then divide the result by 144. Multiply the result by the applicable Material Charge. Add the appropriate number of Design Charges based on the number of front frame openings.

Example: 2 opening front frame 30" x 36" in Harvest Gold

Pricing for all parts will be based on design + material methodology using material charges from Conestoga's finishing program (see Finishing Program Section for Material and Design Charges).

Custom Front Frame Finishing

Number of openings	Design Charge Multiplier
1	1
2 to 3	1.5
4 to 5	2
6 to 7	2.5
8+	3

Front Frame Pricing (continued)

Non-Standard Framing Widths	
Material Width	Upcharge per stile or rail
3/4" to 1-7/16"	
1-1/2"	no upcharge
1-9/16" to 5-15/16"	
6" to 7-7/16"	
7-1/2" and wider	

Non-standard frame configurations will be processed through Special Designs.

Front Frames Lead-Times			
Product	Standard Lead-Time	Expedite max. 6 frames

Custom front frames	10	4	5
Options - additional working days			
Shaped rail	3	3	3
Pre-fit inset doors	2	2	2

Orders containing products with different lead-times are given the longest lead-time date.

Inset Door and Drawer Front Information

- The following edge profile options are recommended for use with inset doors and drawer fronts.
- These edges have a 5 degree back bevel edge to ensure sufficient door clearance. Machine Edge and L-149 are available upon request at no additional upcharge.
- Front frames ordered with inset doors and drawer fronts will be pre-fit to the opening size. A 3/32" margin will be used on all sides for single doors and drawer fronts and between butt door pairs.

Standard Edge Profile Options	
	
L-253	L-686
	
L-947	L-967
	
L-1117	L-1120

Premium Prefit/Inset Edge Profiles
Additional charge per door or drawer front. (These 2 profiles require 2 additional working days.)

L-304

L-996

Design Exceptions

- The following door and drawer front styles are not available for inset applications due to their unique design characteristics: 1-1/8" Sandwich Drawer Front, #10 Drawer Front, 10141 Drawer Front, Aspen, AspenPP, Astoria, Aurora, Boulder, BoulderPP, CRP-1420, CRP-10191, CRP-10318, CRP-10334, CRP-10827, CRP-10875, CRP-10946, Fairhaven, Fargo, FargoPP, Hastings, Keystone Drawer Front, LaSalle, Marcel Drawer Front, Omaha, OmahaPP, Prestige, Rothbury, Rothsford, Savoy, Topeka, TopekaPP, TW-10827 and Woodhull.
- Alexandreia, Juno, Venus, Venus78 and Vulcan door and drawer front designs are available for inset applications only when ordered with Machine Edge or L-253 edge profiles.
- Alternative Material doors and drawer fronts are not available for inset applications, including Allure DLV, Intrigue TTS, Strata TTS, Vogue TTS, Synchronicity High Gloss and Super Matte products.
- Openings with trimmable inserts are not available beaded.
- L-253 and L-686 – only edge profiles available in MDF pre-fit products.
- Finished front frames are not available with antiquing or wear sanding.
- Distressed front frames will receive a modified distressing package.

Inset Door and Drawer Front Information (continued)

- Custom front frames that are ordered with Colourtones and glazes will receive the same hand glazed finishes as doors. Cabinet Systems parts that are ordered with Colourtones and glazes will be finished with the special Colourtones that have been tinted to match the Colourtones and glaze combination. They will not receive a hand rubbed glaze.

Inset Option with Miter Designs Not Recommended

Only miter door designs with edge profile options are available with the inset option; however, miter designs are not recommended with the inset option. The following issues are associated with inset miter designs, and will not be considered defective:

- ♦ **Miter joint lines may not intersect door corner after pre-fit sanding.** This is not considered a defect as it is a necessary part of the pre-fit process to ensure the proper fit within the frame openings. This condition may not be pleasing to some customers.
- ♦ **Panel expansion caused by high humidity may cause miter doors to bind inside frame openings.** Although Conestoga's miter door joint construction is one of the most durable in the industry, high humidity will cause solid wood center panels to expand in width. This pressure can result in framing pushing outward and creating a "barrel" effect where the framing rubs against the front frame.
- ♦ If a miter design is selected, it is highly recommended that doors and drawer fronts be manufactured as 5-piece MDF, Hybrid products with MDF center panels or with plywood center panels. These materials will reduce the likelihood of product expansion and binding of inset doors within the front frame. While reducing the possibility of binding, expansion of solid wood framing can still occur and will not be considered defective.

1/8", 1/4" and 3/4" Plywood Program

- 1/8" thick sheet stock with Grade A face veneer applied over veneer core with sound back.
- 1/4" thick sheet stock with Grade A face and #1 back veneers applied over MDF core.
- 3/4" thick sheet stock with Grade A face veneer applied over veneer core with prefinished Natural Birch back, except where otherwise noted.
- 3/4" thick full sheets or cut-to-size panels over 96-1/16" up to 120" in length of Hard Maple/Hard Maple will have an MDF core.
- All 1/8", 1/4" and 3/4" sheet stock is available in full 4' x 8' sheets, with the exception of Hard Maple/Hard Maple which is also available in 4' x 10' sheets. All sheet stock including 4' x 10' material is also available as cut-to-size panels.
- Plywood finished in Colourtones may have pin marks and small scratches from drying racks, veneer checks, seam separation, glaze smudges, fingerprints, overspray and some dirt in topcoat. Such defects will be kept to a minimum, but are unavoidable when finishing large parts and will not be considered defective. 3/4" thick edges will not be finished unless edgeband has been applied.
- Lead-time 5 days cut-to-size, unfinished; 3 days for full sheets. Add 5-6 days for finishing.
- Additional sheet stock is available through Special Designs in common species, grades and thickness in single sheet minimums. Specify thickness, core type, specie (face and back), veneer grade (face and back) and veneer cut (face and back). Lead-times and pricing are subject to availability.
- Oversized packaging charge per item applies for large cut-to-size pieces or full 4' x 8' sheets of 1/8", 1/4" or 3/4" material. Oversize packaging parameters and conditions apply when the size exceeds 36" wide and 36" long, if any dimension exceeds 84", or when a customer requests oversize packaging.

1/8", 1/4" and 3/4" Plywood Program (continued)

Pricing Instructions

- Multiply actual square footage of panel by the appropriate specie Material Charge.
- Add the Design Charge per panel and applicable options.

Options

- When ordering cut-to-size plywood, specify width, height and grain direction.
- Edgeband charges (3/4" plywood only):
 - ♦ .5mm edgeband 1 to 4 edges
 - ♦ 2mm edgeband 1 to 4 edges: 2mm edgeband has a 2mm radius on the outside edges, similar to edge profile L-034.
 - ♦ For edgeband on specific edges of cut-to-size plywood, specify edges as follows: top, bottom, left, right or all edges.
- Grooving available (1/4" material only):
 - ♦ G-012, G-015 or G-056 groove profiles.
 - ♦ Spacing available in increments starting at 1/2" up to 4".
- When ordering primed or painted 3/4" cut-to-size MDF panels, exterior edges will not be profiled, sanded or prepped for finishing and panel edges will appear somewhat porous. To receive edges that are profiled and sanded prior to finishing, order as a Slab door design with the Machine Edge profile.
- Panel Grooving charges (per panel):
 - ♦ Up to 24" wide and 48" or under in length
 - ♦ Up to 24" wide and over 48" in length
 - ♦ Over 24" wide and 48" or under in length
 - ♦ Over 24" wide and over 48" in length
- Cut-to-size or full sheets of plywood also available finished; see Finishing Program Section for finish options and pricing.
- Colourtone finishes are available on Cherry, Hard Maple and Red Oak plywood only.

1/4" Short Grain Plywood Program

- 96" x 48" panel for island back or wall panel applications.
- Grain runs vertically in the 48" direction.
- 1/4" thick material with Grade A face veneers applied over MDF core with sound back.
- Available unfinished or finished; see Finishing Program Section for finish options and pricing.
- Lead-time 3 days unfinished, add 5-6 days for finishing.
- Oversize packaging fee applies.

1/4" x 96" x 48" Plywood Short Grain Panel

Part #	Specie	Material Charge	Design Charge
1600121A	Cherry		
1600122A	Maple, Hard		

Veneers

- All veneers are approximately 1/32" thick and have real wood veneer faces.
- One end and one side of any veneer sheet is guaranteed to be free from physical damage.
- Wood back veneers have a cross grain wood backer which allows trim edges to be finished to reduce "black line" effect.
- Poly back veneers are applied to a polymer resin impregnated membrane. They contain no added urea formaldehyde (NAUF), are rigid yet pliable and provide excellent moisture resistance.
- Wood back and Poly back veneers are available with their applicable backer with an optional pressure sensitive adhesive (PSA) backer. PSA backed veneers have a pre-glued adhesive layer protected by a peel coat covering that must be removed prior to application.
- Phenolic Back veneers will be used in place of Hard Maple 48-1/4" x 96-1/2" Wood back or Poly back when ordered with Colortones, Prism Prints or primers. Upcharge applies.
- Veneers are not guaranteed to perfectly match solid wood doors. Veneer is sliced from premium material; color and grain match will be more uniform than solid wood doors. Hickory veneers may contain mineral streaks and peck marks.
- Proper surface conditions and preparation is essential to successful application and performance of veneered surfaces.
- Per manufacturer's recommendations, veneers of all backer types should be placed flat and allowed to acclimate 48 hours before installation.
- Pressure sensitive veneers should not be applied to bare wood or surfaces covered with sanding sealers, high pressure laminates, melamine or other plastic materials.
- Wood back and Poly back veneers are best applied with roller grade adhesives. Sufficient adhesive coverage on both the veneer and substrate surface will ensure proper adhesion and performance.
- Conestoga is not liable for product failure due to improper surface preparation, adhesive selection or installation technique.
- Finishing Option available. Stained veneers may vary slightly in color from solid wood products of the same specie. Finishing adds 5-6 days to standard lead-time.
- Conestoga does not accept returns of veneers.

Wood Edgeband Program

Conestoga offers 7/8" wide x 500' rolls of .5mm wood edgeband to complete your panel processing requirements. Select species are also offered in 250' rolls. See charts below for specie availability.

- Real wood veneer applied to an unglued fleece backer.
- Edgeband is not guaranteed to perfectly match solid wood doors or sheet stock. Veneer edgeband is sliced from premium material; color and grain match will be more uniform than solid wood doors.
- Edgeband will contain multiple splice joints which will not be considered a defect.
- Conestoga is not liable for product failure due to improper surface preparation, adhesive selection or installation technique.
- All Conestoga finishing options are available as outlined in the Finishing Program Section of this manual.
- Lead-time 5 days unfinished for stock species, add 5-6 days for finishing. Expedite lead-times not available.
- Conestoga does not accept returns of finished edgeband.
- See the Finishing Program Section for finish pricing.

PVC Edgeband Program

Thermoplastic PVC Edgeband

- PVC edgeband rolls are 15/16" wide, 600' in length and .018" (.5mm) thick.
- Rolls of PVC edgeband are available in over 120 colors and grain patterns to match popular Conestoga finishes.
- The back side of the edgeband is coated with a bonding agent for superior adhesion when used with hot melt glues or solvent-based adhesives.
- PVC edgebands are impact resistant and perform well with cutting tools.
- The PVC edgebands listed provide a close match in appearance to the specie and finish referenced, however, due to color variations in wood substrates we cannot guarantee a perfect match. Some edgebands contain a slight texture and are identified with an asterisk in the chart. Edgeband finishes with two asteriks are 1mm thick and have a slight texture.
- Conestoga is not liable for product delamination or adhesion failure due to improper surface preparation, adhesive selection or installation technique.
- Full rolls only, partial rolls are not available through this program.
- Lead-time is 4 days, expedites not available.

Since Conestoga offers thousands of specie, finish and glaze combinations, customers may have a need for an edgeband not listed in our standard offering. In this case, Conestoga will attempt to work with our suppliers to see if an existing match can be identified. Since a sample chip of the specie/finish must be produced and shipped to the supplier, there will be a fixed charge for this exercise, regardless if a match is found or not.

For a complete list of our current PVC Edgeband offering, please refer to the PVC Edgeband guide on the Customer Business Portal or Con-Nex, our online ordering program.

our online ordering program**

3D Panels

3D Panels are a functional way to create built-in appearances, commonly used as refrigerator end panels, at the end of cabinet runs, a bridge above or beneath wall cabinets, and as island ends. All three panel models include inner supports to prevent panels bowing or cupping. 3D Panels up to 96" are made from 3/4" thick composite core plywood. Panels above 96" will be either composite core plywood or veneer core plywood. Species available are Cherry, Hard Maple, MDF, Rift Cut Red Oak, Rift Cut White Oak and Walnut. Rift Cut Red Oak is available up to 96" only.

Sizing

- Custom sizing is available to the nearest 1/16" in width, depth and height within program parameters.
- Minimum height for all models is 24", maximum standard height is 96" with vertical grain, maximum height for MDF is 96". Taller MDF heights available, but must be quoted through Special Designs. Additional lead-time required.

Pricing

- Calculate the actual square footage of the exposed/exterior side. Multiply the panel square footage by the appropriate specie list price. A 3 square foot minimum applies, regardless of actual size.
 - ♦ Cherry & Hard Maple
 - ♦ MDF
 - ♦ Rift Cut Red Oak
 - ♦ Rift Cut White Oak
 - ♦ Walnut
- Multiply the total material cost established in the prior step by the model multiplier:
 Box Panel – 2.2, J-Panel - 1.75, U-Panel - 2.0.

Pricing Example:

J-Panel, Hard Maple, 3" x 27" x 84".

Order Placement

- When placing order for any of the 3D Panel models, include the following dimensions:
 - ♦ Width of front panel (B side and/or D side).
 - ♦ Depth of exterior/exposed side panel (A side and/or C side).
 - ♦ Height of exterior/exposed side panel (A side and/or C side).
 - ♦ Vertical or horizontal grain direction.

Program Features

- Specify vertical or horizontal grain. (maximum size perimeters vary by grain direction).
- Finish options – available unfinished or finished in all published specie/finish selections except Distressing.
 - ♦ Finishing charges follow Conestoga's design plus material pricing method.
 - A minimum of 3 square feet will be applied, regardless of actual size.
 - 3.00 to 6.00 square feet – 2x Design Charge plus actual square footage charge of the exterior panel.
 - 6.01 square feet to 10.00 square feet – 3x Design Charge plus the actual square footage charge of the exterior panel.
 - 10.01 square feet and greater – 4x Design Charge plus the actual square footage charge of the exterior panel.
- Internal supports in 3-D Panel ends and backs are positioned 1" in from edges to fit over cleats mounted to the floor, wall and/or ceiling.
- Lead-time is 10 business days unfinished. Add 5 to 6 days for finishing.
- Expedites are not available.

3D Panels (continued)

Box Panel

- Primarily used as island ends when both the front and back edges are exposed.
- Both ends of the Box Panel will be equal in width and height (B and D sides).
- Both side panels of the Box Panel will be equal in depth and height (A and C sides).
- Width range of front and back panels: 1-1/2" to 3" (B and D sides). 1-1/2" width is sandwiched and edgebanded except MDF which is not edgebanded.
- Depth range of side panels: 12" to 47" (vertical grain). Horizontal grain depth range is 12" to 95" (A and C sides).
- Height range of side panels: 24" to 96" (vertical grain). Cherry, Hard Maple, Rift Cut White Oak and Walnut also available 96-1/16" to 120" – additional lead-time required. Horizontal grain height range 24" to 48".

J-Panel

- Typically mounted against wall as base and refrigerator cabinet ends. Unfinished back edge must butt against a wall.
- The interior leg of the J-Panel depth range is 4" to 8" (C side).
- Width range of front panels 1-1/2" to 3" (B side). 1-1/2" width is sandwiched and edgebanded except MDF which is not edgebanded.
- Depth range of side panel: 12" to 36" (A side).
- Height range of side panel: 24" to 96" (vertical grain). Cherry, Hard Maple, Rift Cut White Oak and Walnut also available 96-1/16" to 120" – additional lead-time required. Horizontal grain height range 24" to 48".

U-Panel

- Primarily used against wall, base and refrigerator ends as well as a bridge above or beneath wall cabinets to create a built in appearance. Unfinished back edges must butt against a wall.
- Both side panels of the U-Panel will be equal in depth and height (A and C sides).
- Width range of front panels 1-1/2" to 3" (B side). 1-1/2" width is sandwiched and edgebanded except MDF which is not edgebanded.
- Depth range of side panel: 12" to 47" (A and C sides).
- Height range of side panels: 24" to 96" (vertical grain). Cherry, Hard Maple, Rift Cut White Oak and Walnut also available 96-1/16" to 120" – additional lead-time required. Horizontal grain height range 24" to 48".

Blum Frameless Cabinetry Hinge Program

- Hinge and in-line mounting plate systems for standard, specialty and angled frameless cabinets.
- Soft close feature is integrated in the hinge cup itself unless otherwise noted.
- Soft close function can be easily deactivated with a switch on individual hinges as needed based on the door size and weight.
- Hinges packed in pairs with mounting plates and instructions.
- No screws required for hinge or mounting plate installation unless otherwise noted. Most hinges use cam style insert plugs.
- In-line mounting plates utilize 32mm system holes and are concealed behind the hinge arm when installed for a clean interior appearance.
- Hinge and mounting plate feature side to side, height and depth adjustment for fine tuning of door spacing.
- Hinges require Pattern B with Insert Holes concealed hinge boring unless otherwise noted.
- Blum hinges carry a limited lifetime warranty.
- Lead-time is 5 days.

CLIP top BLUMOTION 110° hinge
EXPANDO in-line mounting plate

Blum INSERTA 110° Hinges

- Hinge and in-line mounting plate system for standard frameless wall, base and tall cabinetry. Will not work in angle or specialty frameless cabinetry.
- 110° opening angle.
- Part number: 2103574A.

CLIP top 170° corner hinge
EXPANDO in-line mounting plate

Blum INSERTA 170° Corner Hinges

- Provides full access to corner cabinet interiors.
- 170° opening angle.
- Does not include soft close feature.
- INSERTA feature is not available on mounting plate. Kit includes installation screws.
- Part number: 2103575A.

Blum AVENTOS Door Lift System Hardware

- Blum's AVENTOS Door Lift Systems are available for hinge upward applications.
- AVENTOS HK models provide all the necessary hardware to install lift up door access for wall and tall cabinets. AVENTOS HK-XS models utilize conventional door hinges.
- Kits are designed to accommodate different door design types, weights and overlay options as well as for framed or frameless cabinet construction.
- All AVENTOS mechanisms have an integrated BLUMOTION soft close feature and include installation instructions and screws.

To determine which AVENTOS Lift System is suited for your particular application, two reference sources are available:

- A file containing our AVENTOS Lift System Calculator is provided on Conestoga's Customer Business Portal under the Marketing Resources tab. Use this tool to calculate the weight of your door and select the appropriate lift kit for your application.
- Using the charts which correspond to the different AVENTOS models below, determine the weight of the door then calculate the Blum Power Factor required to adequately lift the door as follows:

Door Weight + (Handle/Pull Weight X 2) = Subtotal X Door Height = Power Factor
Specie and Door Weight reference chart applies to both HK-XS and HK lift systems

Specie & Door Design Weight (approx. weight of 1 sq. ft. 3/4" thick door)				
Specie (all grades)	Slab Design	TW-series Design	CRP-series Design	Frame Only*
Alder	1.6 lb.	1.2 lb.	1.5 lb.	1.0 lb.
Birch (Red, White)	2.8 lb.	2.1 lb.	2.6 lb.	1.7 lb.

Blum AVENTOS Door Lift System Hardware (continued)

Blum AVENTOS HK-XS

- XS-Series utilize conventional hinges (not included).
- Units are symmetrical and can be installed on one or both sides.
- Cabinet heights from 9-1/2" to 24" and cabinet widths up to 72".
- Minimum interior depth required is 5".
- Four AVENTOS kits provide all the necessary hardware designed for different weight doors for both framed and frameless cabinet construction.

AVENTOS HK-XS Reference Chart

Power Factor (1 Lift)	Power Factor (2 Lifts)	Door Weight	Part No.
Framed Cabinet Construction			
17 – 84	34 – 124	Light	2103578A
113 – 180	225 – 336	Heavy	2103580A

Stanisci Design Range Hoods

Stanisci Design is the leading manufacturer of wood range hoods for the custom kitchen industry. This program allows for convenient ordering of custom range hoods and ventilation units. Conestoga's published offering includes several popular hood designs with panel raise and bead options. Both plywood and raised panel hoods are available in a wide variety of heights and widths.

Program Details

- Range hoods are available unfinished or finished; see Finishing Program Section for finish options and pricing.
- Most prefinished hoods will ship from Conestoga's Kenly, N.C. facility.
- Custom species include Hickory and Rustic Knotty Alder. Contact Special Designs for other specie availability.
- Custom sizes and designs are available. Contact Special Designs for a quote.

Examples of custom designs:

Hood shown with
single panel valance

Hood shown with
integrated corbels

Hood shown with stainless
steel base

Hood shown with
metal banding

- Liners are not included with hood unless otherwise noted. Stainless steel ventilation units and liners are available from Stanisci Design with discounted Conestoga program pricing. Contact Stanisci Design at (248) 572-6880.
- Recommended ventilator: Stainless steel units from 300 to 1200 CFM are available through Stanisci Design (248) 572-6880.
- Stanisci hoods are available in catalog format, compatible with 2Configure and 20/20 Design software. Contact your Sales Representative for information.

PLEASE NOTE: All Stanisci Range Hoods should be mounted no closer than 30" above cook tops, although some cook tops require additional clearance. Please check local building codes and appliance specifications.

Removable Options

Removable Applied Panel

- Available on I-Series hood design only.
- Allows for easy installation and access for Building Inspectors.
- Panel features applied moulding for finished look after installation.
- Specify "Removable Panel Option", Upcharge applies.

**Please refer to pricing through Con-Nex,
our online ordering program**

Stanisci Design Range Hoods (continued)

Removable Front

- Available on P and Z200 Series hoods at no additional charge.
- With this option, the entire front fascia lifts straight up for easy removal. When installed, the hood face is secured in place with concealed clips.
- If this option is selected, the depth of the P and Z200 box will be modified to 16" deep. Overall hood depth will remain the same as standard depth.
- No additional lead-time required.
- When ordering, specify the hood design then "Removable Option".

Face

Box

Removable Top

- Available on the BHW, CHW, CHWB, E, FX2HW, FX2PL, G, GRA, T and TRA Series hoods at no additional charge.
- This option allows the base of the hood to be installed separately, followed by the ventilation. After ventilation hookup has been completed, the top portion of the hood can be lowered into place and secured to the base.
- No additional lead-time required.
- When ordering, specify the hood design then "Removable Option".

Stanisci Design Range Hoods (continued)

Optional Moulding Packages

- Several hoods are available with a choice of Classic, Simple or Basic moulding packages. See illustrations below for examples of differences between the three moulding profiles.
- Classic package is a more traditional style moulding. Simple and Basic packages are made for contemporary/transitional kitchens.
- Moulding packages have no effect on pricing, lead-time or overall dimensions.
- Moulding packages available on all Stanisci hoods except B, BX, BXB, CHW, CHWB, E3, FX, FXBPUP, FX2HW, M, VCHM-AV, VCHM-SV and VCHM-VRS hoods.
- Moulding packages below are available for E, FX2PL, G, GRA, H2, I, S, SRA, T and TRA hoods (P and Z200 available in Basic package only).
- When ordering a range hood specify the desired moulding package.

Classic Package

Simple Package

Basic Package

Antiquing, Distressing and Wear Sanding

To allow our customers to purchase prefinished Stanisci range hoods with the same overall appearance of their doors, Conestoga offers a modified version of our Antiquing, Distressing and Wear Sanding Options on the solid wood portions of Stanisci hoods.

- These treatment options available with Stanisci-brand range hoods only.
- Not available on Paint Grade Hard Maple Hybrid specie hoods.
- Availability of these options varies by hood design.
- Wear Sanding Design Charge
- Antiquing Design Charges and square foot Material Charges are equal to published finishing fees.
- Distressing Design Charges and square foot Material Charges are equal to published finishing fees.

Decorative Elements and Accents

Conestoga has partnered with some of the leading industry providers of decorative woodcarvings to bring you this inclusive collection. Conestoga's accessory offering includes a wide variety of corbels, legs, columns, corner posts, and other decorative elements. Items ordered from this collection will be consolidated with the rest of your Conestoga products and ship as a complete order. Because of transportation time required from some suppliers, additional lead-time may be necessary.

- Specie availability varies by product and is indicated by the specie part number listed with each product drawing. Pricing for all items can be found on the Customer Business Portal.
- Because of the various manufacturing and sanding techniques used to produce these decorative products, slight variations in finished appearance may occur. These variations will not be considered defective.
- Due to the size and complexity of design, many of these products utilize edge glued lumber. This may result in grain pattern, wood color and finish variations.
- In addition to the wood carvings and turnings shown on the following pages, Conestoga has established a comprehensive program with Art For Everyday. Known for their exquisite carving capabilities, Art for Everyday is a leader in carved components and provides Conestoga access to thousands of carved items. Complete images and price lists can be found on the Customer Business Portal, under the Marketing Resources tab. All Art For Everyday products can receive any of Conestoga's standard finishes.

Finishing

Conestoga offers finishing on all decorative elements and accents. This allows you to simplify your shop process and purchase accessories along with your finished door order. See the Finishing Program Section for available stain, Colourtone, primer, Prism Paint and glaze combinations.

Decorative Turning Program

Conestoga's turning offering features a large collection of columns, table legs, island posts and feet. The offering consists of standard products shown on the following pages, as well as the capability to produce a variety of custom turnings. These items may include stair and furniture parts, tall columns and non-standard species.

Standard Offering

- Conestoga's standard offering of table legs, island posts and feet is typically available in the industry's most popular species. Depending on the item, Paint Grade will be an unselected closed-grain hardwood.
- The majority of table legs and island posts are available in three options - whole, split and 3/4. This allows for consistency within the design of the kitchen or bath while also providing flexibility in the manner in which the legs are used.
- Whole and 3/4 items can be ordered individually, while splits must be ordered in pairs.
- Lead-times for table legs, island posts and feet are 7-10 days. Some items can be expedited; refer to footnotes at the bottom of each page for expedite availability.
- Parts must be ordered by part number according to specie and whole, split or 3/4.

Receptacle Notching

- Receptacle notching is a custom millwork option developed to allow electrical service installations on island post applications.
- Receptacle notching is available on select table legs/posts only and is not available on feet, corbels, appliqués or other ornaments.
- Available only with whole legs – splits and 3/4 options are not available.
- Receptacle box and wiring is not included. Check your building codes for proper box and wiring codes.
- Holes for the wiring will be drilled in only one of the four locations – left, right, top or back. You must specify the hole location for wiring. We do not drill through the entire length of the table leg/post.
- If choosing 3-1/2" wide table legs, please be aware that some outlet covers may extend beyond the column width. This is due to +/- tolerances of both the table leg and the outlet cover.
- The dimensions of the rout are 2.375" wide, 2.875" deep and 4.125" high.
- For a beginning point of reference for machining the notch, you must indicate the height from the top of the leg to the start of the rout (see drawing on following page).
- Receptacle covers are available through Conestoga's Wood Outlet Cover program, or through many home centers.
- Customization of receptacle notch not available.
- Lead-time of 5 additional days is required for this option.

12

Legs, Corbels & Accents

Duplex receptacle solid wood outlet plate

- See page 12.16 for a listing of available species. Overall dimensions are 3-1/2" wide by 5-3/4" high.

Vent Covers

- All vent covers crafted from solid hardwoods and made in the USA.
- Vent covers are made to fit seamlessly with your hardwood floors, against the toe kicks of your kitchen cabinets, against baseboards and walls.
- Toe Kick Vent Cover is pre-drilled to accept two mounting screws.
- Fixed slats diffuse air in two directions (non-adjustable).
- Custom sizes and designs are available. Contact Special Designs for a quote.
- Vent covers are available unfinished or finished; reference the Finishing Program Section for finish options and pricing.
- Lead-time 10 days unfinished, add 5 days for finishing.

Metal Feet

Triframe Foot

- Made from steel, laser cut, then hand welded.
- Choice of Gunmetal Grey and Flat Black powder coated finishes.
- Available in 6" and 9" heights.
- Usable outdoors as well as indoors.
- Works well with free-standing cabinets. 9" feet make free standing cabinets ADA compliant.
- Sold as individual pieces – for a pair, must order two feet.

Triframe Foot Part Number*		
Finish	6" Foot	9" Foot
Gunmetal Grey	2655973A	2655978A
Flat Black	2655976A	2655981A

*Part number reflects each.

Metal Shelf Supports

Shelf Supports

- Provide attractive alternatives to the traditional floating shelf.
- The Shelf Strap and Elliptical Bracket are available in 8" and 12" depths.
- Finish options include Gold, Gunmetal Grey, Stainless Steel and Flat Black powder coated finishes. Installation screws in matching finish are included.
- It is imperative that the shelf supports are secured into wall studs with installation screws. Conestoga will not be responsible for shelf failure due to inadequate installation techniques or materials.
- Wood shelves not included. Wood shelves can be ordered as 3/4" or 1" thick slabs in any specie. Note: 60" max. length for two shelf straps.
- For an aged or rustic look on wood shelving, add distressing and wear sanding or utilize the weathered grain option.
- Sold as individual pieces – for a pair, must order two supports.
